

The Florida Senate  
**BILL ANALYSIS AND FISCAL IMPACT STATEMENT**

(This document is based on the provisions contained in the legislation as of the latest date listed below.)

Prepared By: The Professional Staff of the Committee on Appropriations

BILL: CS/CS/CS/SB 534

INTRODUCER: Appropriations Committee; Community Affairs Committee; Governmental Oversight and Accountability Committee; and Senators Brandes and Bradley

SUBJECT: Publicly-funded Defined Benefit Retirement Plans

DATE: April 3, 2013

REVISED: \_\_\_\_\_

	ANALYST	STAFF DIRECTOR	REFERENCE	ACTION

**Please see Section VIII. for Additional Information:**

- A. COMMITTEE SUBSTITUTE.....  Statement of Substantial Changes
- B. AMENDMENTS.....  Technical amendments were recommended
- Amendments were recommended
- Significant amendments were recommended

**I. Summary:**

CS/CS/CS/SB 534 explicitly provides that the state is not liable for any obligation relating to any financial shortfalls in any local government retirement plan. The bill also specifies additional reporting requirements for public pension plans - excluding the Florida Retirement System - and provides that local plans, which do not comply with the reporting requirements, may jeopardize their revenue sharing funds. Each local government defined benefit retirement system or plan and plan sponsor that has a publicly available website must post certain information about the retirement system or plan on its website.

Beginning in Fiscal Year 2014-2015, the Department of Management Services (DMS) will incur increased administrative costs for the Division of Retirement (division) as a result of the bill.. Local government defined benefit retirement systems or plans and plan sponsors also will experience increased reporting costs. See Section V.

This bill substantially amends sections 112.63, 112.66 and 112.665, Florida Statutes.

The bill creates section 112.664, Florida Statutes.

## II. Present Situation:

### Florida Local Retirement Systems and Plans

The Division of Retirement of the Department of Management Services reports<sup>1</sup> that as of September 30, 2012, there are 492 defined benefit plans sponsored by 249 local governments in Florida. The vast majority of the plans, 486, are local government defined benefit systems that provide benefits to 77,331 retirees, with 102,636 active employees, and total plan assets of \$23.8 billion.<sup>2</sup> The average annual pension in these local defined benefit plans is \$25,109, and the average annual required contribution rate as a percentage of payroll is 29.62 percent. The total unfunded actuarial accrued liability for all the defined benefit plans as of September 30, 2012, was \$10 billion.

### Actuarial Reporting for Public Pension Plans

Section 112.63, F.S., requires that public pension plans funded in whole or part by public plans must have regularly scheduled actuarial reports prepared and certified by an enrolled actuary, at least every three years. The actuarial reports must include at least the following information:

- Adequacy of employer and employee contributions;
- A plan to amortize any unfunded liability, and a description of actions taken to reduce the unfunded liability;
- A description and explanation of actuarial assumptions;
- A schedule illustrating the amortization of unfunded liabilities, if any;
- A comparative review illustrating the actual salary increases granted and the rate of investment return realized over the 3-year period preceding the actuarial report with the assumptions used in both the preceding and current actuarial reports;
- A disclosure of the present value of the plan's accrued vested, nonvested, and total benefits, as adopted by the Financial Accounting Standards Board, using the Florida Retirement System's assumed rate of return; and
- A statement by the enrolled actuary that the report is complete and accurate and that the techniques and assumptions used are reasonable and meet the requirements of state law.

The actuarial cost methods used to establish the annual normal costs of the plans must be those methods approved in the Employee Retirement Income Security Act of 1974.

The actuarial reports must be submitted to the Department of Management Services, which must review the reports to determine whether the actuarial valuation is complete, accurate, or based on reasonable assumptions.<sup>3</sup>

<sup>2</sup> The other 6 plans are school board early retirement programs that provide benefits to 1,644 retirees, with active plan membership of 8,631, and total plan assets of \$63.7 million.

