COMMITTEE SUBSTITUTE - Technical Changes

---

**I. Summary:**

CS/SB 1186 is the implementing bill for SJR 1182, which proposes an amendment to the Florida Constitution to authorize the Legislature to prohibit an increase in the assessed value of residential property as a result of any change or improvement made to improve the property's resistance to flood damage.

The bill provides that the assessed value of residential property may not increase if the property is voluntarily elevated to meet National Flood Insurance Program and Florida Building Code elevation requirements.

The Revenue Estimating Conference determined that the bill will reduce local government revenue by \$5.8 million beginning in Fiscal Year 2023-2024, with a \$25.1 million recurring reduction.

The bill will take effect on the effective date of the amendment proposed by SJR 1182 or a similar joint resolution having substantially the same specific intent and purpose. If approved by the electors, the proposed amendment (SJR 1182) and CS/SB 1186 will take effect on January 1, 2023.

## II. Present Situation:

### General Overview of Property Taxation

The ad valorem tax or “property tax” is an annual tax levied by counties, municipalities, school districts, and some special districts. The tax is based on the taxable value of property as of January 1 of each year.<sup>1</sup> The property appraiser annually determines the “just value”<sup>2</sup> of property within the taxing jurisdiction and then applies relevant exclusions, assessment limitations, and exemptions to determine the property’s “taxable value.”<sup>3</sup> Tax bills are mailed in November of each year based on the previous January 1 valuation and payment is due by March 31.

The Florida Constitution prohibits the state from levying ad valorem taxes on real estate or tangible personal property,<sup>4</sup> and it limits the Legislature’s authority to provide for property valuations at less than just value, unless expressly authorized.<sup>5</sup> For example, the Legislature may prohibit from increasing the assessed value of residential property those improvements made to enhance the property’s resistance to wind damage or installations of solar or renewable energy source devices.<sup>6</sup> Currently, the Legislature has implemented the assessment limitation for the installation of renewable energy source devices.<sup>7</sup>

### Changes, Additions, and Improvements to Real Property

In general, changes, additions, or improvements to real property are assessed at just value as of the first January 1 after they are substantially completed.<sup>8</sup> However, when property is damaged or destroyed by calamity or misfortune, the property may be repaired or replaced without the change, addition, or improvement being assessed at just value; rather, the change, addition, or improvement is assigned the taxable value and other tax characteristics (i.e. assessment limitation) that the damaged or replaced property had before being damaged or destroyed. This treatment has certain limitations. For instance, the change, addition, or improvement may not exceed 110 percent of the square footage of the property before it was damaged or destroyed.<sup>9</sup> Any square footage greater than 110 percent of the replaced property is assessed at just value. For residential property, the 110 percent limitation does not apply if the change, addition, or improvement is made to property no larger than 1,500 square feet.<sup>10</sup>

---

<sup>1</sup> Both real property and tangible personal property are subject to tax. Section 192.001(12), F.S., defines “real property” as land, buildings, fixtures, and all other improvements to land. Section 192.001(11)(d), F.S., defines “tangible personal property” as all goods, chattels, and other articles of value capable of manual possession and whose chief value is intrinsic to the article itself.

<sup>2</sup> Property must be valued at “just value” for purposes of property taxation, unless the Florida Constitution provides otherwise. FLA. CONST. art VII, s. 4. Just value has been interpreted by the courts to mean the fair market value that a willing buyer would pay a willing seller for the property in an arm’s-length transaction. See *Walter v. Shuler*, 176 So. 2d 81 (Fla. 1965); *Deltona Corp. v. Bailey*, 336 So. 2d 1163 (Fla. 1976); *Southern Bell Tel. & Tel. Co. v. Dade County*, 275 So. 2d 4 (Fla. 1973).

<sup>3</sup> See s. 192.001(2) and (16), F.S.

<sup>4</sup> FLA. CONST. art. VII, s. 1(a).

<sup>5</sup> See FLA. CONST. art. VII, s. 4.

<sup>6</sup> FLA. CONST. art. VII, s. 4(i).

<sup>7</sup> Section 193.624, F.S.

