

By Senator Grimsley

21-00279C-13

2013754

1                                   A bill to be entitled  
2           An act relating to water quality credit trading;  
3           reenacting s. 373.4595(1)(n), F.S., relating to water  
4           quality credit trading, to incorporate the amendments  
5           made to s. 403.067, F.S., in a reference thereto;  
6           amending s. 403.067, F.S.; authorizing the department  
7           to implement water quality credit trading in adopted  
8           basin management action plans on an ongoing basis;  
9           deleting a requirement that voluntary trading of water  
10          credits be limited to the Lower St. Johns River Basin;  
11          authorizing additional water quality protection  
12          programs to participate in water quality credit  
13          trading; revising provisions relating to rulemaking  
14          for water quality credit trading programs; eliminating  
15          a requirement that water quality credit trading be  
16          limited to the Lower St. Johns River Basin as a pilot  
17          project; deleting a required report; making technical  
18          changes; reenacting s. 403.088(2)(e), F.S., relating  
19          to water pollution operation permits, to incorporate  
20          the amendments made to s. 403.067, F.S., in a  
21          reference thereto; providing an effective date.

22  
23 Be It Enacted by the Legislature of the State of Florida:

24  
25           Section 1. For the purpose of incorporating the amendment  
26           made by this act to section 403.067, Florida Statutes, in a  
27           reference thereto, paragraph (n) of subsection (1) of section  
28           373.4595, Florida Statutes, is reenacted to read:

29           373.4595 Northern Everglades and Estuaries Protection

21-00279C-13

2013754

30 Program.—

31 (1) FINDINGS AND INTENT.—

32 (n) It is the intent of the Legislature that the  
33 coordinating agencies encourage and support the development of  
34 creative public-private partnerships and programs, including  
35 opportunities for water storage and quality improvement on  
36 private lands and water quality credit trading, to facilitate or  
37 further the restoration of the surface water resources of the  
38 Lake Okeechobee watershed, the Caloosahatchee River watershed,  
39 and the St. Lucie River watershed, consistent with s. 403.067.

40 Section 2. Paragraphs (a) and (b) of subsection (7) and  
41 subsections (8) through (14) of section 403.067, Florida  
42 Statutes, are amended to read:

43 403.067 Establishment and implementation of total maximum  
44 daily loads.—

45 (7) DEVELOPMENT OF BASIN MANAGEMENT PLANS AND  
46 IMPLEMENTATION OF TOTAL MAXIMUM DAILY LOADS.—

47 (a) *Basin management action plans.*—

48 1. In developing and implementing the total maximum daily  
49 load for a water body, the department, or the department in  
50 conjunction with a water management district, may develop a  
51 basin management action plan that addresses some or all of the  
52 watersheds and basins tributary to the water body. Such a plan  
53 must integrate the appropriate management strategies available  
54 to the state through existing water quality protection programs  
55 to achieve the total maximum daily loads and may provide for  
56 phased implementation of these management strategies to promote  
57 timely, cost-effective actions as provided for in s. 403.151.  
58 The plan must establish a schedule ~~for~~ implementing the

21-00279C-13

2013754

59 management strategies, establish a basis for evaluating the  
60 plan's effectiveness, and identify feasible funding strategies  
61 for implementing the plan's management strategies. The  
62 management strategies may include regional treatment systems or  
63 other public works, where appropriate, and, ~~in the basin listed~~  
64 ~~in subsection (10) for which a basin management action plan has~~  
65 ~~been adopted,~~ voluntary trading of water quality credits to  
66 achieve the needed pollutant load reductions.

67 2. A basin management action plan must equitably allocate,  
68 pursuant to paragraph (6) (b), pollutant reductions to individual  
69 basins, as a whole to all basins, or to each identified point  
70 source or category of nonpoint sources, as appropriate. For  
71 nonpoint sources for which best management practices have been  
72 adopted, the initial requirement specified by the plan must be  
73 those practices developed pursuant to paragraph (c). Where  
74 appropriate, the plan may take into account the benefits of  
75 pollutant load reduction achieved by point or nonpoint sources  
76 that have implemented management strategies to reduce pollutant  
77 loads, including best management practices, before ~~prior to~~ the  
78 development of the basin management action plan. The plan must  
79 also identify the mechanisms that will address potential future  
80 increases in pollutant loading.