<sup>3</sup> Section 112.63(4)(a), F.S.

### **Firefighter and Police Pension Plans**

Sections 175.261 and 185.221, F.S., specify the financial reporting requirements for firefighter and municipal police pensions, respectively, which generally require an annual independent audit, and an actuarial valuation every three years. The reports must be submitted to DMS' Division of Retirement, which issues an annual report to the Legislature based upon the reporting from the plans.

Sections 175.051 and 185.04, F.S., state, in pertinent part, that actuarial deficits, if any, arising under plans under chapters 175 or 185, shall not be the obligation of the state.

### **Generally Accepted Accounting Principles**

The Governmental Accounting Standards Board (GASB) is the independent organization that establishes and improves standards of accounting and financial reporting for U.S. state and local governments. GASB was established in 1984 by agreement of the Financial Accounting Foundation and 10 national associations of state and local government officials. GASB is recognized by governments, the accounting industry, and the capital markets as the official source of generally accepted accounting principles for state and local governments.<sup>4</sup>

In June of 2012, GASB released Statement No. 67, *Financial Reporting for Pension Plans*, and Statement No. 68, *Accounting and Financial Reporting for Pensions*, which establish standards of financial reporting for separately issued financial reports and specify the required approach to measuring the pension liability of employers and nonemployer contributing entities for benefits provided through the pension plan (the net pension liability), about which information is required to be presented. The provisions in Statement 67 are effective for financial statements for periods beginning after June 15, 2013; for Statement No. 68 for periods beginning after June 15, 2014.<sup>5</sup> The new Statements relate to accounting and financial reporting issues only—how pension costs and obligations are measured and reported in audited external financial reports. The Statements do not address how governments approach pension plan funding—a government's policy regarding how much money it will contribute to its pension plan each year.<sup>6</sup>

### **Mortality Tables**

Section 430 of the Internal Revenue Code (IRC) outlines minimum funding standards for single-employer defined benefit pension plans. Section 430(h)(3) of the IRC provides that the Secretary

of the Treasury must by regulation prescribe mortality tables to be used in determining any present value or making any computation under section 430 of the Code, implemented as the RP-2000 Mortality Tables.<sup>7</sup>

### **Actuarial Soundness and Minimum Funding Standards for Pensions**

Article X, s. 14, Florida Constitution, requires public retirement benefits to be funded on a sound actuarial basis:

SECTION 14: State retirement systems benefit changes.- A governmental unit responsible for any retirement or pension system supported in whole or in part by public funds shall not after January 1, 1977, provide any increase in the benefits to the members or beneficiaries of such system unless such unit has made or concurrently makes provision for the funding of the increase in benefits on a sound actuarial basis.<sup>8</sup>

The “Florida Protection of Public Employee Retirement Benefits Act” located in part VII of ch. 112, F.S., provides minimum operation and funding standards for public employee retirement plans. The legislative intent of this act is to “prohibit the use of any procedure, methodology, or assumptions, the effect of which is to transfer to future taxpayers any portion of the costs which may reasonably have been expected to be paid by the current taxpayers.”<sup>9</sup>

### **III. Effect of Proposed Changes:**

**Section 1** amends s. 112.63, F.S., to eliminate a requirement for a retirement system or plan to report present value information, as adopted by the Financial Accounting Standards Board, using the Florida Retirement System (FRS) assumed rate of return.

**Section 2** amends s. 112.66, F.S., to specify that the state is not liable for any obligation relating to any current or future shortfall in any local government retirement system or plan.

**Section 3** creates s. 112.664, F.S., requiring additional reporting requirements for all publicly funded defined benefit retirement plans other than the FRS. The following information must be provided to DMS yearly, within 60 days after receipt of the certified actuarial report submitted after the close of the plan year that ends after June 30, 2014, and thereafter in each year in which an actuarial valuation of the plan is done:

- Annual financial statements in compliance with the requirements of the Government Accounting Standards Board’s Statement No. 67, Financial Reporting for Pension Plans and Statement No. 68 Accounting and Financial Reporting for Pensions using RP-2000 Combined Healthy Participant Mortality Tables, by gender, with generational projection by Scale AA.

