# CONTRACT FOR NETWORK SERVICES

The Florida Senate (Senate) and EarthLink Business (EarthLink), enter into this Contract for Network Services.

## Contract Contents

The following documents are incorporated by reference and are made a part of this Contract:

1. EarthLink's Invitation to Negotiate (ITN) 851 Technical Response; Appendix B-Respondent's Recommendations and Cost, dated 9/2/11; Appendix B-Proposed Network Options, dated 9/2/11; and Optional Available Services, dated 9/2/11
2. EarthLink Master Services Agreement and Attachments I and II
3. EarthLink Business Executive Briefing, dated August 2011
4. Clarification Questions, dated 6/24/11
5. Amendment One, dated 3/29/11
6. Questions and Answers, dated 3/18/11
7. Invitation to Negotiate #851, dated 2/25/11

## Term of Contract

Upon execution of the contract by both parties it will become effective for an initial term of four years from the effective date. The Senate may renew the contract twice for two-year terms.

Renewals are not guaranteed, and are contingent upon funding and performance of EarthLink.

## Consideration and Availability of Funds

As consideration for services rendered by EarthLink, the Senate agrees to pay the costs as outlined in Appendix B-Respondent's Recommendation and Cost, dated 9/2/11, through the initial term. The pricing is fixed at prices submitted in Appendix B-Respondent's Recommendation and Cost and Appendix B-Proposed Network Options, dated 9/2/11 for each additional two-year renewal term of the contract if renewed.

The Senate's obligation to pay begins only after the Senate accepts the service.
All payments will be made monthly in arrears and in accordance to Policy 2.151, Joint Policies and Procedures of the Presiding Officers of the Florida Legislature. Travel expenses incurred by EarthLink are included in the total costs. The performance of the Senate under this Contract is subject to and contingent upon the availability of funds appropriated by and to the Legislature and applicable for the purpose of this Contract.

**Contract Managers:**

The Contract Manager on behalf of the Senate is Bob Endress, telephone, 850-487-5793. The Contract Manager on behalf of EarthLink is Bob West, telephone, 859-333-6066.

**Survival of Terms and Precedence:**

All terms of this Contract that should by their nature survive the termination of this Contract will so survive. In the event of a conflict in any terms of any documents hereunder, that govern the provision of services under this Contract, the following order of precedence will apply in descending order of control:

1. This Contract document,
2. EarthLink's Invitation to Negotiate (ITN) 851 Technical Response; Appendix B-Respondent's Recommendations and Cost, dated 9/2/11; Appendix B-Proposed Network Options, dated 9/2/11; and Optional Available Services, dated 9/2/11
3. Invitation to Negotiate #851, dated 2/25/11; Questions and Answers, dated 3/18/11; Amendment One, dated 3/29/11
4. EarthLink's Master Service Agreement with Attachments I and II
5. EarthLink Business Executive Briefing, dated August 2011
6. Clarification Questions, dated 6/24/11

**Resolution of Disputes**

The exclusive venue of any legal or equitable action that arises out of or relates to the Agreement shall be the appropriate state court in Leon County, Florida. In any such action, Florida law shall apply and the parties waive any right to jury trial.

**Entire Contract**

This Contract together with the documents referenced above constitutes the entire Contract of the parties and supersedes any prior contracts, agreements, or communications written or oral, related to the same subject matter. This contract cannot be changed except in writing with the signature of all parties.

**Execution by the Parties**

**MASTER SERVICES AGREEMENT** 2012 JAN 23 AM 9:41

**THIS AGREEMENT** (hereinafter "Agreement") is entered into as of the ____ day of _____, 2011 ("Effective Date"), by and between **The Florida Senate** ("Customer") and **DeltaCom, Inc. d/b/a EarthLink Business** (hereinafter "EarthLink Business"), each sometimes referred to singularly as a "Party" or collectively as the "Parties". For purposes of the Agreement, "EarthLink Business" means the subsidiary or subsidiaries of EarthLink, Inc that is/are certified to provide the Services in the applicable states.

**WHEREAS**, Customer desires to purchase certain telecommunication services from EarthLink Business; and

**WHEREAS,** EarthLink Business desires to provide Customer with certain telecommunication services.

**NOW THEREFORE,** in consideration of the mutual promises and covenants contained herein, EarthLink Business and Customer agree as follows:

**1. TERM.** The term of this Agreement shall commence on the Effective Date, and continue for a period of four (4) consecutive years from the date the final Service described in **Attachment 1** hereto becomes available to Customer (hereinafter the "Initial Term") unless earlier terminated pursuant to the Parties' contract.

