 46 Division of State Lands a land management plan at least every 10
 47 years in a form and manner adopted by rule of the board of
 48 trustees and in accordance with s. 259.032. Each manager of
 49 conservation lands shall also update a land management plan
 50 whenever the manager proposes to add new facilities or make

51 substantive land use or management changes that were not
52 addressed in the approved plan, or within 1 year after the
53 addition of significant new lands. Each manager of
54 nonconservation lands shall submit to the Division of State
55 Lands a land use plan at least every 10 years in a form and
56 manner adopted by rule of the board of trustees. The division
57 shall review each plan for compliance with the requirements of
58 this subsection and the requirements of the rules adopted by the
59 board of trustees pursuant to this section. All nonconservation
60 land use plans, whether for single-use or multiple-use
61 properties, must ~~shall~~ be managed to provide the greatest
62 benefit to the state. Plans for managed areas larger than 1,000
63 acres must ~~shall~~ contain an analysis of the multiple-use
64 potential of the property which includes the potential of the
65 property to generate revenues to enhance the management of the
66 property. In addition, the plan must ~~shall~~ contain an analysis
67 of the potential use of private land managers to facilitate the
68 restoration or management of these lands and whether
69 nonconservation lands would be more appropriately transferred to
70 the county or municipality in which the land is located for the
71 purpose of providing affordable multifamily rental housing that
72 meets the criteria of s. 420.0004(3). If a newly acquired
73 property has a valid conservation plan that was developed by a
74 soil and water conservation district, such plan must ~~shall~~ be
75 used to guide management of the property until a formal land use

76 | plan is completed.

77 | (a) State conservation lands must ~~shall~~ be managed to
78 | ensure the conservation of this state's plant and animal species
79 | and to ensure the accessibility of state lands for the benefit
80 | and enjoyment of all people of this state, both present and
81 | future. Each land management plan for state conservation lands
82 | must ~~shall~~ provide a desired outcome, describe both short-term
83 | and long-term management goals, and include measurable
84 | objectives to achieve those goals. Short-term goals must ~~shall~~
85 | be achievable within a 2-year planning period, and long-term
86 | goals must ~~shall~~ be achievable within a 10-year planning period.
87 | These short-term and long-term management goals are ~~shall be~~ the
88 | basis for all subsequent land management activities.

90 | conservation lands must ~~shall~~ include measurable objectives for
91 | the following, as appropriate:

- 92 | 1. Habitat restoration and improvement.
- 93 | 2. Public access and recreational opportunities.
- 94 | 3. Hydrological preservation and restoration.
- 95 | 4. Sustainable forest management.
- 96 | 5. Exotic and invasive species maintenance and control.
- 97 | 6. Capital facilities and infrastructure.
- 98 | 7. Cultural and historical resources.
- 99 | 8. Imperiled species habitat maintenance, enhancement,
100 | restoration, or population restoration.

101 (c) The land management plan must ~~shall~~, at a minimum,
 102 contain the following elements:
 103 1. A physical description of the land.
 104 2. A quantitative data description of the land which
 105 includes an inventory of forest and other natural resources;
 106 exotic and invasive plants; hydrological features;
 107 infrastructure, including recreational facilities; and other
 108 significant land, cultural, or historical features. The
 109 inventory must ~~shall~~ reflect the number of acres for each
 110 resource and feature, when appropriate. The inventory must ~~shall~~
 111 be of such detail that objective measures and benchmarks can be
 112 established for each tract of land and monitored during the
 113 lifetime of the plan. All quantitative data collected must ~~shall~~
 114 be aggregated, standardized, collected, and presented in an
 115 electronic format to allow for uniform management reporting and
 116 analysis. The information collected by the Department of
 117 Environmental Protection pursuant to s. 253.0325(2) must ~~shall~~
 118 be available to the land manager and his or her assignee.
 119 3. A detailed description of each short-term and long-term
 120 land management goal, the associated measurable objectives, and
 121 the related activities that are to be performed to meet the land
 122 management objectives. Each land management objective must be
 123 addressed by the land management plan, and if practicable, a
 124 land management objective may not be performed to the detriment
 125 of the other land management objectives.

126 4. A schedule of land management activities which contains
127 short-term and long-term land management goals and the related
128 measurable objective and activities. The schedule must ~~shall~~
129 include for each activity a timeline for completion,
130 quantitative measures, and detailed expense and manpower
131 budgets. The schedule must ~~shall~~ provide a management tool that
132 facilitates development of performance measures.

133 5. A summary budget for the scheduled land management
134 activities of the land management plan. For state lands
135 containing or anticipated to contain imperiled species habitat,
136 the summary budget shall include any fees anticipated from
137 public or private entities for projects to offset adverse
138 impacts to imperiled species or such habitat, which fees must
139 ~~shall~~ be used solely to restore, manage, enhance, repopulate, or
140 acquire imperiled species habitat. The summary budget must ~~shall~~
141 be prepared in such manner that it facilitates computing an
142 aggregate of land management costs for all state-managed lands
143 using the categories described in s. 259.037(3).

144 (d) Upon completion, the land management plan must be
145 transmitted to the Acquisition and Restoration Council for
146 review. Within ~~The council shall have~~ 90 days after receipt of

152 effective upon approval by the board of trustees.

153 (e) Land management plans are to be updated every 10 years
154 on a rotating basis. Each updated land management plan must
155 identify any conservation lands under the plan, in part or in
156 whole, that are no longer needed for conservation purposes and

159 (f) In developing or updating land management plans, at
160 least one public hearing must ~~shall~~ be held in any one affected
161 county.

162 (g) The Division of State Lands shall make available to

167 for compliance with the requirements of this subsection, the
168 requirements of chapter 259, and the requirements of the rules
169 adopted by the board of trustees pursuant to this section. The

172 regard to the future use of the property, the protection of
173 fragile or nonrenewable resources, the potential for alternative
174 or multiple uses not recognized by the managing entity, and the
175 possibility of disposal of the property by the board of

176 trustees. After its review, the council shall submit the plan,
 177 along with its recommendations and comments, to the board of
 178 trustees. The council shall specifically recommend to the board
 179 of trustees whether to approve the plan as submitted, approve
 180 the plan with modifications, or reject the plan. If the council
