

The Florida Senate
BILL ANALYSIS AND FISCAL IMPACT STATEMENT

(This document is based on the provisions contained in the legislation as of the latest date listed below.)

Prepared By: The Professional Staff of the Committee on Rules

BILL: CS/SB 1412

INTRODUCER: Rules Committee and Senator Richter

SUBJECT: Expert Testimony

DATE: April 24, 2013

REVISED: _____

	ANALYST	STAFF DIRECTOR	REFERENCE	ACTION
1.	Munroe	Cibula	JU	Favorable
2.	Munroe	Phelps	RC	Fav/CS
3.	_____	_____	_____	_____
4.	_____	_____	_____	_____
5.	_____	_____	_____	_____
6.	_____	_____	_____	_____

Please see Section VIII. for Additional Information:

- A. COMMITTEE SUBSTITUTE..... Statement of Substantial Changes
B. AMENDMENTS..... Technical amendments were recommended
 Amendments were recommended
 Significant amendments were recommended

I. Summary:

CS/SB 1412 amends the standards for the admission of expert testimony in Florida courts to create a new hybrid standard sharing elements of both the *Frye*¹ and *Daubert*² standard.

The bill provides legislative findings stating that the:

“admissibility of expert testimony should be subject to a standard that generally applies the requirement of *Daubert v. Merrell Dow Pharmaceuticals, Inc.*, 509 U.S. 579 (1993), and Federal Rule of Evidence 702, while recognizing that once knowledge is based upon principles and methods that are generally accepted within an expert community, a court need not continually reexamine the basis for such knowledge, but must ensure that the generally accepted principles and methods are relevant to the facts of the case before the court, . . .

WHEREAS, the Legislature finds that all proposed expert testimony should be subject to the new standards of s. 90.702, [F.S.], as revised in this act,

¹ *Frye v. United States*, 293 F. 1013 (D.C. Cir. 1923).

² *Daubert v. Merrell Dow Pharmaceuticals, Inc.*, 509 U.S. 579 (1993).

and as such, *Marsh v. Valyou*, 977 So. 2d 543 (Fla. 2007) and its holding as to pure opinion testimony, is overruled . . .”

The bill amends s. 90.702, F.S., to prohibit an expert witness from testifying in the form of an opinion or otherwise, including pure opinion testimony, unless the testimony satisfies the following additional criteria:

- The testimony is based on sufficient facts or data;
- The testimony is the product of reliable principles and methods; and
- The witness has applied the principles and methods reliably to the facts of the case.

A witness may testify as an expert witness if the principles and methods on which such testimony is based are sufficiently established as generally accepted by the relevant expert community and are relevant to the facts of the particular case.

The requirements apply in any case in which the expert opinion testimony is based on scientific, technical, or other specialized knowledge. All proposed expert testimony, including pure opinion, is subject to the limitations of ss. 90.702 and 90.704, F.S.

The bill amends s. 90.704, F.S., to prohibit the disclosure of inadmissible facts or data to a jury by the proponent of an expert opinion or by inference unless the court determines that their probative value in assisting the jury’s evaluation of the expert’s opinion is substantially outweighed by their prejudicial effect. As a result of the amendments, the effect of s. 90.704, F.S., is conformed to the effect of Federal Rule of Evidence 703.

Currently, Florida courts employ the standard articulated in *Frye v. United States*, 293 F. 1013 (D.C. Cir. 1923), which requires the party who wants to introduce the expert opinion testimony into evidence to show that the methodology or principle has sufficient reliability.

This bill amends sections 90.702 and 90.704, Florida Statutes.

II. Present Situation:

Admission of Expert Testimony (*Daubert* or *Frye* Standard)

Expert testimony has been used to assist the trier of fact in both civil and criminal trials for a wide range of subjects, including polygraph examination, battered woman syndrome, child abuse cases, and serum blood alcohol. The Florida Rules of Civil Procedure define an “expert witness” as a person duly and regularly engaged in the practice of a profession who holds a professional degree from a university or college and has had special professional training and experience, or one possessed of special knowledge or skill about the subject upon which called to testify.³ Courts use expert witness testimony when scientific, technical, or other specialized knowledge may assist the trier of fact in understanding evidence or determining facts in issue during litigation. The Florida Evidence Code provides that the facts or data upon which an expert bases an opinion or inference may be those perceived by, or made known to, the expert at or before

³ Fla. R. Civ. P. 1.390(a).

