I. Summary:

SB 1664 prohibits counties and municipalities from levying or collecting special assessments for fire protection services on agricultural lands.

The bill is effective July 1, 2016.

The Revenue Estimating Conference has determined that the bill will reduce local non-ad valorem revenues by \$6.9 million in Fiscal Year 2016-2017, with a \$6.9 million recurring reduction.

II. Present Situation:

Agricultural Property Classification

Section 193.461, F.S., provides that each county's property appraiser shall, for assessment purposes on an annual basis, classify all lands within a county as agricultural or nonagricultural. For land to be classified as agricultural, it must be used "primarily for bona fide agricultural purposes."¹ The term "bona fide agricultural purposes" means good faith commercial agricultural use of the land.² In determining whether the use of the land for agricultural purposes is bona fide, the property appraiser may take the following factors into consideration:

- The length of time the land has been used as agricultural.
- Whether the use has been continuous.
- The purchase price paid.
- Size, as it relates to specific agricultural use, but a minimum acreage may not be required for agricultural assessment.

¹ Section 193.461(3)(b), F.S.

² *Id.*

- Whether an indicated effort has been made to care sufficiently and adequately for the land in accordance with accepted commercial agricultural practices, including fertilizing, liming, tilling, mowing, reforestation, and other accepted agricultural practices.
- Whether the land is under lease and, if so, the effective length, terms, and conditions of the lease.
- Other factors as may become applicable.³

Agricultural purposes include, but are not limited to: horticulture; floriculture; viticulture; forestry; dairy; livestock; poultry; bee; pisciculture, when the land is used principally for the production of tropical fish; aquaculture, including algaculture; sod farming; and all forms of farm products and farm production.⁴

Property appraisers are required to reclassify lands as nonagricultural when they are diverted from an agricultural to a nonagricultural use or no longer utilized for agricultural purposes.⁵

Revenue Sources Based on Home Rule Authority

The Florida Constitution provides local governments with expansive home rule powers. Given these powers, local governments may impose proprietary fees, regulatory fees, and special assessments to pay the cost of providing a facility or service or regulating an activity. The validity of these fees and assessments depends on requirements established in Florida case law.⁶

Special Assessments

Counties and municipalities utilize special assessments as a home rule revenue source to fund certain services and to construct and maintain capital facilities. Section 125.01(1)(r), F.S., authorizes the levy of special assessments for county government. Chapter 170, F.S., authorizes the levy of special assessments by municipal governments. Section 125.271, F.S., authorizes the levy of special assessments by county emergency medical services. Special districts derive their authority to levy special assessments through general law or the special act creating the district.⁷

As established by case law, two requirements exist for the imposition of a valid special assessment: 1) the property assessed must derive a special benefit from the improvement or service provided; and 2) the assessment must be fairly and reasonably apportioned among the properties that receive the special benefit.⁸

The test to be applied in evaluating whether a special benefit is conferred on property by the provision of a service is whether there is a “logical relationship” between the services provided and the benefit to real property.⁹ Many assessed services and improvements have been upheld as

providing the requisite special benefit. Such services and improvements include: garbage disposal,¹⁰ fire protection,¹¹ fire and rescue services,¹² and stormwater management services.¹³

Once an identified service or capital facility satisfies the special benefit test, the assessed amount is required to be fairly apportioned among the benefited properties in a manner consistent with the logical relationship embodied in the special benefit requirement.

Special assessments may be collected on an annual ad valorem tax bill.¹⁴

III. Effect of Proposed Changes:

Section 1 amends s. 125.01, F.S., to prohibit a county from levying or collecting special assessments for the provision of fire protection services on lands classified as agricultural lands under s. 193.461, F.S.

Section 2 amends s. 170.01, F.S., to prohibit a municipality from levying or collecting special assessments for the provision of fire protection services on lands classified as agricultural lands under s. 193.461, F.S.

Section 3 provides that the bill is effective July 1, 2016.

IV. Constitutional Issues:

A. Municipality/County Mandates Restrictions:

This bill reduces the authority of counties and municipalities to raise revenues because it eliminates their ability to levy or collect special assessments for the provision of fire protection services on agricultural lands. Article VII, section 18(b) of the Florida Constitution requires a two-thirds vote of the membership of each house of the Legislature in order to enact a general law that reduces the authority of municipalities and counties to raise revenues in the aggregate. Article VII, section 18(d) of the Florida Constitution provides an exemption if the law is determined to have an insignificant fiscal impact, which for Fiscal Year 2016-2017 is \$2 million or less.^{15, 16} Because the bill is estimated to reduce county and municipal revenues by more than an insignificant amount, the bill may require a two-thirds vote of the membership.