81 3. The basin management action planning process is intended  
82 to involve the broadest possible range of interested parties,  
83 with the objective of encouraging the greatest amount of  
84 cooperation and consensus possible. In developing a basin  
85 management action plan, the department shall assure that key  
86 stakeholders, including, but not limited to, applicable local  
87 governments, water management districts, the Department of

21-00279C-13

2013754

88 Agriculture and Consumer Services, other appropriate state  
89 agencies, local soil and water conservation districts,  
90 environmental groups, regulated interests, and affected  
91 pollution sources, are invited to participate in the process.  
92 The department shall hold at least one public meeting in the  
93 vicinity of the watershed or basin to discuss and receive  
94 comments during the planning process and shall otherwise  
95 encourage public participation to the greatest practicable  
96 extent. Notice of the public meeting must be published in a  
97 newspaper of general circulation in each county in which the  
98 watershed or basin lies not less than 5 days nor more than 15  
99 days before the public meeting. A basin management action plan  
100 does ~~shall~~ not supplant or otherwise alter any assessment made  
101 under subsection (3) or subsection (4) or any calculation or  
102 initial allocation.

103 4. The department shall adopt all or any part of a basin  
104 management action plan and any amendment to such plan by  
105 secretarial order pursuant to chapter 120 to implement the  
106 provisions of this section.

107 5. The basin management action plan must include milestones  
108 for implementation and water quality improvement, and an  
109 associated water quality monitoring component sufficient to  
110 evaluate whether reasonable progress in pollutant load  
111 reductions is being achieved over time. An assessment of  
112 progress toward these milestones shall be conducted every 5  
113 years, and revisions to the plan shall be made as appropriate.  
114 Revisions to the basin management action plan shall be made by  
115 the department in cooperation with basin stakeholders. Revisions  
116 to the management strategies required for nonpoint sources must

21-00279C-13

2013754

117 follow the procedures set forth in subparagraph (c)4. Revised  
118 basin management action plans must be adopted pursuant to  
119 subparagraph 4.

120 6. In accordance with procedures adopted by rule under  
121 paragraph (9)(c), basin management action plans, and other  
122 pollution control programs under local, state, or federal  
123 authority as provided in subsection (4), may allow point or  
124 nonpoint sources that will achieve greater pollutant reductions  
125 than required by an adopted total maximum load or wasteload  
126 allocation to generate, register, and trade water quality  
127 credits for the excess reductions to enable other sources to  
128 achieve their allocation; however, the generation of water  
129 quality credits does not remove the obligation of a source or  
130 activity to meet applicable technology requirements or adopted  
131 best management practices. Such plans must allow trading between  
132 NPDES permittees, and trading that may or may not involve NPDES  
133 permittees, where the generation or use of the credits involve  
134 an entity or activity not subject to department water discharge  
135 permits whose owner voluntarily elects to obtain department  
136 authorization for the generation and sale of credits.

137 7. The provisions of the department's rule relating to the  
138 equitable abatement of pollutants into surface waters do not  
139 apply ~~shall not be applied~~ to water bodies or water body  
140 segments for which a basin management plan that takes into  
141 account future new or expanded activities or discharges has been  
142 adopted under this section.

143 (b) *Total maximum daily load implementation.*—

144 1. The department shall be the lead agency in coordinating  
145 the implementation of the total maximum daily loads through

21-00279C-13

2013754

146 existing water quality protection programs. Application of a  
147 total maximum daily load by a water management district must be  
148 consistent with this section and does ~~shall~~ not require the  
149 issuance of an order or a separate action pursuant to s.  
150 120.536(1) or s. 120.54 for the adoption of the calculation and  
151 allocation previously established by the department. Such  
152 programs may include, but are not limited to:

- 153 a. Permitting and other existing regulatory programs,  
154 including water-quality-based effluent limitations;
- 155 b. Nonregulatory and incentive-based programs, including  
156 best management practices, cost sharing, waste minimization,  
157 pollution prevention, agreements established pursuant to s.  
158 403.061(21), and public education;
- 159 c. Other water quality management and restoration  
160 activities, for example surface water improvement and management  
161 plans approved by water management districts or basin management  
162 action plans developed pursuant to this subsection;
- 163 d. Trading of water quality credits or other equitable  
164 economically based agreements;

165 e. Public works including capital facilities; or

166 f. Land acquisition.

