

The Florida Senate
BILL ANALYSIS AND FISCAL IMPACT STATEMENT

(This document is based on the provisions contained in the legislation as of the latest date listed below.)

Prepared By: The Professional Staff of the Committee on Health Policy

BILL: SB 1354

INTRODUCER: Senator Grimsley

SUBJECT: Health Care

DATE: March 22, 2014

REVISED: _____

	ANALYST	STAFF DIRECTOR	REFERENCE	ACTION
1.	<u>Lloyd</u>	<u>Stovall</u>	<u>HP</u>	Favorable
2.	_____	_____	<u>BI</u>	_____

I. Summary:

SB 1354 revises the managed care accountability contract provisions for the statewide Managed Medical Assistance (MMA) contracts under the Statewide Medicaid Managed Care Program (SMMC). It requires plans that establish prescribed drug formularies to offer a range of therapeutic options with at least two products in each therapeutic class. Managed care plans under MMA must also cover any drugs newly approved by the United States Food and Drug Administration (FDA) until the Medicaid Pharmaceutical and Therapeutics Committee can review the drug for inclusion in the formulary. If a drug on a Medicaid managed care plan's formulary is removed or changed, the plan must allow an enrollee to continue that drug if the provider submits a written request that demonstrates the drug is medically necessary and the enrollee meets clinical criteria to receive the drug.

The bill requires MMA managed care plans, health insurers, managed care organizations, and health maintenance organizations and any pharmacy benefit manager under contract with these insurers, to use a standardized prior authorization form adopted by the Financial Services Commission (commission). The form is to be adopted by January 15, 2015. All prior authorization requests for medical procedures, course of treatment, and prescriptions must be submitted using the same standardized two page form. A form submitted by a provider is deemed approved unless the issuer responds otherwise within two business days.

Managed care plans, health maintenance organizations and insurers, including Medicaid plans, that restrict medications by a step-therapy or fail-first protocol are required to have a clear and convenient process to request an override of the protocol. An override must be granted within 24 hours for certain situations where the prescribing provider believes the drug under the step-therapy or fail-first protocol has been or likely will be ineffective or will cause or will likely cause an adverse reaction. If the provider allows the patient to enter the step-therapy or fail-first protocol, the duration of the process may not exceed an amount deemed appropriate by the provider and if the provider deems it ineffective, the patient is entitled to receive the recommended course of treatment without override approval.

For insurance contracts for reduced rates of payment under s. 627.6471, F.S., the bill requires insurers to post a link on their website's homepage to a list of preferred providers. Changes to that list must be updated within 24 hours.

The bill has an indeterminate, but likely significant, fiscal impact.

II. Present Situation:

Medicaid

Medicaid is a joint federal and state funded program that provides health care for low income Floridians. The program is administered by the AHCA and financed with federal and state funds. Over 3.3 million Floridians are currently enrolled in Medicaid and the program's estimated expenditures for Fiscal Year 2012-2013 were approximately \$21 billion.¹ The statutory authority for the Medicaid program is contained in ch. 409, F.S.

Statewide Medicaid Managed Care

In 2011, the Legislature passed HB 7107² creating the Statewide Medicaid Managed Care (SMMC) program as part IV of ch. 409, F.S. The SMMC program requires the AHCA to create an integrated managed care program for Medicaid enrollees that incorporates all of the minimum benefits for the delivery of primary and acute care under the Managed Medical Assistance component (MMA).³ Final approval by the federal government of the 1915(b) Medicaid waiver for the MMA component of SMMC program was received on June 14, 2013.⁴ The AHCA has recently begun the waiver renewal process for the period of July 1, 2014 through June 30, 2017.⁵

The Agency is in the process of implementing the MMA component of SMMC program through which most Medicaid recipients will receive their health care services. The first regional roll-out begins May 1, 2014, and the last is scheduled for August 1, 2014. During the implementation, existing Medicaid managed care plans will continue until the region they serve transitions to the MMA program.

