PRAYER

The following prayer was offered by the Reverend Kyle Peddie, Corinth Baptist Church, Hosford:

Dear Heavenly Father, thank you for another day on planet Earth. We want to pause before this great Senate meets today and acknowledge your presence, power, and sovereignty in our world today. Your word says your mercies are new each day, and we sure are grateful for that because we use them up by the end of each day.

As this session draws to a close, we pray for continued wisdom and discernment in all areas of the legislative process. As we agree with one another, let us do so with love and respect. As we disagree with one another, let us also show the same grace. Lord, may that happen inside, and especially outside, this chamber today and every day.

We pray for all the Senators' families while they are serving here today; bless their spouses, children, grandchildren, and other family members. Protect their homes while they are away as well, we humbly ask. You have been good to us in so many ways, dear Lord, so help us treat others the way you would have us to. Thanks again for allowing us the privilege to pray and seek your face. We claim that promise in your word, that when we draw close to you, you draw close to us. Bless all the Senators as they work today, bless President Galvano as he leads, and lastly, bless my wonderful friend, everybody's friend, my Senator, Bill Montford.

In Jesus' name I pray. Amen.

PLEDGE

Senate Pages, Trinity Fagg of Gretna; Jonathan Howes of Gainesville; Catherine Kelly of Lake Placid, niece of Senator Benacquisto; Olivia Kelly of Lake Placid, niece of Senator Benacquisto; and Alicia Nagda of Citrus Springs, led the Senate in the Pledge of Allegiance to the flag of the United States of America.

DOCTOR OF THE DAY

The President recognized Dr. Jaclyn Nadler of Englewood, sponsored by Senator Gruters, as the doctor of the day. Dr. Nadler specializes in internal medicine.

By direction of the President, there being no objection, the Senate proceeded to—

Senator Rouson moved the following amendment which was adopted:

Amendment 1 (755426) (with title amendment)—Delete everything after the enacting clause and insert:

Section 1. *This act may be cited as “Jordan’s Law.”*

Section 2. Section 25.385, Florida Statutes, is amended to read:

25.385 Standards for instruction of circuit and county court judges ~~in handling domestic violence cases.~~—

(1) The Florida Court Educational Council shall establish standards for instruction of circuit and county court judges who have responsibility for domestic violence cases, and the council shall provide such instruction on a periodic and timely basis.

~~(2) As used in this subsection, section:~~

~~(a) the term “domestic violence” has the meaning set forth in s. 741.28.~~

~~(b) “Family or household member” has the meaning set forth in s. 741.28.~~

(2) *The Florida Court Educational Council shall establish standards for instruction of circuit and county court judges who have responsibility for dependency cases regarding the recognition of and responses to head trauma and brain injury in a child under 6 years of age. The council shall provide such instruction on a periodic and timely basis.*

Section 3. Section 39.0142, Florida Statutes, is created to read:

39.0142 Notifying law enforcement officers of parent or caregiver names.—Beginning March 1, 2021, the Department of Law Enforcement shall provide information to law enforcement officers stating whether a person is a parent or caregiver who is currently the subject of a child protective investigation for alleged child abuse, abandonment, or neglect or is a parent or caregiver of a child who has been allowed to return to or remain in the home under judicial supervision after an adjudication of dependency. The Florida Department of Law Enforcement shall provide this data via a Florida Crime Information Center query into the department’s child protection database.

(1) *If a law enforcement officer has an interaction with a parent or caregiver as described in this section and the interaction results in the officer having concern about a child’s health, safety, or well-being, the officer shall report relevant details of the interaction to the central abuse hotline immediately after the interaction even if the requirements of s. 39.201, relating to a person having actual knowledge or suspicion of abuse, abandonment, or neglect, are not met.*

(2) *The central abuse hotline shall provide any relevant information to:*

(a) *The child protective investigator, if the parent or caregiver is the subject of a child protective investigation; or*

(b) *The child's case manager and the attorney representing the department, if the parent or caregiver has a child under judicial supervision after an adjudication of dependency.*

Section 4. Paragraph (h) of subsection (3) of section 39.303, Florida Statutes, is amended to read:

39.303 Child Protection Teams and sexual abuse treatment programs; services; eligible cases.—

(3) The Department of Health shall use and convene the Child Protection Teams to supplement the assessment and protective supervision activities of the family safety and preservation program of the Department of Children and Families. This section does not remove or reduce the duty and responsibility of any person to report pursuant to this chapter all suspected or actual cases of child abuse, abandonment, or neglect or sexual abuse of a child. The role of the Child Protection Teams is to support activities of the program and to provide services deemed by the Child Protection Teams to be necessary and appropriate to abused, abandoned, and neglected children upon referral. The specialized diagnostic assessment, evaluation, coordination, consultation, and other supportive services that a Child Protection Team must be capable of providing include, but are not limited to, the following:

(h) Such training services for program and other employees of the Department of Children and Families, employees of the Department of Health, and other medical professionals as is deemed appropriate to enable them to develop and maintain their professional skills and abilities in handling child abuse, abandonment, and neglect cases. *The training service must include training in the recognition of and appropriate responses to head trauma and brain injury in a child under 6 years of age as required by ss. 402.402(2) and 409.988.*

A Child Protection Team that is evaluating a report of medical neglect and assessing the health care needs of a medically complex child shall consult with a physician who has experience in treating children with the same condition.

Section 5. Section 39.820, Florida Statutes, is amended to read:

(2) “Guardian advocate” means a person appointed by the court to act on behalf of a drug dependent newborn ~~under pursuant to the provisions of this part.~~

Section 6. Paragraph (b) of subsection (2) of section 39.8296, Florida Statutes, is amended to read:

39.8296 Statewide Guardian Ad Litem Office; legislative findings and intent; creation; appointment of executive director; duties of office.—

(2) STATEWIDE GUARDIAN AD LITEM OFFICE.—There is created a Statewide Guardian Ad Litem Office within the Justice Administrative Commission. The Justice Administrative Commission shall provide administrative support and service to the office to the extent requested by the executive director within the available resources of the commission. The Statewide Guardian Ad Litem Office ~~is shall~~ not be subject to control, supervision, or direction by the Justice Administrative Commission in the performance of its duties, but the employees of the office ~~are shall be~~ governed by the classification plan and salary and benefits plan approved by the Justice Administrative Commission.

(b) The Statewide Guardian Ad Litem Office shall, within available resources, have oversight responsibilities for and provide technical as-

sistance to all guardian ad litem and attorney ad litem programs located within the judicial circuits.

1. The office shall identify the resources required to implement methods of collecting, reporting, and tracking reliable and consistent case data.

2. The office shall review the current guardian ad litem programs in Florida and other states.

3. The office, in consultation with local guardian ad litem offices, shall develop statewide performance measures and standards.

4. The office shall develop a guardian ad litem training program, *which shall include, but is not limited to, training on the recognition of and responses to head trauma and brain injury in a child under 6 years of age.* The office shall establish a curriculum committee to develop the training program specified in this subparagraph. The curriculum committee shall include, but not be limited to, dependency judges, directors of circuit guardian ad litem programs, active certified guardians ad litem, a mental health professional who specializes in the treatment of children, a member of a child advocacy group, a representative of a ~~domestic violence advocacy group the Florida Coalition Against Domestic Violence,~~ an individual with a degree in social work, and a social worker experienced in working with victims and perpetrators of child abuse.

5. The office shall review the various methods of funding guardian ad litem programs, ~~shall~~ maximize the use of those funding sources to the extent possible, and ~~shall~~ review the kinds of services being provided by circuit guardian ad litem programs.

6. The office shall determine the feasibility or desirability of new concepts of organization, administration, financing, or service delivery designed to preserve the civil and constitutional rights and fulfill other needs of dependent children.

7. In an effort to promote normalcy and establish trust between a court-appointed volunteer guardian ad litem and a child alleged to be abused, abandoned, or neglected under this chapter, a guardian ad litem may transport a child. However, a guardian ad litem volunteer may not be required or directed by the program or a court to transport a child.

8. The office shall submit to the Governor, the President of the Senate, the Speaker of the House of Representatives, and the Chief Justice of the Supreme Court an interim report describing the progress of the office in meeting the goals as described in this section. The office shall submit to the Governor, the President of the Senate, the Speaker of the House of Representatives, and the Chief Justice of the Supreme Court a proposed plan including alternatives for meeting the state's guardian ad litem and attorney ad litem needs. This plan may include recommendations for less than the entire state, may include a phase-in system, and shall include estimates of the cost of each of the alternatives. Each year the office shall provide a status report and provide further recommendations to address the need for guardian ad litem services and related issues.

Section 7. Subsection (3) of section 402.40, Florida Statutes, is amended to read:

402.40 Child welfare training and certification.—

(3) THIRD-PARTY CREDENTIALING ENTITIES.—The department shall approve one or more third-party credentialing entities for the purpose of developing and administering child welfare certification programs for persons who provide child welfare services. A third-party credentialing entity shall request such approval in writing from the department. In order to obtain approval, the third-party credentialing entity must:

(a) Establish professional requirements and standards that applicants must achieve in order to obtain a child welfare certification and to maintain such certification.

(b) Develop and apply core competencies and examination instruments according to nationally recognized certification and psychometric standards.

(c) Maintain a professional code of ethics and a disciplinary process that apply to all persons holding child welfare certification.

(d) Maintain a database, accessible to the public, of all persons holding child welfare certification, including any history of ethical violations.

(e) Require annual continuing education for persons holding child welfare certification.

(f) Administer a continuing education provider program to ensure that only qualified providers offer continuing education opportunities for certificateholders.

(g) *Review the findings and all relevant records involving the death of a child or other critical incident following completion of any reviews by the department, the inspector general, or the Office of the Attorney General. Such review may occur only upon the filing of a complaint from an outside party involving certified personnel. This review shall assess the certified personnel's compliance with the third-party credentialing entity's published code of ethical and professional conduct and disciplinary procedures.*

(h)(g) Maintain an advisory committee, including representatives from each region of the department, each sheriff's office providing child protective services, and each community-based care lead agency, who shall be appointed by the organization they represent. The third-party credentialing entity may appoint additional members to the advisory committee.

402.402 Child protection and child welfare personnel; attorneys employed by the department.—

(2) SPECIALIZED TRAINING.—All child protective investigators and child protective investigation supervisors employed by the department or a sheriff's office must complete *the following* specialized training:

(a) *Training on the recognition of and responses to head trauma and brain injury in a child under 6 years of age developed by the Child Protection Team Program within the Department of Health.*

(b) *Training that is either focused on serving a specific population, including, but not limited to, medically fragile children, sexually exploited children, children under 3 years of age, or families with a history of domestic violence, mental illness, or substance abuse, or focused on performing certain aspects of child protection practice, including, but not limited to, investigation techniques and analysis of family dynamics.*

The specialized training may be used to fulfill continuing education requirements under s. 402.40(3)(e). Individuals hired before July 1, 2014, shall complete the specialized training by June 30, 2016, and individuals hired on or after July 1, 2014, shall complete the specialized training within 2 years after hire. An individual may receive specialized training in multiple areas.

(4) ATTORNEYS EMPLOYED BY THE DEPARTMENT TO HANDLE CHILD WELFARE CASES.—Attorneys hired on or after July 1, 2014, whose primary responsibility is representing the department in child welfare cases shall, within the first 6 months of employment, receive training in *all of the following*:

(a) The dependency court process, including the attorney's role in preparing and reviewing documents prepared for dependency court for accuracy and completeness.‡

(b) Preparing and presenting child welfare cases, including at least 1 week shadowing an experienced children's legal services attorney preparing and presenting cases.‡

(c) Safety assessment, safety decisionmaking tools, and safety plans.‡

(d) Developing information presented by investigators and case managers to support decisionmaking in the best interest of children.‡ ~~and~~

(e) The experiences and techniques of case managers and investigators, including shadowing an experienced child protective investigator and an experienced case manager for at least 8 hours.

(f) *The recognition of and responses to head trauma and brain injury in a child under 6 years of age.*

Section 9. Paragraph (f) of subsection (1) and subsection (3) of section 409.988, Florida Statutes, are amended to read:

409.988 Lead agency duties; general provisions.—

(1) DUTIES.—A lead agency:

(f) Shall ensure that all individuals providing care for dependent children receive appropriate training and meet the minimum employment standards established by the department. *Appropriate training shall include, but is not limited to, training on the recognition of and responses to head trauma and brain injury in a child under 6 years of age developed by the Child Protection Team Program within the Department of Health.*

(3) SERVICES.—A lead agency must provide dependent children with services that are supported by research or that are recognized as best practices in the child welfare field. The agency shall give priority to the use of services that are evidence-based and trauma-informed and may also provide other innovative services, including, but not limited to, family-centered and cognitive-behavioral interventions designed to mitigate out-of-home placements *and intensive family reunification services that combine child welfare and mental health services for families with dependent children under 6 years of age.*

Section 10. Section 943.17298, Florida Statutes, is created to read:

943.17298 *Training in the recognition of and responses to head trauma and brain injury.—The commission shall establish standards for the instruction of law enforcement officers in the subject of recognition of and responses to head trauma and brain injury in a child under 6 years of age to aid an officer in the detection of head trauma and brain injury due to child abuse. Each law enforcement officer must successfully complete the training as part of the basic recruit training for a law enforcement officer, as required under s. 943.13(9), or as a part of continuing training or education required under s. 943.135(1), before July 1, 2022.*

Section 11. *Until all systems enhancements and integrations required to implement the provisions of s. 39.0142, Florida Statutes, are complete and in production, the Florida Department of Law Enforcement, in collaboration with the Department of Children and Families, shall submit quarterly status reports to the Office of Policy and Budget in the Executive Office of the Governor and the chair of each legislative appropriations committee. Each report must detail progress made to date on each activity needed to implement the technology provisions of the bill.*

Section 12. This act shall take effect July 1, 2020.

CS for SR 1572—A resolution expressing the Legislature’s support for the adoption of policies that will prepare Florida for the environmental and economic impact of climate change, sea-level rise, and flooding, and recognizing the important role that resiliency and infrastructure will play in fortifying this state.

WHEREAS, the State of Florida has 1,350 miles of low-elevation coastline, and 75 percent of this state’s population are living in coastal counties that generate a significant portion of this state’s economic output, and

WHEREAS, the residents and the economy of this state, and the State of Florida itself, would benefit from the development of an established estimated consensus projection of anticipated sea-level rise and flooding impacts to these communities in developing future projects, plans, and programs, and

WHEREAS, clean and renewable energy is a tool that combats climate change, and the provision of adequate electric vehicle charging stations along our main transportation infrastructure will make a cleaner fuel source more readily available and reduce carbon dioxide emissions, and

WHEREAS, appropriate infrastructure will continue to fortify and protect this state, NOW, THEREFORE,

Be It Resolved by the Senate of the State of Florida:

That the Legislature intends to adopt policies focusing on resiliency efforts and appropriate infrastructure which prepare Florida for the environmental and economic impact of climate change, sea-level rise, and flooding and policies relating to clean and renewable energy, including the provision of adequate electric vehicle charging stations.

Senator Mayfield moved the following amendment which was adopted:

Amendment 1 (939348) (with title amendment)—Delete lines 330-2318 and insert:

Section 3. Paragraphs (a) and (b) of subsection (7) of section 373.036, Florida Statutes, are amended to read:

373.036 Florida water plan; district water management plans.—

(7) CONSOLIDATED WATER MANAGEMENT DISTRICT ANNUAL REPORT.—

(a) By March 1, annually, each water management district shall prepare and submit to the *Office of Economic and Demographic Research*, the department, the Governor, the President of the Senate, and the Speaker of the House of Representatives a consolidated water management district annual report on the management of water resources. In addition, copies must be provided by the water management districts to the chairs of all legislative committees having substantive or fiscal jurisdiction over the districts and the governing board of each county in the district having jurisdiction or deriving any funds for operations of the district. Copies of the consolidated annual report must be made available to the public, either in printed or electronic format.

(b) The consolidated annual report shall contain the following elements, as appropriate to that water management district:

1. A district water management plan annual report or the annual work plan report allowed in subparagraph (2)(e)4.
2. The department-approved minimum flows and minimum water levels annual priority list and schedule required by s. 373.042(3).
3. The annual 5-year capital improvements plan required by s. 373.536(6)(a)3.
4. The alternative water supplies annual report required by s. 373.707(8)(n).
5. The final annual 5-year water resource development work program required by s. 373.536(6)(a)4.
6. The Florida Forever Water Management District Work Plan annual report required by s. 373.199(7).
7. The mitigation donation annual report required by s. 373.414(1)(b)2.
8. Information on all projects related to water quality or water quantity as part of a 5-year work program, including:
 - a. A list of all specific projects identified to implement a basin management action plan, *including any projects to connect onsite sew-*

age treatment and disposal systems to central sewerage systems and convert onsite sewage treatment and disposal systems to enhanced nutrient-reducing onsite sewage treatment and disposal systems, or a recovery or prevention strategy;

b. A priority ranking for each listed project for which state funding through the water resources development work program is requested, which must be made available to the public for comment at least 30 days before submission of the consolidated annual report;

c. The estimated cost for each listed project;

d. The estimated completion date for each listed project;

e. The source and amount of financial assistance to be made available by the department, a water management district, or other entity for each listed project; and

f. A quantitative estimate of each listed project's benefit to the watershed, water body, or water segment in which it is located.