---

<sup>7</sup> RP-2000 Mortality Tables are available at [http://www.pensionsoft.com/references\\_mort\\_other.html](http://www.pensionsoft.com/references_mort_other.html) (last visited on March 20, 2013).

<sup>8</sup> Art. X, s. 14, Florida Constitution.

<sup>9</sup> Section 112.61, F.S.

- Annual financial statements similar to GASB, but which use an assumed rate of return and assumed discount rate 200 basis points less than a plan's assumed rate of return.
- The number of months or years for which the current market value of assets is adequate to sustain the payment of expected retirement benefits.
- The recommended contributions to the plan based on financial statements stated as an annual dollar value and a percentage of valuation payroll.

Though it is a reporting requirement and not a funding requirement, utilizing an assumed discount rate of 200 basis points less than a plan's assumed rate of return may produce lower funded ratios for most plans, since in the actuarial reporting the plans are currently doing, the average assumed rate of return for local plans is approximately 7.7 percent.<sup>10</sup>

The information required by this bill must be provided by local government plan sponsors and the plans in the municipal budget disclosure required by s. 166.241(3), F.S., and on any websites that contain budget information, or actuarial or plan performance information. Each plan sponsor and plan that has a publicly available website must also provide the plan's most recent financial statement and actuarial valuation, a side-by-side comparison for the previous 5 years, beginning with 2013, of the plan's assumed rate of return compared to the actual rate of return together with the percentages of cash, equity, bond, and alternative investments in the plan portfolio, and any charts and graphs of that data, presented in a standardized, user-friendly and easily interpretable format prescribed by the DMS, on the website.

Plans that fail to submit timely the required information within 60 days after receipt of the plan's actuarial report will be deemed to be in noncompliance. DMS may notify the Department of Revenue (DOR) and Department of Financial Services (DFS) of the noncompliance, and DOR and DFS must withhold funds payable to the plan sponsor, which are not pledged towards bond debt service. The bill gives plan sponsors administrative rights if these actions are taken.

**Section 4** amends s. 112.665, F.S., to mandate that the DMS-produced local pension plan fact sheets must contain the additional reporting information required by this bill.

**Section 5** is the legislative finding of an important state interest.

**Section 6** provides that the bill takes effect July 1, 2013.

---

<sup>10</sup> Using data from the July 1, 2010, actuarial valuation of the FRS, a study was done in March 2011, to estimate the impact of changing the FRS investment return assumptions. The actuarial liability of the FRS was \$134.2 billion; the investment return rate assumption was (and still is) 7.75 percent. The study found that changing the investment return assumption from 7.75 percent to 6 percent would increase actuarial liabilities by \$36 billion; changing it to 5 percent would increase actuarial liabilities by \$62.9 billion. Study available at <http://www.floridahasarighttoknow.com/docs/StatePensionActuaryLetter.pdf>, (last visited on March 10, 2013).

**IV. Constitutional Issues:****A. Municipality/County Mandates Restrictions:**

To the extent this bill requires a local government to expend funds to comply with its terms, the provisions of s. 18(a) of Art. VII, State Constitution, may apply. If those provisions do apply, in order for the law to be binding upon the cities and counties, the Legislature must find that the law fulfills an important state interest (included in section 4 of the bill), and one of the following relevant exceptions must be met:

- Funds estimated at the time of enactment sufficient to fund such expenditures are appropriated;
- Counties and cities are authorized to enact a funding source not available for such local government on February 1, 1989, that can be used to generate the amount of funds necessary to fund the expenditures;
- The expenditure is required to comply with a law that applies to all persons similarly situated; or
- The law must be approved by two-thirds of the membership of each house of the Legislature.