**2. SERVICES PROVIDED BY EARTHLINK BUSINESS.**

2.1 Subject to the terms and conditions of this Agreement, EarthLink Business shall provide certain services (the "Services") to Customer as further described in **Attachment I** hereto, including the Service Schedules and, if applicable, Rate Schedules incorporated therein, as may be amended from time to time upon written agreement of the Parties, and/or as described in orders for Services ("Service Orders") as agreed to in writing between the Parties from time to time. The form of Service Order is attached hereto as **Attachment II**. Unless otherwise provided in a Service Order, the term for each of the Services ordered pursuant to this Agreement shall terminate upon the expiration of the Initial Term or Renewal Term, as applicable.

2.2 Both Parties agree that the Services provided herein are subject to regulation by certain governmental entities, agencies or commissions and shall be provided in accordance with such governmental entities', agencies', or commissions' rules and regulations and EarthLink Business's approved tariffs, as the same may be amended from time to time in the future or, when and where applicable in compliance with specific rules and regulations of such governmental entities, agencies or commissions, and in the event of detariffing by a governmental entity, agency or commission, the applicable replacement tariff shall apply upon notice to Customer, all as the same appears on EarthLink Business's company website at www.deltacom.com. All charges for usage of the Services to be provided by EarthLink Business hereunder shall not exceed the maximum charges permitted by order or ruling from time to time of any governmental agency or entity with competent jurisdiction over such matters, if any such maximum charges are established.

2.3 EarthLink Business shall comply with the Service Level Agreements set forth in Attachment I. Except for express indemnity obligations set forth in section 1.15 of The Florida Legislature's ITN #851, the service level agreement credits together with Customer's right to terminate under Sections 6.2 and Section 10, shall be the sole and exclusive remedy of Customer for the failure of EarthLink Business to provide the Services in accordance with this Agreement. Payment of the rates and charges for services satisfactorily rendered up to the date of termination and the Discontinuance Charge hereinafter defined shall be the sole and exclusive remedy of EarthLink Business against Customer.

**3. RATES AND CHARGES.** The rates, charges and term applicable to the Services provided to Customer by EarthLink Business during the Term are contained in **Attachment I** hereto and for any Services ordered in the future will be set forth in an authorized EarthLink

RECEIVED
PURCHASING
2012 JAN 20 AM 9:41

Business quote for services and referenced in the applicable Service Order. Rates and charges set forth in **Attachment I** are exclusive of any applicable taxes or other governmental or regulatory fees that EarthLink Business has been expressly permitted by applicable regulatory authorities of competent jurisdiction to assess its customers. Notwithstanding any other provision contained herein relating to the applicability of EarthLink Business's tariffs, the rates and pricing set forth on **Attachment I** shall be the applicable rates and pricing for the Services during the Term except as may be specifically provided in a Service Schedule.

**4. PAYMENT FOR SERVICES.**

4.1 A statement for Services provided to Customer under this Agreement shall be submitted to Customer by EarthLink Business on a monthly basis and shall be due and payable pursuant to the terms of Policy 2.151, Joint Policies and Procedures of the Presiding Officers of the Florida Legislature, a copy of which is included by reference in this agreement. Interest on unpaid amounts due shall be as provided in Joint Policy 2.151. The first and the final statements for Services will be for a partial month in the event the dates of Service provision do not coincide with EarthLink Business billing dates.

4.2 In addition to the charges for Services, Customer shall be responsible and pay for all excise, sales, use and other taxes required by law, regulatory assessments and fees which may be levied by any governing or regulatory body, or for which EarthLink Business is authorized to assess by any such body on Customer, the Florida Legislature, regarding the provision of the Services furnished under this Agreement. The Legislature does not pay Federal excise or Florida sales taxes on direct purchases of tangible personal property. The Legislature will not pay for any personal property taxes levied on the Contractor or for any taxes levied on employees' wages.

