Senator Constantine moved the following:

Senate Amendment

Delete lines 3395 - 3414
and insert:

(d)1. Systems being evaluated that were installed prior to January 1, 1983, shall meet a minimum 6-inch separation from the bottom of the drainfield to the wettest season water table elevation as defined by department rule. All drainfield repairs, replacements or modifications to systems installed prior to January 1, 1983, shall meet a minimum 12-inch separation from the bottom of the drainfield to the wettest season water table elevation as defined by department rule.

2. Systems being evaluated that were installed on or after

664614

14 January 1, 1983, shall meet a minimum 12-inch separation from
15 the bottom of the drainfield to the wettest season water table
16 elevation as defined by department rule. All drainfield repairs,
17 replacements or modification to systems developed on or after
18 January 1, 1983, shall meet a minimum 24-inch separation from
19 the bottom of the drainfield to the wettest season water table
20 elevation.

21 (e) If documentation of a tank pump-out or a permitted new
22 installation, repair, or modification of the system within the
23 previous 5 years is provided, and states the capacity of the
24 tank and indicates that the condition of the tank is not a
25 sanitary or public health nuisance pursuant to department rule,
26 a pump-out of the system is not required.