trial. If the facts or data are of a type reasonably relied upon by experts in the subject to support the opinion expressed, the facts or data need not be admissible in evidence.⁴ The Florida Supreme Court has considered the issue of whether experts can testify on direct examination that they relied on the hearsay opinions of other experts in forming their opinions.⁵ The Court held that an expert is not permitted to testify on direct examination that the expert relied on consultations with colleagues or other experts in reaching his or her opinion because it impermissibly permits the testifying experts to bolster their opinions and creates the danger that the testifying experts will serve as conduits for the opinions of others who are not subject to cross-examination.⁶ The Court emphasized that its holding did not preclude experts from relying on facts or data that are not independently admissible if the facts or data are a type reasonably relied upon by experts in the subject.⁷

***Frye* Standard**

To admit scientific testimony into evidence, Florida courts currently use the standard governing the admissibility of scientific expert testimony imposed in *Frye v. United States*, 293 F. 1013 (D.C. Cir. 1923).⁸ If the subject matter involves new or novel scientific evidence, the *Frye* standard requires the party who wants to introduce the expert opinion into evidence to show that the methodology or principle has sufficient reliability. In *Frye*, the court held that the “principle or discovery” must be sufficiently established to “have gained general acceptance in the particular field in which it belongs.”⁹

The Florida Supreme Court imposes four steps in its articulation of the *Frye* test:

1. The trial judge must determine whether such expert testimony will assist the jury in understanding the evidence or in determining a fact in issue.
2. The trial judge must decide whether the expert’s testimony is based on a scientific principle or discovery that is “sufficiently established to have gained general acceptance in the particular field in which it belongs.”
3. The trial judge must determine whether a particular witness is qualified as an expert to present opinion testimony on the subject in issue.
4. The judge may then allow the expert to render an opinion on the subject of his or her expertise, and it is then up to the jury to determine the credibility of the expert’s opinion, which it may either accept or reject.¹⁰

The Florida Supreme Court noted that, under *Frye*, the court’s inquiry focuses only on the general acceptance of the scientific principles and methodologies upon which an expert relies to give his or her opinion.¹¹ The *Frye* test is satisfied through the court’s finding of proof of general

⁴ Section 90.704, F.S.

⁵ *Linn v. Fossum*, 946 So. 2d 1032 (Fla. 2006).

⁹ *Frye v. United States*, 293 F. 1013, 1014 (D.C. Cir. 1923).

¹⁰ *Ramirez v. State*, 651 So. 2d 1164, 1166-67 (Fla. 1995).

¹¹ *Marsh v. Valyou*, 977 So. 2d 543, 549 (Fla. 2007).

acceptance of the basis of an expert's opinion.¹² Once the basis or foundation is established for an expert's opinion, the finder of fact may then assess and weigh the opinion for its value.¹³

The *Frye* test is not applicable to all expert opinion proffered for admissibility into evidence. If the expert opinion is based solely on the expert's experience and training, and the opinion does not rely on something that constitutes new or novel scientific tests or procedures, then it may be admissible without meeting the *Frye* standard.¹⁴ By example, Florida courts admit medical expert testimony concerning medical causation when based solely on the expert's training and experience.¹⁵ One court in determining the admissibility of medical expert testimony noted that *Frye* was not applicable to medical testimony (pure opinion) because the expert relied on his analysis of medical records and differential diagnosis rather than a study, test, procedure, or methodology that constituted new or novel scientific evidence.¹⁶

Florida Rules of Evidence

The Florida Evidence Code is codified in ch. 90, F.S. Section 90.102, specifies that the chapter replaces and supersedes existing statutory or common law in conflict with its provisions. As previously noted, the Florida Supreme Court regularly adopts amendments to the Evidence Code as rules of court when it is determined that the matter is procedural rather than substantive. The Florida Evidence Code requires an expert to demonstrate knowledge, skill, experience, training, or education in the subject matter to qualify as an expert.¹⁷ In a concurring opinion, one justice has argued that the Florida Supreme Court has "never explained how *Frye* has survived the adoption of the rules of evidence."¹⁸ Justice Anstead also noted that the Florida Supreme Court has continued to apply *Frye* in determining the admissibility of scientific expert opinion testimony after the adoption of the Florida Rules of Evidence, but has done so without any mention that the rules do not mention *Frye* or the test set out in *Frye*.¹⁹

