The Committee on Governmental Oversight and Accountability
(King) recommended the following:

Senate Amendment

Delete lines 46 - 60
and insert:

necessity that proprietary confidential business information
obtained from a communications company or broadband company by
the Department of Management Services, or any person or agency
authorized by the department, be held confidential and exempt
from public-records requirements. Disclosure of proprietary
confidential business information would adversely affect the

968504

12 business interests of communications and broadband companies
13 providing such information by harming them in the marketplace
14 and compromising the security of the communications network.
15 Further, disclosure of such proprietary confidential business
16 information would impair competition in the communications
17 industry. Competitors can use such information to impede full
18 and fair competition in the communications marketplace to the
19 disadvantage of the consumers of communications services. Thus,
20 it is the finding of the Legislature that proprietary
21 confidential business information obtained