Since the provisions of the bill apply to municipalities and special districts alike, estimated expenditures required by the bill (see Government Sector Impact) are required by all persons similarly situated. Given this relevant exception, it appears that the mandate restriction does not apply.

**B. Public Records/Open Meetings Issues:**

None.

**C. Trust Funds Restrictions:**

None.

**V. Fiscal Impact Statement:****A. Tax/Fee Issues:**

None.

**B. Private Sector Impact:**

None.

**C. Government Sector Impact:**

The bill requires additional reporting for local plans and, as a result, local plan sponsors may incur additional costs. The exact cost of compliance with this bill is indeterminate; however, last year DMS estimated that the cost of compliance for a local pension

financial rating plan proposal that involved some similar reporting requirements could range from \$1,000 to \$5,000 per plan, per year.<sup>11</sup>

According to the DMS, the bill will increase administrative costs for the Division of Retirement (division), including staff and actuarial work, to comply with the reporting requirements in the bill. The first actuarial reports that will be submitted to the division under the bill will be for plan years ending on or after June 30, 2014. Accordingly, the division initially will incur costs associated with the bill in the 2014-2015 fiscal year.

The DMS has indicated that it will need one additional analyst position, a recurring appropriation of \$57,693 from general revenue and a nonrecurring appropriation of \$3,762 from general revenue, to implement and maintain the actuarial database with the additional disclosure items required by the bill, so that the division's performance of its other statutory responsibilities will not be negatively impacted.

Additionally, the actuarial costs for the chapter plans under chapters 175 and 185, F.S., are paid for from the police and firefighter's trust fund.<sup>12</sup>The bill creates an additional annual expenditure requirement for reporting in order for the plans to qualify for premium tax distributions. Those costs are estimated to be \$39,100 during the first fiscal year after the bill's requirements become effective and \$18,400 in subsequent fiscal years. Technical Deficiencies:

None.

#### **VI. Related Issues:**

None.

#### **VII. Additional Information:**

- A. **Committee Substitute – Statement of Substantial Changes:**  
(Summarizing differences between the Committee Substitute and the prior version of the bill.)

##### **CS/CS/CS by Appropriations on April 3, 2013:**

The committee substitute:

- Makes the bill's reporting requirements applicable to retirement plan years ending on or after June 30, 2014, and requires certified actuarial reports be submitted to the division not later than 60 days after receipt of those reports.
- Expands the information about the plan which a plan sponsor or plan that has a publicly available website must include on that website.

##### **CS/CS by Community Affairs on March 20, 2013:**

The proposed committee substitute makes the following changes to the bill:

---

<sup>11</sup> Financial Rating of Local Government Defined Benefit Plans, January 25, 2012, by the Department of Management Services, on file with the Senate Governmental Oversight and Accountability Committee.

- Eliminates a current requirement for defined benefit plans to report information using the FRS rate of return assumption.
- Specifically excludes the FRS from the reporting requirements of the bill.
- Requires defined benefit retirement plans to report certain data consistent with financial reporting standards adopted by GASB.
- Requires reporting of information similar to GASB which uses an assumed rate of return and assumed discount rate 200 basis points less than a plan's assumed rate of return.
- Extends the time period for reporting plan information to DFS from 30 days to 60 days after receipt of the certified actuarial plan year report.

**CS by Governmental Oversight and Accountability on March 7, 2013:**

The proposed committee substitute makes the following changes to the bill:

- Adds a finding of important state interest;
- Clarifies that the mortality tables must account for generational mortality improvements;
- Excludes Deferred Retirement Option Program (DROP) assets and liabilities from the calculations;
- Provides that all plans must report for the first plan year ending on or after June 30, 2013, and in each subsequent year in which an actuarial valuation is completed;
- Provides that plans that do not comply with the reporting requirements may have their revenue sharing withheld, and specifies administrative procedures; and
- Requires that the yearly local plan fact sheets produced by the DMS must include the additional reporting requirements.

**B. Amendments:**

None.