**5. SUSPENSION AND TERMINATION OF SERVICE.** If any invoiced amount remains unpaid on the due date, and such default remains uncured ten (10) days after EarthLink Business gives Customer written notice of such default ("Suspension Notice"), EarthLink Business may immediately suspend the Services, in whole or in part. Following the issuance of a Suspension Notice, EarthLink Business may terminate all or any part of the Services without further notice to Customer if all outstanding amounts are not paid within five (5) days after the suspension date specified in the Suspension Notice. EarthLink Business shall not suspend service for non-payment provided that Customer provides EarthLink Business with a notice of a good faith, bona fide dispute relating to such billing statement within thirty (30) days after receipt of such billing statement (the dispute notice shall state with particularity the basis of the dispute) and Customer pays all undisputed amounts. Neither suspension nor termination of the Service will relieve Customer of any obligation to pay EarthLink Business's statement(s) for Services with respect to services performed prior to suspension or termination or the applicable Discontinuance Charge. Unless otherwise set forth in this Agreement, should this Agreement be terminated by Customer prior to the expiration of the Term of this Agreement, or, if applicable, any Service be terminated prior to the expiration of the Service Order Term, Customer shall be required to pay the total of all unpaid monthly recurring charges that could be charged under the Agreement for the Initial Term or Renewal Term ("Discontinuance Charge") provided that in the event that the foregoing is unenforceable, in whole or in part, for whatever reason, EarthLink Business will be entitled, in addition to any other remedy available at law or in equity, to recover any unpaid costs it incurred to implement and discontinue the Services, including, without limitation, the following: (i) the cost of any early termination charges owed by EarthLink Business to any third party provider of any component of the Services provided to EarthLink Business for Customer's benefit; and (ii) any and all previously waived install and engineering fees or other credits or incentives (if any) given to Customer as set forth in Attachment I or a Service Order. Because damages resulting from early termination would be difficult to determine, the parties agree that the foregoing is a reasonable approximation of such damage and shall be considered a liquidated damage and not a penalty. Notwithstanding the foregoing, in the event that Customer relocates any T1 service (i) during months one through twelve (1-12) of the Service Term, Customer shall only be obligated to pay to EarthLink any non-recurring charge by EarthLink Business to establish such

Service(s), whether such charge was waived or not, (ii) after month thirteen (13) Customer will not be obligated to pay any fee to relocate Services, including the Discontinuance Charge.

**6. CANCELLATION.**

6.1 The Parties agree that in the event a decision or ruling by a regulatory authority at the federal, state or local level with competent jurisdiction over such matters materially affects the rights or obligations of either Party arising out of this Agreement, the Parties will negotiate in good faith to modify this Agreement in light of such decision. Should said decision or ruling prohibit EarthLink Business from furnishing the Services, then either Party may terminate this Agreement with notice to the other Party without further liability hereunder except Customer's liability to pay for Services provided through the effective date of such termination and EarthLink's liability to provide Service Level Agreement credits and service outage credits through the effective date of such termination.

6.2 If Customer is not satisfied with any service provided by EarthLink Business under this Agreement, Customer may discontinue any of the services provided under this Agreement by written notice of non- performance in regard to EarthLink Business's Sales Support, or Network Quality. Should a service problem arise, Customer must notify EarthLink Business's Vice President of Enterprise Sales, in writing, and allow EarthLink Business twenty (20) business days in which to responsively address Customer's problem or return the telephone network service performance to customarily acceptable industry standards. If the problem cannot be responsively addressed or the service cannot be restored to normal and customarily acceptable industry performance standards, EarthLink Business will terminate the non-performing service thirty (30) days after receipt of Customer's written notice of cancellation without requiring payment of the Discontinuance Charge. Customer is responsible for paying all accrued charges for Services through the date Customer provided EarthLink notice of nonperformance.

**7. USE AND PROTECTION OF INFORMATION.** In connection with performance under this Agreement the Parties may exchange certain information that is non-public, proprietary and confidential ("Confidential Information"). Confidential information shall also include any information provided to Customer for 'write' access to the routers and switches. EarthLink Business agrees that information regarding Customer's business and information with respect to Customer's customers disclosed to EarthLink Business is the Confidential Information of Customer. Without the prior written consent of the disclosing Party, during the Term of this Agreement and for a period of three (3) years after the expiration or earlier termination hereof, each Party will not (and will cause each of their respective officers, employees, agents, contractors, representatives, affiliates, attorneys, successors and assigns to not): (i) use any portion of the other Party's Confidential Information for any purpose other than performance of this Agreement in accordance with its terms; or (ii) disclose any portion of such the other Party's Confidential Information to a third party; provided, however, that the recipient may disclose Confidential Information (y) to the extent such disclosure is required by law, including state or federal securities laws, by either a governmental or regulatory authority, provided that it gives the other Party written notice and an opportunity to object to the disclosure or obtain protections for such Confidential Information, or (z) to enforce its rights under this Agreement. The foregoing obligations to protect Confidential Information shall not apply to any information that: (a) becomes generally available to the public other than as a result of unauthorized disclosure by the recipient Party; (b) has been released by the disclosing Party to any other person or entity without similar restrictions on use or disclosure; (c) was known by the recipient Party prior to disclosure; or (d) was independently developed by the recipient Party without use of any Confidential Information of the other Party, or rightfully and lawfully furnished to the recipient Party by an independent third party without any restriction on disclosure or use. Confidential Information of a tangible nature shall remain the property of the disclosing Party, and shall be returned to the disclosing Party or shall be destroyed upon termination of this Agreement. The recipient Party agrees to safeguard Confidential Information utilizing the same degree of care utilized by the recipient Party in protecting its own confidential information, but in no event less than reasonable care.