167 2. For a basin management action plan adopted pursuant to  
168 paragraph (a), any management strategies and pollutant reduction  
169 requirements associated with a pollutant of concern for which a  
170 total maximum daily load has been developed, including effluent  
171 limits set forth for a discharger subject to NPDES permitting,  
172 if any, must be included in a timely manner in subsequent NPDES  
173 permits or permit modifications for that discharger. The  
174 department may ~~shall~~ not impose limits or conditions

21-00279C-13

2013754

175 implementing an adopted total maximum daily load in an NPDES  
176 permit until the permit expires, the discharge is modified, or  
177 the permit is reopened pursuant to an adopted basin management  
178 action plan.

179 a. Absent a detailed allocation, total maximum daily loads  
180 must ~~shall~~ be implemented through NPDES permit conditions that  
181 provide for a compliance schedule. In such instances, a  
182 facility's NPDES permit must allow time for the issuance of an  
183 order adopting the basin management action plan. The time  
184 allowed for the issuance of an order adopting the plan may ~~shall~~  
185 not exceed 5 years. Upon issuance of an order adopting the plan,  
186 the permit must be reopened or renewed, as necessary, and permit  
187 conditions consistent with the plan must be established.  
188 Notwithstanding the other provisions of this subparagraph, upon  
189 request by an NPDES permittee, the department as part of a  
190 permit issuance, renewal, or modification may establish  
191 individual allocations before ~~prior to~~ the adoption of a basin  
192 management action plan.

193 b. For holders of NPDES municipal separate storm sewer  
194 system permits and other stormwater sources, implementation of a  
195 total maximum daily load or basin management action plan must be  
196 achieved, to the maximum extent practicable, through the use of  
197 best management practices or other management measures.

198 c. The basin management action plan does not relieve the  
199 discharger from any requirement to obtain, renew, or modify an  
200 NPDES permit or to abide by other requirements of the permit.

201 d. Management strategies set forth in a basin management  
202 action plan to be implemented by a discharger subject to  
203 permitting by the department must be completed pursuant to the

21-00279C-13

2013754

204 schedule set forth in the basin management action plan. This  
205 implementation schedule may extend beyond the 5-year term of an  
206 NPDES permit.

207 e. Management strategies and pollution reduction  
208 requirements set forth in a basin management action plan for a  
209 specific pollutant of concern are ~~shall~~ not be subject to  
210 challenge under chapter 120 at the time they are incorporated,  
211 in an identical form, into a subsequent NPDES permit or permit  
212 modification.

213 f. For nonagricultural pollutant sources not subject to  
214 NPDES permitting but permitted pursuant to other state,  
215 regional, or local water quality programs, the pollutant  
216 reduction actions adopted in a basin management action plan must  
217 ~~shall~~ be implemented to the maximum extent practicable as part  
218 of those permitting programs.

219 g. A nonpoint source discharger included in a basin  
220 management action plan must demonstrate compliance with the  
221 pollutant reductions established under subsection (6) by ~~either~~  
222 implementing the appropriate best management practices  
223 established pursuant to paragraph (c) or conducting water  
224 quality monitoring prescribed by the department or a water  
225 management district. A nonpoint source discharger may, in  
226 accordance with department rules, supplement the implementation  
227 of best management practices with water quality credit trades in  
228 order to demonstrate compliance with the pollutant reductions  
229 established under subsection (6).

230 h. A nonpoint source discharger included in a basin  
231 management action plan may be subject to enforcement action by  
232 the department or a water management district based upon a

21-00279C-13

2013754

233 failure to implement the responsibilities set forth in sub-  
234 subparagraph g.

235 i. A landowner, discharger, or other responsible person who  
236 is implementing applicable management strategies specified in an  
237 adopted basin management action plan may ~~shall~~ not be required  
238 by permit, enforcement action, or otherwise to implement  
239 additional management strategies to reduce pollutant loads to  
240 attain the pollutant reductions established pursuant to  
241 subsection (6) and shall be deemed to be in compliance with this  
242 section. This subparagraph does not limit the authority of the  
243 department to amend a basin management action plan as specified  
244 in subparagraph (a)5.

245 (8) WATER QUALITY CREDIT TRADING.—

246 (a) Water quality credit trading must be consistent with  
247 federal law and regulation.

248 (b) Water quality credit trading must be implemented  
249 through permits, including water quality credit trading permits,  
250 other authorizations, or other legally binding agreements as  
251 established by department rule.

252 (c) The department shall establish the pollutant load  
253 reduction value of water quality credits and is ~~shall be~~  
254 responsible for authorizing their use.

255 (d) A person who ~~that~~ acquires water quality credits  
256 ("buyer") shall timely submit to the department an affidavit,  
257 signed by the buyer and the credit generator ("seller"),  
258 disclosing the term of acquisition, number of credits, unit  
259 credit price paid, and any state funding received for the  
260 facilities or activities that generate the credits. The  
261 department may ~~shall~~ not participate in the establishment of

21-00279C-13

2013754

262 credit prices.

