Senator Lee moved the following:

Senate Amendment (with title amendment)

Between lines 141 and 142

insert:

Section 5. (1) The legislature intends that this act ensure a balance between the need for transmission lines with the broad interests of the public in order to effect a reasonable balance between the need for a facility as a means of providing reliable, economical, and efficient electric energy and the impact on the public and the environment resulting from the location of the transmission line corridor and the construction,

820426

12 operation, and maintenance of the transmission lines.
13 (2) This act does not preclude or limit any local
14 government in whose jurisdiction a proposed electrical power
15 plant or transmission line is to be located from preparing a
16 report in accordance with s. 403.507, Florida Statutes, or s.
17 403.526, Florida Statutes, as to the consistency of the proposed
18 electrical power plant or transmission line with local
19 ordinances, regulations, standards, or criteria that apply to
20 the proposed electrical power plant or transmission line,
21 including applicable local environmental regulations adopted
22 pursuant to s. 403.182, Florida Statutes, or by other means.