RECEIVED
2002 JAN 23 AM 9:42
PURCHASING

Any portion of the documents, data or records submitted to the Customer and considered by EarthLink to be confidential, trade secret or otherwise not subject to disclosure pursuant to Section 11.0431, Florida Statutes, the Florida Constitution or other authority, must be clearly labeled as such. EarthLink must also simultaneously provide the Legislature with a separate redacted copy of its documents, data or records and briefly describe in writing the grounds for claiming exemption from the public records law, including the specific statutory citation for such exemption. This redacted copy shall contain EarthLink's name on the cover and shall be clearly titled "Redacted Copy." The Redacted Copy shall be provided to the Legislature within one week of the effective date of this agreement and must only exclude or obliterate those exact portions that are claimed confidential, proprietary, or trade secret. The terms of this agreement are not confidential, proprietary or a trade secret.

**8. ORDERS FOR SERVICES**: Customer authorizes EarthLink Business to accept Service Orders by e-mail, facsimile or other electronic transmission from the employee(s) of Customer as previously identified or as identified on Attachment II attached hereto. Customer may change or modify this authorization at any time upon written notice to EarthLink Business in accordance with the notice provisions of this Agreement. Every accepted email or fax order from Customer shall act as an amendment to this Agreement, and all Services ordered, whether by e-mail, fax or otherwise, shall be subject to the terms and conditions of the Agreement and any applicable EarthLink Business tariff for such Services. A service order that increases the cost must be signed by the Florida Senate.

**9. LIMITATION OF LIABILITY AND DISCLAIMER OF WARRANTIES.**

9.1EXCEPT AS SET FORTH IN THE APPLICABLE SERVICE LEVEL AGREEMENTS, INCLUDING ADDENDUM TO AGREEMENT FOR SERVICE, OR AS OTHERWISE MAY BE PRESCRIBED BY APPLICABLE LAW, EARTHLINK BUSINESS MAKES NO REPRESENTATION OR WARRANTY, WHETHER EXPRESS, IMPLIED, OR STATUTORY, AS TO THE DESCRIPTION, QUALITY, MERCHANTABILITY, NON-INFRINGEMENT, COMPLETENESS OR FITNESS FOR ANY PURPOSE OF THE SERVICE (INCLUDING, WITHOUT LIMITATION, LOCAL ACCESS, LONG DISTANCE, INTERNET ACCESS, FRAME RELAY, ATM OR OTHER DATA SERVICES) OR AS TO ANY OTHER MATTER, ALL OF WHICH REPRESENTATIONS AND WARRANTIES ARE HEREBY EXCLUDED AND DISCLAIMED BY EARTHLINK BUSINESS. .

9.2 IN NO EVENT SHALL EITHER PARTY BE LIABLE TO THE OTHER PARTY, OR TO EITHER PARTY'S CUSTOMERS CLIENTS, OR TO ANY OTHER PERSON, FIRM OR ENTITY FOR ANY INDIRECT, CONSEQUENTIAL, SPECIAL, INCIDENTAL, OR PUNITIVE DAMAGES, OR FOR ANY LOST PROFITS OF ANY KIND OR NATURE WHATSOEVER, ARISING OUT OF THIS AGREEMENT, OR THE OBLIGATIONS OF EARTHLINK BUSINESS OR CUSTOMER PURSUANT TO THIS AGREEMENT, INCLUDING, WITHOUT LIMITATION, THOSE MATTERS WHICH MAY RESULT FROM OR BE IMPOSED BY GOVERNMENTAL, REGULATORY, LAW ENFORCEMENT OR JUDICIAL AUTHORITIES. LIABILITY TO CUSTOMER FOR DIRECT DAMAGES (INCLUDING WITHOUT LIMITATION SERVICE OUTAGE CREDITS) MAY NOT EXCEED THE AMOUNT PAID BY CUSTOMER FOR SERVICES DURING THE PRECEEDING TWELVE (12) MONTHS REGARDLESS OF THE FORM OF ACTION, NATURE OF THE CLAIM ASSERTED OR THE FRUSTRATION OF EITHER PARTY'S PURPOSE.

