

**HOUSE OF REPRESENTATIVES
FINAL BILL ANALYSIS**

BILL #:	CS/HB 595	FINAL HOUSE FLOOR ACTION:	
SPONSOR(S):	Health Innovation Subcommittee; Plasencia and others	115 Y's	0 N's
COMPANION BILLS:	CS/SB 580	GOVERNOR'S ACTION:	Approved

SUMMARY ANALYSIS

CS/HB 595 passed the House on March 8, 2016, as CS/SB 580.

Section 466.024(2), F.S., authorizes licensed dental hygienists to perform a limited number of unsupervised remediable tasks in health access settings, such as county health departments, Head Start programs, and other facilities, as defined in s. 466.003(14), F.S. Section 409.906(6), F.S., authorizes the Agency for Health Care Administration (AHCA) to pay for dental services provided to a recipient under age 21, by or under the supervision of a licensed dentist. AHCA interprets s. 409.906(6), F.S., as barring reimbursement for unsupervised tasks performed by licensed dental hygienists pursuant to s. 466.024(2).

HB 595 amends s. 409.906(6), F.S., to expressly authorize reimbursement to the health access setting by Medicaid for the remediable tasks that a licensed dental hygienist is authorized to perform under s. 466.024(2), F.S., without supervision by a licensed dentist, when the services are provided to children under the age of 21 in the Medicaid program.

The bill was approved by the Governor on March 30, 2016, ch. 2016-158, L.O.F., and will become effective on July 1, 2016.

I. SUBSTANTIVE INFORMATION

A. EFFECT OF CHANGES:

Present Situation

Oral Health

Oral health has a significant impact on an individual's physical and mental health. It can influence how individuals grow, enjoy life, look, speak, chew, taste food and socialize, as well as their feelings of social well-being.¹ It can also affect, be affected or contribute to various diseases and conditions including:²

- Endocarditis;
- Cardiovascular disease;
- Diabetes;
- HIV/AIDS;
- Osteoporosis; and
- Alzheimer's disease.

For children, poor oral health can result in pain, discomfort, disfigurement, acute and chronic infections, eating and sleep disruption and an overall reduction of quality of life.³ Children with poorer oral health are also more likely to miss school, have a lower grade-point average and otherwise perform poorly in school.⁴ In fact, one study concluded that visits or dental problems accounted for 117,000 hours of school lost per 100,000 children.⁵

Tooth decay is one of the most common, and easily preventable, chronic conditions of childhood in the United States.⁶ About 20 percent of children aged 5-11 and 13 percent of adolescents aged 12-19 have at least one untreated tooth decay.⁷ The prevalence of tooth decay is more than twice as high, 25 percent compared to 11 percent, for children from low-income families.⁸

Dental Workforce

Currently, there is a national workforce shortage of dentists, and it is projected to worsen in the future. In 2012, there were 190,800 dentists with an estimated need of 197,800 dentists, resulting in a shortage of 7,000 dentists.⁹ By 2025, projections have 202,600 dentists in practice with a need for

211,200 dentists.¹⁰ This projected shortage of 8,600 dentists, combined with the 2012 shortage, results in a shortage of 15,600 dentists by the year 2025. All 50 states and the District of Columbia are projected to have a shortfall of dentists with Florida projected to have the second highest shortfall in the nation (1,152) by 2025.¹¹

Dental hygienists are trending in the opposite direction of dentists. There is currently an excess supply of dental hygienists and by 2025 the national excess supply is projected to be 28,100.¹² Florida again follows the national trend and is projected to have the third largest excess supply of dental hygienists (2,768) by 2025.¹³ However, not all states are projected to have an excess supply.¹⁴

Dental Hygienists

Dental Hygienists are regulated by ch. 466, F.S., and by the Board of Dentistry (Board) within the Department of Health. Dental hygienists are focused on preventing dental disease. They are educated and trained to evaluate the patient's oral health; expose, process and interpret dental X-ray films; and remove calculus deposits, stains, and plaque above and below the gumline.¹⁵ They also apply preventive agents such as fluorides and sealants to teeth when allowed by state regulations.¹⁶ Dental hygienists may also perform certain tasks which are delegated by a licensed dentist. These delegable tasks are established either in statute or by rule and include:¹⁷

- Taking impressions for study casts but not for the purpose of fabricating any intraoral restorations or orthodontic appliance;
- Placing periodontal dressings;
- Removing periodontal or surgical dressings;
- Removing sutures;
- Placing or removing rubber dams;
- Placing or removing matrices;
- Placing or removing temporary restorations;
- Applying cavity liners, varnishes, or bases;
- Polishing amalgam restorations;
- Polishing clinical crowns of the teeth for the purpose of removing stains but not changing the existing contour of the tooth;
- Dental charting¹⁸;
- Obtaining bacteriological cytological specimens not involving cutting of the tissue; and
- Administering local anesthesia pursuant to s. 466.017(5).