9. A grade for each watershed, water body, or water segment in which a project listed under subparagraph 8. is located representing the level of impairment and violations of adopted minimum flow or minimum water levels. The grading system must reflect the severity of the impairment of the watershed, water body, or water segment.

Section 4. *Bottled water industry study.*—The department shall, in coordination with the water management districts, conduct a study on the bottled water industry in this state.

(1) *The study must:*

(a) *Identify all springs statewide that have an associated consumptive use permit for a bottled water facility producing its product with water derived from a spring. Such identification must include:*

1. *The magnitude of the spring;*

2. *Whether the spring has been identified as an Outstanding Florida Spring as defined in s. 373.802, Florida Statutes;*

3. *Any department- or water management district-adopted minimum flow or minimum water levels, the status of any adopted minimum flow or minimum water levels, and any associated recovery or prevention strategy;*

4. *The permitted and actual use associated with the consumptive use permits;*

5. *The reduction in flow associated with the permitted and actual use associated with the consumptive use permits;*

6. *The impact on springs of bottled water facilities as compared to other users; and*

7. *Types of water conservation measures employed at bottled water facilities permitted to derive water from a spring.*

(b) *Identify the labeling and marketing regulations associated with the identification of bottled water as spring water, including whether these regulations incentivize the withdrawal of water from springs.*

(c) *Evaluate the direct and indirect economic benefits to the local communities resulting from bottled water facilities that derive water from springs, including, but not limited to, tax revenue, job creation, and wages.*

(d) *Evaluate the direct and indirect costs to the local communities located in proximity to springs impacted by withdrawals from bottled water production, including, but not limited to, the decreased recreational value of the springs and the cost to other users for the development of alternative water supply or reductions in permit durations and allocations.*

(e) *Include a cost-benefit analysis of withdrawing, producing, marketing, selling, and consuming spring water as compared to other sources of bottled water.*

(f) *Evaluate how much bottled water derived from Florida springs is sold in this state.*

(2) *By June 30, 2021, the department shall submit a report containing the findings of the study to the Governor, the President of the Senate, the Speaker of the House of Representatives, and the Office of Economic and Demographic Research.*

(3) *As used in this section, the term "bottled water" has the same meaning as in s. 500.03, Florida Statutes, and the term "water derived from a spring" means water derived from an underground formation from which water flows naturally to the surface of the earth in the manner described in 21 C.F.R. s. 165.110(a)(2)(vi).*

Section 5. Subsection (5) of section 373.4131, Florida Statutes, is amended, and subsection (6) is added to that section, to read:

373.4131 Statewide environmental resource permitting rules.—

(5) To ensure consistent implementation and interpretation of the rules adopted pursuant to this section, the department shall conduct or oversee regular assessment and training of its staff and the staffs of the water management districts and local governments delegated local pollution control program authority under s. 373.441. *The training must include field inspections of publicly and privately owned stormwater structural controls, such as stormwater retention and detention ponds.*

(6) *By January 1, 2021:*

(a) *The department and the water management districts shall initiate rulemaking to update the stormwater design and operation regulations, including updates to the Environmental Resource Permit Applicant's Handbook, using the most recent scientific information available. As part of rule development, the department shall consider and address low-impact design best management practices and design criteria that increase the removal of nutrients from stormwater discharges, and measures for consistent application of the net improvement performance standard to ensure significant reductions of any pollutant loadings to a waterbody.*

(b) *The department shall review and evaluate permits and inspection data by those entities that submit a self-certification under s. 403.814(12) for compliance with state water quality standards and provide the Legislature with recommendations for improvements to the self-certification process, including, but not limited to, additional staff resources for department review of portions of the process where high-priority water quality issues justify such action.*

Section 6. Subsection (7) is added to section 381.0065, Florida Statutes, to read:

381.0065 Onsite sewage treatment and disposal systems; regulation.—

(7) *USE OF ENHANCED NUTRIENT-REDUCING ONSITE SEWAGE TREATMENT AND DISPOSAL SYSTEMS.—To meet the requirements of a total maximum daily load, the department shall implement a fast-track approval process of no longer than 6 months for the determination of the use of American National Standards Institute 245 systems approved by NSF International before July 1, 2020.*

Section 7. Effective July 1, 2021, present paragraphs (d) through (q) of subsection (2) of section 381.0065, Florida Statutes, are redesignated as paragraphs (e) through (r), respectively, subsections (3) and (4) of that section are amended, and a new paragraph (d) is added to subsection (2) of that section, to read:

381.0065 Onsite sewage treatment and disposal systems; regulation.—

(2) **DEFINITIONS.**—As used in ss. 381.0065-381.0067, the term:

(d) *"Department" means the Department of Environmental Protection.*

(3) **DUTIES AND POWERS OF THE DEPARTMENT OF ENVIRONMENTAL PROTECTION HEALTH.**—The department shall:

(a) Adopt rules to administer ss. 381.0065-381.0067, including definitions that are consistent with the definitions in this section, ~~decreases to setback requirements where no health hazard exists, increases for the lot-flow allowance for performance-based systems, requirements for separation from water table elevation during the wettest season, requirements for the design and construction of any component part of an onsite sewage treatment and disposal system, application and permit requirements for persons who maintain an onsite sewage treatment and disposal system, requirements for maintenance and service agreements for aerobic treatment units and performance-based treatment systems, and recommended standards, including disclosure requirements, for voluntary system inspections to be performed by individuals who are authorized by law to perform such inspections and who shall inform a person having ownership, control, or use of an onsite sewage treatment and disposal system of the inspection standards and of that person's authority to request an inspection based on all or part of the standards.~~

(b) Perform application reviews and site evaluations, issue permits, and conduct inspections and complaint investigations associated with the construction, installation, maintenance, modification, abandonment, operation, use, or repair of an onsite sewage treatment and disposal system for a residence or establishment with an estimated domestic sewage flow of 10,000 gallons or less per day, or an estimated commercial sewage flow of 5,000 gallons or less per day, which is not currently regulated under chapter 403.

(c) Develop a comprehensive program to ensure that onsite sewage treatment and disposal systems regulated by the department are sized, designed, constructed, installed, *sited*, repaired, modified, abandoned, used, operated, and maintained in compliance with this section and rules adopted under this section to prevent groundwater contamination, *including impacts from nutrient pollution*, and surface water contamination and to preserve the public health. The department is the final administrative interpretive authority regarding rule interpretation. In the event of a conflict regarding rule interpretation, the *Secretary of Environmental Protection State Surgeon General*, or his or her designee, shall timely assign a staff person to resolve the dispute.

(d) Grant variances in hardship cases under the conditions prescribed in this section and rules adopted under this section.

(e) Permit the use of a limited number of innovative systems for a specific period of time, when there is compelling evidence that the system will function properly and reliably to meet the requirements of this section and rules adopted under this section.

(f) Issue annual operating permits under this section.

(g) Establish and collect fees as established under s. 381.0066 for services provided with respect to onsite sewage treatment and disposal systems.

(h) Conduct enforcement activities, including imposing fines, issuing citations, suspensions, revocations, injunctions, and emergency orders for violations of this section, part I of chapter 386, or part III of chapter 489 or for a violation of any rule adopted under this section, part I of chapter 386, or part III of chapter 489.

(i) Provide or conduct education and training of department personnel, service providers, and the public regarding onsite sewage treatment and disposal systems.

(j) Supervise research on, demonstration of, and training on the performance, environmental impact, and public health impact of onsite sewage treatment and disposal systems within this state. Research fees collected under s. 381.0066(2)(k) must be used to develop and fund hands-on training centers designed to provide practical information about onsite sewage treatment and disposal systems to septic tank contractors, master septic tank contractors, contractors, inspectors, engineers, and the public and must also be used to fund research projects which focus on improvements of onsite sewage treatment and disposal systems, including use of performance-based standards and reduction of environmental impact. Research projects shall be ~~initially approved by the technical review and advisory panel and shall be applicable to and reflect the soil conditions specific to this state Florida.~~ Such projects shall be awarded through competitive negotiation, using the procedures provided in s. 287.055, to public or private entities that

have experience in onsite sewage treatment and disposal systems in ~~this state Florida~~ and that are principally located in ~~this state Florida~~. ~~Research projects shall not be awarded to firms or entities that employ or are associated with persons who serve on either the technical review and advisory panel or the research review and advisory committee.~~

(k) Approve the installation of individual graywater disposal systems in which blackwater is treated by a central sewerage system.

(l) Regulate and permit the sanitation, handling, treatment, storage, reuse, and disposal of byproducts from any system regulated under this chapter ~~and not regulated by the Department of Environmental Protection.~~

(m) Permit and inspect portable or temporary toilet services and holding tanks. The department shall review applications, perform site evaluations, and issue permits for the temporary use of holding tanks, privies, portable toilet services, or any other toilet facility that is intended for use on a permanent or nonpermanent basis, including facilities placed on construction sites when workers are present. The department may specify standards for the construction, maintenance, use, and operation of any such facility for temporary use.

(n) Regulate and permit maintenance entities for performance-based treatment systems and aerobic treatment unit systems. To ensure systems are maintained and operated according to manufacturer's specifications and designs, the department shall establish by rule minimum qualifying criteria for maintenance entities. The criteria shall include: training, access to approved spare parts and components, access to manufacturer's maintenance and operation manuals, and service response time. The maintenance entity shall employ a contractor licensed under s. 489.105(3)(m), or part III of chapter 489, or a state-licensed wastewater plant operator, who is responsible for maintenance and repair of all systems under contract.

(4) PERMITS; INSTALLATION; AND CONDITIONS.—A person may not construct, repair, modify, abandon, or operate an onsite sewage treatment and disposal system without first obtaining a permit approved by the department. The department may issue permits to carry out this section, ~~but shall not make the issuance of such permits contingent upon prior approval by the department of Environmental Protection~~, except that the issuance of a permit for work seaward of the coastal construction control line established under s. 161.053 shall be contingent upon receipt of any required coastal construction control line permit from the department ~~of Environmental Protection~~. A construction permit is valid for 18 months ~~after from the date of issuance date~~ and may be extended by the department for one 90-day period under rules adopted by the department. A repair permit is valid for 90 days ~~after from~~ the date of issuance. An operating permit must be obtained ~~before prior to~~ the use of any aerobic treatment unit or if the establishment generates commercial waste. Buildings or establishments that use an aerobic treatment unit or generate commercial waste shall be inspected by the department at least annually to assure compliance with the terms of the operating permit. The operating permit for a commercial wastewater system is valid for 1 year ~~after from~~ the date of issuance and must be renewed annually. The operating permit for an aerobic treatment unit is valid for 2 years ~~after from~~ the date of issuance and must be renewed every 2 years. If all information pertaining to the siting, location, and installation conditions or repair of an onsite sewage treatment and disposal system remains the same, a construction or repair permit for the onsite sewage treatment and disposal system may be transferred to another person, if the transferee files, within 60 days after the transfer of ownership, an amended application providing all corrected information and proof of ownership of the property. ~~A There is no fee is not associated with the processing of this supplemental information.~~ A person may not contract to construct, modify, alter, repair, service, abandon, or maintain any portion of an onsite sewage treatment and disposal system without being registered under part III of chapter 489. A property owner who personally performs construction, maintenance, or repairs to a system serving his or her own owner-occupied single-family residence is exempt from registration requirements for performing such construction, maintenance, or repairs on that residence, but is subject to all permitting requirements. A municipality or political subdivision of the state may not issue a building or plumbing permit for any building that requires the use of an onsite sewage treatment and disposal system unless the owner or builder has received a construction permit for such system from the department. A building or structure may not be occupied and a municipality, political

subdivision, or any state or federal agency may not authorize occupancy until the department approves the final installation of the onsite sewage treatment and disposal system. A municipality or political subdivision of the state may not approve any change in occupancy or tenancy of a building that uses an onsite sewage treatment and disposal system until the department has reviewed the use of the system with the proposed change, approved the change, and amended the operating permit.

(a) Subdivisions and lots in which each lot has a minimum area of at least one-half acre and either a minimum dimension of 100 feet or a mean of at least 100 feet of the side bordering the street and the distance formed by a line parallel to the side bordering the street drawn between the two most distant points of the remainder of the lot may be developed with a water system regulated under s. 381.0062 and onsite sewage treatment and disposal systems, provided the projected daily sewage flow does not exceed an average of 1,500 gallons per acre per day, and provided satisfactory drinking water can be obtained and all distance and setback, soil condition, water table elevation, and other related requirements of this section and rules adopted under this section can be met.

(b) Subdivisions and lots using a public water system as defined in s. 403.852 may use onsite sewage treatment and disposal systems, provided there are no more than four lots per acre, provided the projected daily sewage flow does not exceed an average of 2,500 gallons per acre per day, and provided that all distance and setback, soil condition, water table elevation, and other related requirements that are generally applicable to the use of onsite sewage treatment and disposal systems are met.

(c) Notwithstanding paragraphs (a) and (b), for subdivisions platted of record on or before October 1, 1991, when a developer or other appropriate entity has previously made or makes provisions, including financial assurances or other commitments, acceptable to the department of Health, that a central water system will be installed by a regulated public utility based on a density formula, private potable wells may be used with onsite sewage treatment and disposal systems until the agreed-upon densities are reached. In a subdivision regulated by this paragraph, the average daily sewage flow may not exceed 2,500 gallons per acre per day. This section does not affect the validity of existing prior agreements. After October 1, 1991, the exception provided under this paragraph is not available to a developer or other appropriate entity.

(d) Paragraphs (a) and (b) do not apply to any proposed residential subdivision with more than 50 lots or to any proposed commercial subdivision with more than 5 lots where a publicly owned or investor-owned *sewage treatment coverage* system is available. ~~It is the intent of~~ This paragraph ~~does not~~ allow development of additional proposed subdivisions in order to evade the requirements of this paragraph.

(e) *The department shall adopt rules relating to the location of onsite sewage treatment and disposal systems, including establishing setback distances, to prevent groundwater contamination and surface water contamination and to preserve the public health. The rulemaking process for such rules must be completed by July 1, 2022, and the department shall notify the Division of Law Revision of the date such rules take effect. The rules must consider conventional and enhanced nutrient-reducing onsite sewage treatment and disposal system designs, impaired or degraded water bodies, domestic wastewater and drinking water infrastructure, potable water sources, nonpotable wells, stormwater infrastructure, the onsite sewage treatment and disposal system remediation plans developed pursuant to s. 403.067(7)(a)9.b., nutrient pollution, and the recommendations of the onsite sewage treatment and disposal systems technical advisory committee established pursuant to s. 381.00652. The rules must also allow a person to apply for and receive a variance from a rule requirement upon demonstration that the requirement would cause an undue hardship and granting the variance would not cause or contribute to the exceedance of a total maximum daily load.*

(f)(e) Onsite sewage treatment and disposal systems *that are permitted before the rules in paragraph (e) take effect* ~~must~~ not be placed closer than:

1. Seventy-five feet from a private potable well.
2. Two hundred feet from a public potable well serving a residential or nonresidential establishment having a total sewage flow of greater than 2,000 gallons per day.
3. One hundred feet from a public potable well serving a residential or nonresidential establishment having a total sewage flow of less than or equal to 2,000 gallons per day.
4. Fifty feet from any nonpotable well.
5. Ten feet from any storm sewer pipe, to the maximum extent possible, but in no instance shall the setback be less than 5 feet.
6. Seventy-five feet from the mean high-water line of a tidally influenced surface water body.
7. Seventy-five feet from the mean annual flood line of a permanent nontidal surface water body.

8. Fifteen feet from the design high-water line of retention areas, detention areas, or swales designed to contain standing or flowing water for less than 72 hours after a rainfall or the design high-water level of normally dry drainage ditches or normally dry individual lot storm-water retention areas.

~~(f) Except as provided under paragraphs (c) and (t), no limitations shall be imposed by rule, relating to the distance between an onsite disposal system and any area that either permanently or temporarily has visible surface water.~~

(g) ~~All provisions of~~ This section and rules adopted under this section relating to soil condition, water table elevation, distance, and other setback requirements must be equally applied to all lots, with the following exceptions:

1. Any residential lot that was platted and recorded on or after January 1, 1972, or that is part of a residential subdivision that was approved by the appropriate permitting agency on or after January 1, 1972, and that was eligible for an onsite sewage treatment and disposal system construction permit on the date of such platting and recording or approval shall be eligible for an onsite sewage treatment and disposal system construction permit, regardless of when the application for a permit is made. If rules in effect at the time the permit application is filed cannot be met, residential lots platted and recorded or approved on or after January 1, 1972, shall, to the maximum extent possible, comply with the rules in effect at the time the permit application is filed. At a minimum, however, those residential lots platted and recorded or approved on or after January 1, 1972, but before January 1, 1983, shall comply with those rules in effect on January 1, 1983, and those residential lots platted and recorded or approved on or after January 1, 1983, shall comply with those rules in effect at the time of such platting and recording or approval. In determining the maximum extent of compliance with current rules that is possible, the department shall allow structures and appurtenances thereto which were authorized at the time such lots were platted and recorded or approved.

