SUMMARY ANALYSIS

CS/CS/CS/HB 889 passed the House on April 22, 2015, and subsequently passed the Senate on April 24, 2015. The bill amends laws on health care surrogates and creates statutory forms.

Current law provides several methods for a person to make health care decisions, and in some instances access health information, on behalf of another person. One such method is the designation by an adult person of another adult person to act as a health care surrogate. A health care surrogate is authorized to review confidential medical information and to make health care decisions in the place of the principal. Generally, a determination of incapacity of the principal is required before the health care surrogate may act.

Because a principal may regain capacity and in some instances, especially with the elderly, may vacillate in and out of capacity, a redetermination of incapacity is frequently necessary to provide ongoing authorization for the health care surrogate to act. This process can hinder effective and timely assistance and is cumbersome. Further, some competent persons desire the assistance of a health care surrogate with the sometimes complex task of understanding health care treatments and procedures and with making health care decisions.

The bill amends the health care surrogate law to allow a person to designate a health care surrogate, who may act at any time, including while the person is still competent and able to make his or her own decisions. However, if the person is competent, his or her own decisions are controlling over any contrary decision of the surrogate.

This bill also creates a means for designating a health care surrogate for the benefit of a minor when the parents, legal custodian, or legal guardian of the minor cannot be timely contacted by a health care provider or are unable to provide consent for medical treatment.

The bill creates sample forms that may be used to designate health care surrogates for adults and minors.

This bill does not appear to have a fiscal impact on state or local governments.

The bill was approved by the Governor on June 11, 2015, ch. 2015-153, L.O.F., and will become effective on October 1, 2015.

I. SUBSTANTIVE INFORMATION

A. EFFECT OF CHANGES:

General Background

Advance Directives

Competent adults may formulate, in advance, preferences regarding a course of treatment in the event that injury or illness causes severe impairment or loss of decision-making capacity. These preferences generally should be honored by the health care team out of respect for patient autonomy. Patients may establish an advance directive by documenting their treatment preferences and goals in a living will, by designating a health care surrogate, or by using a durable power of attorney for health care to make health care decisions on their behalf.¹ All 50 states permit an individual to use an advance directive to express his or her wishes as to medical treatment in the event the individual becomes terminally ill or has an injury or disease making the individual unable to communicate or make medical decisions.²

Physicians should recognize the patient's proxy or surrogate as an extension of the patient, entitled to the same respect as the competent patient.³ Physicians should provide advice, guidance, and support; explain that decisions should be based on substituted judgment when possible and otherwise on the best interest principle; and offer relevant medical information as well as medical opinions in a timely manner. In addition to the physician, other hospital staff or ethics committees are often helpful to providing support for the decision-makers.⁴

Health Care Surrogates

Part II of Chapter 765, F.S., entitled "Health Care Surrogate," governs the designation of health care surrogates in the State of Florida. A health care surrogate is a competent adult expressly designated by a principal to make health care decisions on behalf of the principal upon the principal's incapacity.⁵ Section 765.203, F.S., provides a suggested form for the designation of a health care surrogate.⁶

If an adult fails to designate a surrogate or a designated surrogate is unwilling or unable to perform his or her duties, a health care facility may seek the appointment of a proxy⁷ to serve as surrogate upon the incapacity of such person.⁸ A surrogate appointed by the principal or by proxy, may, subject to any limitations and instructions provided by the principal, take the following actions:⁹

⁶ By law hospitals, nursing homes, home health agencies, hospices, and health maintenance organizations (HMOs) are required to provide their patients with written information concerning health care advance directives. The state rules that require this include: rules 58A-2.0232, 59A-3.254, 59A-4.106, 59A-8.0245, and 59A-12.013, Florida Administrative Code. ⁷ "Proxy" means a competent adult who has not been expressly designated to make health care decisions for a particular incapacitated individual, but who, nevertheless, is authorized pursuant to s. 765.401, F.S., to make health care decisions for such individual. s. 765.101(15), F.S.

⁸ ss. 765.202(4) and 765.401, F.S.

⁹ s.765.205, F.S.

- Make all health care decisions¹⁰ for the principal during the principal's incapacity;
- Consult expeditiously with appropriate health care providers to provide informed consent, including written consent where required, provided that such consent reflects the principal's wishes or the principal's best interests;
- Have access to the appropriate medical records of the principal;
- Apply for public benefits for the principal and have access to information regarding the principal's income, assets, and financial records to the extent required to make such application;
- Authorize the release of information and medical records to appropriate persons to ensure continuity of the principal's health care; and
- Authorize the admission, discharge, or transfer of the principal to or from a health care facility.

The surrogate's authority to act commences upon a determination that the principle is incapacitated.¹¹ A determination of incapacity is required to be made by a physician.¹² If the physician evaluation finds that the principal is incapacitated and the principal has designated a health care surrogate, a health care facility will notify such surrogate in writing that her or his authority under the instrument has commenced.¹³ The health care surrogate's authority continues until a determination that the principal has regained capacity. If a principal goes in and out of capacity, a redetermination of incapacity is necessary each time before a health care surrogate may make health care decisions.¹⁴

This process can hinder effective and timely assistance and is cumbersome. Further, some competent persons desire the assistance of a health care surrogate with the sometimes complex task of understanding health care treatments and procedures and with making health care decisions, but may not effectively empower such persons to act on their behalf due to the restriction that a health care surrogate act only for incapacitated persons.

