

**The Florida Senate**  
**BILL ANALYSIS AND FISCAL IMPACT STATEMENT**

(This document is based on the provisions contained in the legislation as of the latest date listed below.)

---

Prepared By: The Professional Staff of the Committee on Transportation

---

BILL: SB 906

INTRODUCER: Senator Brandes

SUBJECT: Fleet Management

DATE: February 1, 2022

REVISED: \_\_\_\_\_

	ANALYST	STAFF DIRECTOR	REFERENCE	ACTION
1.	Proctor	Vickers	TR	<b>Pre-meeting</b>
2.			AEG	
3.			AP	

---

**I. Summary:**

SB 906 requires the Department of Management Services (DMS) to prepare an inventory of all state-owned motor vehicles, maintenance facilities, and fuel depots. The inventory must be submitted to the Governor, President of the Senate, and Speaker of the House of Representatives by December 31, 2022.

The bill requires the DMS to create, administer, and maintain a centralized management system for the fleet of state-owned motor vehicles, maintenance facilities, and fuel depots. The DMS is also required to consolidate under a centralized system the management of existing motor vehicles, maintenance facilities, fuel depots, and any full-time equivalent positions associated with state-owned facilities and fuel depots.

Each state agency and state university must provide information to the DMS necessary for consolidating the management of existing vehicles, maintenance facilities, fuel depots, and personnel under the centralized system.

The bill requires the DMS to contract with a vendor or contractor for privatizing the centralized management and operation of the state-owned motor vehicle fleet, motor vehicle acquisitions, maintenance facilities, and fuel depots.

The DMS may incur indeterminate costs associated with creating and maintaining the centralized system, along with the process of privatizing with a vendor or contractor. See Section V. Fiscal Impact Statement.

The bill takes effect upon becoming law.

## II. Present Situation:

### Acquisition, Assignment, and Use of Motor Vehicles and Watercraft

The DMS has the authority to adopt and enforce rules for the efficient and safe use, operation, maintenance, repair, disposal, and replacement of all state-owned or state-leased aircraft, watercraft and motor vehicles assigned.<sup>1</sup> Rules 60B-1.001–1.013, F.A.C., provide for the acquisition, assignment, and use of motor vehicles owned by the state.<sup>2</sup>

No state agency can purchase, lease, or acquire any motor vehicle, watercraft, or aircraft of any type unless prior approval from the DMS. The DMS approval is not required for the short-term lease of motor vehicles by state agencies.<sup>3</sup> Special authorization, with approval from the DMS, is given to the Department of Children and Families, the Agency for Persons with Disabilities, and the Department of Corrections to secure motor vehicles for use at residential facilities, centers, and county health departments.<sup>4</sup>

All state-owned or leased vehicles will be assigned to and operated in conformance with the regulations pertaining to one of the following classes of assignment:

- Class A – Pool assignment,<sup>5</sup>
- Class B – Limited use assignment,<sup>6</sup> and
- Class C – Special assignment.<sup>7</sup>

Except when otherwise specifically authorized by law, all state-owned vehicles are required to carry an official state license plate.<sup>8</sup>

### Bureau of Fleet Management and Federal Property Assistance

The Bureau of Fleet Management (Bureau) within the Division of Specialized Services provides oversight responsibility for the state's fleet of motor vehicles and mobile equipment, along with the federal surplus property program. The Bureau's programs include fleet management, federal property assistance, and aircraft operations.<sup>9</sup>

---

<sup>1</sup> Section 287.16(6), F.S. establishes rule making authority for the Department of Management Services.

<sup>2</sup> Rules 60B-1.001 – 60B-1.013, F.A.C.

<sup>3</sup> Section 287.15, F.S.

<sup>4</sup> Section 287.155, F.S.

<sup>5</sup> Rule 60B-1.006, F.A.C., defines "pool vehicle assignment" to mean vehicles which are centrally controlled and made available for specific trips and returned to the pool upon completion of the trips.

<sup>6</sup> Rule 60B-1.007, F.A.C., defines "limited use assignment" to mean State-owned or leased passenger vehicles required by an employee or position to conduct official state business and which are required for use 15 or more work days per month but do not classify as special assignment vehicles.

<sup>7</sup> Rule 60B-1.008, F.A.C., defines "special assignment" to mean vehicles which are state-owned or leased vehicles and are: 1) officially authorized as a prerequisite by the Department of Management Services, 2) required by an employee after normal duty hours to perform duties of the position to which he is assigned, or 3) assigned to an employee whose home is his official base of operation

<sup>8</sup> Section 287.16, F.S.

<sup>9</sup> The Department of Management Services, *Fleet Management and Federal Property Assistance*, available at [https://www.dms.myflorida.com/business\\_operations/fleet\\_management\\_and\\_federal\\_property\\_assistance](https://www.dms.myflorida.com/business_operations/fleet_management_and_federal_property_assistance) (last visited, January 28, 2022).