2. Lots platted before 1972 are subject to a 50-foot minimum surface water setback and are not subject to lot size requirements. The projected daily flow for onsite sewage treatment and disposal systems for lots platted before 1972 may not exceed:

- a. Two thousand five hundred gallons per acre per day for lots served by public water systems as defined in s. 403.852.
- b. One thousand five hundred gallons per acre per day for lots served by water systems regulated under s. 381.0062.

(h)1. The department may grant variances in hardship cases which may be less restrictive than the provisions specified in this section. If a variance is granted and the onsite sewage treatment and disposal system construction permit has been issued, the variance may be transferred with the system construction permit, if the transferee files, within 60 days after the transfer of ownership, an amended construction permit application providing all corrected information and proof of ownership of the property and if the same variance would have been required for the new owner of the property as was originally granted to the original applicant for the variance. ~~There is no fee is not asso-~~

ciated with the processing of this supplemental information. A variance may not be granted under this section until the department is satisfied that:

- a. The hardship was not caused intentionally by the action of the applicant;
- b. A ~~no~~ reasonable alternative, taking into consideration factors such as cost, ~~does not exist~~ ~~exists~~ for the treatment of the sewage; and
- c. The discharge from the onsite sewage treatment and disposal system will not adversely affect the health of the applicant or the public or significantly degrade the groundwater or surface waters.

Where soil conditions, water table elevation, and setback provisions are determined by the department to be satisfactory, special consideration must be given to those lots platted before 1972.

2. The department shall appoint and staff a variance review and advisory committee, which shall meet monthly to recommend agency action on variance requests. The committee shall make its recommendations on variance requests at the meeting in which the application is scheduled for consideration, except for an extraordinary change in circumstances, the receipt of new information that raises new issues, or when the applicant requests an extension. The committee shall consider the criteria in subparagraph 1. in its recommended agency action on variance requests and shall also strive to allow property owners the full use of their land where possible. The committee consists of the following:

- a. The ~~Secretary of Environmental Protection~~ ~~State Surgeon General~~ or his or her designee.
- b. A representative from the county health departments.
- c. A representative from the home building industry recommended by the Florida Home Builders Association.
- d. A representative from the septic tank industry recommended by the Florida Onsite Wastewater Association.
- e. A representative from the Department of ~~Health~~ ~~Environmental Protection~~.
- f. A representative from the real estate industry who is also a developer in this state who develops lots using onsite sewage treatment and disposal systems, recommended by the Florida Association of Realtors.
- g. A representative from the engineering profession recommended by the Florida Engineering Society.

Members shall be appointed for a term of 3 years, with such appointments being staggered so that the terms of no more than two members expire in any one year. Members shall serve without remuneration, but if requested, shall be reimbursed for per diem and travel expenses as provided in s. 112.061.

(i) A construction permit may not be issued for an onsite sewage treatment and disposal system in any area zoned or used for industrial or manufacturing purposes, or its equivalent, where a publicly owned or investor-owned sewage treatment system is available, or where a likelihood exists that the system will receive toxic, hazardous, or industrial waste. An existing onsite sewage treatment and disposal system may be repaired if a publicly owned or investor-owned ~~sewage treatment sewerage~~ system is not available within 500 feet of the building sewer stub-out and if system construction and operation standards can be met. This paragraph does not require publicly owned or investor-owned ~~sewage sewerage~~ treatment systems to accept anything other than domestic wastewater.

1. A building located in an area zoned or used for industrial or manufacturing purposes, or its equivalent, when such building is served by an onsite sewage treatment and disposal system, must not be occupied until the owner or tenant has obtained written approval from the department. The department ~~may shall~~ not grant approval when the proposed use of the system is to dispose of toxic, hazardous, or industrial wastewater or toxic or hazardous chemicals.

2. Each person who owns or operates a business or facility in an area zoned or used for industrial or manufacturing purposes, or its equivalent, or who owns or operates a business that has the potential to generate toxic, hazardous, or industrial wastewater or toxic or hazardous chemicals, and uses an onsite sewage treatment and disposal system that is installed on or after July 5, 1989, must obtain an annual system operating permit from the department. A person who owns or operates a business that uses an onsite sewage treatment and disposal system that was installed and approved before July 5, 1989, ~~does not need to not~~ obtain a system operating permit. However, upon change of ownership or tenancy, the new owner or operator must notify the department of the change, and the new owner or operator must obtain an annual system operating permit, regardless of the date that the system was installed or approved.

3. The department shall periodically review and evaluate the continued use of onsite sewage treatment and disposal systems in areas zoned or used for industrial or manufacturing purposes, or its equivalent, and may require the collection and analyses of samples from within and around such systems. If the department finds that toxic or hazardous chemicals or toxic, hazardous, or industrial wastewater have been or are being disposed of through an onsite sewage treatment and disposal system, the department shall initiate enforcement actions against the owner or tenant to ensure adequate cleanup, treatment, and disposal.

(j) An onsite sewage treatment and disposal system designed by a professional engineer registered in the state and certified by such engineer as complying with performance criteria adopted by the department must be approved by the department subject to the following:

1. The performance criteria applicable to engineer-designed systems must be limited to those necessary to ensure that such systems do not adversely affect the public health or significantly degrade the groundwater or surface water. Such performance criteria shall include consideration of the quality of system effluent, the proposed total sewage flow per acre, wastewater treatment capabilities of the natural or replaced soil, water quality classification of the potential surface-water-receiving body, and the structural and maintenance viability of the system for the treatment of domestic wastewater. However, performance criteria shall address only the performance of a system and not a system's design.

2. A person electing to ~~use~~ ~~utilize~~ an engineer-designed system shall, upon completion of the system design, submit such design, certified by a registered professional engineer, to the county health department. The county health department may ~~use~~ ~~utilize~~ an outside consultant to review the engineer-designed system, with the actual cost of such review to be borne by the applicant. Within 5 working days after receiving an engineer-designed system permit application, the county health department shall request additional information if the application is not complete. Within 15 working days after receiving a complete application for an engineer-designed system, the county health department ~~either~~ shall issue the permit or, if it determines that the system does not comply with the performance criteria, shall notify the applicant of that determination and refer the application to the department for a determination as to whether the system should be approved, disapproved, or approved with modification. The department engineer's determination shall prevail over the action of the county health department. The applicant shall be notified in writing of the department's determination and of the applicant's rights to pursue a variance or seek review under the provisions of chapter 120.

3. The owner of an engineer-designed performance-based system must maintain a current maintenance service agreement with a maintenance entity permitted by the department. The maintenance entity shall inspect each system at least twice each year and shall report quarterly to the department on the number of systems inspected and serviced. The reports may be submitted electronically.

4. The property owner of an owner-occupied, single-family residence may be approved and permitted by the department as a maintenance entity for his or her own performance-based treatment system upon written certification from the system manufacturer's approved representative that the property owner has received training on the proper installation and service of the system. The maintenance service agreement must conspicuously disclose that the property owner has the right to maintain his or her own system and is exempt from contractor re-

gistration requirements for performing construction, maintenance, or repairs on the system but is subject to all permitting requirements.

5. The property owner shall obtain a biennial system operating permit from the department for each system. The department shall inspect the system at least annually, or on such periodic basis as the fee collected permits, and may collect system-effluent samples if appropriate to determine compliance with the performance criteria. The fee for the biennial operating permit shall be collected beginning with the second year of system operation.

6. If an engineer-designed system fails to properly function or fails to meet performance standards, the system shall be re-engineered, if necessary, to bring the system into compliance with the provisions of this section.

(k) An innovative system may be approved in conjunction with an engineer-designed site-specific system ~~that which~~ is certified by the engineer to meet the performance-based criteria adopted by the department.

(l) For the Florida Keys, the department shall adopt a special rule for the construction, installation, modification, operation, repair, maintenance, and performance of onsite sewage treatment and disposal systems which considers the unique soil conditions and water table elevations, densities, and setback requirements. On lots where a setback distance of 75 feet from surface waters, saltmarsh, and buttonwood association habitat areas cannot be met, an injection well, approved and permitted by the department, may be used for disposal of effluent from onsite sewage treatment and disposal systems. The following additional requirements apply to onsite sewage treatment and disposal systems in Monroe County:

1. The county, each municipality, and those special districts established for the purpose of the collection, transmission, treatment, or disposal of sewage shall ensure, in accordance with the specific schedules adopted by the Administration Commission under s. 380.0552, the completion of onsite sewage treatment and disposal system upgrades to meet the requirements of this paragraph.

2. Onsite sewage treatment and disposal systems must cease discharge by December 31, 2015, or must comply with department rules and provide the level of treatment which, on a permitted annual average basis, produces an effluent that contains no more than the following concentrations:

- a. Biochemical Oxygen Demand (CBOD5) of 10 mg/l.
- b. Suspended Solids of 10 mg/l.
- c. Total Nitrogen, expressed as N, of 10 mg/l or a reduction in nitrogen of at least 70 percent. A system that has been tested and certified to reduce nitrogen concentrations by at least 70 percent shall be deemed to be in compliance with this standard.
- d. Total Phosphorus, expressed as P, of 1 mg/l.

In addition, onsite sewage treatment and disposal systems discharging to an injection well must provide basic disinfection as defined by department rule.

3. In areas not scheduled to be served by a central *sewerage system sewer*, onsite sewage treatment and disposal systems must, by December 31, 2015, comply with department rules and provide the level of treatment described in subparagraph 2.

4. In areas scheduled to be served by a central *sewerage system sewer* by December 31, 2015, if the property owner has paid a connection fee or assessment for connection to the central *sewerage sewer* system, the property owner may install a holding tank with a high water alarm or an onsite sewage treatment and disposal system that meets the following minimum standards:

- a. The existing tanks must be pumped and inspected and certified as being watertight and free of defects in accordance with department rule; and
- b. A sand-lined drainfield or injection well in accordance with department rule must be installed.

5. Onsite sewage treatment and disposal systems must be monitored for total nitrogen and total phosphorus concentrations as required by department rule.

6. The department shall enforce proper installation, operation, and maintenance of onsite sewage treatment and disposal systems pursuant to this chapter, including ensuring that the appropriate level of treatment described in subparagraph 2. is met.

7. The authority of a local government, including a special district, to mandate connection of an onsite sewage treatment and disposal system is governed by s. 4, chapter 99-395, Laws of Florida.

8. Notwithstanding any other ~~provision of~~ law, an onsite sewage treatment and disposal system installed after July 1, 2010, in unincorporated Monroe County, excluding special wastewater districts, that complies with the standards in subparagraph 2. is not required to connect to a central *sewerage sewer* system until December 31, 2020.

(m) A ~~No~~ product sold in the state for use in onsite sewage treatment and disposal systems may *not* contain any substance in concentrations or amounts that would interfere with or prevent the successful operation of such system, or that would cause discharges from such systems to violate applicable water quality standards. The department shall publish criteria for products known or expected to meet the conditions of this paragraph. ~~If in the event~~ a product does not meet such criteria, such product may be sold if the manufacturer satisfactorily demonstrates to the department that the conditions of this paragraph are met.

(n) Evaluations for determining the seasonal high-water table elevations or the suitability of soils for the use of a new onsite sewage treatment and disposal system shall be performed by department personnel, professional engineers registered in the state, or such other persons with expertise, as defined by rule, in making such evaluations. Evaluations for determining mean annual flood lines shall be performed by those persons identified in paragraph (2)(k) ~~(2)(j)~~. The department shall accept evaluations submitted by professional engineers and such other persons as meet the expertise established by this section or by rule unless the department has a reasonable scientific basis for questioning the accuracy or completeness of the evaluation.

~~(o) The department shall appoint a research review and advisory committee, which shall meet at least semiannually. The committee shall advise the department on directions for new research, review and rank proposals for research contracts, and review draft research reports and make comments. The committee is comprised of:~~

- ~~1. A representative of the State Surgeon General, or his or her designee.~~
- ~~2. A representative from the septic tank industry.~~
- ~~3. A representative from the home building industry.~~
- ~~4. A representative from an environmental interest group.~~
- ~~5. A representative from the State University System, from a department knowledgeable about onsite sewage treatment and disposal systems.~~
- ~~6. A professional engineer registered in this state who has work experience in onsite sewage treatment and disposal systems.~~
- ~~7. A representative from local government who is knowledgeable about domestic wastewater treatment.~~
- ~~8. A representative from the real estate profession.~~
- ~~9. A representative from the restaurant industry.~~
- ~~10. A consumer.~~

~~Members shall be appointed for a term of 2 years, with the appointments being staggered so that the terms of no more than four members expire in any one year. Members shall serve without remuneration, but are entitled to reimbursement for per diem and travel expenses as provided in s. 112.061.~~

(o)(~~g~~) An application for an onsite sewage treatment and disposal system permit shall be completed in full, signed by the owner or the owner's authorized representative, or by a contractor licensed under chapter 489, and shall be accompanied by all required exhibits and fees. ~~No~~ Specific documentation of property ownership *is not shall be* required as a prerequisite to the review of an application or the issuance of a permit. The issuance of a permit does not constitute determination by the department of property ownership.

(p)(~~e~~) The department may not require any form of subdivision analysis of property by an owner, developer, or subdivider *before prior to* submission of an application for an onsite sewage treatment and disposal system.

(q)(~~r~~) ~~Nothing in~~ This section *does not limit limits* the power of a municipality or county to enforce other laws for the protection of the public health and safety.

(r)(~~s~~) In the siting of onsite sewage treatment and disposal systems, including drainfields, shoulders, and slopes, guttering *may shall* not be required on single-family residential dwelling units for systems located greater than 5 feet from the roof drip line of the house. If guttering is used on residential dwelling units, the downspouts shall be directed away from the drainfield.

(s)(~~t~~) Notwithstanding ~~the provisions of~~ subparagraph (g)1., onsite sewage treatment and disposal systems located in floodways of the Suwannee and Aucilla Rivers must adhere to the following requirements:

1. The absorption surface of the drainfield *may shall* not be subject to flooding based on 10-year flood elevations. Provided, however, for lots or parcels created by the subdivision of land in accordance with applicable local government regulations *before prior to* January 17, 1990, if an applicant cannot construct a drainfield system with the absorption surface of the drainfield at an elevation equal to or above 10-year flood elevation, the department shall issue a permit for an onsite sewage treatment and disposal system within the 10-year floodplain of rivers, streams, and other bodies of flowing water if all of the following criteria are met:

- a. The lot is at least one-half acre in size;
- b. The bottom of the drainfield is at least 36 inches above the 2-year flood elevation; and
- c. The applicant installs ~~either~~ a waterless, incinerating, or organic waste composting toilet and a graywater system and drainfield in accordance with department rules; an aerobic treatment unit and drainfield in accordance with department rules; a system ~~approved by the State Health Office~~ that is capable of reducing effluent nitrate by at least 50 percent *in accordance with department rules*; or a system *other than a system using alternative drainfield materials in accordance with department rules approved by the county health department pursuant to department rule other than a system using alternative drainfield materials*. The United States Department of Agriculture Soil Conservation Service soil maps, State of Florida Water Management District data, and Federal Emergency Management Agency Flood Insurance maps are resources that shall be used to identify flood-prone areas.

2. The use of fill or mounding to elevate a drainfield system out of the 10-year floodplain of rivers, streams, or other bodies of flowing water *may shall* not be permitted if such a system lies within a regulatory floodway of the Suwannee and Aucilla Rivers. In cases where the 10-year flood elevation does not coincide with the boundaries of the regulatory floodway, the regulatory floodway will be considered for the purposes of this subsection to extend at a minimum to the 10-year flood elevation.

(t)1.(~~u~~)1. The owner of an aerobic treatment unit system shall maintain a current maintenance service agreement with an aerobic treatment unit maintenance entity permitted by the department. The maintenance entity shall inspect each aerobic treatment unit system at least twice each year and shall report quarterly to the department on the number of aerobic treatment unit systems inspected and serviced. The reports may be submitted electronically.

2. The property owner of an owner-occupied, single-family residence may be approved and permitted by the department as a maintenance entity for his or her own aerobic treatment unit system upon written certification from the system manufacturer's approved representative that the property owner has received training on the proper installation and service of the system. The maintenance entity service agreement must conspicuously disclose that the property owner has the right to maintain his or her own system and is exempt from contractor registration requirements for performing construction, maintenance, or repairs on the system but is subject to all permitting requirements.

3. A septic tank contractor licensed under part III of chapter 489, if approved by the manufacturer, may not be denied access by the manufacturer to aerobic treatment unit system training or spare parts for maintenance entities. After the original warranty period, component parts for an aerobic treatment unit system may be replaced with parts that meet manufacturer's specifications but are manufactured by others. The maintenance entity shall maintain documentation of the substitute part's equivalency for 2 years and shall provide such documentation to the department upon request.

4. The owner of an aerobic treatment unit system shall obtain a system operating permit from the department and allow the department to inspect during reasonable hours each aerobic treatment unit system at least annually, and such inspection may include collection and analysis of system-effluent samples for performance criteria established by rule of the department.

(u)(~~v~~) The department may require the submission of detailed system construction plans that are prepared by a professional engineer registered in this state. The department shall establish by rule criteria for determining when such a submission is required.

