HB 1103

2012 A bill to be entitled 1 2 An act relating to the ordinary high-water mark for 3 navigable, nontidal waterbodies; creating s. 253.024, 4 F.S.; providing definitions; providing criteria for 5 determining the location of the ordinary high-water 6 mark for navigable, nontidal waterbodies; providing 7 construction; providing an effective date. 8 9 Be It Enacted by the Legislature of the State of Florida: 10 Section 1. Section 253.024, Florida Statutes, is created 11 12 to read: 253.024 Determining location of ordinary high-water mark 13 14 for navigable, nontidal waterbodies.-15 (1) As used in this section, the term: 16 (a) "Ordinary agricultural crop" means any terrestrial plant or vegetation from a farm, nursery, grove, orchard, 17 18 vineyard, or garden, but does not include cypress trees. 19 "Freshet" means a flood or overflowing of a river by (b) 20 means of rain, melted snow, or an inundation of water. 21 "Ordinary high-water mark" means the highest reach of (C) 22 a navigable, nontidal waterbody as it usually exists when in its 23 ordinary condition and is not the highest reach of such 24 waterbody during the high water season or in times of freshets. The term also includes the terms "ordinary high-water line" and 25 26 "line of ordinary high water". (2) 27 When determining the location of the ordinary high-28 water mark for navigable, nontidal waterbodies, this subsection

HB 1103

2012

29	shall be considered in its entirety and each of the following
30	provisions shall apply:
31	(a) The ordinary high-water mark is an ambulatory
32	boundary, shifting in response to long-term changes, and is to
33	be determined by examining the bed and banks to ascertain where
34	the presence and action of the water are so common and usual,
35	and so long continued in all ordinary years, as to mark upon the
36	soil of the bed a character distinct from that of the banks, in
37	respect to vegetation and the nature of the soil itself.
38	(b) The ordinary high-water mark is coordinate with the
39	limit of the bed the water occupies sufficiently long and
40	continuously to wrest it from vegetation and destroy its value
41	for agricultural purposes. The bed does not take in swamp or
42	overflowed lands, and the ordinary high-water mark is to be
43	found between such lands and the area occupied by the water for
44	the greater portion of each average year. At this level a
45	definite escarpment in the soil is generally traceable, at the
46	top of which is the position for the boundary. Escarpments
47	resulting from the action of a storm, a flood, or rises in water
48	levels of a waterbody during the annual high water season do not
49	signify the ordinary high-water mark.
50	(c) In some places where the banks are low and flat and
51	the water does not impress on the soil any well-defined line of
52	demarcation between the bed and the banks, the effect of the
53	water upon vegetation must be the principal test in determining
54	the location of the ordinary high-water mark. In such an
55	instance, the ordinary high-water mark is the point up to which
56	the presence and action of the water is so continuous as to

HB 1103

2012

57	destroy the value of the land for agricultural purposes by
58	preventing the growth of vegetation constituting what may be
59	termed an ordinary agricultural crop.
60	(d) Marks upon the ground or upon local objects that are
61	more or less permanent may be considered, in connection with
62	competent testimony and other evidence, in determining the
63	ordinary high-water mark.
64	(3) This section does not alter the public's right to use
65	navigable waters and sovereignty submerged lands for common law
66	public trust purposes up to the ordinary high-water mark as
67	defined in this section, nor does this section affect the
68	ownership by the public of sovereignty submerged lands lying
69	below that mark.
70	Section 2. This act shall take effect July 1, 2012.