9.3 DISCLAIMER OF EMERGENCY 9-1-1 SERVICES, IF CUSTOMER USES VoIP (VOICE over INTERNET PROTOCOL)-BASED PHONES, CUSTOMER IS ADVISED THAT EMERGENCY 9-1-1 SERVICE MAY NOT FUNCTION OR BE AVAILABLE TO CUSTOMER WITH THE LOSS OF ELECTRICAL POWER OR IF THE BROADBAND CONNECTION IS NOT OPERATIONAL. EMERGENCY 9-1-1 SERVICE WILL NOT BE AVAILABLE AT ANY REMOTE LOCATION IF INTERNAL USERS ARE ALLOWED TO USE THEIR VoIP-BASED PHONES REMOTELY. CUSTOMER'S SIGNATURE ON THIS AGREEMENT WILL BE CUSTOMER'S ACKNOWLEDGMENT THAT EARTHLINK BUSINESS HAS ADVISED CUSTOMER OF THESE LIMITATIONS AND THAT CUSTOMER ACCEPTS THE SERVICES WITH THESE

RECEIVED
2012 JAN 23 AM 9:42
PURCHASING

LIMITATIONS. UPON REQUEST BY CUSTOMER, EARTHLINK BUSINESS WILL PROVIDE LABELS TO CUSTOMER THAT ALERT USERS TO THE LIMITATIONS. THE FEDERAL COMMUNICATIONS COMMISSION RECOMMENDS THAT CUSTOMER PLACE THESE LABELS ON OR NEAR THE TELEPHONE AND OTHER EQUIPMENT ASSOCIATED WITH CUSTOMER'S VoIP-BASED PHONES.

9.4 For purposes of Sections 9 and 10, the term "EarthLink Business" shall be deemed to include EarthLink Business and any person or entity (including its parent entity, affiliates, subsidiaries, delegates, successors and assigns) assisting EarthLink Business in its performance under this Agreement.

**10. FORCE MAJEURE.** Neither EarthLink Business nor Customer shall be liable to the other party for any failure of performance hereunder if neither the fault nor the negligence of that party contributed to the failure and the failure of performance is due directly to causes beyond its reasonable control, including acts of God, fire, explosion, vandalism, terrorism or other crime, cable cut, storm or tornado, meteorological, hydrological or geological conditions or other similar catastrophes; any law, order, rule, regulation, statute, direction, action, administrative proceeding, or request of the United States government or of any other government, including state and local governments, having jurisdiction over either of the Parties, or of any department, agency, commission, court, bureau, corporation or other instrumentality of any one or more of said governments, or of any civil or military authority; national emergencies; insurrections or other civil disturbances; riots; wars; or strikes, lock-outs, work stoppages or other labor difficulties; unavailability of rights-of-way; failures of third party service or material providers; failures of transportation and common carriers; or the acts or omissions of any third party, including, without limitation, telecommunications and local exchange and interexchange carriers other than EarthLink Business as defined above in Section 9.3 ("Force Majeure"). If either Party is unable to perform any of its obligations under this Agreement because of a Force Majeure Event, the Party who has been so affected shall immediately give notice to the other Party and shall do everything reasonably practicable to resume performance. Notwithstanding anything in this Agreement to the contrary, if such failure of performance shall continue for more than thirty (30) days, then this Agreement may be canceled by either Party with no liability of either Party other than Customer's obligation to pay accrued charges for Services provided prior to the date of the performance failure and EarthLink's obligation to provide service outage credits up to the point of the Force Majeure.

**11. DISPUTE RESOLUTION**:

11.1 All disputes arising out of or in connection with the Agreement shall be attempted to be settled through good-faith negotiation between management of both Parties, followed if necessary (and only if agreed by the Parties) by professionally-assisted mediation. Any mediator so designated must be acceptable to each Party. The mediation will be conducted as specified by the mediator and agreed upon by the Parties. The Parties agree to discuss their differences in good faith and to attempt, with the assistance of the mediator, to reach an amicable resolution of the dispute. Each Party will bear its own costs in the mediation. The fees and expenses of the mediator will be shared equally by the Parties.

11.2 Notwithstanding the determination by the Parties to utilize mediation as specified above for resolution of disputes arising out of or in connection with this Agreement, nothing herein shall preclude either Party from seeking and obtaining from a court of competent jurisdiction appropriate equitable relief, including without limitation, a temporary restraining order or other injunctive relief, to prevent a breach of this Agreement relating to intellectual property, confidentiality, or non-hire and non-solicitation, or to otherwise maintain the status quo pending outcome of any mediation.

PURCHASING

**12. CUSTOMER PROPRIETARY NETWORK INFORMATION**. As EarthLink Business provides Services, EarthLink Business develops information about the quantity, technical configuration, type and destination of products and services Customer uses, together with other information about Customer found on Customer's bill ("Customer Proprietary Network

Information" or "CPNI"). Customer's telephone number, name and address are not CPNI. Under federal law, Customer has a right, and EarthLink Business has a duty, to protect the confidentiality of CPNI. The Florida Legislature's CPNI will not be shared by EarthLink with any organization or individual without specific written consent of the Legislature. The restriction in sharing CPNI shall survive the termination of any Services provided by EarthLink Business. Opting out will not affect the status of the Services.