(v)(~~w~~) Any permit issued and approved by the department for the installation, modification, or repair of an onsite sewage treatment and disposal system shall transfer with the title to the property in a real estate transaction. A title may not be encumbered at the time of transfer by new permit requirements by a governmental entity for an onsite sewage treatment and disposal system which differ from the permitting requirements in effect at the time the system was permitted, modified, or repaired. An inspection of a system may not be mandated by a governmental entity at the point of sale in a real estate transaction. This paragraph does not affect a septic tank phase-out deferral program implemented by a consolidated government as defined in s. 9, Art. VIII of the State Constitution (1885).

(w)(~~x~~) A governmental entity, including a municipality, county, or statutorily created commission, may not require an engineer-designed performance-based treatment system, excluding a passive engineer-designed performance-based treatment system, before the completion of the Florida Onsite Sewage Nitrogen Reduction Strategies Project. This paragraph does not apply to a governmental entity, including a municipality, county, or statutorily created commission, which adopted a local law, ordinance, or regulation on or before January 31, 2012. Notwithstanding this paragraph, an engineer-designed performance-based treatment system may be used to meet the requirements of the variance review and advisory committee recommendations.

(x)1.(~~y~~)1. An onsite sewage treatment and disposal system is not considered abandoned if the system is disconnected from a structure that was made unusable or destroyed following a disaster and if the system was properly functioning at the time of disconnection and was not adversely affected by the disaster. The onsite sewage treatment and disposal system may be reconnected to a rebuilt structure if:

- a. The reconnection of the system is to the same type of structure which contains the same number of bedrooms or fewer, if the square footage of the structure is less than or equal to 110 percent of the original square footage of the structure that existed before the disaster;
 - b. The system is not a sanitary nuisance; and
 - c. The system has not been altered without prior authorization.
2. An onsite sewage treatment and disposal system that serves a property that is foreclosed upon is not considered abandoned.

(y)(z) If an onsite sewage treatment and disposal system permittee receives, relies upon, and undertakes construction of a system based upon a validly issued construction permit under rules applicable at the time of construction but a change to a rule occurs within 5 years after the approval of the system for construction but before the final approval of the system, the rules applicable and in effect at the time of construction approval apply at the time of final approval if fundamental site conditions have not changed between the time of construction approval and final approval.

(z)(aa) An existing-system inspection or evaluation and assessment, or a modification, replacement, or upgrade of an onsite sewage treatment and disposal system is not required for a remodeling addition or modification to a single-family home if a bedroom is not added. However, a remodeling addition or modification to a single-family home may not cover any part of the existing system or encroach upon a required setback or the unobstructed area. To determine if a setback or the unobstructed area is impacted, the local health department shall review and verify a floor plan and site plan of the proposed remodeling addition or modification to the home submitted by a remodeler which shows the location of the system, including the distance of the remodeling addition or modification to the home from the onsite sewage treatment and disposal system. The local health department may visit the site or otherwise determine the best means of verifying the information submitted. A verification of the location of a system is not an inspection or evaluation and assessment of the system. The review and verification must be completed within 7 business days after receipt by the local health department of a floor plan and site plan. If the review and verification is not completed within such time, the remodeling addition or modification to the single-family home, for the purposes of this paragraph, is approved.

Section 8. Section 381.00652, Florida Statutes, is created to read:

381.00652 Onsite sewage treatment and disposal systems technical advisory committee.—

(1) *As used in this section, the term “department” means the Department of Environmental Protection.*

(2) *An onsite sewage treatment and disposal systems technical advisory committee, a committee as defined in s. 20.03(8), is created within the department. The committee shall:*

(a) *Provide recommendations to increase the availability of enhanced nutrient-reducing onsite sewage treatment and disposal systems in the marketplace, including such systems that are cost-effective, low maintenance, and reliable.*

(b) *Consider and recommend regulatory options, such as fast-track approval, prequalification, or expedited permitting, to facilitate the introduction and use of enhanced nutrient-reducing onsite sewage treatment and disposal systems that have been reviewed and approved by a national agency or organization, such as the American National Standards Institute 245 systems approved by the NSF International.*

(c) *Provide recommendations for appropriate setback distances for onsite sewage treatment and disposal systems from surface water, groundwater, and wells.*

(3) *The department shall use existing and available resources to administer and support the activities of the committee.*

(4)(a) *By August 1, 2021, the department, in consultation with the Department of Health, shall appoint no more than 10 members to the committee, as follows:*

1. *A professional engineer.*
2. *A septic tank contractor.*
3. *Two representatives from the home building industry.*
4. *A representative from the real estate industry.*
5. *A representative from the onsite sewage treatment and disposal system industry.*
6. *A representative from local government.*

7. *Two representatives from the environmental community.*

8. *A representative of the scientific and technical community who has substantial expertise in the areas of the fate and transport of water pollutants, toxicology, epidemiology, geology, biology, or environmental sciences.*

(b) *Members shall serve without compensation and are not entitled to reimbursement for per diem or travel expenses.*

(5) *By January 1, 2022, the committee shall submit its recommendations to the Governor, the President of the Senate, and the Speaker of the House of Representatives.*

(6) *This section expires August 15, 2022.*

Section 9. *Effective July 1, 2021, section 381.0068, Florida Statutes, is repealed.*

Section 10. Present subsections (14) through (44) of section 403.061, Florida Statutes, are redesignated as subsections (15) through (45), respectively, subsection (7) is amended, and a new subsection (14) is added to that section, to read:

403.061 Department; powers and duties.—The department shall have the power and the duty to control and prohibit pollution of air and water in accordance with the law and rules adopted and promulgated by it and, for this purpose, to:

(7) ~~Adopt rules pursuant to ss. 120.536(1) and 120.54 to implement the provisions of this act. Any rule adopted pursuant to this act must shall be consistent with the provisions of federal law, if any, relating to control of emissions from motor vehicles, effluent limitations, pretreatment requirements, or standards of performance. A No county, municipality, or political subdivision may not shall adopt or enforce any local ordinance, special law, or local regulation requiring the installation of Stage II vapor recovery systems, as currently defined by department rule, unless such county, municipality, or political subdivision is or has been in the past designated by federal regulation as a moderate, serious, or severe ozone nonattainment area. Rules adopted pursuant to this act may shall not require dischargers of waste into waters of the state to improve natural background conditions. The department shall adopt rules to reasonably limit, reduce, and eliminate domestic wastewater collection and transmission system pipe leakages and inflow and infiltration. Discharges from steam electric generating plants existing or licensed under this chapter on July 1, 1984, may shall not be required to be treated to a greater extent than may be necessary to assure that the quality of nonthermal components of discharges from nonrecirculated cooling water systems is as high as the quality of the makeup waters; that the quality of nonthermal components of discharges from recirculated cooling water systems is no lower than is allowed for blowdown from such systems; or that the quality of non-cooling system discharges which receive makeup water from a receiving body of water which does not meet applicable department water quality standards is as high as the quality of the receiving body of water. The department may not adopt standards more stringent than federal regulations, except as provided in s. 403.804.~~

(14) *In order to promote resilient utilities, require public utilities or their affiliated companies holding, applying for, or renewing a domestic wastewater discharge permit to file annual reports and other data regarding transactions or allocations of common costs and expenditures on pollution mitigation and prevention among the utility’s permitted systems, including, but not limited to, the prevention of sanitary sewer overflows, collection and transmission system pipe leakages, and inflow and infiltration. The department shall adopt rules to implement this subsection.*

The department shall implement such programs in conjunction with its other powers and duties and shall place special emphasis on reducing and eliminating contamination that presents a threat to humans, animals or plants, or to the environment.

Section 11. Section 403.0616, Florida Statutes, is created to read:

403.0616 Real-time water quality monitoring program.—

(1) *Subject to appropriation, the department shall establish a real-time water quality monitoring program to assist in the restoration,*

preservation, and enhancement of impaired water bodies and coastal resources.

(2) In order to expedite the creation and implementation of the program, the department is encouraged to form public-private partnerships with established scientific entities that have proven existing real-time water quality monitoring equipment and experience in deploying the equipment.

Section 12. Subsection (17) is added to section 403.064, Florida Statutes, to read:

403.064 Reuse of reclaimed water.—

(17) By December 31, 2020, the department shall initiate rule revisions based on the recommendations of the Potable Reuse Commission's 2020 report "Advancing Potable Reuse in Florida: Framework for the Implementation of Potable Reuse in Florida." Rules for potable reuse projects must address contaminants of emerging concern and meet or exceed federal and state drinking water quality standards and other applicable water quality standards. Reclaimed water is deemed a water source for public water supply systems.

Section 13. Subsection (7) of section 403.067, Florida Statutes, is amended to read:

403.067 Establishment and implementation of total maximum daily loads.—

(7) DEVELOPMENT OF BASIN MANAGEMENT PLANS AND IMPLEMENTATION OF TOTAL MAXIMUM DAILY LOADS.—

(a) Basin management action plans.—

1. In developing and implementing the total maximum daily load for a water body, the department, or the department in conjunction with a water management district, may develop a basin management action plan that addresses some or all of the watersheds and basins tributary to the water body. Such plan must integrate the appropriate management strategies available to the state through existing water quality protection programs to achieve the total maximum daily loads and may provide for phased implementation of these management strategies to promote timely, cost-effective actions as provided for in s. 403.151. The plan must establish a schedule implementing the management strategies, establish a basis for evaluating the plan's effectiveness, and identify feasible funding strategies for implementing the plan's management strategies. The management strategies may include regional treatment systems or other public works, when where appropriate, and voluntary trading of water quality credits to achieve the needed pollutant load reductions.

2. A basin management action plan must equitably allocate, pursuant to paragraph (6)(b), pollutant reductions to individual basins, as a whole to all basins, or to each identified point source or category of nonpoint sources, as appropriate. For nonpoint sources for which best management practices have been adopted, the initial requirement specified by the plan must be those practices developed pursuant to paragraph (c). When where appropriate, the plan may take into account the benefits of pollutant load reduction achieved by point or nonpoint sources that have implemented management strategies to reduce pollutant loads, including best management practices, before the development of the basin management action plan. The plan must also identify the mechanisms that will address potential future increases in pollutant loading.

3. The basin management action planning process is intended to involve the broadest possible range of interested parties, with the objective of encouraging the greatest amount of cooperation and consensus possible. In developing a basin management action plan, the department shall assure that key stakeholders, including, but not limited to, applicable local governments, water management districts, the Department of Agriculture and Consumer Services, other appropriate state agencies, local soil and water conservation districts, environmental groups, regulated interests, and affected pollution sources, are invited to participate in the process. The department shall hold at least one public meeting in the vicinity of the watershed or basin to discuss and receive comments during the planning process and shall otherwise encourage public participation to the greatest practicable extent. Notice

of the public meeting must be published in a newspaper of general circulation in each county in which the watershed or basin lies at least not less than 5 days, but not nor more than 15 days, before the public meeting. A basin management action plan does not supplant or otherwise alter any assessment made under subsection (3) or subsection (4) or any calculation or initial allocation.

4. Each new or revised basin management action plan shall include:

a. The appropriate management strategies available through existing water quality protection programs to achieve total maximum daily loads, which may provide for phased implementation to promote timely, cost-effective actions as provided for in s. 403.151;

b. A description of best management practices adopted by rule;

c. A list of projects in priority ranking with a planning-level cost estimate and estimated date of completion for each listed project;

d. The source and amount of financial assistance to be made available by the department, a water management district, or other entity for each listed project, if applicable; and

e. A planning-level estimate of each listed project's expected load reduction, if applicable.

5. The department shall adopt all or any part of a basin management action plan and any amendment to such plan by secretarial order pursuant to chapter 120 to implement ~~the provisions of~~ this section.

6. The basin management action plan must include milestones for implementation and water quality improvement, and an associated water quality monitoring component sufficient to evaluate whether reasonable progress in pollutant load reductions is being achieved over time. An assessment of progress toward these milestones shall be conducted every 5 years, and revisions to the plan shall be made as appropriate. Revisions to the basin management action plan shall be made by the department in cooperation with basin stakeholders. Revisions to the management strategies required for nonpoint sources must follow the procedures ~~set forth~~ in subparagraph (c)4. Revised basin management action plans must be adopted pursuant to subparagraph 5.

7. In accordance with procedures adopted by rule under paragraph (9)(c), basin management action plans, and other pollution control programs under local, state, or federal authority as provided in subsection (4), may allow point or nonpoint sources that will achieve greater pollutant reductions than required by an adopted total maximum daily load or wasteload allocation to generate, register, and trade water quality credits for the excess reductions to enable other sources to achieve their allocation; however, the generation of water quality credits does not remove the obligation of a source or activity to meet applicable technology requirements or adopted best management practices. Such plans must allow trading between NPDES permittees, and trading that may or may not involve NPDES permittees, where the generation or use of the credits involve an entity or activity not subject to department water discharge permits whose owner voluntarily elects to obtain department authorization for the generation and sale of credits.

8. ~~The provisions of~~ The department's rule relating to the equitable abatement of pollutants into surface waters do not apply to water bodies or water body segments for which a basin management plan that takes into account future new or expanded activities or discharges has been adopted under this section.

9. In order to promote resilient wastewater utilities, if the department identifies domestic wastewater treatment facilities or onsite sewage treatment and disposal systems as contributors of at least 20 percent of point source or nonpoint source nutrient pollution or if the department determines remediation is necessary to achieve the total maximum daily load, a basin management action plan for a nutrient total maximum daily load must include the following:

a. A wastewater treatment plan developed by each local government, in cooperation with the department, the water management district, and the public and private domestic wastewater treatment facilities within the jurisdiction of the local government, that addresses domestic wastewater. The wastewater treatment plan must:

(I) Provide for construction, expansion, or upgrades necessary to achieve the total maximum daily load requirements applicable to the domestic wastewater treatment facility.

(II) Include the permitted capacity in average annual gallons per day for the domestic wastewater treatment facility; the average nutrient concentration and the estimated average nutrient load of the domestic wastewater; a projected timeline of the dates by which the construction of any facility improvements will begin and be completed and the date by which operations of the improved facility will begin; the estimated cost of the improvements; and the identity of responsible parties.

The wastewater treatment plan must be adopted as part of the basin management action plan no later than July 1, 2025. A local government that does not have a domestic wastewater treatment facility in its jurisdiction is not required to develop a wastewater treatment plan unless there is a demonstrated need to establish a domestic wastewater treatment facility within its jurisdiction to improve water quality necessary to achieve a total maximum daily load. A local government is not responsible for a private domestic wastewater facility's compliance with a basin management action plan unless such facility is operated through a public-private partnership to which the local government is a party.

b. An onsite sewage treatment and disposal system remediation plan developed by each local government in cooperation with the department, the Department of Health, water management districts, and public and private domestic wastewater treatment facilities.

(I) The onsite sewage treatment and disposal system remediation plan must identify cost-effective and financially feasible projects necessary to achieve the nutrient load reductions required for onsite sewage treatment and disposal systems. To identify cost-effective and financially feasible projects for remediation of onsite sewage treatment and disposal systems, the local government shall:

(A) Include an inventory of onsite sewage treatment and disposal systems based on the best information available;

(B) Identify onsite sewage treatment and disposal systems that would be eliminated through connection to existing or future central domestic wastewater infrastructure in the jurisdiction or domestic wastewater service area of the local government, that would be replaced with or upgraded to enhanced nutrient-reducing onsite sewage treatment and disposal systems, or that would remain on conventional onsite sewage treatment and disposal systems;

(C) Estimate the costs of potential onsite sewage treatment and disposal system connections, upgrades, or replacements; and

(D) Identify deadlines and interim milestones for the planning, design, and construction of projects.

(II) The department shall adopt the onsite sewage treatment and disposal system remediation plan as part of the basin management action plan no later than July 1, 2025, or as required for Outstanding Florida Springs under s. 373.807.

10. When identifying wastewater projects in a basin management action plan, the department may not require the higher cost option if it achieves the same nutrient load reduction as a lower cost option. A regulated entity may choose a different cost option if it complies with the pollutant reduction requirements of an adopted total maximum daily load and meets or exceeds the pollution reduction requirement of the original project.

(b) Total maximum daily load implementation.—

1. The department shall be the lead agency in coordinating the implementation of the total maximum daily loads through existing water quality protection programs. Application of a total maximum daily load by a water management district must be consistent with this section and does not require the issuance of an order or a separate action pursuant to s. 120.536(1) or s. 120.54 for the adoption of the calculation and allocation previously established by the department. Such programs may include, but are not limited to:

a. Permitting and other existing regulatory programs, including water-quality-based effluent limitations;

b. Nonregulatory and incentive-based programs, including best management practices, cost sharing, waste minimization, pollution prevention, agreements established pursuant to s. 403.061(22) ~~s. 403.061(21)~~, and public education;

c. Other water quality management and restoration activities, for example surface water improvement and management plans approved by water management districts or basin management action plans developed pursuant to this subsection;

d. Trading of water quality credits or other equitable economically based agreements;

e. Public works including capital facilities; or

f. Land acquisition.

