

1 A bill to be entitled
 2 An act relating to public records; amending s.
 3 119.0713, F.S.; providing an exemption from public
 4 records requirements for certain information held by a
 5 utility owned or operated by a unit of local
 6 government; providing definitions; providing
 7 retroactive application; providing for future
 8 legislative review and repeal of the exemption;
 9 providing a statement of public necessity; providing
 10 an effective date.

11
 12 Be It Enacted by the Legislature of the State of Florida:

13
 14 Section 1. Subsection (5) of section 119.0713, Florida
 15 Statutes, is amended to read:

16 119.0713 Local government agency exemptions from
 17 inspection or copying of public records.—

18 (5) (a) The following information held by a utility owned
 19 or operated by a unit of local government is exempt from s.
 20 119.07(1) and s. 24(a), Art. I of the State Constitution:

21 1. Information related to the security of the technology,
 22 processes, or practices of a utility owned or operated by a unit
 23 of local government that are designed to protect the utility's
 24 networks, computers, programs, and data from attack, damage, or
 25 unauthorized access, which information, if disclosed, would

26 facilitate the alteration, disclosure, or destruction of such
27 data or information technology resources.

28 2. Information related to the security of existing or
29 proposed information technology systems or industrial control
30 technology systems of a utility owned or operated by a unit of
31 local government, which, if disclosed, would facilitate
32 unauthorized access to, and alteration or destruction of, such
33 systems in a manner that would adversely impact the safe and
34 reliable operation of the systems and the utility.

35 3. Information related to threat detection, defense,
36 deterrence, or response plans and actions for information
37 technology and operational technology systems of a utility owned
38 or operated by a unit of local government, including, but not
39 limited to, plans and actions made or taken in response to a
40 ransomware attack or cyberattack on or threat to information
41 technology or operational technology systems.

42 4. Information related to insurance or other risk
43 mitigation products or coverages, including, but not limited to,
44 deductible or self-insurance amounts, coverage limits, and
45 policy terms and conditions, for the protection of the
46 information technology and operational technology systems and
47 data of a utility owned or operated by a unit of local
48 government.

49 5. Critical energy infrastructure information created or
50 received by a utility owned or operated by a unit of local

51 government. As used in this subparagraph, the term:

52 a. "Critical energy infrastructure information" means
53 specific engineering, vulnerability, or detailed design
54 information about proposed or existing critical infrastructure
55 which:

56 (I) Includes details about the production, generation,
57 transportation, transmission, or distribution of energy;

58 (II) Could be useful in planning an attack on critical
59 infrastructure; and

60 (III) Provides more detailed location information than the
61 general location of the critical infrastructure.

62 b. "Critical infrastructure" means existing and proposed
63 systems and assets, whether physical or virtual, the incapacity
64 or destruction of which would negatively affect security,
65 economic security, public health, or public safety.

66 6.3. Customer meter-derived data and billing information
67 in increments less than one billing cycle.

68 (b) This exemption applies to such information held by a
69 utility owned or operated by a unit of local government before,
70 on, or after the effective date of this exemption.

71 (c) This subsection is subject to the Open Government
72 Sunset Review Act in accordance with s. 119.15 and shall stand
73 repealed on October 2, 2027 ~~2024~~, unless reviewed and saved from
74 repeal through reenactment by the Legislature.

75 Section 2. The Legislature finds that it is a public

76 necessity that information held by a utility owned or operated
77 by a unit of local government and relating to the utility's
78 threat detection, defense, or deterrence of increasing
79 ransomware attacks or cyberattacks from foreign or domestic
80 terrorists; information regarding the insurance coverage
81 amounts, premium amount paid, self-insurance amounts, and policy
82 terms and conditions of such cybersecurity insurance policies
83 held by a utility owned or operated by a unit of local
84 government; and critical energy infrastructure information
85 created or received by the utility which consists of details
86 about the production, generation, transportation, transmission,
87 or distribution of energy be made exempt from s. 119.07(1),
88 Florida Statutes, and s. 24(a), Article I of the State
89 Constitution. Such information held by a utility owned or
90 operated by a local government is critical information, the
91 release of which could lead to extreme danger or harm to the
92 citizens of this state. Typical critical energy infrastructure
93 information held by a utility consists of critical asset
94 location, vulnerable electric grid transmission information,
95 emerging technologies utilized by the utility to prevent a
96 cyberattack, and secure information that utilities in the state
97 share with regional and federal entities. The exposure or leak
98 of such information could lead to interruptions in the delivery
99 of essential services, as well as financial or physical harm to
100 the citizens of the state. Critical energy infrastructure

101 information has been defined and codified in law in over half of
102 the states in the United States of America in conjunction with
103 the Federal Energy Regulatory Commission. Utilities in the state
104 have recently been attacked by criminals who hold hostage
105 critical data and operability of the utility for ransom. Public
106 disclosure of insurance coverages provides information to
107 potential attackers as to the monetary limits to which they may
108 seek ransom from these utilities. These vulnerabilities leave
109 all utilities owned and operated by a unit of local government,
110 which control water, electricity, wastewater, and natural gas
111 utilities throughout this state, exposed to cyberattacks and
112 ransom demands. The Legislature finds that the harm that may
113 result from the release of such information outweighs any public
114 benefit that may be derived from disclosure of the information.

115 Section 3. This act shall take effect July 1, 2022.
