2) State Affairs Committee			

SUMMARY ANALYSIS

The Federal Emergency Management Agency's (FEMA) Public Assistance (PA) Program provides federal assistance to state, local, territorial, and tribal governments as well as certain private nonprofit organizations for the recovery from presidentially declared disasters or emergencies. In order to access assistance under the PA program, the Governor must request the President of the United States to issue a presidential disaster declaration. Joint Preliminary Damage Assessments (JPDA) must accompany the Governor's declaration request. JPDA's document the impact and magnitude of an event. FEMA uses JPDA information to determine the estimated cost of assistance under the PA program. FEMA compares the estimated cost of assistance against the population to give some measure of the per capita impact, these are known as per capita impact indicators. FEMA uses per capita impact indicators when determining whether or not to recommend that the President declare a disaster. Once the President signs a disaster declaration, FEMA may begin allocating disaster assistance funds to the state.

Beginning in 1986, the per capita impact indicator was set at \$1, but has been adjusted for inflation since 1999. Florida's per capita impact indicator for fiscal year 2020 was \$1.53. FEMA is proposing a new rule which would increase Florida's per capita impact indicator to \$1.98. The new threshold is an increase of 49.5% from the state's current baseline. Because of the substantial increase in Florida's threshold, the proposed rule may result in fewer disaster declarations, resulting in a decrease in federal disaster assistance.

The memorial urges FEMA amend the proposed rule to provide for a gradual increase in the per capita impact indicator.

Legislative memorials are not subject to the Governor's veto powers and are not presented to the Governor for review. Memorials have no force of law, as they are mechanisms for formally petitioning the federal government to act on a particular subject.

This memorial does not have a fiscal impact on the state or local governments.

FULL ANALYSIS

I. SUBSTANTIVE ANALYSIS

A. EFFECT OF PROPOSED CHANGES:

Background

FEMA's Public Assistance Program

The Robert T. Stafford Disaster Relief Act and Emergency Assistance Act (Stafford Act) authorizes the President to provide federal assistance when the magnitude of an incident or threatened incident exceeds the affected state, local, territorial, and tribal government capabilities to respond and recover.¹ The Federal Emergency Management Agency's (FEMA) Public Assistance (PA) Program provides federal assistance to state, local, territorial, and tribal governments as well as certain private nonprofit organizations for the recovery from presidentially declared disasters or emergencies.² Through the PA Program, FEMA provides assistance for debris removal, emergency protective measures, and the restoration of disaster-damaged facilities.³ The PA Program also encourages the protection of damaged facilities from future incidents through mitigation measures.⁴

In Florida, FEMA funds are distributed and managed by the Florida Division of Emergency Management (the division) as the pass-through entity. Since January 2019, the division has distributed more than \$846 million in PA funds to recipients affected by Hurricane Michael and more than \$1.6 billion in PA funds for Hurricane Irma.⁵

To access the PA Program, the Governor must request the President of the United States to issue a presidential disaster declaration.⁶ There are two types of presidential disaster declarations, emergency declarations and major disaster declarations, depending on the event's severity.⁷

If a presidential disaster declaration is necessary, the Governor must request a Joint Preliminary Damage Assessment (JPDA) with FEMA.⁸ JPDA's accompany the request for a presidential disaster declaration. During a JPDA, local, state, and FEMA officials work together to estimate and document the impact and magnitude of an event.⁹ FEMA uses JPDA information to determine the estimated cost of assistance under the PA Program. FEMA compares the estimated cost of assistance against the population to give some measure of the per capita impact, these are known as per capita impact indicators.¹⁰ FEMA uses per capita impact indicators when determining whether or not to recommend that the President declare a disaster. Once the President signs a disaster declaration, FEMA may begin allocating disaster assistance funds to the state.

Florida's Per Capita Impact Indicator

Beginning in 1986, the per capita impact indicator was set at \$1.¹¹ The per capita indicator remained at \$1 until 1999, when FEMA began adjusting the indicator for inflation.¹² Florida's per capita impact indicator for fiscal year 2020 was \$1.53 per capita. As such, in order for Florida to be eligible for a

presidential disaster declaration to make the state eligible for FEMA assistance, estimated cost of assistance must exceed \$28,766,004.30 per disaster.

FEMA is proposing a rule entitled “Cost of Assistance Estimates in the Disaster Declaration Process for the Public Assistance Program” (proposed rule) which raises the per capita impact indicator.¹³ The proposed rule increases Florida’s per capita impact indicator to \$1.98.¹⁴ Per the proposed rule, Florida’s estimated cost of assistance must exceed the new threshold of \$42,172,664. The new threshold is an increase of 49.5% from the state’s current baseline.

	Per Capita Indicator	State Threshold
Fiscal Year 2020	\$1.53	\$28,766,004.30
Proposed Change	\$1.98	\$42,172,664.00

FEMA’s purpose for implementing the changes is to provide for a better distribution of responsibilities between states and the federal government and to incentivize states to invest more in response, recovery, and mitigation activities.¹⁵ Because of the substantial increase in Florida’s threshold, the proposed rule may result in fewer disaster declarations, resulting in a decrease in federal disaster assistance.

Effect of the Memorial

The memorial urges FEMA to amend the proposed rule to provide for a gradual increase in the per capita impact indicator.

Copies of the memorial will be sent to the President of the United States, to the Administrator of FEMA, to the President of the United States Senate, to the Speaker of the United States House of Representatives, and to each member of the Florida delegation to the United States Congress.

Legislative memorials are not subject to the Governor’s veto power and are not presented to the Governor for review. Memorials have no force of law, as they are mechanisms for formally petitioning the federal government to act on a particular subject.