<sup>8</sup> Sections 193.155(4)(a), 193.1554(6)(a), and 193.1555(6)(a), F.S.

<sup>9</sup> Sections 193.155(4)(b), 193.1554(6)(b), and 193.1555(6)(b), F.S.

<sup>10</sup> Sections 193.155(4)(b), F.S.

## Resistance to Flood Damage

Hurricanes and severe storms cause flooding throughout Florida and sea-level rise may increase the potency of flood damage over time.<sup>11</sup> As of 2019, Florida held over one-third of the flood insurance policies issued by the National Flood Insurance Program (NFIP), a federal entity created in 1968 to provide standardized flood insurance.<sup>12</sup> According to the Federal Emergency Management Agency (FEMA), 1,719,376 properties in Florida are at risk of flooding in a 100-year storm.<sup>13</sup>

Flood damage can be mitigated via multiple strategies. These might include large structural mitigation public works projects, such as dams, seawalls, levees.<sup>14</sup> Mitigation can also include improvements made to individual properties, such as elevating structures, filling basements, and waterproofing.<sup>15</sup> They might also include non-structural mitigation as well, such as maintaining land to allow for storm water runoff, waterproofing basements, installing check valves capable of preventing water backup, and elevating furnaces, heaters, and electrical panels.<sup>16</sup>

## Voluntary Property Elevation

Surveyors and architects use Flood Insurance Rate Maps, maps produced by FEMA which delineate base flood elevations,<sup>17</sup> to determine minimum building height. Buildings constructed before a community was under elevation regulations or before FEMA produced the area's first flood map may now be considered below safe elevation, and at high risk for flood damage.

Buildings may be raised after construction either by lifting an existing house and constructing a new foundation below, or by leaving the house in place and building an elevated floor within the house or adding an upper story.<sup>18</sup> When a house is lifted, its new foundation may be made of continuous walls, or columns or pilings which would allow access to the area below the newly elevated house.<sup>19</sup>

### *NFIP Elevation Certificate*

An NFIP Elevation Certificate is a form produced by FEMA used to provide information which can ensure compliance with community floodplain ordinances, determine a property's insurance rate, and be used as evidence to have a FEMA flood plain map altered.<sup>20</sup> An elevation certificate must in most cases be completed by a licensed land surveyor, engineer, architect, or designated local official.<sup>21</sup> The completed document includes location and elevation data from the property, the corresponding Flood Insurance Rate Map, community information, and photographic proof elevation certificates that are typically required when new construction or substantial improvements occur on a property resting at least in part or below a limit set by local authorities. Nationwide, the average cost for having an elevation certificate completed is on average \$600.<sup>22</sup>

### *Florida Building Code Elevation Requirements*

The Florida Building Code requires the construction or reconstruction of residential properties follow specific guidelines to mitigate potential damage that might be caused by flood waters in areas designated as “flood hazard areas” and “coastal high-hazard areas.” For example, buildings in flood hazard areas must have their lowest floors elevated above the base flood elevation plus one foot, or the design flood elevation, whichever is higher.<sup>23</sup>

## **III. Effect of Proposed Changes:**

**Sections 1 and 2** amend ss. 193.155 and 193.1554, F.S., respectively, to provide that the assessed value of a residential property may not increase if the property is voluntarily elevated to meet NFIP and Florida Building Code elevation requirements and the square footage of the property, as improved, does not exceed 110 percent of the original square footage.

The area below an elevated structure that is created as a result of elevating the property may not be included in the property's 110 percent calculation when it is solely designated for parking, storage, or access and does not exceed 110 percent of the original property's square footage.

In addition, the assessed value may not increase if the total square footage of the property as elevated does not exceed 1,500 square feet.

The portions of property in excess of these limits are subject to assessment at just value.

To qualify for this assessment limitation, the owner must provide the property appraiser with elevation certificates for both the original and elevated property.

The bill defines “voluntary elevation” to mean the elevation of an existing nonconforming property or the removal and rebuilding of a nonconforming property.

