COMMITTEE SUBSTITUTE - Substantial Changes

I. Summary:

CS/SB 936 encourages the use of state-of-the-art digital devices to assist law enforcement, correctional, or other public safety officials in quickly identifying individuals who have been diagnosed with autism, an autism spectrum disorder, or a related developmental disability and notifying the family members, caregivers, and primary intervention professionals of these individuals when a crisis occurs.

The bill provides that, unless extenuating circumstances exist, a psychiatrist, psychologist, mental health counselor, special education instructor, clinical social worker, speech therapist, or related professional who have experience in treating, teaching, or assisting persons with autism, an autism spectrum disorder, or a related developmental disability must be present to assist law enforcement and other public safety officials during all interviews of an individual with autism or autism spectrum disorder, or related developmental disability, whether the individual being interviewed is the victim of a crime, the suspect in a crime, or the defendant formally accused of a crime. It requires law enforcement officers or other public safety officers to document the interview in writing when a professional is not available and make a professional available as soon as practicable. The bill provides that the cost of the professional must be borne by the individual.

The cost of any delay occasioned by the requirements of the bill that certain professionals be present during interviews of individuals with autism, autism spectrum disorder or a related developmental disability is unknown.

The bill has an effective date of July 1, 2016.

II. Present Situation:

The Center for Disease Control (CDC) estimates that one in 68 children have been identified with Autism Spectrum Disorder (ASD).¹ The CDC defines “Autism spectrum disorder” as a developmental disability that can cause significant social, communication, and behavioral challenges. Though there is nothing about how persons who have been diagnosed with ASD look that sets them apart from other people, the CDC states that people with ASD may communicate, interact, behave, and learn in ways that are different from most other people. The range of abilities of people with ASD can span from gifted to severely challenged.²

Though formerly diagnosed separately, autistic disorder, pervasive developmental disorder, and Asperger syndrome are now included in the diagnosis of ASD.³

Florida law includes the following definitions:

“Autism” is a pervasive, neurologically based developmental disability of extended duration which causes severe learning, communication, and behavior disorders with age of onset during infancy or childhood. Individuals with autism exhibit impairment in reciprocal social interaction, impairment in verbal and nonverbal communication and imaginative ability, and a markedly restricted repertoire of activities and interests.⁴

“Developmental disability” is a disorder or syndrome that is attributable to intellectual disability, cerebral palsy, autism, spina bifida, or Prader-Willi syndrome; that manifests before the age of 18; and that constitutes a substantial handicap that can reasonably be expected to continue indefinitely.⁵

“Autism spectrum disorder” is any of the following disorders as defined in the most recent edition of the Diagnostic and Statistical Manual of Mental Disorders of the American Psychiatric Association:

1. Autistic disorder;
2. Asperger’s syndrome; and
3. Pervasive developmental disorder not otherwise specified.⁶

⁴ Section 393.063(3), F.S.

⁵ Section 393.063(9), F.S.

⁶ Sections 627.6686(2)(b) and 641.31098(2), F.S.

III. Effect of Proposed Changes:

The bill, cited the act as the “Wes Kleinert Fair Interview Act,” encourages the use of state-of-the-art digital devices, such as bracelets, necklaces, and pocket cards that are similar to those kept upon the person of individuals who have certain medical conditions or age-related disabilities, to assist law enforcement, correctional, or other public safety officials and other concerned persons in quickly identifying individuals who have been diagnosed with autism, an autism spectrum disorder, or a related developmental disability and notifying the family members, caregivers, and primary intervention professionals of these individuals when a crisis occurs.

The bill provides that, unless extenuating circumstances exist, a psychiatrist, psychologist, mental health counselor, special education instructor, clinical social worker, speech therapist, or related professional that have experience in treating, teaching, or assisting persons with autism, an autism spectrum disorder, or a related developmental disability be present to assist law enforcement and other public safety officials during all interviews of an individual with autism, an autism spectrum disorder or related developmental disability, whether the individual being interviewed is the victim of a crime, the suspect in a crime, or the defendant formally accused of a crime. It provides for law enforcement officers or other public safety officers to document the interview in writing when a professional is not available and make a professional available as soon as practicable. It provides that the cost of the professional must be borne by the individual.

IV. Constitutional Issues:

A. Municipality/County Mandates Restrictions:

None.

B. Public Records/Open Meetings Issues:

None.

C. Trust Funds Restrictions:

None.

V. Fiscal Impact Statement:

A. Tax/Fee Issues:

None.

B. Private Sector Impact:

An individual with autism, an autism spectrum disorder or a related developmental disability will be responsible for the cost of the professionals required during interviews of persons with those disorders. The cost of the professionals required by CS/SB 936 is unknown.

C. Government Sector Impact:

None.

VI. Technical Deficiencies:

The cost of any delay occasioned by the requirements of the bill that certain professionals be present during interviews of individuals with autism, autism spectrum disorder or a related developmental disability is unknown.

VII. Related Issues:

None.

VIII. Statutes Affected:

This bill does not include sections of the Florida Statutes.

IX. Additional Information:

A. Committee Substitute – Statement of Changes:

(Summarizing differences between the Committee Substitute and the prior version of the bill.)

CS by Criminal Justice on February 1, 2016:

The Committee Substitute includes speech therapists in the list of trained professionals that can be present to assist law enforcement and other public safety officials whether the individual being interviewed is the victim of a crime, the suspect in a crime, or the defendant formally accused of a crime. It provides for law enforcement officers or other public safety officers to document the interview in writing when a professional is not available and make a professional available as soon as practicable. It provides that the cost of the professional shall be borne by the individual.

B. Amendments:

None.