The AHCA's contracts with the current Medicaid managed care plans allow the plans to develop their own preferred drug list (PDL) and prior authorization processes, including step-therapy and fail-first criteria, which must be approved by the AHCA.⁶ Current managed care plans also have

the ability to deny claims for enrollees who were later determined to be ineligible at the time of service despite having issued a prior authorization.⁷

For the first year of the MMA transition, the Agency is requiring the MMA plans to use the Medicaid PDL. After the first year, the MMA plans may develop a plan-specific PDL for the Agency's consideration, if requested by the Agency at that time.⁸

Patient Protection and Affordable Care Act

In March 2010, the Congress passed and the President signed the Patient Protection and Affordable Care Act (PPACA).⁹ Among its changes to the United States health care system are requirements for health insurers to make coverage available to all individuals and employers. Qualifying coverage may be obtained through an employer, the federal or state exchanges created under PPACA, or private individual or group coverage meeting the minimum essential benefits coverage standard. Florida did not establish its own state exchange under PPACA.

Premium credits and other cost sharing subsidies are available to United States citizens and legal immigrants within certain income limits for qualified coverage purchased through the exchange. Premium credits are set on a sliding scale based on a percentage of the federal poverty level and reduce the out of pocket costs incurred by individuals and families.¹⁰

Federal regulations for PPACA also govern an enrollee's coverage bought through the exchanges and for non-grandfathered plans.¹¹ If an enrollee's coverage bought with advance premium tax credit for a qualified health plan (QHP)¹² is terminated for non-payment of premium for example, the regulations provide the enrollee a 3-month grace period before cancellation of coverage.¹³ During the grace period, the insurer must pay claims for services rendered in the first month but may pend claims for the second and third months.¹⁴ If coverage is ultimately terminated, the termination date is the last day of the first month of the grace period and the insurer may not recoup any claims paid during the first month of the grace period.

The federal regulations do not impact those enrollees who are not enrolled in an exchange plan or are not receiving a subsidy. The grace period for these individuals remains at the length required under s. 627.608, F.S., which varies by the length of the premium payment interval. Cancellation of coverage is effective the first day of the grace period if payment is not received.

¹¹ Certain plans received "grandfather status" under PPACA. A grandfathered health plan is a plan that existed on March 23, 2010, and had at least one person continuously covered for one year. Some consumer protections elements do not apply to grandfathered plans.

¹² A "qualified health plan" is an insurance plan certified by the applicable Health Insurance Marketplace, provides the essential health benefits, established limits on cost sharing and meets other requirements. *See* <https://www.healthcare.gov/glossary/qualified-health-plan/> for more information on qualified health plans.

Step-Therapy or Fail-First Protocols

Step-therapy or fail-first protocols for prescription medication coverage requires a member to try a certain drug, usually a generic alternative, before receiving coverage for another drug, usually a branded, more expensive product. Utilization management pharmacy benefit programs were first introduced in the 1980s and became popular with the implementation of tiered co-payment formularies.¹⁵ Step therapy is usually applied to a certain drug class with the goal of encouraging generic drug use and decreasing costs without compromising the quality of care.¹⁶ Many step-therapy programs incorporate edits into the system to recognize members through prior claims who have previously received a first step drug so claims for a second step drug are not rejected, but automatically covered.

One outcome of step-therapy programs; however, has been that enrollees who have had a claim rejected, do not have a later claim for a later medication in that same class.¹⁷ The process for notifying the patient and prescriber of a step-therapy claim rejection and the resubmission of an alternate medication varies by issuer.

Prior Authorization for Health Care Services

Insurers may require prior authorization for certain services as a cost control and quality measure. Florida has waived requirements for prior authorization for certain services and requires direct access within specified guidelines for certain services such as dermatology.¹⁸ State law currently does not provide a specific standard form or review timeline for a prior authorization process for health care services covered by an insurer, managed care plan or health maintenance organization. Prior authorization is never required for any emergency procedure. Each insurer has established its own prior authorization process and form based on the situation and the type of authorization, such service, course of treatment, or prescription. The state has mandated a standard health claims processing form be adopted by the commission and used under s. 627.647, F.S., by all hospitals and a separate form by all physicians, dentists and pharmacists.

