---

1 The Committee on Communications and Public Utilities (Bennett)  
2 recommended the following **amendment**:

3  
4 **Senate Amendment**

5 Delete line(s) 1997-2007  
6 and insert:

7 (11) The commission shall establish a renewable energy  
8 portfolio standard "RPS" that requires electric utilities to  
9 generate or purchase a specified percentage of their total system  
10 wide electrical power or renewable energy credits from renewable  
11 energy resources located within the state. Not less than 3  
12 percent of the RPS must be solar and located within the state.  
13 Notwithstanding s. 366.91(3) and (4), the Commission is  
14 authorized to approve projects and power sales agreements with  
15 renewable power producers, and the sale of renewable energy  
16 credits which are needed to comply with the RPS. In the event of  
17 any conflict, this section shall supersede s. 366.91(3) and (4).

218914

18 Municipal and cooperative utilities that are exempt from the  
19 Florida Energy Efficiency and Conservation Act shall submit an  
20 annual report to the commission identifying the respective  
21 percentage of their electrical power that is generated or  
22 purchased from such renewable energy resources. The commission  
23 shall adopt rules to administer and enforce this subsection.
