Senator Dean moved the following:

Senate Amendment

Delete lines 406 - 418

and insert:

discharge properly. A system is not in failure if it does not
have a minimum separation distance between the bottom of the
drainfield and the wettest season water table, or if an
obstruction in a sanitary line or an effluent screen or filter
prevents effluent from flowing into a drainfield. If a system
failure is identified and several permittable remedial options
are available to cure the failure, the homeowner may select the
least costly permittable remedial measure. There may be
instances in which a pump out is sufficient to resolve a system

667414

14 failure. Remedial measures to resolve a system failure must be
15 limited to what is necessary to resolve the failure, but must
16 otherwise meet, to the maximum extent practicable, the
17 requirements of the repair code in effect at the time of the
18 repair, provided the exceptions contained in s. 381.0065(4)(g)
19 relating to soil condition, water table elevation, distance, and
20 other setback requirements apply. For purposes of this section,
21 an engineer-designed performance system to reduce nutrients may
22 not be required as an alternative remediation measure to resolve
23 the failure of a conventional system.