The National Council for Prescription Drug Programs, a non-profit, stakeholder group proposed in July 2013, new uniform electronic prior authorization (ePA) standards. The new ePA electronic prescribing standard provides for a two-way, real-time exchange of information for insurers and prescribers.¹⁹

Federal regulations for the Medicaid and Children's Health Insurance Program both require that managed care plans have written policies and procedures for initial and continuing authorization

decisions that ensure timely access to care for enrollees with serious and chronic conditions.²⁰ Both regulations establish that prior authorization decisions may not exceed 14 calendar days following receipt of the request, with a possible extension up to 14 additional calendar days if requested by the enrollee or provider or there is a need for additional information.

For Medicaid, an expedited authorization process is also provided that does not exceed 3 working days with the ability to extend up to 14 calendar days upon enrollee request, or if the managed care plan justifies a need for additional information and that the extension is in the enrollee's benefit.²¹

The Children's Health Insurance Program's regulation provides a deferral to any existing state law on the authorization of health services, if applicable.²²

Preferred Provider Listings

Individuals enrolled in plans licensed under s. 627.6471, F.S., known as a "Preferred Provider Organization" or PPO plans, incur different out of pocket costs based on whether the provider is in-network. These out of pocket costs can be significant to the consumer. For example, in the standard PPO Option Group Plan for state employees, the enrollee would pay a small copayment for a physician office visit with an in-network provider after the enrollee had met any calendar year deductible, but would incur 40 percent of the costs with an out of network provider for the same service.²³ The state group PPO provider, Florida Blue, does provide a list of providers on its website.

Federal regulations require QHPs on the exchanges to make its provider directory available online and to potential enrollees in hard copy, upon request.²⁴ Further guidance from the federal Centers for Medicare and Medicaid Services (CMS) via a draft guidance letter indicates that QHPs must provide a link from the federal marketplace to their network directly where the consumer can view an up-to-date provider directory. CMS requires the directory to include the location, contact information, specialty, medical group, any institutional affiliations for each provider and whether the provider is accepting new patients.²⁵

III. Effect of Proposed Changes:

Medicaid Managed Care Program (Section 1)

Section 1 modifies s. 409.967, F.S., and requires a Medicaid managed care plan that establishes a prescribed drug formulary or a PDL must provide a broad range of therapeutic options for the treatment of disease consistent with the outpatient population. At least two products in each

therapeutic class must be included, if feasible. The AHCA indicates it will be required to amend its existing Medicaid contracts to ensure compliance.²⁶

The managed care plan must also provide coverage through prior authorization for any new drug approved by the Food and Drug Administration until the Medicaid Pharmaceutical and Therapeutics Committee (committee) can review the drug for inclusion on the formulary. The timing of the committee meeting must comply with s. 409.91195, F.S., which requires at least quarterly meetings.

If a managed care plan removes a drug from a plan's formulary, the bill requires the managed care plan to continue the enrollee's receipt of the drug if the provider submits a written request that the drug is medically necessary and meets clinical criteria.

Prior Authorization Requirements (Sections 1, 3, and 7)

Health plans, health insurers, and health maintenance organizations, including those participating under SMMC will be required, upon adoption by the commission after January 1, 2015, to use a new, standardized prior authorization form for obtaining approval for a medical procedure, course of treatment, or prescription drug benefits. A pharmacy benefit manager under contract with a managed care plan must also comply with this requirement. The form shall be available electronically from the commission and on the managed care plan's website. A prior authorization request completed on the standardized form will be deemed approved upon receipt by the managed care plan unless the managed care plan responds within two business days.

SB 1354 adds the prior authorization provisions to existing s. 409.967, F.S., and creates two new sections, ss. 627.6465 and 641.393, F.S.

