The Committee on Health Care (Miller) recommended the following amendment:

Senate Amendment

On page 45, lines 7 through 9, delete those lines and insert: subsection (12). No multiplier of attorneys fees in personal injury protection benefits litigation is appropriate unless counsel undertook representation of the case on a contingency "no attorney fee unless there is a recovery" basis and the attorney could not mitigate non-payment of attorneys fees, and it is an exceptional case in which the plaintiff could not have obtained competent counsel for the case but for the opportunity for a fee multiplier.