2. For a basin management action plan adopted pursuant to paragraph (a), any management strategies and pollutant reduction requirements associated with a pollutant of concern for which a total maximum daily load has been developed, including effluent limits ~~set forth~~ for a discharger subject to NPDES permitting, if any, must be included in a timely manner in subsequent NPDES permits or permit modifications for that discharger. The department may not impose limits or conditions implementing an adopted total maximum daily load in an NPDES permit until the permit expires, the discharge is modified, or the permit is reopened pursuant to an adopted basin management action plan.

a. Absent a detailed allocation, total maximum daily loads must be implemented through NPDES permit conditions that provide for a compliance schedule. In such instances, a facility's NPDES permit must allow time for the issuance of an order adopting the basin management action plan. The time allowed for the issuance of an order adopting the plan may not exceed 5 years. Upon issuance of an order adopting the plan, the permit must be reopened or renewed, as necessary, and permit conditions consistent with the plan must be established. Notwithstanding the other provisions of this subparagraph, upon request by an NPDES permittee, the department as part of a permit issuance, renewal, or modification may establish individual allocations before the adoption of a basin management action plan.

b. For holders of NPDES municipal separate storm sewer system permits and other stormwater sources, implementation of a total maximum daily load or basin management action plan must be achieved, to the maximum extent practicable, through the use of best management practices or other management measures.

c. The basin management action plan does not relieve the discharger from any requirement to obtain, renew, or modify an NPDES permit or to abide by other requirements of the permit.

d. Management strategies ~~set forth~~ in a basin management action plan to be implemented by a discharger subject to permitting by the department must be completed pursuant to the schedule ~~set forth~~ in the basin management action plan. This implementation schedule may extend beyond the 5-year term of an NPDES permit.

e. Management strategies and pollution reduction requirements ~~set forth~~ in a basin management action plan for a specific pollutant of concern are not subject to challenge under chapter 120 at the time they are incorporated, in an identical form, into a subsequent NPDES permit or permit modification.

f. For nonagricultural pollutant sources not subject to NPDES permitting but permitted pursuant to other state, regional, or local water quality programs, the pollutant reduction actions adopted in a basin management action plan must be implemented to the maximum extent practicable as part of those permitting programs.

g. A nonpoint source discharger included in a basin management action plan must demonstrate compliance with the pollutant reductions established under subsection (6) by implementing the appropriate best management practices established pursuant to paragraph (c) or conducting water quality monitoring prescribed by the department or a water management district. A nonpoint source discharger may, in accordance with department rules, supplement the implementation of best management practices with water quality credit trades in order to

demonstrate compliance with the pollutant reductions established under subsection (6).

h. A nonpoint source discharger included in a basin management action plan may be subject to enforcement action by the department or a water management district based upon a failure to implement the responsibilities ~~set forth~~ in sub-subparagraph g.

i. A landowner, discharger, or other responsible person who is implementing applicable management strategies specified in an adopted basin management action plan may not be required by permit, enforcement action, or otherwise to implement additional management strategies, including water quality credit trading, to reduce pollutant loads to attain the pollutant reductions established pursuant to subsection (6) and shall be deemed to be in compliance with this section. This subparagraph does not limit the authority of the department to amend a basin management action plan as specified in subparagraph (a)6.

(c) *Best management practices.*—

1. The department, in cooperation with the water management districts and other interested parties, as appropriate, may develop suitable interim measures, best management practices, or other measures necessary to achieve the level of pollution reduction established by the department for nonagricultural nonpoint pollutant sources in allocations developed pursuant to subsection (6) and this subsection. These practices and measures may be adopted by rule by the department and the water management districts and, where adopted by rule, shall be implemented by those parties responsible for nonagricultural nonpoint source pollution.

2. The Department of Agriculture and Consumer Services may develop and adopt by rule pursuant to ss. 120.536(1) and 120.54 suitable interim measures, best management practices, or other measures necessary to achieve the level of pollution reduction established by the department for agricultural pollutant sources in allocations developed pursuant to subsection (6) and this subsection or for programs implemented pursuant to paragraph (12)(b). These practices and measures may be implemented by those parties responsible for agricultural pollutant sources and the department, the water management districts, and the Department of Agriculture and Consumer Services shall assist with implementation. In the process of developing and adopting rules for interim measures, best management practices, or other measures, the Department of Agriculture and Consumer Services shall consult with the department, the Department of Health, the water management districts, representatives from affected farming groups, and environmental group representatives. Such rules must also incorporate provisions for a notice of intent to implement the practices and a system to assure the implementation of the practices, including site inspection and recordkeeping requirements.

3. ~~When~~ ~~Where~~ interim measures, best management practices, or other measures are adopted by rule, the effectiveness of such practices in achieving the levels of pollution reduction established in allocations developed by the department pursuant to subsection (6) and this subsection or in programs implemented pursuant to paragraph (12)(b) must be verified at representative sites by the department. The department shall use best professional judgment in making the initial verification that the best management practices are reasonably expected to be effective and, ~~when~~ ~~where~~ applicable, shall ~~must~~ notify the appropriate water management district or the Department of Agriculture and Consumer Services of its initial verification before the adoption of a rule proposed pursuant to this paragraph. Implementation, in accordance with rules adopted under this paragraph, of practices that have been initially verified to be effective, or verified to be effective by monitoring at representative sites, by the department, shall provide a presumption of compliance with state water quality standards and release from ~~the provisions of~~ s. 376.307(5) for those pollutants addressed by the practices, and the department is not authorized to institute proceedings against the owner of the source of pollution to recover costs or damages associated with the contamination of surface water or groundwater caused by those pollutants. Research projects funded by the department, a water management district, or the Department of Agriculture and Consumer Services to develop or demonstrate interim measures or best management practices shall be granted a presumption of compliance with state water quality standards and a release from ~~the provisions of~~ s. 376.307(5). The presumption of compliance and release

is limited to the research site and only for those pollutants addressed by the interim measures or best management practices. Eligibility for the presumption of compliance and release is limited to research projects on sites where the owner or operator of the research site and the department, a water management district, or the Department of Agriculture and Consumer Services have entered into a contract or other agreement that, at a minimum, specifies the research objectives, the cost-share responsibilities of the parties, and a schedule that details the beginning and ending dates of the project.

4. ~~When~~ ~~Where~~ water quality problems are demonstrated, despite the appropriate implementation, operation, and maintenance of best management practices and other measures required by rules adopted under this paragraph, the department, a water management district, or the Department of Agriculture and Consumer Services, in consultation with the department, shall institute a reevaluation of the best management practice or other measure. ~~If~~ ~~Should~~ the reevaluation ~~determines~~ ~~determine~~ that the best management practice or other measure requires modification, the department, a water management district, or the Department of Agriculture and Consumer Services, as appropriate, shall revise the rule to require implementation of the modified practice within a reasonable time period as specified in the rule.

5. *Subject to subparagraph 6., the Department of Agriculture and Consumer Services shall provide to the department information obtained pursuant to subparagraph (d)3.*

~~6.5-~~ Agricultural records relating to processes or methods of production, costs of production, profits, or other financial information held by the Department of Agriculture and Consumer Services pursuant to subparagraphs 3., ~~and~~ 4., and 5. or pursuant to any rule adopted pursuant to subparagraph 2. are confidential and exempt from s. 119.07(1) and s. 24(a), Art. I of the State Constitution. Upon request, records made confidential and exempt pursuant to this subparagraph shall be released to the department or any water management district provided that the confidentiality specified by this subparagraph for such records is maintained.

~~7.6-~~ ~~The provisions of~~ Subparagraphs 1. and 2. do not preclude the department or water management district from requiring compliance with water quality standards or with current best management practice requirements ~~set forth~~ in any applicable regulatory program authorized by law for the purpose of protecting water quality. Additionally, subparagraphs 1. and 2. are applicable only to the extent that they do not conflict with any rules adopted by the department that are necessary to maintain a federally delegated or approved program.

(d) *Enforcement and verification of basin management action plans and management strategies.*—

1. Basin management action plans are enforceable pursuant to this section and ss. 403.121, 403.141, and 403.161. Management strategies, including best management practices and water quality monitoring, are enforceable under this chapter.

2. No later than January 1, 2017:

a. The department, in consultation with the water management districts and the Department of Agriculture and Consumer Services, shall initiate rulemaking to adopt procedures to verify implementation of water quality monitoring required in lieu of implementation of best management practices or other measures pursuant to sub-subparagraph (b)2.g.;

b. The department, in consultation with the water management districts and the Department of Agriculture and Consumer Services, shall initiate rulemaking to adopt procedures to verify implementation of nonagricultural interim measures, best management practices, or other measures adopted by rule pursuant to subparagraph (c)1.; and

c. The Department of Agriculture and Consumer Services, in consultation with the water management districts and the department, shall initiate rulemaking to adopt procedures to verify implementation of agricultural interim measures, best management practices, or other measures adopted by rule pursuant to subparagraph(c)2.

The rules required under this subparagraph shall include enforcement procedures applicable to the landowner, discharger, or other responsible person required to implement applicable management strategies, including best management practices or water quality monitoring as a result of noncompliance.

3. At least every 2 years, the Department of Agriculture and Consumer Services shall perform onsite inspections of each agricultural producer that enrolls in a best management practice to ensure that such practice is being properly implemented. Such verification must include a collection and review of the best management practice documentation from the previous 2 years required by rules adopted pursuant to subparagraph (c)2., including, but not limited to, nitrogen and phosphorus fertilizer application records, which must be collected and retained pursuant to subparagraphs (c)3., 4., and 6. The Department of Agriculture and Consumer Services shall initially prioritize the inspection of agricultural producers located in the basin management action plans for Lake Okeechobee, the Indian River Lagoon, the Caloosahatchee River and Estuary, and Silver Springs.

(e) Cooperative agricultural regional water quality improvement element.—

1. The department, the Department of Agriculture and Consumer Services, and owners of agricultural operations in the basin shall develop a cooperative agricultural regional water quality improvement element as part of a basin management action plan only if:

a. Agricultural measures have been adopted by the Department of Agriculture and Consumer Services pursuant to subparagraph (c)2. and have been implemented and the waterbody remains impaired;

b. Agricultural nonpoint sources contribute to at least 20 percent of nonpoint source nutrient discharges; and

c. The department determines that additional measures, in combination with state-sponsored regional projects and other management strategies included in the basin management action plan, are necessary to achieve the total maximum daily load.

2. The element will be implemented through the use of cost-sharing projects. The element must include cost-effective and technically and financially practical cooperative regional agricultural nutrient reduction projects that can be implemented on private properties on a site-specific, cooperative basis. Such cooperative regional agricultural nutrient reduction projects may include land acquisition in fee or conservation easements on the lands of willing sellers and site-specific water quality improvement or dispersed water management projects on the lands of project participants.

3. To qualify for participation in the cooperative agricultural regional water quality improvement element, the participant must have already implemented and be in compliance with best management practices or other measures adopted by the Department of Agriculture and Consumer Services pursuant to subparagraph (c)2. The element may be included in the basin management action plan as a part of the next 5-year assessment under subparagraph (a)6.

4. The department may submit a legislative budget request to fund projects developed pursuant to this paragraph. In allocating funds for projects funded pursuant to this paragraph, the department shall provide at least 20 percent of its annual appropriation for projects in sub-basins with the highest nutrient concentrations within a basin management action plan.

(f) Data collection and research.—

1. The Department of Agriculture and Consumer Services, in cooperation with the University of Florida Institute of Food and Agricultural Sciences and other state universities and Florida College System institutions that have agricultural research programs, shall annually develop research plans and legislative budget requests to:

a. Evaluate and suggest enhancements to the existing adopted agricultural best management practices to reduce nutrient runoff;

b. Develop new best management practices that, if proven effective, the Department of Agriculture and Consumer Services may adopt by rule pursuant to subparagraph (c)2.; and

c. Develop agricultural nutrient runoff reduction projects that willing participants could implement on a site-specific, cooperative basis, in addition to best management practices. The department may consider these projects for inclusion in a basin management action plan. These nutrient runoff reduction projects must reduce the nutrient impacts from agricultural operations on water quality when evaluated with the projects and management strategies currently included in the basin management action plan.

2. To be considered for funding, the University of Florida Institute of Food and Agricultural Sciences and other state universities and Florida College System institutions that have agricultural research programs must submit such plans to the department and the Department of Agriculture and Consumer Services by August 1, 2021, and each May 1 thereafter.

3. The department shall work with the University of Florida Institute of Food and Agricultural Sciences and regulated entities to consider the adoption by rule of best management practices for nutrient impacts from golf courses. Such adopted best management practices are subject to the requirements of paragraph (c).

Section 14. Section 403.0671, Florida Statutes, is created to read:

403.0671 Basin management action plan wastewater reports.—

(1) By July 1, 2021, the department, in coordination with the county health departments, wastewater treatment facilities, and other governmental entities, shall submit a report to the Governor, the President of the Senate, and the Speaker of the House of Representatives evaluating the costs of wastewater projects identified in the basin management action plans developed pursuant to ss. 373.807 and 403.067(7) and the onsite sewage treatment and disposal system remediation plans and other restoration plans developed to meet the total maximum daily loads required under s. 403.067. The report must include:

(a) Projects to:

1. Replace onsite sewage treatment and disposal systems with enhanced nutrient-reducing onsite sewage treatment and disposal systems.

2. Install or retrofit onsite sewage treatment and disposal systems with enhanced nutrient-reducing technologies.

3. Construct, upgrade, or expand domestic wastewater treatment facilities to meet the wastewater treatment plan required under s. 403.067(7)(a)9.

4. Connect onsite sewage treatment and disposal systems to domestic wastewater treatment facilities;

(b) The estimated costs, nutrient load reduction estimates, and other benefits of each project;

(c) The estimated implementation timeline for each project;

(d) A proposed 5-year funding plan for each project and the source and amount of financial assistance the department, a water management district, or other project partner will make available to fund the project; and

(e) The projected costs of installing enhanced nutrient-reducing onsite sewage treatment and disposal systems on buildable lots in priority focus areas to comply with s. 373.811.

(2) By July 1, 2021, the department shall submit a report to the Governor, the President of the Senate, and the Speaker of the House of Representatives that provides an assessment of the water quality monitoring being conducted for each basin management action plan implementing a nutrient total maximum daily load. In developing the report, the department may coordinate with water management districts and any applicable university. The report must:

(a) Evaluate the water quality monitoring prescribed for each basin management action plan to determine if it is sufficient to detect changes in water quality caused by the implementation of a project.

(b) Identify gaps in water quality monitoring.

(c) Recommend water quality monitoring needs.

(3) Beginning January 1, 2022, and each January 1 thereafter, the department shall submit to the Office of Economic and Demographic Research the cost estimates for projects required in s. 403.067(7)(a)9. The office shall include the project cost estimates in its annual assessment conducted pursuant to s. 403.928.

Section 15. Section 403.0673, Florida Statutes, is created to read:

403.0673 Wastewater grant program.—A wastewater grant program is established within the Department of Environmental Protection.

(1) Subject to the appropriation of funds by the Legislature, the department may provide grants for the following projects within a basin management action plan, an alternative restoration plan adopted by final order, or a rural area of opportunity under s. 288.0656 which will individually or collectively reduce excess nutrient pollution:

(a) Projects to retrofit onsite sewage treatment and disposal systems to upgrade such systems to enhanced nutrient-reducing onsite sewage treatment and disposal systems.

(b) Projects to construct, upgrade, or expand facilities to provide advanced waste treatment, as defined in s. 403.086(4).

(c) Projects to connect onsite sewage treatment and disposal systems to central sewer facilities.

(2) In allocating such funds, priority must be given to projects that subsidize the connection of onsite sewage treatment and disposal systems to wastewater treatment facilities. First priority must be given to subsidize the connection of onsite sewage treatment and disposal systems to existing infrastructure. Second priority must be given to any expansion of a collection or transmission system that promotes efficiency by planning the installation of wastewater transmission facilities to be constructed concurrently with other construction projects occurring within or along a transportation facility right-of-way. Third priority must be given to all other connections of onsite sewage treatment and disposal systems to wastewater treatment facilities. The department shall consider the estimated reduction in nutrient load per project; project readiness; the cost-effectiveness of the project; the overall environmental benefit of a project; the location of a project; the availability of local matching funds; and projected water savings or quantity improvements associated with a project.

(3) Each grant for a project described in subsection (1) must require a minimum of a 50 percent local match of funds. However, the department may, at its discretion, waive, in whole or in part, this consideration of the local contribution for proposed projects within an area designated as a rural area of opportunity under s. 288.0656.

(4) The department shall coordinate with each water management district, as necessary, to identify grant recipients in each district.

(5) Beginning January 1, 2021, and each January 1 thereafter, the department shall submit a report regarding the projects funded pursuant to this section to the Governor, the President of the Senate, and the Speaker of the House of Representatives.

Section 16. Section 403.0855, Florida Statutes, is created to read:

403.0855 Biosolids management.—

(1) The Legislature finds that it is in the best interest of this state to regulate biosolids management in order to minimize the migration of nutrients that impair water bodies. The Legislature further finds that permitting according to site-specific application conditions, an increased inspection rate, groundwater and surface water monitoring protocols, and nutrient management research will improve biosolids management and assist in protecting this state's water resources and water quality.

(2) The department shall adopt rules for biosolids management. Rules adopted by the department pursuant to this section may not take effect until ratified by the Legislature.

(3) For a new land application site permit or a permit renewal issued after July 1, 2020, the permittee of a biosolids land application site shall:

(a) Ensure a minimum unsaturated soil depth of 2 feet between the depth of biosolids placement and the water table level at the time the Class A or Class B biosolids are applied to the soil. Biosolids may not be applied on soils that have a seasonal high-water table less than 6 inches from the soil surface or within 6 inches of the intended depth of biosolids placement, unless a department-approved nutrient management plan and water quality monitoring plan provide reasonable assurances that the land application of biosolids at the site will not cause or contribute to a violation of the state's surface water quality standards or groundwater standards. As used in this subsection, the term "seasonal high water" means the elevation to which the ground and surface water may be expected to rise due to a normal wet season.