The Bureau oversees fleet management, which manages the purchase, operation, maintenance, and disposal of the state’s fleet of motor vehicles and watercraft. The state’s fleet currently includes approximately 25,000 assets of 30 agencies.<sup>10</sup> The fleet includes automobiles, light trucks, heavy trucks, aircraft, construction and industrial equipment, trailers, tractors, motorcycles, all-terrain vehicles, boats, airboats, and boat engines. The Bureau is responsible for four areas of fleet management which include: the purchase of mobile equipment, the Fleet Information Management System (FIMS), the disposal of mobile equipment, and the surplus state vehicles and equipment auctions.<sup>11</sup>

The FIMS, is used to provide management and cost information required to effectively manage the state’s fleet. The FIMS also provides accountability of equipment use and expenditures. The system requires agencies to keep records and provide reports regarding the effective use, operation, maintenance, repair, and replacement of motor vehicles. The system also assures the safe use of motor vehicles and their used solely for state business.<sup>12</sup> The FIMS system does not account for maintenance facilities and fuel depots.

**State Agency Fleets**

Table 1 provides the total fleet count of state agencies.

### **Business Case for Outsourcing Projects**

Section 287.0571, F.S., provides that an agency should complete a business case for any outsourcing projects that have an expected cost in excess of \$10 million within a single fiscal year. The business case should be available for solicitation and must include the following:

- A detailed description of the service or activity for which the outsourcing is proposed;
- A description and analysis of the state agency's current performance, based on existing performance metrics if the state agency is currently performing the service or activity;
- The goals desired to be achieved through the proposed outsourcing and the rationale for such goals;
- A citation to the existing or proposed legal authority for outsourcing and the rationale for such goals;
- A description of available options for achieving the goals. If state employees are currently performing the service or activity, at least one option maintain state provision of the service or activity must be included;
- An analysis of the advantages and disadvantages of each option, including, at a minimum, potential performance improvements and risks;
- A description of the current market for the contractual services that are under consideration for outsourcing;
- A cost-benefit analysis documenting the direct and indirect specific baseline costs, savings, and qualitative and quantitative benefits involved in or resulting from the implementation of the recommended option or options;
- A description of differences among current state agency policies and processes and, as appropriate, a discussion of options for or a plan to standardize, consolidate, or revise current policies and processes, if any, to reduce the customization of any proposed solution that would otherwise be required;

<sup>13</sup> Email from Sam Kerce, Deputy Director of Legislative Affairs, Department of Management Services, Fleet Data (September 3, 2021) (on file with the Senate Committee on Transportation).

- A description of the specific performance standards that must, at a minimum, be met to ensure adequate performance;
- The projected timeframe for key events from the beginning of the procurement process through the expiration of a contract;
- A plan to ensure compliance with the public records law;
- A specific and feasible contingency plan addressing contractor nonperformance and a description of the tasks involved in and costs required for its implementation;
- A state agency's transition plan for addressing changes in the number of agency personnel, affected business processes, employee transition issues, and communication with affected stakeholders, such as agency clients and the public. The transition plan must contain a reemployment and retraining assistance plan for employees who are not retained by the state agency or employed by the contractor; and
- A plan for ensuring access by persons with disabilities in compliance with applicable state and federal law.<sup>14</sup>

Business cases to outsource should be evaluated for feasibility, cost-effectiveness, and efficiency before a state agency proceeds with any outsourcing of services.<sup>15</sup>

### **2019-2020 Government Efficiency Task Force**

Approved by voters in 2006 by an amendment to the Florida Constitution, the Government Efficiency Task Force was required to meet, no later than January of 2007, and every four years thereafter for the purpose of developing recommendations to improve governmental operations and reduce costs.<sup>16</sup>

As recommended by Governor Ron DeSantis, Senate President Bill Galvano, and Speaker of the House Jose Oliva, the 2019-20 Task Force, established in September 2019, focused on efficiencies that can be gained through leveraging technology to better serve Floridians.<sup>17</sup>

One recommendation from the 2019-20 Task Force was for the Legislature to consider consolidating management of all state agency vehicles into one statewide fleet program under one state agency (either the DMS or the Department of Transportation) or third-party vendor with uniform standards for procurement, assignment utilization, maintenance, and disposal of fleet vehicles.<sup>18</sup>

The states of Michigan, Massachusetts, Minnesota, and Tennessee are examples of states which have a centralized fleet management program, with some aspects outsourced to third parties.<sup>19</sup>

### **Fleet Management Business Case**

In 2013 the DMS contracted for a Fleet Management Business Case to be completed by Mercury Associates, Inc. The recommendations in the study presented to the DMS included:

- Centralization of Fleet Management:
  - The DMS should assume the primary role for managing fleet related activities across the enterprise (state), such as planning, coordination, analysis and reporting, and establishment of programs that make it easier for fleet users to operate their fleets (such as enterprise-wide systems, tools, contracts, etc.).
- Improve Planning and Funding Levels for Fleet Replacement:
  - The State should centralize fleet replacement planning in the DMS, develop a multi-year recurring spending plan to smooth out inherent peaks and valleys in funding requirements, and explore alternative financing approaches (including leasing) to spread capital costs over the useful lives of fleet assets.
- Right-size the Fleet (reduce fleet size by five to ten percent due to consolidation); and
- Improve Fleet Maintenance:
  - All state-owned shops should be open to all agencies;
  - Shops located in close proximity to each other should be consolidated;
  - Operation of the largest shops should be outsourced to on-site contractors;
  - Smaller state run shops should continue to operate only if they meet rigorous standards for facility condition and management practices;
  - A single contractor should be used to manage all ad hoc vendor maintenance; and
  - All maintenance and repair activities should be coordinated under DMS' oversight through the FIMS.<sup>20</sup>