The Board establishes by rule whether these tasks are to be performed under direct, indirect, or general supervision of the dentist.¹⁹ A dental hygienist may perform these tasks in multiple settings, including:²⁰

¹⁶ Rule 64B5-16.006, F.A.C.

¹⁷ S. 466.024 (1), F.S.

¹⁸ "Dental charting" is a recording of visual observations of clinical conditions of the oral cavity without the use of X rays, laboratory tests, or other diagnostic methods or equipment, except the instruments necessary to record visual restorations, missing teeth, suspicious areas, and periodontal pockets. S. 466.0235.

¹⁹ S. 466.023(1), F.S. "Direct supervision" means supervision whereby a dentist diagnoses the condition to be treated, a dentist authorizes the procedure to be performed, a dentist remains on the premises while the procedures are performed, and a dentist approves the work performed before dismissal of the patient. "Indirect supervision" means supervision whereby a dentist authorizes the procedure and a dentist is on the premises while the procedures are performed. "General supervision" means supervision whereby a dentist authorizes the procedures which are being carried out but need not be present when the authorized procedures are being performed. The authorized procedures may also be performed at a place other than the dentist's usual place of practice. The issuance of a written work authorization to a commercial dental laboratory by a dentist does not constitute general supervision. S. 466.003 (8), (9) and (10), F.S.

- In the office of a licensed dentist;
- In public health programs and institutions of the Department of Children and Families, Department of Health, and Department of Juvenile Justice under the general supervision of a licensed dentist; and
- In a health access setting.

Scope of Practice in Health Access Settings

In 2011, the Legislature expanded the scope of practice for dental hygienists providing dental services to children under the age of 21 in health access settings²¹ in an effort to maximize the existing dental workforce. The legislation authorized licensed dental hygienists to perform certain remediable tasks in a health access setting without the physical presence, prior examination or authorization of a dentist.²²

These tasks include:

- Perform dental charting as defined in s. 466.0235 and as provided by rule;
- Measure and record a patient's blood pressure rate, pulse rate, respiration rate, and oral temperature;
- Record a patient's case history;
- Apply topical fluorides, including fluoride varnishes, which are approved by the American Dental Association or the Food and Drug Administration;
- Apply dental sealants; and
- Remove calculus deposits, accretions, and stains from exposed surfaces of the teeth and from tooth surfaces within the gingival sulcus.²³

Numerous safeguards are in place to ensure patient safety when unsupervised services are provided in health access settings. For example, when a dental hygienist performs one of the above procedures, the patient must be notified that the visit with the dental hygienist is not a substitute for a comprehensive dental exam.²⁴ Additionally, a dentist is required to conduct an oral examination within 13 months of a dental hygienist removing calculus deposits, accretions, and stains from a patient's teeth.²⁵ Also, a dental hygienist providing such services must maintain professional malpractice insurance coverage that has minimum limits of \$100,000 per occurrence and \$300,000 in the aggregate through the employing health access setting or through an individual policy.²⁶

Reimbursement for Children's Dental Care Services Provided in Health Access Settings

The absence of dentist supervision of the tasks performed by a dental hygienist in a health access setting does not preclude reimbursement for those services. Specifically, s. 466.024(4), F.S., states:

This section does not prevent a program operated by one of the health access settings as defined in s. 466.003 or a nonprofit organization that is exempt from federal income taxation under s. 501(a) of the Internal Revenue Code and described in s. 501(c)(3) of the Internal Revenue Code from billing and obtaining reimbursement for the services described in this section which are provided by a dental hygienist or from making or maintaining any records pursuant to s. 456.057 necessary to obtain reimbursement.

²⁰ S. 466.023(2), F.S.

²¹ "Health access setting" means a program or an institution of the Department of Children and Families, the Department of Health, the Department of Juvenile Justice, a nonprofit community health center, a Head Start center, a federally qualified health center or look-alike as defined by federal law, a school-based prevention program, a clinic operated by an accredited college of dentistry, or an accredited dental hygiene program in this state if such community service program or institution immediately reports to the Board of Dentistry all violations of s. 466.027, s. 466.028, or other practice act or standard of care violations related to the actions or inactions of a dentist, dental hygienist, or dental assistant engaged in the delivery of dental care in such setting. S. 466.003(14), F.S.