(b) Be enrolled in the Department of Agriculture and Consumer Service's best management practices program or be within an agricultural operation enrolled in the program for the applicable commodity type.

(4) All permits shall comply with the requirements of subsection (3) by July 1, 2022.

(5) New or renewed biosolids land application site or facility permits issued after July 1, 2020, must comply with this section and include a permit condition that requires the permit to be reopened to insert a compliance date of no later than 1 year after the effective date of the rules adopted pursuant to subsection (2). All permits must meet the requirements of the rules adopted pursuant to subsection (2) no later than 2 years after the effective date of such rules.

(6) A municipality or county may enforce or extend a local ordinance, regulation, resolution, rule, moratorium, or policy, any of which was adopted before November 1, 2019, relating to the land application of Class A or Class B biosolids until the ordinance, regulation, resolution, rule, moratorium, or policy is repealed by the municipality or county.

Section 17. Present subsections (7) through (10) of section 403.086, Florida Statutes, are redesignated as subsections (8) through (11), respectively, subsections (1) and (2) are amended, and a new subsection (7) is added to that section, to read:

403.086 Sewage disposal facilities; advanced and secondary waste treatment.—

(1)(a) ~~Neither~~ The Department of Health or ~~nor~~ any other state agency, county, special district, or municipality may not ~~shall~~ approve construction of any sewage disposal facilities for sanitary sewage disposal which do not provide for secondary waste treatment and, ~~in addition thereto~~, advanced waste treatment as deemed necessary and ordered by the department.

(b) Sewage disposal ~~No~~ facilities for sanitary sewage disposal constructed after June 14, 1978, may not ~~shall~~ dispose of any wastes by deep well injection without providing for secondary waste treatment and, ~~in addition thereto~~, advanced waste treatment deemed necessary by the department to protect adequately the beneficial use of the receiving waters.

(c) Notwithstanding any other provisions of this chapter or chapter 373, sewage disposal facilities for sanitary sewage disposal may not dispose of any wastes into Old Tampa Bay, Tampa Bay, Hillsborough Bay, Boca Ciega Bay, St. Joseph Sound, Clearwater Bay, Sarasota Bay, Little Sarasota Bay, Roberts Bay, Lemon Bay, ~~or~~ Charlotte Harbor Bay, or, beginning July 1, 2025, Indian River Lagoon, or into any river, stream, channel, canal, bay, bayou, sound, or other water tributary thereto, without providing advanced waste treatment, as defined in subsection (4), approved by the department. This paragraph ~~does~~ ~~shall~~ not apply to facilities which were permitted by February 1, 1987, and which discharge secondary treated effluent, followed by water hyacinth treatment, to tributaries of tributaries of the named waters; or to facilities permitted to discharge to the nontidally influenced portions of the Peace River.

(d) By December 31, 2020, the department, in consultation with the water management districts and sewage disposal facilities, shall submit to the Governor, the President of the Senate, and the Speaker of the House of Representatives a progress report on the status of upgrades made by each facility to meet the advanced waste treatment requirements under paragraph (c). The report must include a list of sewage disposal

facilities required to upgrade to advanced waste treatment, the preliminary cost estimates for the upgrades, and a projected timeline of the dates by which the upgrades will begin and be completed and the date by which operations of the upgraded facility will begin.

(2) All sewage disposal ~~Any facilities for sanitary sewage disposal~~ shall provide for secondary waste treatment, a power outage contingency plan that mitigates the impacts of power outages on the utility's collection system and pump stations, and, ~~in addition thereto,~~ advanced waste treatment as deemed necessary and ordered by the Department of Environmental Protection. Failure to conform ~~is shall be~~ punishable by a civil penalty of \$500 for each 24-hour day or fraction thereof that such failure is allowed to continue thereafter.

(7) All sewage disposal facilities under subsection (2) which control a collection or transmission system of pipes and pumps to collect and transmit wastewater from domestic or industrial sources to the facility shall take steps to prevent sanitary sewer overflows or underground pipe leaks and ensure that collected wastewater reaches the facility for appropriate treatment. Facilities must use inflow and infiltration studies and leakage surveys to develop pipe assessment, repair, and replacement action plans with a 5-year planning horizon that comply with department rule to limit, reduce, and eliminate leaks, seepages, or inputs into wastewater treatment systems' underground pipes. The pipe assessment, repair, and replacement action plans must be reported to the department. The facility action plans must include information regarding the annual expenditures dedicated to the inflow and infiltration studies and the required replacement action plans; expenditures that are dedicated to pipe assessment, repair, and replacement; and expenditures designed to limit the presence of fats, roots, oils, and grease in the facility's collection system. The department shall adopt rules regarding the implementation of inflow and infiltration studies and leakage surveys; however, such rules may not fix or revise utility rates or budgets. A utility or an operating entity subject to this subsection and s. 403.061(14) may submit one report to comply with both requirements. Substantial compliance with this subsection is evidence in mitigation for the purposes of assessing penalties pursuant to ss. 403.121 and 403.141.

Section 18. Present subsections (4) through (10) of section 403.087, Florida Statutes, are redesignated as subsections (5) through (11), respectively, and a new subsection (4) is added to that section, to read:

403.087 Permits; general issuance; denial; revocation; prohibition; penalty.—

(4) The department shall issue an operation permit for a domestic wastewater treatment facility other than a facility regulated under the National Pollutant Discharge Elimination System Program under s. 403.0885 for a term of up to 10 years if the facility is meeting the stated goals in its action plan adopted pursuant to s. 403.086(7).

Section 19. Present subsections (3) and (4) of section 403.088, Florida Statutes, are redesignated as subsections (4) and (5), respectively, paragraph (c) of subsection (2) is amended, and a new subsection (3) is added to that section, to read:

403.088 Water pollution operation permits; conditions.—

(2)

(c) A permit shall:

1. Specify the manner, nature, volume, and frequency of the discharge permitted;

2. Require proper operation and maintenance of any pollution abatement facility by qualified personnel in accordance with standards established by the department;

3. Require a deliberate, proactive approach to investigating or surveying a significant percentage of the domestic wastewater collection system throughout the duration of the permit to determine pipe integrity, which must be accomplished in an economically feasible manner. The permittee shall submit an annual report to the department which details facility revenues and expenditures in a manner prescribed by department rule. The report must detail any deviation of annual expenditures from identified system needs related to inflow and infiltration studies; model plans for pipe assessment, repair, and replacement; and pipe assessment, repair, and replacement required under s. 403.086(7). Sub-

stantial compliance with this subsection is evidence in mitigation for the purposes of assessing penalties pursuant to ss. 403.121 and 403.141;

4.3. Contain such additional conditions, requirements, and restrictions as the department deems necessary to preserve and protect the quality of the receiving waters;

5.4. Be valid for the period of time specified therein; and

6.5. Constitute the state National Pollutant Discharge Elimination System permit when issued pursuant to the authority in s. 403.0885.

(3) No later than March 1 of each year, the department shall submit a report to the Governor, the President of the Senate, and the Speaker of the House of Representatives which identifies all domestic wastewater treatment facilities that experienced a sanitary sewer overflow in the preceding calendar year. The report must identify the name of the utility or responsible operating entity, permitted capacity in annual average gallons per day, number of overflows, type of water discharged, total volume of sewage released, and, to the extent known and available, volume of sewage recovered, volume of sewage discharged to surface waters, and cause of the sanitary sewer overflow, including whether the overflow was caused by a third party. The department shall include with this report the annual report specified under subparagraph (2)(c)3. for each utility that experienced an overflow.

Section 20. Subsection (6) of section 403.0891, Florida Statutes, is amended to read:

403.0891 State, regional, and local stormwater management plans and programs.—The department, the water management districts, and local governments shall have the responsibility for the development of mutually compatible stormwater management programs.

(6) The department and the Department of Economic Opportunity, in cooperation with local governments in the coastal zone, shall develop a model stormwater management program that could be adopted by local governments. The model program must contain model ordinances that target nutrient reduction practices and use green infrastructure. The model program shall contain dedicated funding options, including a stormwater utility fee system based upon an equitable unit cost approach. Funding options shall be designed to generate capital to retrofit existing stormwater management systems, build new treatment systems, operate facilities, and maintain and service debt.

Section 21. Paragraphs (b) and (g) of subsection (2), paragraph (b) of subsection (3), and subsections (8) and (9) of section 403.121, Florida Statutes, are amended to read:

403.121 Enforcement; procedure; remedies.—The department shall have the following judicial and administrative remedies available to it for violations of this chapter, as specified in s. 403.161(1).

(2) Administrative remedies:

(b) If the department has reason to believe a violation has occurred, it may institute an administrative proceeding to order the prevention, abatement, or control of the conditions creating the violation or other appropriate corrective action. Except for violations involving hazardous wastes, asbestos, or underground injection, the department shall proceed administratively in all cases in which the department seeks administrative penalties that do not exceed \$50,000 ~~\$10,000~~ per assessment as calculated in accordance with subsections (3), (4), (5), (6), and (7). Pursuant to 42 U.S.C. s. 300g-2, the administrative penalty assessed pursuant to subsection (3), subsection (4), or subsection (5) against a public water system serving a population of more than 10,000 may not ~~shall be not~~ less than \$1,000 per day per violation. The department may ~~shall~~ not impose administrative penalties in excess of \$50,000 ~~\$10,000~~ in a notice of violation. The department may ~~shall~~ not have more than one notice of violation seeking administrative penalties pending against the same party at the same time unless the violations occurred at a different site or the violations were discovered by the department subsequent to the filing of a previous notice of violation.

(g) This subsection does not prevent ~~Nothing herein shall be construed as preventing~~ any other legal or administrative action in accordance with law and does not. ~~Nothing in this subsection shall limit~~ the department's authority provided in s. ss. 403.131, s. 403.141, and this section to judicially pursue injunctive relief. When the department

exercises its authority to judicially pursue injunctive relief, penalties in any amount up to the statutory maximum sought by the department must be pursued as part of the state court action and not by initiating a separate administrative proceeding. The department retains the authority to judicially pursue penalties in excess of \$50,000 ~~\$10,000~~ for violations not specifically included in the administrative penalty schedule, or for multiple or multiday violations alleged to exceed a total of \$50,000 ~~\$10,000~~. The department also retains the authority provided in ss. 403.131, 403.141, and this section to judicially pursue injunctive relief and damages, if a notice of violation seeking the imposition of administrative penalties has not been issued. The department has the authority to enter into a settlement, ~~either~~ before or after initiating a notice of violation, and the settlement may include a penalty amount different from the administrative penalty schedule. Any case filed in state court because it is alleged to exceed a total of \$50,000 ~~\$10,000~~ in penalties may be settled in the court action for less than \$50,000 ~~\$10,000~~.

(3) Except for violations involving hazardous wastes, asbestos, or underground injection, administrative penalties must be calculated according to the following schedule:

(b) For failure to obtain a required wastewater permit, other than a permit required for surface water discharge, the department shall assess a penalty of \$2,000 ~~\$1,000~~. For a domestic or industrial wastewater violation not involving a surface water or groundwater quality violation, the department shall assess a penalty of \$4,000 ~~\$2,000~~ for an unpermitted or unauthorized discharge or effluent-limitation exceedance or for failure to comply with s. 403.061(14) or s. 403.086(7) or rules adopted thereunder. For an unpermitted or unauthorized discharge or effluent-limitation exceedance that resulted in a surface water or groundwater quality violation, the department shall assess a penalty of \$10,000 ~~\$5,000~~.

(8) The direct economic benefit gained by the violator from the violation, where consideration of economic benefit is provided by Florida law or required by federal law as part of a federally delegated or approved program, ~~must shall~~ be added to the scheduled administrative penalty. The total administrative penalty, including any economic benefit added to the scheduled administrative penalty, ~~may shall~~ not exceed \$10,000.

(9) The administrative penalties assessed for any particular violation ~~may shall~~ not exceed \$10,000 ~~\$5,000~~ against any one violator, unless the violator has a history of noncompliance, the economic benefit of the violation as described in subsection (8) exceeds \$10,000 ~~\$5,000~~, or there are multiday violations. The total administrative penalties ~~may shall~~ not exceed \$50,000 ~~\$10,000~~ per assessment for all violations attributable to a specific person in the notice of violation.

And the title is amended as follows:

Delete lines 17-247 and insert: leave upon the transfer; amending s. 373.036, F.S.; directing water management districts to submit consolidated annual reports to the Office of Economic and Demographic Research; requiring such reports to include connection and conversion projects for onsite sewage treatment and disposal systems; requiring the Department of Environmental Protection, in coordination with the water management districts, to conduct a study on the bottled water industry in this state; providing requirements for the study; requiring the department to submit a report containing the findings of the study to the Governor and the Legislature by a specified date; defining terms; amending s. 373.4131, F.S.; requiring the Department of Environmental Protection to include stormwater structural control inspections as part of its regular staff training; requiring the department and the water management districts to adopt rules regarding stormwater design and operation regulations by a specified date and address specified information as part of such rule development; requiring the department to review and evaluate data relating to self-certification and provide the Legislature with recommendations for improvements; amending s. 381.0065, F.S.; requiring the department to implement an approval process for the use of specified nutrient-reducing onsite sewage treatment and disposal systems by a specified date; defining the term "department" for the regulation of onsite sewage treatment and disposal systems; revising the duties of the department; requiring the Department of Environmental Protection to adopt rules relating to the location of onsite sewage treatment and disposal systems and complete such rulemaking by a specified date; providing requirements for such rules;

requiring the department to determine that a hardship exists for certain variance applicants; providing that certain provisions relating to existing setback requirements are applicable to permits only until the effective date of certain rules adopted by the department; removing provisions requiring certain onsite sewage treatment and disposal system research projects to be approved by a Department of Health technical review and advisory panel; removing provisions prohibiting the award of research projects to certain entities; removing provisions establishing a Department of Health onsite sewage treatment and disposal system research review and advisory committee; conforming provisions to changes made by the act; creating s. 381.00652, F.S.; defining the term "department"; creating the onsite sewage treatment and disposal systems technical advisory committee within the Department of Environmental Protection; authorizing the department, in consultation with the Department of Health, to appoint an onsite sewage treatment and disposal systems technical advisory committee; Pursuant to Rule 7.1, there being no objection, consideration of the following late-filed amendments was allowed:

Senator Simmons moved the following amendments which were adopted:

Amendment 1 (962572) (with title amendment)—Delete lines 75-107 and insert:

(7)(6) “Tobacco products” includes:

(a) Loose tobacco leaves, and products made from tobacco leaves, in whole or in part, and cigarette wrappers, which can be used for smoking, sniffing, or chewing; and

(b) Any nicotine product or vapor-generating electronic device.

1. For the purposes of this paragraph, the term:

a. “Vapor-generating electronic device” means any product that employs an electronic, chemical, or mechanical means capable of producing vapor or aerosol from a nicotine product or any other substance, including, but not limited to, an electronic cigarette, electronic cigar, electronic cigarillo, electronic pipe, or other similar device or product; any replacement cartridge for such device; and any other container of nicotine in a solution or other substance form intended to be used with or within an electronic cigarette, an electronic cigar, an electronic cigarillo, an electronic pipe, a vape pen, an electronic hookah, or other similar device or product. The term includes any component, part, or accessory of the device and also includes any substance intended to be aerosolized or vaporized during the use of the device, whether or not the substance contains nicotine.

b. “Nicotine product” means any product that contains nicotine, including liquid nicotine, which is intended for human consumption, whether inhaled, chewed, absorbed, dissolved, or ingested by any means. The term includes vapor-generating electronic devices.

2. The terms “vapor-generating electronic device” and “nicotine product” do not include:

a. Tobacco products described in paragraph (a); or

b. Products regulated as a drug or device by the United States Food and Drug Administration under Chapter V of the Federal Food, Drug, and Cosmetic Act.

~~(7) “Any person under the age of 18” does not include any person under the age of 18 who:~~

~~(a) Has had his or her disability of nonage removed under chapter 743;~~

~~(b) Is in the military reserve or on active duty in the Armed Forces of the United States;~~

~~(c) Is otherwise emancipated by a court of competent jurisdiction and released from parental care and responsibility; or~~

~~(d) Is acting in his or her scope of lawful employment with an entity licensed under the provisions of chapter 210 or this chapter.~~

Section 4. Paragraphs (b) and (c) of subsection (1) and paragraph (a) of subsection (2) of section 569.003, Florida Statutes, are amended to read:

(b) *This subsection expires on January 1, 2025.*

And the title is amended as follows:

Delete lines 3-6 and insert: F.S.; prohibiting the import, export, and sale of shark fins in this state; providing exceptions; providing for expiration of the exceptions; providing an effective date.