Additionally, there is no statutory authority for a health care surrogate to be designated for a minor or for a health care facility to seek a proxy to serve as a health care surrogate for a minor when his or her parents, legal custodian, or legal guardian cannot be timely contacted by the health care provider or are unable to consent to medical treatment.

Effect of the Bill

Health Care Surrogate for an Adult

The bill creates s. 765.202(6), F.S., to provide that an individual may elect to designate a health care surrogate who may act while the individual is still competent to make health care decisions. To that end, the bill:

- Adds a legislative finding at s. 765.102(3), F.S., that some competent adults want a health care surrogate to assist them with making medical decisions.
- Provides that statutory provisions for review of the decision of a health care surrogate at s. 765.105, F.S., do not apply when the individual who appointed the health care surrogate is still competent.
- Amends s. 765.204, F.S., which relates to determinations of incapacity, to require a health care facility to notify the surrogate upon a determination of incapacity. The notification requirement requires notice to the attorney in fact if the health care facility knows of a durable power of

¹⁰ "Health care decision" means: informed consent, refusal of consent, or withdrawal of consent to any and all health care, including life-prolonging procedures and mental health treatment, unless otherwise stated in the advance directives; the decision to apply for private, public, government, or veterans' benefits to defray the cost of health care; the right of access to all records of the principal reasonably necessary for a health care surrogate to make decisions involving health care and to apply for benefits; and the decision to make an anatomical gift pursuant to part V of ch. 765, F.S.

attorney. It also requires an attending physician's hospital to inform a principal's primary physician of the principal's incapacity, if an attending physician determines the principal lacks capacity.

- Provides that a health care provider is not liable for relying on a decision made by a surrogate while the principal lacks capacity.
- Provides that, where the principal has capacity and the decision of the principal conflicts with a decision of the surrogate, the decision of the principal controls.
- Authorizes an alternate health care surrogate to act when the primary surrogate is not reasonably available in addition to those circumstances when the primary surrogate is unwilling or unable to act.

The bill creates a sample form for the designation of a health care surrogate for an adult under s. 765.203, F.S. (See Attachment I).

Consent to Medical Treatment of a Minor; Creation of Health Care Surrogate for a Minor

In general, a minor does not have the legal right to consent to medical care or treatment. Instead, for non-emergency treatment, a parent or legal guardian must give consent. As to emergency treatment, where the parents, legal custodian or legal guardian of a minor cannot be timely contacted to give consent for medical treatment of a minor, s. 743.0645(2), F.S., sets forth a list of people who have the power to consent on behalf of the minor. There is no general statutory authority for non-emergency medical treatment of a minor without consent of a parent or legal guardian.

It is common for parents and legal guardians to go on vacation and leave their children with a caregiver, and equally common for parents and legal guardians to allow a minor to travel and stay with relatives or friends for a period of time. Lawyers routinely draft a power of attorney authorizing caregivers to consent to medical treatment of the minor, despite there being no statutory authority for such document.

The bill amends s. 743.0645, F.S., to recognize that a power of attorney executed between July 1, 2001, and September 30, 2015, may authorize an individual to consent to health care for a minor. However, no power of attorney executed after the effective date of the bill, October 1, 2015, will be authority to consent to such treatment. Thus, after the effective date of the bill only a designation of health care surrogate will allow someone other than a parent, legal custodian or legal guardian to consent to non-emergency medical care of a minor.

The bill creates s. 765.2035, F.S., to create statutory authority for a parent, legal custodian or legal guardian to designate a health care surrogate who may consent to medical care for a minor. The designation must be in writing and signed by two witnesses. The designated surrogate may not be a witness. Like a surrogate for an adult, an alternate surrogate may be appointed to act if the original surrogate is not willing, able, or reasonably available to act.

In addition to regular and emergency treatment, a health care surrogate for a minor is authorized to consent to mental health treatment unless the document specifically provides otherwise. The appointment of a health care surrogate for a minor remains in place until the termination date provided in the designation (if any), the minor reaches the age of majority, or the designation is revoked.

The bill also creates a sample form for the designation of a health care surrogate for a minor under s. 765.2038, F.S. (See Attachment II).

Other

The bill amends ss. 765.101 and 765.202, F.S., to specify that a right to consent to treatment of an individual (adult or minor) also includes the right to obtain health information regarding that individual.

The bill creates s. 765.101(9), F.S., to define the term “health information” to be consistent with the Health Insurance Portability and Accountability Act.

The bill removes the majority of references to “attending physician” in favor of the term “primary physician”, “evaluating physician” or simply “physician” in statutes related to advance directives, health care surrogates, pain management, palliative care, capacity, living wills, determination of patient condition, persistent vegetative state, and anatomical gifts. This change in terminology should have no practical effect.

The bill defines attending physician as the physician who has primary responsibility for the treatment and care of the patient while the patient receives such treatment or care in a hospital as defined in s. 395.002(12), F.S.

The bill has an effective date of October 1, 2015.
