[Commerce](#)

SUMMARY

Effect of the Bill:

HB 951 establishes rounding procedures for sales tax dealers who, due to the discontinuation of the penny, are unable to provide exact change. Under the bill, cash transactions may be rounded to the nearest nickel after the calculation of tax is accounted for. The bill confirms that rounding cash transactions in this manner does not alter the amount of tax owed.

The bill also provides rounding provisions for cash payments made to secondary metals recyclers.

Additionally, the bill provides that the Florida Deceptive and Unfair Trade Practices Act does not apply to the rounding of consumer sales to the nearest nickel when the penny is no longer in circulation.

The bill takes effect upon becoming a law.

Fiscal or Economic Impact:

The Revenue Estimating Conference has not estimated the impact of the bill on state or local government revenues. Staff estimates the bill will not impact on state or local government revenues.

[BILL HISTORY](#)

ANALYSIS

EFFECT OF THE BILL:

If the one-cent piece (the penny) is no longer in [production](#), and as a result a [dealer](#) is unable to round an in-person cash transaction to the whole cent as required in [s. 212.12\(10\), F.S.](#), such transaction may to be rounded to the nearest nickel.

The rounding rules for cash transactions, to be applied after tax is calculated and added to the sales price, would be as follows:

| <u>For amounts ending in:</u> | <u>Then round:</u> |
|-------------------------------|--------------------|
| one or two cents | down to zero cents |
| three or four cents | up to five cents |
| six or seven cents | down to five cents |
| eight or nine cents | up to ten cents |

Transactions already ending in zero or five cents are unchanged, and are not rounded.

STORAGE NAME: h0951a.WMC

DATE: 2/2/2026

Rounding to the nearest nickel does not apply to transactions conducted electronically, and for mixed-tender transactions, rounding to the nearest nickel applies only to the portion of the transaction paid in cash. The bill further provides that rounding under new [s. 212.12\(c\), F.S.](#), does not increase or decrease the amount of [sales tax](#) due for in-person cash transactions. Further, rounding will not alter or affect the exact amounts authorized, cleared, or settled through any noncash payment system. (Section [1](#))

The bill amends [s. 501.212, F.S.](#), to provide that the [Florida Deceptive and Unfair Trade Practices Act](#) does not apply to rounding a consumer sale to the nearest nickel if the one-cent piece is no longer in production. (Section [2](#))

The bill amends [s. 538.235, F.S.](#), to provide that cash payments made to [secondary metals recyclers](#) must be made in full or rounded up to the nearest nickel. (Section [3](#))

The bill takes effect upon becoming a law. (Section [4](#))

FISCAL OR ECONOMIC IMPACT:

STATE GOVERNMENT:

The Revenue Estimating Conference has not estimated the impact of the bill on state government revenues. Staff estimates that the bill will not impact on state government revenues.

LOCAL GOVERNMENT:

The Revenue Estimating Conference has not estimated the impact of the bill on local government revenues. Staff estimates that the bill will not impact on local government revenues.

RELEVANT INFORMATION

SUBJECT OVERVIEW:

[Penny Production](#)

The federal government has stopped manufacturing new pennies; however, the Federal Reserve will continue to recirculate the pennies still in existence, which are roughly 114 billion pennies.¹ The Treasury Department aims to help keep the existing supply of pennies in circulation by encouraging the public to spend their on-hand pennies, which will provide a smooth transition and allow retailers and point-of-sale system providers time to adapt to the change.²

Merchants may round transactions either up or down to the nearest five cents as pennies fall out of circulation.³ However many states require sales tax to be calculated on the final sale price rounded to the nearest penny, so states and localities may need to amend their sales tax laws.⁴

Other countries, (e.g., Canada,⁵ the Bahamas,⁶ and several European Union countries⁷) have implemented rounding policies that eliminate the use of the one-cent coin in cash transactions using the same basic tenets:

- Round cash purchases down to the nearest nickel for totals ending in 1, 2, 6 or 7; round up to the nearest nickel for those ending in 3, 4, 8 or 9.
- Applies to only cash transactions
- Occurs at the end of the transaction (after taxes are applied)
- Doesn't change the price for those possessing exact change.