263 (e) Sellers of water quality credits are responsible for  
264 achieving the load reductions on which the credits are based and  
265 complying with the terms of the department authorization and any  
266 trading agreements into which they may have entered.

267 (f) Buyers of water quality credits are responsible for  
268 complying with the terms of the department water discharge  
269 permit.

270 (g) The department shall take appropriate action to address  
271 the failure of a credit seller to fulfill its obligations,  
272 including, as necessary, deeming the seller's credits invalid if  
273 the seller cannot achieve the load reductions on which the  
274 credits were based in a reasonable time. If the department  
275 determines duly acquired water quality credits to be invalid, in  
276 whole or in part, thereby causing the credit buyer to be unable  
277 to timely meet its pollutant reduction obligations under this  
278 section, the department shall issue an order establishing the  
279 actions required of the buyer to meet its obligations by  
280 alternative means and a reasonable schedule for completing the  
281 actions. The invalidation of credits does shall not, in and of  
282 itself, constitute a violation of the buyer's water discharge  
283 permit.

284 (h) The department may authorize water quality trading in  
285 adopted basin management action plans. Entities that participate  
286 in water quality credit trades shall timely report to the  
287 department the prices for credits, how the prices were  
288 determined, and any state funding received for the facilities or  
289 activities that generated the credits. The department may not  
290 participate in the establishment of credit prices.

21-00279C-13

2013754

291 (9) RULES.—The department may ~~is authorized to~~ adopt rules  
292 ~~pursuant to ss. 120.536(1) and 120.54~~ for:

293 (a) Delisting water bodies or water body segments from the  
294 list developed under subsection (4) pursuant to the guidance  
295 under subsection (5).

296 (b) Administering of funds to implement the total maximum  
297 daily load and basin management action planning programs.

298 (c) Water quality credit trading among the pollutant  
299 sources to a water body or water body segment. ~~By September 1,~~  
300 ~~2008, rulemaking must be initiated which provides~~ The rules must  
301 provide for the following:

302 1. The process to be used to determine how credits are  
303 generated, quantified, and validated.

304 2. A publicly accessible water quality credit trading  
305 registry that tracks water quality credits, trading activities,  
306 and prices paid for credits.

307 3. Limitations on the availability and use of water quality  
308 credits, including a list of eligible pollutants or parameters  
309 and minimum water quality requirements and, where appropriate,  
310 adjustments to reflect best management practice performance  
311 uncertainties and water-segment-specific location factors.

312 4. The timing and duration of credits and allowance for  
313 credit transferability.

314 5. Mechanisms for determining and ensuring compliance with  
315 trading procedures, including recordkeeping, monitoring,  
316 reporting, and inspections.

317

318 At the time of publication of the draft rules on water quality  
319 credit trading, the department shall submit a copy to the United

21-00279C-13

2013754

320 States Environmental Protection Agency for review.

321 (d) The total maximum daily load calculation in accordance  
322 with paragraph (6) (a) immediately upon the effective date of  
323 this act, for those eight water segments within Lake Okeechobee  
324 proper as submitted to the United States Environmental  
325 Protection Agency pursuant to subsection (2).

326 (e) Implementation of other specific provisions.

327 ~~(10) Water quality credit trading shall be limited to the~~  
328 ~~Lower St. Johns River Basin, as defined by the department, as a~~  
329 ~~pilot project. The department may authorize water quality credit~~  
330 ~~trading and establish specific requirements for trading in the~~  
331 ~~adopted basin management action plan for the Lower St. Johns~~  
332 ~~River Basin prior to the adoption of rules under paragraph~~  
333 ~~(9) (c) in order to effectively implement the pilot project.~~  
334 ~~Entities that participate in water quality credit trades shall~~  
335 ~~timely report to the department the prices for credits, how the~~  
336 ~~prices were determined, and any state funding received for the~~  
337 ~~facilities or activities that generated the credits. The~~  
338 ~~department shall not participate in the establishment of credit~~  
339 ~~prices. No later than 24 months after adoption of the basin~~  
340 ~~management action plan for the Lower St. Johns River, the~~  
341 ~~department shall submit a report to the Governor, the President~~  
342 ~~of the Senate, and the Speaker of the House of Representatives~~  
343 ~~on the effectiveness of the pilot project, including the~~  
344 ~~following information:~~