**13. NETWORK MAINTENANCE ACTIVITY**

13.1 Timing. EarthLink Business shall avoid performing network maintenance between 0600 to 2200 Central Time (or local time with respect to facilities comprising international Service), Monday through Friday, inclusive, that will have a disruptive impact on the continuity or performance level of Customer's Service. However, the preceding sentence does not apply to restoration of continuity to a severed or partially severed fiber optic cable, restoration of dysfunctional power and ancillary support equipment, or correction of any potential jeopardy conditions. EarthLink Business will use commercially reasonable efforts to notify Customer prior to emergency maintenance.

13.2 Notice. EarthLink Business shall provide Customer with electronic mail, telephone, facsimile, or written notice of all non-emergency, planned network maintenance (i) not less than three (3) business days prior to performing maintenance that, in its reasonable opinion, has a substantial likelihood of affecting Customer's traffic for up to fifty (50) milliseconds, and (ii) not less than ten (10) business days prior to performing maintenance that, in its reasonable opinion, has a substantial likelihood of affecting Customer traffic for more than fifty (50) milliseconds. If EarthLink Business' planned activity is canceled or delayed, EarthLink Business shall promptly notify Customer and shall comply with the provisions of this Section to reschedule any delayed activity.

14. INTERNET ACCESS. If the Services include Internet Access and/or Email Access ("Access"), Customer covenants that none of Customer's internet content, Email content, transmission or any other internet activities will be in violation of any local, state, federal or international laws, regulations or treaties or EarthLink Business's Acceptable Use Policies. Any such violations may be grounds for termination of the Access. Customer agrees to abide by EarthLink Business's Acceptable Use Policies, which are available for review by Customer at http://www.deltacom.com/terms_conditions.asp or, with prior notice to customer, any successor URL which may be located on the EarthLink Business website, except that Customer may access content prohibited by EarthLink's policies only in connection with legitimate information gathering for legislative research purposes, in which case the Legislature, subject to the sovereign immunity of the State of Florida, will indemnify and hold harmless EarthLink Business from any and all damages, claims, and liabilities arising from or related to such use. EarthLink Business provides no user access security with respect to any of Customer's facilities or facilities of others. Customer shall be responsible for user access security and network access. Customer is responsible for assessing its own computer and transmission network needs, and is solely responsible for the results obtained therefrom.

15. CUSTOMER PREMISE EQUIPMENT Should Customer return any item of CPE ordered by Customer and that has been used or taken out of its box, Customer will pay EarthLink Business a Restocking charge. Customer shall provide all consumables (e.g., paper, toner, ink) used by any CPE. EarthLink Business, through its employees or other repair personnel, will provide maintenance as required to keep CPE in good operating condition as a result of Customer's normal use. Any manufacturer's warranties or maintenance contracts will be for the benefit of EarthLink Business. EarthLink Business reserves the right to substitute another type of CPE of similar functionality with the Customer's approval. Any substituted CPE or repair and replacement parts may be new or like new. Customer shall provide EarthLink Business or other repair personnel reasonable access to the CPE. Customer agrees to assume and bear the entire risk of any partial or complete loss with respect to the CPE from any and every cause whatsoever including theft, loss, damage, (including damage caused by Acts of God, or Force Majeure), destruction or governmental taking, whether or not such loss is covered by insurance or caused

by any fault or neglect of Customer. If Customer's CPE is so equipped, wireless service within Customer's premise is available to Customer's device only when it is within the operating range of the CPE. Connection speed is an estimate and is no indication of the speed at which Customer's device or the Service sends or receives data. Actual connection speed will vary based on device configuration, compression, distance, network congestion, interference and other factors. The accuracy and timeliness of data received is not guaranteed; delays or omissions may occur. EarthLink Business may, but does not have to, change or improve the CPE by, among other things, changing or upgrading the 802.11b/g standard. If Customer is receiving CPE at no rental cost to Customer, then Customer shall be billed a Monthly Equipment Maintenance Coverage charge and payment of such charge shall relieve Customer of liability for Acts of God, including lightning, power surge, fire, wind, flood and earthquake. Damage caused by power surge, fire, and flood, which is not the result of an Act of God, is specifically excluded from coverage. Customer agrees to give EarthLink Business prompt notice of any damage to or loss of any CPE, or any abandonment or relocation from Customer's premise. CPE furnished by EarthLink Business remain the property of EarthLink Business. EarthLink shall provide the Florida Legislature 'write' access to the routers and switches that comprise the CPE for any and all locations that are on the network. Any and all information provided to Customer to enable 'write' access shall be considered confidential and proprietary information. Customer shall not (a) reproduce, publish, display, distribute, disclose, or otherwise make available the proprietary information, or any part thereof, to any party except those employees, agents and officers or third party advisors and consultants who have a need to know; (b) reverse engineer, disassemble, decompile or otherwise attempt to recreate the proprietary information, or modify, translate, adapt, alter or create derivative works there from; (c) use the proprietary information for any purposes other than those explicitly stated in the Service Agreement. In the event any such access to the Services adversely impacts the EarthLink Business services and or network, EarthLink Business reserves the right to immediately suspend and prohibit such access. Should Customer require maintenance of the router, or any part of the Service, resulting from a Customer caused service impairment to the router, EarthLink Business will restore the router configuration to the last scheduled backup configuration and charge the customer a fee of $100 for each such restoration. Should service not be restored through the reload of the last scheduled backup, EarthLink Business will provide the necessary remediation and will charge Customer a time and materials charge of $250.00 per hour. EarthLink Business will not be responsible for the backup of Customer's modified router/switch configurations until the next regularly scheduled EarthLink configuration backup. For EarthLink Business-furnished CPE that cannot be recovered from Customer's site, Customer will pay EarthLink Business the listed purchase price for such CPE. Customer shall pay any charges at EarthLink Business's normal time and materials rates for installation of or work on any inside wiring by EarthLink Business in Customer's premises.