Some states have proposed legislation or acted through state agencies⁸:

- Proposed legislation in New York ([Assembly Bill A9274](#) and companion [Senate Bill S8580](#)) would require merchants to round final cash transactions based on the final cost of the item
- [Utah](#) and [Texas](#) have provided guidelines on rounding

The Florida Department of Revenue has published a Taxpayer Information Publication (TIP) advising retailers they must calculate Florida sales tax and discretionary sales surtax (local sales tax) on the actual sales price prior to any rounding⁹. The TIP also advises dealers to disclose their rounding methods for cash transactions prominently within the business.

[Sales Tax](#)

Florida's sales and use tax is a six percent levy on retail sales of a wide array of tangible personal property, admissions, transient lodgings, and commercial real estate rentals,¹⁰ unless expressly exempted. Generally, the sales tax is added to the price of a taxable good and collected by the dealer from the purchaser at the time of sale.

Sales tax represents the majority of Florida's General Revenue (projected 73.9 percent for FY 2024-25)¹¹ and is administered by the Department of Revenue (DOR) under ch. 212, F.S. Sales tax revenue is distributed via a formula found in [s. 212.20, F.S.](#), with roughly 89.6% going to the General Revenue Fund, 10.3% going to local governments,¹² and the remainder being distributed to specified trust funds or sports facilities. For FY 2025-26, the Revenue Estimating Conference estimates that the sales tax collections under chapter 212, F.S., will result in more than \$41 billion of total revenue, with distributions to the General Revenue Fund of roughly \$37.4 billion.¹³

¹² The local government distributions include the Local Government Half-Cent Sales Tax Clearing Trust Fund under [s. 218.61, F.S.](#), county and municipal revenue sharing trust funds under [s. 218.215, F.S.](#), emergency distributions under [s. 218.65, F.S.](#), and a shift of a specified amount to counties that used to be funded from pari-mutuel revenues pursuant to [s. 212.20\(6\)\(d\)6.a., F.S.](#)

¹³ Revenue Estimating Conference on [General Revenue](#), held January 23, 2026 (last visited Jan. 29, 2026).

In 2021, Florida transitioned from the bracket system for calculating sales tax and discretionary sales surtax to a rounding algorithm.¹⁴ Dealers are required to use a rounding algorithm that carries the tax computation to the third decimal place and always rounds up to the nearest whole cent when the third decimal place is greater than 4.¹⁵ The DOR provides the following examples:¹⁶

- \$5.045 rounds up to \$5.05; and
- \$3.213 rounds down to \$3.21.

Dealers may compute the tax by applying the rounding algorithm to the combined taxable amount on an invoice or to the individual taxable items on an invoice.¹⁷

Dealer

Section [212.06\(2\)\(a\), F.S.](#), defines “dealer” as including every person, as used in ch. 212, F.S., who manufactures or produces tangible personal property for sale at retail; for use, consumption, or distribution; or for storage to be used or consumed in Florida. The term is further defined with specifics in s. [212.06, F.S.](#)

Florida Deceptive and Unfair Trade Practices Act (FRUTPA)

Defined in Part II of Chapter 501, F.S., the FRUTPA is Florida’s main consumer-protection and fair-competition statute designed to police the marketplace making it unlawful to engage in unfair methods of competition or deceptive and unconscionable acts in the conduct of trade or commerce.

Section [501.212, F.S.](#), provides circumstances in which the FRUTPA rules do not apply.

Secondary Metals Recyclers

Section [538.18\(11\), F.S.](#), defines “secondary metals recycler” as an person who:

- Is engaged, from a fixed location, in the business of purchase transactions or gathering or obtaining ferrous or nonferrous metals that have served their original economic purpose or is in the business of performing the manufacturing process by which ferrous metals or nonferrous metals are converted into raw material products consisting of prepared grades and having an existing or potential economic value; or
- Has facilities for performing the manufacturing process by which ferrous metals or nonferrous metals are converted into raw material products consisting of prepared grades and having an existing or potential economic value, other than by the exclusive use of hand tools, by methods including, without limitation, processing, sorting, cutting, classifying, cleaning, baling, wrapping, shredding, shearing, or changing the physical form or chemical content thereof.