### **III. Effect of Proposed Changes:**

The bill requires the DMS to prepare an inventory of all state-owned motor vehicles, maintenance facilities, and fuel depots. The DMS is required to submit the inventory to the Governor, President of the Senate, and the Speaker of the House of Representatives by December 31, 2022.

The bill provides that the inventory must, at a minimum, provide the following information:

- The entity of ownership of all state-owned motor vehicles, maintenance facilities, and fuel depots;
- The entity of possession of all state-owned motor vehicles, maintenance facilities, and fuel depots;
- The estimated annual operating and other costs of all state-owned motor vehicles, maintenance facilities, and fuel depots;

<sup>20</sup> Mercury Associates, Inc., *Fleet Management Business Case for the State of Florida December 2013*, available at [https://www.dms.myflorida.com/content/download/98763/571269/Fleet\\_Management\\_Business\\_Case\\_Final.pdf](https://www.dms.myflorida.com/content/download/98763/571269/Fleet_Management_Business_Case_Final.pdf) (last visited January 31, 2022).

- The number of full-time equivalent and other personal services positions assigned to operate and maintain each state-owned maintenance facility and fuel depot; and
- The physical address for the location of all state-owned motor vehicles, maintenance facilities, and fuel depots.

The bill requires each state agency and state university to provide any information requested by the DMS necessary for the completion of the inventory. It is unclear what information cities, counties and school districts may hold that is useful to completing the inventory relating solely to state-owned motor vehicles, maintenance facilities, and fuel depots.

The bill requires the DMS to create, administer, and maintain a centralized management system for the fleet of state-owned motor vehicles, maintenance facilities, and fuel depots. The DMS is also required to consolidate under a centralized management system the existing motor vehicles, maintenance facilities, fuel depots, and any full-time equivalent and other personal services positions assigned to operate and maintain each state-owned maintenance facility and fuel depot.

The bill requires each state agency and state university to provide any information requested by the DMS that is necessary for consolidating under the centralized system.

The bill requires the DMS to contract with a vendor or contractor for privatizing the centralized management and operation of the state-owned vehicle fleet, motor vehicle acquisitions, maintenance facilities, and fuel depots. Any data that relates to the contract must be stored in at least one common format approved by the DMS, and such data remains the property of the DMS. Any vehicle-monitoring hardware installed in a state-owned motor vehicle must be commercially available and may not be proprietary to the vendor or contractor.

The bill provides that the bill will take effect upon becoming law.

#### **IV. Constitutional Issues:**

A. Municipality/County Mandates Restrictions:

None.

B. Public Records/Open Meetings Issues:

None.

C. Trust Funds Restrictions:

None.

D. State Tax or Fee Increases:

None.

E. Other Constitutional Issues:

None identified.

**V. Fiscal Impact Statement:**

A. Tax/Fee Issues:

None.

B. Private Sector Impact:

The vendor or contractor selected by the DMS may have a positive fiscal impact on revenues by privatizing the centralized management and operation of the state-owned vehicle fleet, motor vehicle acquisitions, maintenance facilities, and fuel depots required by the bill.

C. Government Sector Impact:

The state may see an indeterminate reduction in cost for the management and maintenance of state-owned vehicle fleets, motor vehicle acquisitions, maintenance facilities, and fuel depots due to the centralization and outsourcing of the management and operation of the fleets and facilities to a contractor or vendor.

The DMS may incur costs associated with consolidating the fleets and updating the FIMS system with fuel depots and maintenance facilities. The outsourcing of the management and operation of the fleets to a contractor or vendor may result in a significant fiscal impact on the DMS, although the costs that may be incurred by the DMS are indeterminate.

State agencies and state universities may incur additional workload responding to requests from the DMS for information to complete the inventory and consolidation under a centralized system.

**VI. Technical Deficiencies:**

None.

**VII. Related Issues:**

Lines 62-67 require the DMS to create and consolidate under a centralized system the management of existing motor vehicles, maintenance facilities, fuel depots, and any full-time equivalent and other personal services positions assigned to operate and maintain each state-owned maintenance facility and fuel depot. If the intent of the bill is to permanently transfer such positions to the DMS, the Legislature may want to consider an amendment specifying this transfer as a type two transfer pursuant to s. 20.06, F.S.

**VIII. Statutes Affected:**

The bill does not affect any statutes.

**IX. Additional Information:**

**A. Committee Substitute – Statement of Changes:**

(Summarizing differences between the Committee Substitute and the prior version of the bill.)

None.

**B. Amendments:**

None.
