5 and insert:

6 (e) "Toxic substance" means a substance that contains lead,
7 or a coating on an item that contains lead, so that the lead
8 content is more than 0.06 percent of the total weight. The term
9 does not include glass or crystal decorative components,
10 electrical components, or any component that is not accessible
11 through normal and reasonably foreseeable use and abuse of a toy
12 or article of child care. For purposes of this section, a
13 component is "not accessible" if it cannot be touched with an
14 articulated probe meant to simulate a child's finger both before
15 and after use and abuse testing, such as drop, torque, tension,
16 compression, and other applicable testing performed in a manner
17 described in 16 C.F.R. part 1500.