Daubert Standard

The *Frye* standard was used in federal courts until 1993 when the U.S. Supreme Court issued its opinion in the case of *Daubert v. Merrell Dow Pharmaceuticals, Inc.*²⁰ The U.S. Supreme Court held that Federal Rule of Evidence 702 had superseded the *Frye* test, and it announced a new standard for determining the admissibility of novel scientific evidence.²¹ Under the *Daubert* test, when there is a proffer of expert testimony, the judge as a gatekeeper must make "a preliminary assessment of whether the reasoning or methodology underlying the testimony is scientifically valid and of whether that reasoning or methodology properly can be applied to the facts in

issue.”²² The Court announced other factors that a court may consider as part of its assessment under the *Daubert* test for the admissibility of expert scientific testimony:

- Whether the scientific methodology is susceptible to testing or has been tested;
- Whether the theory or technique has been subjected to peer review and publication;
- Whether in the case of a particular scientific technique, the court ordinarily should consider the known or potential rate of error; and
- The existence and maintenance of standards controlling the technique’s operation.²³

Federal Rule of Evidence 702 was amended in 2000 to reflect *Daubert* and other decisions applying *Daubert*.²⁴ In *General Electric Co. v. Joiner*, the U.S. Supreme Court held that abuse of discretion is the appropriate standard of review for an appellate court to apply when reviewing a trial court’s decision to admit or exclude evidence under *Daubert*.²⁵ In *Kumho Tire Co. v. Carmichael*, the Court held that a trial judge is not bound by the specific factors outlined in *Daubert*, but depending on the circumstances of the particular case at issue, the judge may consider other factors in his or her assessment under *Daubert*.²⁶ Additionally, the Court in *Kumho Tire Co.* held that the trial judge’s obligation to be a gatekeeper is not limited to scientific testimony but extends to all expert testimony.²⁷

The *Weisgram v. Marley Co.* case, a part of the *Daubert* progeny, was a wrongful death action against a manufacturer of heaters in which the plaintiff introduced expert testimony that the alleged heater defect caused a house fire.²⁸ The Court held that a federal appellate court may direct the entry of judgment as a matter of law when the court determines that evidence was erroneously admitted at trial and the remaining evidence that was properly admitted is insufficient to support the jury verdict.²⁹ The plaintiffs obtained a jury verdict based on the expert testimony that the heater was defective and that the heater’s defect caused the fire.³⁰ The U.S. Supreme Court affirmed the Court of Appeals’ reversal of the jury verdict, finding that the expert testimony offered by the plaintiff was speculation under Federal Rule of Evidence 702 as explicated in *Daubert* regarding the defectiveness of the heater.³¹ The Court found the plaintiff’s fears unconvincing that “allowing [federal] courts of appeals to direct the entry of judgment for defendants will punish plaintiffs who could have shored up their cases by other means had they known their expert testimony would be found inadmissible.”³² The Court stated that *Daubert* put parties on notice regarding the exacting standards of reliability demanded of expert testimony.³³

III. Effect of Proposed Changes:

The bill amends the standards for the admission of expert testimony in Florida courts to create a new hybrid standard sharing elements of both the *Frye* and *Daubert* standard.

The bill provides legislative findings stating that the

“admissibility of expert testimony should be subject to a standard that generally applies the requirement of *Daubert v. Merrell Dow Pharmaceuticals, Inc.*, 509 U.S. 579 (1993), and Federal Rule of Evidence 702, while recognizing that once knowledge is based upon principles and methods that are generally accepted within an expert community, a court need not continually reexamine the basis for such knowledge, but must ensure that the generally accepted principles and methods are relevant to the facts of the case before the court, . . .

WHEREAS, the Legislature finds that all proposed expert testimony should be subject to the new standards of s. 90.702, [F.S.], as revised in this act, and as such, *Marsh v. Valyou*, 977 So. 2d 543 (Fla. 2007) and its holding as to pure opinion testimony, is overruled . . .”

The bill amends s. 90.702, F.S., to prohibit an expert witness from testifying in the form of an opinion or otherwise, including pure opinion testimony, unless the testimony satisfies the following additional criteria:

- The testimony is based on sufficient facts or data;
- The testimony is the product of reliable principles and methods; and
- The witness has applied the principles and methods reliably to the facts of the case.

A witness may testify as an expert witness if the principles and methods on which such testimony is based are sufficiently established as generally accepted by the relevant expert community and are relevant to the facts of the particular case.