345 ~~(a) A summary of how water quality credit trading was~~  
346 ~~implemented, including the number of pounds of pollutants~~  
347 ~~traded.~~

348 ~~(b) A description of the individual trades and estimated~~

21-00279C-13

2013754

349 ~~pollutant load reductions that are expected to result from each~~  
350 ~~trade.~~

351 ~~(c) A description of any conditions placed on trades.~~

352 ~~(d) Prices associated with the trades, as reported by the~~  
353 ~~traders.~~

354 ~~(e) A recommendation as to whether other areas of the state~~  
355 ~~would benefit from water quality credit trading and, if so, an~~  
356 ~~identification of the statutory changes necessary to expand the~~  
357 ~~scope of trading.~~

358 (10) ~~(11)~~ APPLICATION.—The provisions of this section are  
359 intended to supplement existing law, and may not ~~nothing in this~~  
360 ~~section shall~~ be construed as altering any applicable state  
361 water quality standards or as restricting the authority  
362 otherwise granted to the department or a water management  
363 district under this chapter or chapter 373. The exclusive means  
364 of state implementation of s. 303(d) of the Clean Water Act,  
365 Pub. L. No. 92-500, 33 U.S.C. ss. 1251 et seq. shall be in  
366 accordance with the identification, assessment, calculation and  
367 allocation, and implementation provisions of this section.

368 (11) ~~(12)~~ CONSTRUCTION.—~~Nothing in~~ This section does not  
369 limit ~~shall be construed as limiting~~ the applicability or  
370 consideration of any mixing zone, variance, exemption, site  
371 specific alternative criteria, or other moderating provision.

372 (12) ~~(13)~~ IMPLEMENTATION OF ADDITIONAL PROGRAMS.—

373 (a) The department may ~~shall~~ not implement, without prior  
374 legislative approval, any additional regulatory authority  
375 pursuant to s. 303(d) of the Clean Water Act or 40 C.F.R. part  
376 130, if such implementation would result in water quality  
377 discharge regulation of activities not currently subject to

21-00279C-13

2013754

378 regulation.

379 (b) Interim measures, best management practices, or other  
380 measures may be developed and voluntarily implemented pursuant  
381 to paragraph (7)(c) for any water body or segment for which a  
382 total maximum daily load or allocation has not been established.  
383 The implementation of such pollution control programs may be  
384 considered by the department in the determination made pursuant  
385 to subsection (4).

386 (13) ~~(14)~~ RULE CHALLENGES.—In order to provide adequate due  
387 process while ensuring timely development of total maximum daily  
388 loads, proposed rules and orders authorized by this act are  
389 ~~shall be~~ ineffective pending resolution of a s. 120.54(3), s.  
390 120.56, s. 120.569, or s. 120.57 administrative proceeding.  
391 However, the department may go forward prior to resolution of  
392 such administrative proceedings with subsequent agency actions  
393 authorized by subsections (2)-(6) if, ~~provided that~~ the  
394 department can support and substantiate those actions using the  
395 underlying bases for the rules or orders without the benefit of  
396 any legal presumption favoring, or in deference to, the  
397 challenged rules or orders.

398 Section 3. For the purpose of incorporating the amendment  
399 made by this act to section 403.067, Florida Statutes, in a  
400 reference thereto, paragraph (e) of subsection (2) of section  
401 403.088, Florida Statutes, is reenacted to read:

402 403.088 Water pollution operation permits; conditions.—

403 (2)

404 (e) However, if the discharge will not meet permit  
405 conditions or applicable statutes and rules, the department may  
406 issue, renew, revise, or reissue the operation permit if:

21-00279C-13

2013754\_\_

407           1. The applicant is constructing, installing, or placing  
408 into operation, or has submitted plans and a reasonable schedule  
409 for constructing, installing, or placing into operation, an  
410 approved pollution abatement facility or alternative waste  
411 disposal system;

412           2. The applicant needs permission to pollute the waters  
413 within the state for a period of time necessary to complete  
414 research, planning, construction, installation, or operation of  
415 an approved and acceptable pollution abatement facility or  
416 alternative waste disposal system;

417           3. There is no present, reasonable, alternative means of  
418 disposing of the waste other than by discharging it into the  
419 waters of the state;

420           4. The granting of an operation permit will be in the  
421 public interest;

422           5. The discharge will not be unreasonably destructive to  
423 the quality of the receiving waters; or

424           6. A water quality credit trade that meets the requirements  
425 of s. 403.067.