**16. ADDITIONAL PROVISIONS.**

16.1 The failure of either Party to give notice of default or to enforce or insist upon compliance with any terms or conditions of this Agreement, the waiver of any term or condition of this Agreement, or the granting of an extension of time for performance, shall not constitute the permanent waiver of any term or condition of this Agreement, and this Agreement and each of its provisions shall remain at all times in full force and effect until modified by the Parties in writing.

16.2 Each Party agrees to comply with, and shall require its agents, servants, employees and contractors to comply with all applicable laws, rules, regulations and orders of all governmental and quasi-governmental agencies having jurisdiction over such Party and to obtain and maintain in effect all permits licenses, approvals, and agreements that are needed to operate its business and perform its obligation under this Agreement.

16.3 In the event suit is brought or an attorney is retained by either party to enforce the terms of this Agreement or to collect any moneys due hereunder or to collect money damages for breach hereof, the prevailing party shall be entitled to recover, in addition to any other remedy, reimbursement for reasonable attorney's fees, court costs, costs of investigation and other related expenses incurred in connection therewith.

2012 JAN 23 AM 9:42

16.4 No subsequent agreement between Customer and EarthLink Business concerning the Services shall be effective or binding unless it is made in writing. No representation, promise, inducement or statement or intention has been made by either Party which is not embodied herein.

16.5 This Agreement shall be binding upon and inure to the benefit of the Parties hereto and their respective affiliates, successors, or assigns; provided, however, Customer shall not assign or transfer its right or obligations under this Agreement without prior written consent of EarthLink Business, which consent shall not be unreasonably withheld.

16.6 Notices under this Agreement shall be in writing and delivered by (i) overnight express courier service with a reliable system for tracking delivery, (ii) by registered or certified mail, return receipt requested, postage prepaid, (iii) hand delivery, or (iv) via confirmed facsimile transmittal to the person whose names and business addresses appear beneath the signatures below and on the Contract for Network Services with a copy sent by another means specified herein. The effective date of any notice under this Agreement shall be the date of delivery or refusal of such notice and not the date of mailing.

16.7 It is the explicit intention of the Parties hereto that there are no third party beneficiaries to this Agreement, and no person or entity other than the Parties hereto is or shall be entitled to bring any action to enforce any provision of this Agreement against either of the Parties, and that the covenants, undertakings, and agreements set forth in this Agreement shall be solely for the benefit of, and shall be enforceable only by, the Parties hereto or their respective successors and assigns as permitted hereunder.

16.8 This Agreement is comprised of the general terms and conditions contained in Sections 1 through 16 herein (the "General Terms") together with any attachments Service Schedules, Rate Schedules, and Service Orders attached and incorporated by reference, and the foregoing shall be deemed one, integrated agreement and not as separate, severable contracts. The Service Schedules and Rate Schedules may be attached hereto, separately executed, or added by amendment. This Agreement and EarthLink Business's tariffs for the Services sets forth the entire understanding of the Parties and supersedes any and all prior or contemporaneous agreements, arrangements or understandings, whether oral or written, relating to the subject matter hereof. The Parties intend that to the extent practicable this Agreement and EarthLink Business's applicable tariffs shall be construed so as to give effect to each provision thereof, however, in the event of a conflict between the terms of this Agreement and the applicable tariffs, the Parties intend for the terms of this Agreement to control.