The requirements apply in any case in which the expert opinion testimony is based on scientific, technical, or other specialized knowledge. All proposed expert testimony, including pure opinion, is subject to the limitations of ss. 90.702 and 90.704, F.S.

The bill amends s. 90.704, F.S., to prohibit the disclosure of inadmissible facts or data to a jury by the proponent of an expert opinion or by inference unless the court determines that their probative value in assisting the jury’s evaluation of the expert’s opinion is substantially outweighed by their prejudicial effect. As a result of the amendments, the effect of s. 90.704, F.S., is conformed to the effect of Federal Rule of Evidence 703.

Currently, Florida courts employ the standard articulated in *Frye v. United States*, 293 F. 1013 (D.C. Cir. 1923), which requires the party who wants to introduce the expert opinion testimony into evidence to show that the methodology or principle has sufficient reliability.

The bill takes effect July 1, 2013.

IV. Constitutional Issues:

A. Municipality/County Mandates Restrictions:

None.

B. Public Records/Open Meetings Issues:

None.

C. Trust Funds Restrictions:

None.

D. Other Constitutional Issues:

There is a balance between enactments of the Legislature and the Florida Supreme Court on matters relating to evidence. The Legislature has enacted and continues to revise ch. 90, F.S., and the Florida Supreme Court tends to adopt these changes as rules. The Florida Supreme Court regularly adopts amendments to the Evidence Code as rules of court when it is determined that the matter is procedural rather than substantive. If the Florida Supreme Court views the changes in this bill as an infringement upon the Court's authority over practice and procedure, it may refuse to adopt the changes in the bill as a rule.

V. Fiscal Impact Statement:

A. Tax/Fee Issues:

None.

B. Private Sector Impact:

Generally, in civil litigation such as negligence actions, the plaintiff has the burden of proof on issues essential to his or her cause of action.³⁴ The change in the new evidentiary standard may have a fiscal impact on the outcome of lawsuits or the number of such lawsuits.

It is difficult to quantify the fiscal impact of the bill's change in evidentiary standards for the admission of expert opinions. It may or may not result in a need for additional pre-trial hearings depending on the manner in which it is actually implemented by the courts.

³⁴ *Gooding v. Univ. Hosp. Bldg., Inc.*, 445 So. 2d 1015, 1018 (Fla. 1984). "On the issue of the fact of causation, as on other issues essential to his cause of action for negligence, the plaintiff, in general, has the burden of proof." (quoting *Prosser, Law of Torts* § 41 (4th ed. 1971)). *Id.*

C. Government Sector Impact:

Last year, under similar legislation, SB 378 (2012), the fiscal impact of the bill was estimated to have a recurring fiscal impact of between \$1-\$1.25 million due to “expert expenses and the utilization of assistant state attorneys’ time in the more complicated cases.”³⁵

The committee substitute adds *Frye* criteria to the proposed *Daubert* criteria language. As with the original bill’s language, the change in the standard to admit expert opinions in Florida courts may have an impact on the number of pre-trial hearings needed, but it is difficult to estimate due to the unavailability of data needed to quantify any increase or decrease in judicial workload.

According to the Florida Prosecuting Attorneys Association (FPAA), CS/SB 378 (2012) allows “established science” to meet a *Frye* standard, while new and emerging scientific testimony is subject to the *Daubert* standard. As a result, the FPAA estimates that the “hybrid” standard would reduce the fiscal impact in half to \$500,000-\$625,000.

In criminal proceedings, the state may incur additional costs in litigating the application and interpretation of the new standards supplied in this bill.

VI. Technical Deficiencies:

None.

VII. Related Issues:

None.

VIII. Additional Information:

A. Committee Substitute – Statement of Substantial Changes:

(Summarizing differences between the Committee Substitute and the prior version of the bill.)

CS by Rules on April 22, 2013:

The committee substitute no longer requires courts to interpret and apply ss. 90.702 and 90.704, F.S., in accordance with *Daubert v. Merrell Dow Pharmaceuticals, Inc.*, 509 U.S. 579 (1993) and several related federal cases.³⁶ The committee substitute amends the standards for the admission of expert testimony in Florida courts to create a new standard. The committee substitute prohibits an expert witness from testifying in the form of an opinion or otherwise, including pure opinion testimony, unless the testimony satisfies specified additional criteria and conforms to the requirements of Federal Rule of Evidence 703.