Senator Hutson moved the following amendment:

Amendment 2 (231276) (with title amendment)—Between lines 69 and 70 insert:

Section 2. *The Office of Program Policy Analysis and Government Accountability (OPPAGA) shall conduct a study to determine the potential economic impacts to the commercial shark fishing industry in this state and the potential environmental impacts to our oceans due to such industry, including the positive or negative impact to our oceans if the fishing and sale of shark fins in this state and the export of shark fins from this state are prohibited. In conducting the study, OPPAGA shall consult with the National Oceanic and Atmospheric Administration, Mote Marine Laboratory, the Fish and Wildlife Conservation Commission, any other interested entities, and commercial fishermen, and such study may consider any relevant information necessary. If the office determines that there is a negative economic or environmental impact to the commercial shark fishing industry in this state or to the oceans themselves, respectively, the office must consider potential actions that this state may take to lessen or offset such impacts to the extent practicable. OPPAGA shall submit a report of its findings to the President of the Senate and the Speaker of the House of Representatives by October 1, 2021.*

And the title is amended as follows:

Delete line 6 and insert: applicability; requiring the Office of Program Policy Analysis and Government Accountability to conduct a study on the economic and environmental impacts of the commercial shark fishing industry in this state; requiring the office to consult with specified entities in conducting the study; requiring the office to consider offsets to certain potential negative impacts if necessary; requiring a report to the Legislature by a specified date; providing an effective date.

Senator Hutson moved the following substitute amendment which was adopted:

Substitute Amendment 3 (897886) (with title amendment)—Between lines 69 and 70 insert:

Section 2. *The Fish and Wildlife Conservation Commission shall evaluate the potential economic impact to the commercial shark fishing industry associated with the prohibition of the import, export, and sale of shark fins in Florida. Based on any identified negative economic impacts to the commercial shark fishing industry, the commission shall identify actions to lessen or offset impacts on the industry to the extent practicable. The commission also shall review the potential impact on shark populations associated with the prohibition of the import, export, and sale of shark fins in Florida. The commission shall report its findings to the Governor, the President of the Senate, and the Speaker of the House of Representatives by December 31, 2023.*

And the title is amended as follows:

Delete line 6 and insert: applicability; requiring the Fish and Wildlife Conservation Commission to evaluate the potential economic impacts to the commercial shark fishing industry in this state; requiring the commission to identify actions to lessen or offset impacts to the industry; requiring the commission to review the potential impact on

shark populations; requiring a report to the Legislature by a specified date; providing an effective date.

THE PRESIDENT PRESIDING

Pursuant to Rule 7.1, there being no objection, consideration of the following late-filed amendment was allowed:

Senator Lee moved the following amendment which was adopted:

Amendment 1 (148826) (with title amendment)—Delete lines 119-209 and insert:

Section 3. Section 339.287, Florida Statutes, is created to read:

339.287 Electric vehicle charging stations; infrastructure plan development.—

(1) *The Legislature finds that:*

(a) *Climate change may have significant impacts to this state which will require the development of avoidance, adaptation, and mitigation strategies to address these potential impacts on future state projects, plans, and programs;*

(b) *A significant portion of the carbon dioxide emissions in this state are produced by the transportation sector;*

(c) *Electric vehicles can help reduce these emissions, thereby helping to reduce the impact of climate change on this state;*

(d) *The use of electric vehicles for non-local driving requires adequate, reliable charging stations to address electric vehicle battery range limitations;*

(e) *Having adequate, reliable charging stations along the State Highway System will also help with evacuations during hurricanes or other disasters;*

(f) *Ensuring the prompt installation of adequate, reliable charging stations is in the public interest; and*

(g) *A recommended plan for electric vehicle charging station infrastructure should be established to address changes in the emerging electric vehicle market and necessary charging infrastructure.*

(2)(a) *The department shall coordinate, develop, and recommend a master plan for current and future plans for the development of electric vehicle charging station infrastructure along the State Highway System, as defined in s. 334.03(24). The department shall develop the recommended master plan and submit it to the Governor, the President of the Senate, and the Speaker of the House of Representatives by July 1, 2021. The plan must include recommendations for legislation and may include other recommendations as determined by the department.*

(b) *The department, in consultation with the Public Service Commission and the Office of Energy within the Department of Agriculture and Consumer Services, and any other public or private entities as necessary or appropriate, shall be primarily responsible for the following goals and objectives in developing the plan:*

1. *Identifying the types or characteristics of possible locations for electric vehicle charging station infrastructure along the State Highway System to support a supply of electric vehicle charging stations that will:*

a. *Accomplish the goals and objectives of this section;*

b. *Support both short-range and long-range electric vehicle travel;*

c. *Encourage the expansion of electric vehicle use in this state; and*

d. *Adequately serve evacuation routes in this state.*

2. *Identifying any barriers to the use of electric vehicles and electric vehicle charging station infrastructure both for short-range and long-range electric vehicle travel along the State Highway System.*

3. *Identifying an implementation strategy for expanding electric vehicle and charging station infrastructure use in this state.*

4. *Quantifying the loss of revenue to the State Transportation Trust Fund due to the current and projected future use of electric vehicles in this state and summarizing efforts of other states to address such revenue loss.*

(c) *The Public Service Commission, in consultation with the department and the Office of Energy within the Department of Agriculture and Consumer Services, and any other public or private entities as necessary or appropriate, shall be primarily responsible for the following goals and objectives in developing the plan:*

1. *Projecting the increase in the use of electric vehicles in this state over the next 20 years and determining how to ensure an adequate supply of reliable electric vehicle charging stations to support and encourage this growth in a manner supporting a competitive market with ample consumer choice.*

2. *Evaluating and comparing the types of electric vehicle charging stations available at present and which may become available in the future, including the technology and infrastructure incorporated in such stations, along with the circumstances within which each type of station and infrastructure is typically used, including fleet charging, for the purpose of identifying any advantages to developing particular types or uses of these stations.*

3. *Considering strategies to develop this supply of charging stations, including, but not limited to, methods of building partnerships with local governments, other state and federal entities, electric utilities, the business community, and the public in support of electric vehicle charging stations.*

4. *Identifying the type of regulatory structure necessary for the delivery of electricity to electric vehicles and charging station infrastructure, including competitive neutral policies and the participation of public utilities in the marketplace.*

(d) *The Public Service Commission, in consultation with the Office of Energy within the Department of Agriculture and Consumer Services, shall review emerging technologies in the electric and alternative vehicle market, including alternative fuel sources.*

(e) *The department, the Public Service Commission, and the Office of Energy within the Department of Agriculture and Consumer Services may agree to explore other issues deemed necessary or appropriate for purposes of the report required in paragraph (a).*

(f) *By December 1, 2020, the department shall file a status report with the Governor, the President of the Senate, and the Speaker of the House of Representatives containing any preliminary recommendations, including recommendations for legislation.*

And the title is amended as follows:

Delete lines 22-38 and insert: program; creating s. 339.287, F.S.; providing legislative findings; requiring the department to coordinate, develop, and recommend a master plan for the development of electric vehicle charging station infrastructure along the State Highway System; requiring the department to submit the plan to the Governor and the Legislature by a specified date; providing responsibilities for the department and the Public Service Commission, in consultation with specified entities, in developing the plan; providing the goals and objectives of the plan; requiring the commission, in consultation with specified entities, to review certain emerging technologies; authorizing the department, commission, and the Office of Energy within the Department of Agriculture and Consumer Services to explore other issues as necessary and appropriate; requiring the department to file a status report with

Section 2. Paragraph (d) of subsection (1) of section 499.012, Florida Statutes, is amended to read:

499.012 Permit application requirements.—

(1)

(d) A permit for a prescription drug manufacturer, prescription drug repackager, prescription drug wholesale distributor, limited prescription drug veterinary wholesale distributor, or retail pharmacy drug wholesale distributor may not be issued to the address of a health care entity or to a pharmacy licensed under chapter 465, except as provided in this paragraph. *The department may issue a prescription drug manufacturer permit to a nonembryonic stem cell bank that is licensed by the Agency for Health Care Administration pursuant to s. 400.991 and part II of chapter 408.* The department may issue a prescription drug manufacturer permit to an applicant at the same address as a licensed nuclear pharmacy, which is a health care entity, even if the nuclear pharmacy holds a special sterile compounding permit under chapter 465, for the purpose of manufacturing prescription drugs used in positron emission tomography or other radiopharmaceuticals, as listed in a rule adopted by the department pursuant to this paragraph. The purpose of this exemption is to assure availability of state-of-the-art pharmaceuticals that would pose a significant danger to the public health if manufactured at a separate establishment address from the nuclear pharmacy from which the prescription drugs are dispensed. The department may also issue a retail pharmacy drug wholesale distributor permit to the address of a community pharmacy licensed under chapter 465, even if the community pharmacy holds a special sterile compounding permit under chapter 465, as long as the community pharmacy does not meet the definition of a closed pharmacy in s. 499.003.

Pursuant to Rule 7.1, there being no objection, consideration of the following late-filed amendment was allowed:

Senator Flores moved the following amendment which was adopted by two-thirds vote:

Amendment 1 (834648) (with title amendment)—Delete lines 20-153 and insert:

Section 1. Paragraph (a) of subsection (2) and subsections (4) and (13) of section 376.3071, Florida Statutes, are amended, and paragraph (h) is added to subsection (1) and subsection (15) is added to that section, to read:

376.3071 Inland Protection Trust Fund; creation; purposes; funding.—

(1) FINDINGS.—In addition to the legislative findings set forth in s. 376.30, the Legislature finds and declares:

(h) *That Congress enacted the Energy Policy Act of 2005, amending the Clean Water Act, and that the state enacted the Renewable Fuels Standard, to establish a renewable fuel standard requiring the use of ethanol as an oxygenate additive for gasoline and biodiesel as an additive for ultra-low sulfur diesel fuel. An unintended consequence of the inclusion of ethanol in gasoline and biodiesel in diesel fuel has been to cause, and potentially cause, significant corrosion and other damage to storage tanks, piping, and storage tank system components regulated under this chapter. The Legislature further finds that storage tanks, piping, and storage tank system components have been found by the department in its equipment approval process to meet compatibility standards, however, these standards may have subsequently changed due to the introduction of ethanol and biodiesel. The state enacted secondary containment requirements before the mandated introduction of ethanol into gasoline and biodiesel into ultra-low sulfur diesel fuel. Therefore, owners and operators of petroleum storage facilities in the state that complied with the state's secondary containment requirements and installed approved equipment that may not have been evaluated for compatibility with ethanol and biodiesel, cross-contamination due to the storage of gasoline and diesel fuel, and the effects of condensation and minimal amounts of water in storage tanks are at a particular risk for having to repair or replace equipment or take other preventive measures in advance of the equipment's expected useful life in order to prevent releases or discharges of pollutants.*

(2) INTENT AND PURPOSE.—

(a) It is the intent of the Legislature to establish the Inland Protection Trust Fund to serve as a repository for funds which will enable the department to respond without delay to incidents of inland contamination, and damage or potential damage to storage tank systems caused by ethanol or biodiesel as described in subsection (15) which may result in such incidents, related to the storage of petroleum and petro-

leum products in order to protect the public health, safety, and welfare and to minimize environmental damage.

(4) USES.—Whenever, in its determination, incidents of inland contamination, or potential incidents as provided in subsection (15), related to the storage of petroleum or petroleum products may pose a threat to the public health, safety, or welfare, water resources, or the environment, the department shall obligate moneys available in the fund to provide for:

- (a) Prompt investigation and assessment of contamination sites.
- (b) Expeditious restoration or replacement of potable water supplies as provided in s. 376.30(3)(c)1.
- (c) Rehabilitation of contamination sites, which shall consist of cleanup of affected soil, groundwater, and inland surface waters, using the most cost-effective alternative that is technologically feasible and reliable and that provides adequate protection of the public health, safety, and welfare, and water resources, and that minimizes environmental damage, pursuant to the site selection and cleanup criteria established by the department under subsection (5), except that this paragraph does not authorize the department to obligate funds for payment of costs which may be associated with, but are not integral to, site rehabilitation, such as the cost for retrofitting or replacing petroleum storage systems.
- (d) Maintenance and monitoring of contamination sites.
- (e) Inspection and supervision of activities described in this subsection.
- (f) Payment of expenses incurred by the department in its efforts to obtain from responsible parties the payment or recovery of reasonable costs resulting from the activities described in this subsection.
- (g) Payment of any other reasonable costs of administration, including those administrative costs incurred by the Department of Health in providing field and laboratory services, toxicological risk assessment, and other assistance to the department in the investigation of drinking water contamination complaints and costs associated with public information and education activities.
- (h) Establishment and implementation of the compliance verification program as authorized in s. 376.303(1)(a), including contracting with local governments or state agencies to provide for the administration of such program through locally administered programs, to minimize the potential for further contamination sites.
- (i) Funding of the provisions of ss. 376.305(6) and 376.3072.
- (j) Activities related to removal and replacement of petroleum storage systems, if repair, replacement, or other preventive measures are authorized under subsection (15), or exclusive of costs of any tank, piping, dispensing unit, or related hardware, if soil removal is approved as a component of site rehabilitation and requires removal of the tank where remediation is conducted under this section, or if such activities were justified in an approved remedial action plan.
- (k) Reasonable costs of restoring property as nearly as practicable to the conditions which existed before activities associated with contamination assessment or remedial action taken under s. 376.303(4).
- (l) Repayment of loans to the fund.
- (m) Expenditure of sums from the fund to cover ineligible sites or costs as set forth in subsection (13), if the department in its discretion deems it necessary to do so. In such cases, the department may seek recovery and reimbursement of costs in the same manner and pursuant to the same procedures established for recovery and reimbursement of sums otherwise owed to or expended from the fund.
- (n) Payment of amounts payable under any service contract entered into by the department pursuant to s. 376.3075, subject to annual appropriation by the Legislature.
- (o) Petroleum remediation pursuant to this section throughout a state fiscal year. The department shall establish a process to uniformly encumber appropriated funds throughout a state fiscal year and shall

allow for emergencies and imminent threats to public health, safety, and welfare, water resources, and the environment as provided in paragraph (5)(a). This paragraph does not apply to appropriations associated with the free product recovery initiative provided in paragraph (5)(c) or the advanced cleanup program provided in s. 376.30713.

(p) Enforcement of this section and ss. 376.30-376.317 by the Fish and Wildlife Conservation Commission and the Department of Environmental Protection. The department shall ~~may~~ disburse moneys to the commission for such purpose.

(q) Payments for program deductibles, copayments, and limited contamination assessment reports that otherwise would be paid by another state agency for state-funded petroleum contamination site rehabilitation.

(r) *Payments for the repair or replacement of, or other preventive measures for, storage tanks, piping, or system components as provided in subsection (15). Such costs may include equipment, excavation, electrical work, and site restoration.*

The issuance of a site rehabilitation completion order pursuant to subsection (5) or paragraph (12)(b) for contamination eligible for programs funded by this section does not alter the project's eligibility for state-funded remediation if the department determines that site conditions are not protective of human health under actual or proposed circumstances of exposure under subsection (5). The Inland Protection Trust Fund may be used only to fund the activities in ss. 376.30-376.317 except ss. 376.3078 and 376.3079. Amounts on deposit in the fund in each fiscal year must first be applied or allocated for the payment of amounts payable by the department pursuant to paragraph (n) under a service contract entered into by the department pursuant to s. 376.3075 and appropriated in each year by the Legislature before making or providing for other disbursements from the fund. This subsection does not authorize the use of the fund for cleanup of contamination caused primarily by a discharge of solvents as defined in s. 206.9925(6), or polychlorinated biphenyls when their presence causes them to be hazardous wastes, except solvent contamination which is the result of chemical or physical breakdown of petroleum products and is otherwise eligible. Facilities used primarily for the storage of motor or diesel fuels as defined in ss. 206.01 and 206.86 are not excluded from eligibility pursuant to this section.

(13) PETROLEUM CLEANUP PARTICIPATION PROGRAM.—To encourage detection, reporting, and cleanup of contamination caused by discharges of petroleum or petroleum products, the department shall, within the guidelines established in this subsection, implement a ~~cost-sharing~~ cleanup program to provide rehabilitation funding assistance for all property contaminated by discharges of petroleum or petroleum products from a petroleum storage system occurring before January 1, 1995, ~~subject to a copayment provided for in a Petroleum Cleanup Participation Program site rehabilitation agreement.~~ Eligibility is subject to an annual appropriation from the fund. Additionally, funding for eligible sites is contingent upon annual appropriation in subsequent years. Such continued state funding is not an entitlement or a vested right under this subsection. Eligibility shall be determined in the program, notwithstanding any other provision of law, consent order, order, judgment, or ordinance to the contrary.

(a)1. The department shall accept any discharge reporting form received before January 1, 1995, as an application for this program, and the facility owner or operator need not reapply.

2. Regardless of whether ownership has changed, owners or operators of property that is contaminated by petroleum or petroleum products from a petroleum storage system may apply for such program by filing a written report of the contamination incident, including evidence that such incident occurred before January 1, 1995, with the department. Incidents of petroleum contamination discovered after December 31, 1994, at sites which have not stored petroleum or petroleum products for consumption, use, or sale after such date shall be presumed to have occurred before January 1, 1995. An operator's filed report shall be an application of the owner for all purposes.

