An act

A bill to be entitled An act relating to mitigation credits; amending s.

373.4136, F.S.; authorizing the Department of Environmental Protection and water management districts to release mitigation credits to certain mitigation banks under specified conditions; requiring the department and water management districts to authorize the use of mitigation credits available within surrounding basins or specified regions; conforming provisions to changes made by the act; providing circumstances under which mitigation credits are deemed unavailable in a basin; requiring affidavits from mitigation banks before certain mitigation credits are released; authorizing certain projects to use mitigation banks regardless of whether the projects are located within the mitigation service area; requiring the department to begin rulemaking on

Be It Enacted by the Legislature of the State of Florida:

a specified date; providing an effective date.

- Section 1. Subsection (5) and paragraph (d) of subsection (6) of section 373.4136, Florida Statutes, are amended to read: 373.4136 Establishment and operation of mitigation banks.—
- (5) SCHEDULE FOR CREDIT RELEASE.—After awarding mitigation credits to a mitigation bank, the department or the water management district shall set forth a schedule for the release of those credits in the mitigation bank permit. A mitigation credit that has been released may be sold or used to offset

adverse impacts from an activity regulated under this part.

- (a) The department or the water management district shall allow a portion of the mitigation credits awarded to a mitigation bank to be released for sale or use before prior to meeting all of the performance criteria specified in the mitigation bank permit. The department or the water management district shall allow the release of all of a mitigation bank's awarded mitigation credits only after the bank meets the mitigation success criteria specified in the permit. If mitigation credits are not available in sufficient quantities to be sold or used to offset imminent and otherwise allowable adverse impacts within a mitigation service area, the department or water management district may release credits to a mitigation bank before the bank meets the mitigation success criteria specified in the mitigation bank permit if the bank has been successfully constructed and there is a high degree of confidence that the required ecological performance standards will be met.
- (b) The number of credits and schedule for release shall be determined by the department or water management district based upon the performance criteria for the mitigation bank and the success criteria for each mitigation activity. The release schedule for a specific mitigation bank or phase thereof shall be related to the actions required to implement the bank, such as site protection, site preparation, earthwork, removal of wastes, planting, removal or control of nuisance and exotic species, installation of structures, and annual monitoring and management requirements for success. In determining the specific release schedule for a bank, the department or water management

district shall consider, at a minimum, the following factors:

- 1. Whether the mitigation consists solely of preservation or includes other types of mitigation.
- 2. The length of time anticipated to be required before a determination of success can be achieved.
- 3. The ecological value to be gained from each action required to implement the bank.
- 4. The financial expenditure required for each action to implement the bank.
- (c) Notwithstanding the provisions of this subsection, no credit shall be released for freshwater wetland creation until the success criteria included in the mitigation bank permit are met.
- (c) (d) The withdrawal of mitigation credits from a mitigation bank shall be accomplished as a minor modification of the mitigation bank permit. A processing fee may shall not be required by the department or water management district for this minor modification.
- (d) If mitigation credits are not available in a basin, the department or water management district shall allow the use of mitigation credits available within surrounding basins or within the appropriate United States Geological Survey hydrological unit code in the appropriate buffer region.
- (e) Wetland mitigation credits are deemed unavailable in a basin if the party requesting the credits provides an affidavit to the department or water management district signed by the mitigation banks within the basin attesting that credits are not available. The affidavit must be signed by each mitigation bank within the 30 days preceding the date the request is submitted

18-01253A-23 20231702

to the department or water management district. Mitigation banks without available wetland mitigation credits shall sign an affidavit at the request of the party seeking the credits. If a mitigation bank owner or agent is unable to release wetland mitigation credits within 30 days after a request is made, the mitigation bank is deemed to not have wetland mitigation credits available.

- (6) MITIGATION SERVICE AREA.—The department or water management district shall establish a mitigation service area for each mitigation bank permit. The department or water management district shall notify and consider comments received on the proposed mitigation service area from each local government within the proposed mitigation service area. Except as provided herein, mitigation credits may be withdrawn and used only to offset adverse impacts in the mitigation service area. The boundaries of the mitigation service area shall depend upon the geographic area where the mitigation bank could reasonably be expected to offset adverse impacts. Mitigation service areas may overlap, and mitigation service areas for two or more mitigation banks may be approved for a regional watershed.
- (d) If the requirements in s. 373.414(1)(b) and (8) are met, the following projects or activities regulated under this part shall be eligible to use a mitigation bank, regardless of whether they are located within the mitigation service area:
- 1. Projects with adverse impacts partially located within the mitigation service area.
- 2. Linear projects, such as roadways, transmission lines, distribution lines, pipelines, railways, or seaports listed in s. 311.09(1).

3. Projects with total adverse impacts of less than 1 acre in size.

- 4. Projects approved by the department or water management district on a case-by-case basis if sufficient quantities of mitigation credits are not available to be sold or used to offset imminent and otherwise allowable adverse impacts within a mitigation service area.
- Section 2. The Department of Environmental Protection shall begin rulemaking to implement this act on August 1, 2023.
 - Section 3. This act shall take effect July 1, 2023.