²² S. 466.024 (2), F.S.

²³ Id.

²⁴ S. 466.024 (3)(a), F.S.

²⁵ S. 466.024 (2)(f) 2, F.S.

²⁶ S. 466.024 (5)(c), F.S.

As such, programs providing dental care in health access settings may seek reimbursement for specified dental services provided by dental hygienists, irrespective of whether those services were supervised by a dentist.

Medicaid

Medicaid is the health care safety net for low-income Floridians. Medicaid is a partnership of the federal and state governments established to provide coverage for health services for eligible persons. The program is administered by the Agency for Health Care Administration (AHCA) and financed by federal and state funds. AHCA delegates certain functions to other state agencies, including the Department of Children and Families, the Agency for Persons with Disabilities, and the Department of Elderly Affairs.

The structure of each state's Medicaid program varies and what states must pay for is largely determined by the federal government, as a condition of receiving federal funds. Federal law sets the amount, scope, and duration of services offered in the program, among other requirements. These federal requirements create an entitlement that comes with constitutional due process protections. The entitlement means that two parts of the Medicaid cost equation – people and utilization – are largely predetermined for the states: Some populations are entitled to enroll in the program; and enrollees are entitled to certain benefits.

The federal government sets the minimum mandatory benefits to be covered in every state Medicaid program. These benefits include physician services, hospital services, home health services, and family planning.²⁷ States can add benefits, with federal approval. Florida has added many optional benefits, including prescription drugs, dental services, and dialysis.²⁸

Medicaid Reimbursement for Children's Dental Services

Under the Medicaid program, AHCA is statutorily authorized to pay for diagnostic, preventive, or corrective procedures, including orthodontia in severe cases, provided to a recipient under age 21, by or under the supervision of a licensed dentist.²⁹ AHCA interprets this provision as prohibiting reimbursement under the Medicaid program for any delegable tasks³⁰ performed by a dental hygienist or dental assistant unless the task was performed under the supervision of a dentist. This provision predates the dental hygienist scope of practice expansion contained within s. 466.024, F.S., and, as applied by AHCA, functions to limit the scope of practice for dental hygienists in the Medicaid program.

Effect of Proposed Changes

CS/HB 595 amends s. 409.906(6), F.S., to expressly authorize reimbursement to the health access setting by Medicaid for the remediable tasks that a licensed dental hygienist is authorized to perform under s. 466.024(2), F.S., without supervision by a licensed dentist, when the services are provided to children under the age of 21 in the Medicaid program. This allows the Medicaid program and Medicaid recipients to benefit from the dental hygienist scope of practice expansion in s. 466.024(2), F.S.

II. FISCAL ANALYSIS & ECONOMIC IMPACT STATEMENT

A. FISCAL IMPACT ON STATE GOVERNMENT:

1. Revenues:

None.

²⁷ S. 409.905, F.S.

²⁸ S. 409.906, F.S.

²⁹ S. 409.906 (6), F.S.

³⁰ A dentist may delegate remediable tasks to dental hygienists or dental assistants when such tasks pose no risk to the patient.

2. Expenditures:

AHCA would be permitted to reimburse health access settings for remediable tasks performed by licensed dental hygienists, as outlined in s. 466.024(2), F.S., on children under age 21 in the Medicaid program. The majority of the expenditures for this reimbursement would be through Medicaid capitation payments to managed care organizations participating in the MMA program. It is unknown how many services would be provided by licensed dental hygienists in lieu of services provided and reimbursed under the supervision of a dentist, or how many additional services will be provided that would not have been provided before, but for this bill. Any additional costs to managed care organizations would not be reflected in the capitation rates for at least one year as capitation rates are set each September. Additionally, the increased costs would likely be minimal and result in an immaterial increase or no increase at all to managed care capitation rates.

B. FISCAL IMPACT ON LOCAL GOVERNMENTS:

1. Revenues:

None.

2. Expenditures:

None.

C. DIRECT ECONOMIC IMPACT ON PRIVATE SECTOR:

Health access settings may be reimbursed for remediable tasks performed by licensed dental hygienists, as authorized under s. 466.024(2), F.S., on children under age 21 in the Medicaid program.

D. FISCAL COMMENTS:

In Fiscal Year 2014-15 AHCA reported that approximately \$16.2 million was reimbursed to health care access settings under the supervision of a dentist either through the fee-for-service system or through encounters with managed care organizations under contract with AHCA.