(b) Subject to annual appropriation from the fund, sites meeting the criteria of this subsection are eligible for up to \$400,000 of site rehabilitation funding assistance in priority order pursuant to subsections (5) and (6). Sites meeting the criteria of this subsection for which a site

rehabilitation completion order was issued before June 1, 2008, do not qualify for the 2008 increase in site rehabilitation funding assistance and are bound by the pre-June 1, 2008, limits. Sites meeting the criteria of this subsection for which a site rehabilitation completion order was not issued before June 1, 2008, regardless of whether they have previously transitioned to nonstate-funded cleanup status, may continue state-funded cleanup pursuant to this section until a site rehabilitation completion order is issued or the increased site rehabilitation funding assistance limit is reached, whichever occurs first. The department may not pay expenses incurred beyond the scope of an approved contract.

(c) The department may also approve supplemental funding of up to \$100,000 for additional remediation and monitoring if such remediation and monitoring is necessary to achieve a determination of "No Further Action."

(d) Upon notification by the department that rehabilitation funding assistance is available for the site pursuant to subsections (5) and (6), the property owner, operator, or person otherwise responsible for site rehabilitation shall provide the department with a limited contamination assessment report and shall enter into a Petroleum Cleanup Participation Program site rehabilitation agreement with the department. *The limited contamination assessment report must be sufficient to support the proposed course of action and to estimate the cost of the proposed course of action.* The agreement must provide for a 25-percent cost savings to the department, a copayment by the owner, operator, or person otherwise responsible for conducting site rehabilitation, or a combination of cost savings and a copayment. *Cost savings to the department may be demonstrated in the form of reduced rates by the proposed agency term contractor or the difference in cost associated with a Risk Management Options Level I closure versus a Risk Management Options Level II closure. For the purpose of this paragraph, the term:*

1. "Risk Management Options Level I" means a "No Further Action" closure without institutional controls or without institutional and engineering controls. This closure option applies subject to conditions in department rules and agreements.

2. "Risk Management Options Level II" means a "No Further Action" closure where institutional controls and, if appropriate, engineering controls apply if the controls are protective of human health, public safety, and the environment. This closure option applies subject to conditions in department rules and agreements. ~~The owner, operator, or person otherwise responsible for conducting site rehabilitation shall adequately demonstrate the ability to meet the copayment obligation. The limited contamination assessment report and the copayment costs may be reduced or eliminated if the owner and all operators responsible for restoration under s. 376.308 demonstrate that they cannot financially comply with the copayment and limited contamination assessment report requirements. The department shall take into consideration the owner's and operator's net worth in making the determination of financial ability. In the event the department and the owner, operator, or person otherwise responsible for site rehabilitation cannot complete negotiation of the cost sharing agreement within 120 days after beginning negotiations, the department shall terminate negotiations and the site shall be ineligible for state funding under this subsection and all liability protections provided for in this subsection shall be revoked.~~

(e) A report of a discharge made to the department by a person pursuant to this subsection or any rules adopted pursuant to this subsection may not be used directly as evidence of liability for such discharge in any civil or criminal trial arising out of the discharge.

(f) This subsection does not preclude the department from pursuing penalties under s. 403.141 for violations of any law or any rule, order, permit, registration, or certification adopted or issued by the department pursuant to its lawful authority.

(g) Upon the filing of a discharge reporting form under paragraph (a), the department or local government may not pursue any judicial or enforcement action to compel rehabilitation of the discharge. This paragraph does not prevent any such action with respect to discharges determined ineligible under this subsection or to sites for which rehabilitation funding assistance is available pursuant to subsections (5) and (6).

(h) The following are excluded from participation in the program:

1. Sites at which the department has been denied reasonable site access to implement this section.

2. Sites that were active facilities when owned or operated by the Federal Government.

3. Sites that are identified by the United States Environmental Protection Agency to be on, or which qualify for listing on, the National Priorities List under Superfund. This exception does not apply to those sites for which eligibility has been requested or granted as of the effective date of this act under the Early Detection Incentive Program established pursuant to s. 15, chapter 86-159, Laws of Florida.

4. Sites for which contamination is covered under the Early Detection Incentive Program, the Abandoned Tank Restoration Program, or the Petroleum Liability and Restoration Insurance Program, in which case site rehabilitation funding assistance shall continue under the respective program.

(15) *ETHANOL OR BIODIESEL DAMAGE; PREVENTIVE MEASURES.—The department shall pay, pursuant to this subsection, up to \$10 million each fiscal year from the fund for the costs of labor and equipment to repair or replace petroleum storage systems that may have been damaged due to the storage of fuels blended with ethanol or biodiesel, or for preventive measures to reduce the potential for such damage.*

(a) *A petroleum storage system owner or operator may request payment from the department for the repair or replacement of petroleum storage tanks, integral piping, or ancillary equipment that may have been damaged, or is subject to damage, by the storage of fuels blended with ethanol or biodiesel or for other preventive measures to ensure compatibility with ethanol or biodiesel in accordance with the following procedures:*

1. *The petroleum storage system owner or operator may submit a request for payment to the department along with the following information:*

a. *An affidavit from a petroleum storage system specialty contractor attesting to an opinion that the petroleum storage system may have been damaged as a result of the storage of fuel blended with ethanol or biodiesel or may not be compatible with fuels containing ethanol or biodiesel, or a combination of both. The affidavit must also include a proposal from the specialty contractor for repair or replacement of the equipment, or for the implementation of other preventive measures to reduce the probability of damage. If the specialty contractor proposes replacement of any equipment, the affidavit must include the reasons that repair or other preventive measures are not technically or economically feasible or practical.*

b. *Copies of any inspection reports, including photographs, prepared by the specialty contractor or department or local program inspectors documenting the damage or potential for damage to the petroleum storage system.*

c. *A proposal from the specialty contractor showing the proposed scope of the repair, replacement, or other preventive measures, including a detailed list of labor, equipment, and other associated costs. In the case of replacement or repair, the proposal must also include provisions for any preventive measures needed to prevent a recurrence of the damage, such as the use of corrosion inhibitors, the application of coatings compatible with ethanol or biodiesel, as appropriate, and the adoption of a maintenance plan.*

d. *For proposals to replace storage tanks or piping, a statement from a certified public accountant indicating the depreciated value of the tanks or piping proposed for replacement. Applications for such proposals must also include documentation of the age of the storage tank or piping. Historical tank registration records may be used to determine the age of the storage tank and piping. The depreciated value shall be the maximum allowable replacement cost for the storage tank and piping, exclusive of labor costs. For the purposes of this paragraph, tanks that are 20 years old or older are deemed to be fully depreciated and have no replacement value.*

2. The department shall review applications for completeness, accuracy, and the reasonableness of costs and scope of work. Within 30 days after receipt of an application, the department must approve or deny the application, propose modification to the application, or request additional information.

(b) If an application is approved, the department shall issue a purchase order to the petroleum storage system owner or operator. The purchase order shall:

1. Reflect a payment due to the owner for the cost of the scope of work approved by the department, less a deductible of 25 percent.

2. State that a payment is not due to the owner pursuant to the purchase order until the scope of work authorized by the department has been completed in substantial conformity with the purchase order.

3. Except for preventive maintenance contracts, specify that the work authorized in the purchase order must be substantially completed and paid for by the petroleum storage system owner or operator within 180 days after the date of the purchase order. After such time, the purchase order is void.

4. For preventive maintenance contracts, the department shall develop a maintenance completion and payment schedule for approved applicants. The failure of an owner or operator to meet scheduled payments shall invalidate the purchase order for all future payments due pursuant to the order.

(c)1. Except for maintenance contracts, the applicant may request that the department make payment following completion of the work authorized by the department, in accordance with the terms of the purchase order. The request must include a sufficient demonstration that the work has been completed in substantial compliance with the purchase order and that the costs have been fully paid. Upon such a showing, the department must issue the payment pursuant to the terms of the purchase order.

2. For maintenance contracts, the department must make periodic payments pursuant to the schedule specified in the purchase order upon satisfactory showing that maintenance work has been completed and costs have been paid by the owner or operator as specified in the purchase order.

(d) The department may develop forms to be used for application and payment procedures. Until such forms are developed, an applicant may submit the required information in any format, as long as the documentation is complete.

(e) The department may request the assistance of the Department of Management Services or a third-party administrator to assist in the administration of the application and payment process. Any costs associated with this administration shall be paid from the funds identified in this section.

(f) This subsection does not affect the obligations of facility owners or operators or petroleum storage system owners or operators to timely comply with department rules regarding the maintenance, replacement, and repair of petroleum storage systems in order to prevent a release or discharge of pollutants.

(g) Payments may not be made for the following:

1. Proposal costs or costs related to preparation of the application and required documentation;

2. Certified public accountant costs;

3. Except as provided in subsection (k), any costs in excess of the amount approved by the department under paragraph (b) or which are not in substantial compliance with the purchase order;

4. Costs associated with storage tanks, piping, or ancillary equipment that has previously been repaired or replaced for which costs have been paid under this section;

5. Facilities that are not in compliance with department storage tank rules, until the noncompliance issues have been resolved; or

6. Costs associated with damage to petroleum storage systems caused in whole or in part by causes other than the storage of fuels blended with ethanol or biodiesel.

(h) Applications may be submitted on a first-come, first-served basis. However, the department may not issue purchase orders unless funds remain for the current fiscal year.

(i) A petroleum storage system owner or operator may not receive more than \$200,000 annually for equipment replacement, repair, or preventive measures at any single facility, or \$500,000 annually in aggregate for all facilities owned or operated by the owner or operator it owns or operates.

(j) Owners or operators that have incurred costs for repair, replacement, or other preventive measures as described in this subsection during the period of July 1, 2015, through June 30, 2019, may apply to request payment for such costs from the department using the procedure in paragraphs (b), (c), and (d). The department may not disburse payment for approved applications for such work until all purchase orders for previously approved applications have been paid and unless funds remain available for the fiscal year. Such payment is subject to a deductible of 25 percent of the cost of the scope of work approved by the department under this paragraph.

(k) For new petroleum requirement registrations after July 1, 2019, the department shall only register equipment that meets applicable standards for compatibility for ethanol blends, biodiesel blends, and other alternative fuels that are likely to be stored in such systems.

And the title is amended as follows:

Delete lines 3-8 and insert: 376.3071, F.S.; providing legislative findings, declarations, and intent; authorizing the Department of Environmental Protection to use funds from the Inland Protection Trust Fund to pay for specified activities related to removal and replacement of petroleum storage systems; providing for petroleum storage system repair or replacement due to damage caused by ethanol or biodiesel and for preventive measures to reduce the potential for such damage; revising requirements for a limited contamination assessment report required to be provided by a property owner, an operator, or a person otherwise responsible for site rehabilitation to the Department of Environmental Protection under the Petroleum Cleanup Participation Program; providing requirements for requesting and receiving payments for such repair, replacement, and measures; providing construction; prohibiting payments for certain costs; limiting the payment amount a petroleum storage system owner or operator is eligible to receive annually; requiring the department, after a specified date, to only register storage system equipment that meets certain fuel standards; amending s.

HJR 877—A joint resolution proposing an amendment to Section 6 of Article VII and the creation of a new section in Article XII of the State Constitution to provide for the carryover of the homestead property tax discount for certain veterans with permanent combat-related disabilities to a veteran's surviving spouse if certain criteria are met, to authorize the transfer of the discount to a surviving spouse's new homestead property if certain criteria are met, and to provide an effective date.

Be It Resolved by the Legislature of the State of Florida:

That the following amendment to Section 6 of Article VII and the creation of a new section in Article XII of the State Constitution are agreed to and shall be submitted to the electors of this state for approval or rejection at the next general election or at an earlier special election specifically authorized by law for that purpose:

ARTICLE VII

FINANCE AND TAXATION

SECTION 6. Homestead exemptions.—

(a) Every person who has the legal or equitable title to real estate and maintains thereon the permanent residence of the owner, or another legally or naturally dependent upon the owner, shall be exempt from taxation thereon, except assessments for special benefits, up to the assessed valuation of twenty-five thousand dollars and, for all levies other than school district levies, on the assessed valuation greater than

fifty thousand dollars and up to seventy-five thousand dollars, upon establishment of right thereto in the manner prescribed by law. The real estate may be held by legal or equitable title, by the entireties, jointly, in common, as a condominium, or indirectly by stock ownership or membership representing the owner's or member's proprietary interest in a corporation owning a fee or a leasehold initially in excess of ninety-eight years. The exemption shall not apply with respect to any assessment roll until such roll is first determined to be in compliance with the provisions of section 4 by a state agency designated by general law. This exemption is repealed on the effective date of any amendment to this Article which provides for the assessment of homestead property at less than just value.

(b) Not more than one exemption shall be allowed any individual or family unit or with respect to any residential unit. No exemption shall exceed the value of the real estate assessable to the owner or, in case of ownership through stock or membership in a corporation, the value of the proportion which the interest in the corporation bears to the assessed value of the property.

(c) By general law and subject to conditions specified therein, the Legislature may provide to renters, who are permanent residents, ad valorem tax relief on all ad valorem tax levies. Such ad valorem tax relief shall be in the form and amount established by general law.

(d) The legislature may, by general law, allow counties or municipalities, for the purpose of their respective tax levies and subject to the provisions of general law, to grant either or both of the following additional homestead tax exemptions:

(1) An exemption not exceeding fifty thousand dollars to a person who has the legal or equitable title to real estate and maintains thereon the permanent residence of the owner, who has attained age sixty-five, and whose household income, as defined by general law, does not exceed twenty thousand dollars; or

(2) An exemption equal to the assessed value of the property to a person who has the legal or equitable title to real estate with a just value less than two hundred and fifty thousand dollars, as determined in the first tax year that the owner applies and is eligible for the exemption, and who has maintained thereon the permanent residence of the owner for not less than twenty-five years, who has attained age sixty-five, and whose household income does not exceed the income limitation prescribed in paragraph (1).

The general law must allow counties and municipalities to grant these additional exemptions, within the limits prescribed in this subsection, by ordinance adopted in the manner prescribed by general law, and must provide for the periodic adjustment of the income limitation prescribed in this subsection for changes in the cost of living.

(e)(1) Each veteran who is age 65 or older who is partially or totally permanently disabled shall receive a discount from the amount of the ad valorem tax otherwise owed on homestead property the veteran owns and resides in if the disability was combat related and the veteran was honorably discharged upon separation from military service. The discount shall be in a percentage equal to the percentage of the veteran's permanent, service-connected disability as determined by the United States Department of Veterans Affairs. To qualify for the discount granted by this ~~paragraph~~ subsection, an applicant must submit to the county property appraiser, by March 1, an official letter from the United States Department of Veterans Affairs stating the percentage of the veteran's service-connected disability and such evidence that reasonably identifies the disability as combat related and a copy of the veteran's honorable discharge. If the property appraiser denies the request for a discount, the appraiser must notify the applicant in writing of the reasons for the denial, and the veteran may reapply. The Legislature may, by general law, waive the annual application requirement in subsequent years.

(2) *If a veteran who receives the discount described in paragraph (1) predeceases his or her spouse, and if, upon the death of the veteran, the surviving spouse holds the legal or beneficial title to the homestead property and permanently resides thereon, the discount carries over to the surviving spouse until he or she remarries or sells or otherwise disposes of the homestead property. If the surviving spouse sells or otherwise disposes of the property, a discount not to exceed the dollar amount granted from the most recent ad valorem tax roll may be transferred to*

the surviving spouse's new homestead property, if used as his or her permanent residence and he or she has not remarried.

(3) This subsection is self-executing and does not require implementing legislation.

(f) By general law and subject to conditions and limitations specified therein, the Legislature may provide ad valorem tax relief equal to the total amount or a portion of the ad valorem tax otherwise owed on homestead property to:

(1) The surviving spouse of a veteran who died from service-connected causes while on active duty as a member of the United States Armed Forces.

(2) The surviving spouse of a first responder who died in the line of duty.

(3) A first responder who is totally and permanently disabled as a result of an injury or injuries sustained in the line of duty. Causal connection between a disability and service in the line of duty shall not be presumed but must be determined as provided by general law. For purposes of this paragraph, the term "disability" does not include a chronic condition or chronic disease, unless the injury sustained in the line of duty was the sole cause of the chronic condition or chronic disease.

As used in this subsection and as further defined by general law, the term "first responder" means a law enforcement officer, a correctional officer, a firefighter, an emergency medical technician, or a paramedic, and the term "in the line of duty" means arising out of and in the actual performance of duty required by employment as a first responder.

ARTICLE XII

SCHEDULE

Ad valorem tax discount for surviving spouses of certain permanently disabled veterans.—The amendment to Section 6 of Article VII, relating to the ad valorem tax discount for spouses of certain deceased veterans who had permanent, combat-related disabilities, and this section shall take effect January 1, 2021.

BE IT FURTHER RESOLVED that the following statement be placed on the ballot:

CONSTITUTIONAL AMENDMENT

ARTICLE VII, SECTION 6

ARTICLE XII

AD VALOREM TAX DISCOUNT FOR SPOUSES OF CERTAIN DECEASED VETERANS WHO HAD PERMANENT, COMBAT-RELATED DISABILITIES.—Provides that the homestead property tax discount for certain veterans with permanent combat-related disabilities carries over to such veteran's surviving spouse who holds legal or beneficial title to, and who permanently resides on, the homestead property, until he or she remarries or sells or otherwise disposes of the property. The discount may be transferred to a new homestead property of the surviving spouse under certain conditions. The amendment takes effect January 1, 2021.
