<b>DELETE</b>	<b>INSERT</b>

GOVERNOR, EXECUTIVE OFFICE OF THE  
 Program: Emergency Management  
 Emergency Prevention, Preparedness And  
 Response 31700100

In Section 06 On Page 359

At the end of existing proviso language, INSERT:

In order to properly store, manage, maintain, and deploy emergency supplies during emergency activations and responses, the Division of Emergency Management shall solicit procurement proposals for the lease, acquisition, or construction of warehouse storage space as well as an inventory management solution. Proposals must be from experienced providers who can demonstrate successful past performance of projects similar in size, scope, and complexity. Proposals should address:

1. The integration and colocation of the Division of Emergency Management and the Department of Health warehouses into a new, fully-licensed and regulatory-compliant warehouse footprint with facilities at various geographic locations that meet the state's strategic needs for safety and distribution.
2. The capability of the warehouse facilities to store emergency supplies, including food and water, health and medical supplies, and medical equipment, including personal protective equipment, in the

correct environment with appropriate security, temperature, and humidity controls and in compliance with licensing and regulatory standards. Facility square footage shall be sufficient to access, maintain, inventory and distribute such supplies, which includes a PPE inventory pursuant to section 252.35(2)(u), Florida Statutes.

3. A staffing plan that ensures facility staff have appropriate knowledge, skills, and training to maintain, organize, identify, and package all types of emergency supplies, including medical equipment.

4. An inventory management system that tracks and traces, in real-time, the state's emergency supplies. The system must be able to track the number, type, location, and expiration date of supplies in real-time; facilitate the regular testing, maintenance, and rotation of supplies and equipment; and provide real-time reporting to assist in the state's emergency response.

Proposals should identify the one-time and on-going costs associated with site selection and preparation, design and construction, retrofitting or renovations, leasing, utilities, software, and staffing, as appropriate. A proposal for an inventory management system is not required to be bundled with a proposal for the lease, acquisition, or construction of warehouse storage space. The Division shall develop a report that summarizes the proposals received; compares the costs and benefits of the proposals to the existing storage model; and identifies the most appropriate and cost-effective solution. The report shall be submitted to the Governor, the President of the Senate, and the Speaker of the House of Representatives by January 15, 2023.

Line item amendments are accepted as part of the amendatory process. However, due to the necessity of using computerized systems this may entail a different placement within a budget entity or the renumbering of the specific appropriation items.