Step-Therapies or Fail-First Protocols (Sections 1, 4, and 8)

If medications for the treatment of a medical condition are restricted for use through a step-therapy or fail-first protocol by a SMMC plan, an insurer, or a health maintenance organization, the prescribing provider must have access to a clear and convenient process to request an override. An override must be granted within 24 hours if the prescribing provider believes that:

- Based on sound clinical evidence, the preferred treatment required under step-therapy or fail-first protocol has been ineffective in the patient's disease or medical condition; or,
- Based on sound clinical evidence or medical and scientific evidence, the preferred treatment required under the step-therapy or fail-first protocol:
 - Is expected or likely to be ineffective based on known relevant physical or mental characteristics of the enrollee and known characteristics of the drug regimen; or
 - Will cause or will likely cause an adverse reaction or other physical harm to the patient.

If the patient does enroll in the step-therapy or fail-first protocol, the duration of the process may not exceed a period deemed appropriate by the provider. If the provider finds the treatment ineffective, the bill provides that the patient is entitled to receive the recommended course of

²⁶ See *supra*, note 6.

treatment without requiring the provider to seek an override of the step-therapy or fail-first protocol.

To add the provisions on step-therapy and fail-first protocol for the SMMC program, s. 409.967, F.S., is amended and two new sections, ss. 627.6466 and 641.394, F.S., are created to apply the provisions to insurers and health maintenance organizations.

Payment of Claims (Sections 2 and 6)

Health insurers under s. 627.6131, F.S., and health maintenance organizations under s. 641.3155, F.S., are prohibited from retroactively denying claims because of insurer ineligibility if the insurer:

- Verified the eligibility of the insured at time of treatment and provided an authorization number or
- Provided the insured with an identification card as provided in s. 627.642(3), F.S., that at the time of service identifies the insured as eligible to receive services.

Reduced Rate Insurance Contracts - Provider Listings (Section 5)

For contracts for reduced rates of payment, s. 627.6471, F.S., is modified and insurers must post a link on their website's homepage to a list of preferred providers. Changes to that provider list must be updated within 24 hours.

The bill has an effective date of July 1, 2014.

IV. Constitutional Issues:

A. Municipality/County Mandates Restrictions:

None.

B. Public Records/Open Meetings Issues:

None.

C. Trust Funds Restrictions:

None.

V. Fiscal Impact Statement:

A. Tax/Fee Issues:

None.

B. Private Sector Impact:

Individuals and employers with private insurance coverage may see an increase in premium costs related to the step-therapy or fail-first process and the prior authorization provisions. These measures are used by insurers today as utilization management and cost control tools and might impact some current policies and procedures of insurers.

Consumers may see more timely authorization for certain services, course of treatment, or prescriptions ordered by their health care providers. Health care providers and their patients may also experience less of a burden receiving a brand drug under the step-therapy or fail-first guidelines as patients are provided a statutory mechanism for bypassing step one, if certain indicators are present.

Insurers under s. 627.6471, F.S., have an additional administrative impact complying with posting a list of preferred providers to their website and reflecting changes within 24 hours.

C. Government Sector Impact:

The fiscal impact to Medicaid is indeterminate at this time. The bill may increase the cost of providing a prescribed drug to Medicaid enrollees because it makes changes to the step-therapy and fail-first requirements for plan enrollees and requires that any drug prescribed or recommended by a provider be approved and reimbursed.

The AHCA would also need to modify existing Medicaid managed care contracts to incorporate the revised step-therapy and formulary requirements.

VI. Technical Deficiencies:

None.

VII. Related Issues:

None.

VIII. Statutes Affected:

This bill substantially amends the following sections of the Florida Statutes: 409.967, 627.6131, 627.6471, and 641.3155.

This bill creates the following sections of the Florida Statutes: 627.6465, 627.6466, 641.393, and 641.394.

IX. Additional Information:**A. Committee Substitute – Statement of Changes:**

(Summarizing differences between the Committee Substitute and the prior version of the bill.)

None.

B. Amendments:

None.

This Senate Bill Analysis does not reflect the intent or official position of the bill's introducer or the Florida Senate.