<sup>23</sup> International Code Council, Inc., *2020 Florida Building Code, Residential, 7th Edition*, (July 2020), Section 322.2.1, available at: [https://floridabuilding.org/bc/bc\\_default.aspx](https://floridabuilding.org/bc/bc_default.aspx) (last visited April 8, 2021).

**Section 3** reenacts s. 193.1557, F.S., for the purpose of incorporating the amendments made to ss. 193.155 and 193.1554, F.S.

**Section 4** provides that the bill takes effect on the effective date of SJR 1182 or a similar joint resolution having substantially the same specific intent and purpose, if such amendment to the Florida Constitution is approved at the general election<sup>24</sup> held in November 2022, or at an earlier special election specifically authorized by law for that purpose.

#### IV. Constitutional Issues:

##### A. Municipality/County Mandates Restrictions:

Article VII, s. 18(b) of the Florida Constitution provides that, except upon the approval of each house of the Legislature by a two-thirds vote of the membership, the Legislature may not enact, amend, or repeal any general law if the anticipated effect of doing so would be to reduce the authority that municipalities or counties have to raise revenue in the aggregate, as such authority existed on February 1, 1989. However, the mandates requirements do not apply to laws having an insignificant impact,<sup>25, 26</sup> which for Fiscal Year 2021-2022 is forecast at approximately \$2.2 million.<sup>27</sup>

The Revenue Estimating Conference determined that the bill will reduce local government revenues by \$5.8 million beginning in Fiscal Year 2023-2024 and by \$25.1 million thereafter. Therefore, this bill may be a mandate subject to the requirements of Art. VII, s. 18(b) of the Florida Constitution.

##### B. Public Records/Open Meetings Issues:

None.

##### C. Trust Funds Restrictions:

None.

##### D. State Tax or Fee Increases:

This bill does not create or raise state taxes or fees. Therefore, the requirements of Art. VII, s. 19 of the Florida Constitution do not apply.

---

<sup>24</sup> Section 97.021(16), F.S., defines “general election” as an election held on the first Tuesday after the first Monday in November in the even-numbered years, for the purpose of filling national, state, county, and district offices and for voting on constitutional amendments not otherwise provided for by law.

<sup>25</sup> FLA. CONST. art. VII, s. 18(d).

<sup>26</sup> An insignificant fiscal impact is the amount not greater than the average statewide population for the applicable fiscal year multiplied by \$0.10. See Florida Senate Committee on Community Affairs, *Interim Report 2012-115: Insignificant Impact*, (September 2011), available at: <http://www.flsenate.gov/PublishedContent/Session/2012/InterimReports/2012-115ca.pdf> (last visited Feb. 03, 2021).

<sup>27</sup> Based on the Demographic Estimating Conference’s April 1, 2021, estimated population adopted on Nov. 13, 2020. The conference packet is available at <http://edr.state.fl.us/Content/conferences/population/ConferenceResults.pdf> (last visited Feb. 03, 2021).

E. Other Constitutional Issues:

None identified.

V. **Fiscal Impact Statement:**

A. Tax/Fee Issues:

The Revenue Estimating Conference analyzed the impact of a substantively identical House bill (CS/HB 1379) and determined that the provisions of the bill will reduce local government revenue by \$5.8 million beginning in Fiscal Year 2023-2024, with a \$25.1 million recurring reduction.<sup>28</sup>

B. Private Sector Impact:

If the proposed amendment (SJR 1182) is approved by 60 percent of voters in November 2022, homeowners will be able to voluntarily elevate their residential property without increasing the property's assessed value.

C. Government Sector Impact:

None.

VI. **Technical Deficiencies:**

None.

VII. **Related Issues:**

None.

VIII. **Statutes Affected:**

This bill substantially amends sections 193.155 and 193.1554 of the Florida Statutes.

This bill reenacts section 193.1557 of the Florida Statutes.

IX. **Additional Information:**

A. Committee Substitute – Statement of Changes:

(Summarizing differences between the Committee Substitute and the prior version of the bill.)

**CS by Community Affairs on March 10, 2021:**

The committee substitute inserts the bill number for the senate joint resolution to which this bill is linked.