No shrink-wrap, click-wrap, or other terms and conditions or agreement ("Additional Terms") provided with any service, products, or software hereunder shall be binding on Customer, even if use of such services, products, or software requires an affirmative "acceptance" of those Additional Terms before access is permitted. All such Additional Terms shall be of no force or effect and shall be deemed rejected by Customer in their entirety.

16.9 This Agreement and all other documents and writings associated herewith shall be governed by the laws of the State of Florida, without regard to its conflicts of laws provisions. If any part of any provision of this Agreement or any other agreement, document or writing given pursuant to or in connection with this Agreement shall be invalid or unenforceable under applicable law, said part shall be ineffective to the extent of such invalidity only, without in any way affecting the remaining parts of said provision or remaining provisions of this Agreement and the Parties hereby agree to negotiate with respect to any such invalid or unenforceable part to the extent necessary to render such part valid and enforceable.

16.10 As provided in Section 287.042(16)(a), F.S., state agencies may purchase from this agreement, provided that the Department of Management Services has determined that the agreement's use is cost-effective and in the best interest of the State. Upon such approval, EarthLink may, at its discretion, sell these commodities or services to additional agencies, upon the terms and conditions contained herein.

EarthLink

ADDENDUM TO AGREEMENT FOR SERVICE

THIS ADDENDUM ("Addendum") is entered into between the customer identified below ("Customer") and DeltaCom, Inc., d/b/a EarthLink Business ("EarthLink Business") and amends the Master Services Agreement (~~"Agreement"~~ MSA) dated concurrently herewith between EarthLink Business and Customer as provided below.

A. The following provisions, as applicable, are in addition to or amend and restate in their entirety the applicable provisions from the MSA:

**1.0 Service Level Agreements**

1.1 Network Availability. EarthLink Business is committed to providing Customer with 99.9% availability of its network facilities, from point of connection at our central office or data center facilities, to delivery of data to and from the global Internet backbone. EarthLink Business will provide an SLA credit equal to 1 day's pro-rata portion (3.33%) of Customer's monthly recurring charge, excluding taxes, regulatory and other similar fees ("MRC") ("1 Day Credit"), for the impacted Service for each 30 minutes of SLA violation beyond the 2.1 minutes allowed, up to a maximum credit of one month's MRC for the impacted Service. (Example: 1 Day Credit for the first hour of outage, including the 2.1 minutes allowed by 99.9%, and then 1 Day Credit per 30 minutes after that.) Customer must inform EarthLink Business of a violation within five days of outage.

1.2 Network Latency. EarthLink Business continuously monitors all aspects of its network for any issues that might lead to performance degradation, and proactively takes steps to resolve those issues. EarthLink Business will measure latency from the exact point Customer connects to EarthLink Business's facilities to various exit points throughout the EarthLink Business network and onto the global Internet backbone. Overall latency calculations are taken at five-minute intervals and averaged across the entire network. Should the average "two-way" latency in one calendar week exceed 55 milliseconds, Customer is entitled to one weeks pro rata credit (25% of MRC) for the impacted Service, up to a maximum credit of one month's MRC for the impacted Service. Customer must notify EarthLink Business of SLA violation at which point EarthLink Business will verify to Customer's premise from EarthLink Business's network.

1.3 Packet Delivery Ratio SLA (for DIA, MPLS & ELINE Services). EarthLink Business's Packet Delivery Ratio ("PDR") is the measurement of the percentage of IP packets delivered between any EarthLink Business Core IP/MPLS router and any other EarthLink Business Core IP/MPLS router on the EarthLink Business MPLS network averaged over a thirty (30) day month (720 hours) period. For PDR, the amount of credit shall be an amount equal to a 1 Day Credit during any calendar month that the affected port fails to conform to the applicable SLA.

1.4 Jitter SLA (for High Priority MPLS Services only). Jitter is a measurement of the standard deviation of latency averaged over a thirty (30) day month (720 hour) period, required for a packet (100 bytes) to travel between any Core IP/MPLS router and any other core IP/MPLS router. For Jitter, the amount of credit shall be an amount equal to a 1 Day Credit during any calendar month that the affected port fails to conform to the applicable SLA.

1.5 Customer Service Response Time. EarthLink Business's strong customer service commitment is to completely satisfy any operational issues that arise. In the event that EarthLink Business is notified by Customer to respond to service issues, EarthLink Business's goal is to immediately assist Customer at the time of contact. If EarthLink Business is unable to immediately assist Customer, EarthLink Business will respond back to Customer within 30 minutes of initial contact. Should EarthLink Business fail to meet this commitment, Customer will be entitled to 1 Day credit per instance, up to a maximum credit of one month's MRC. Customer is solely responsible for insuring EarthLink Business having the proper, up to date, contact information.

1.6 SLA Summary Table

| Measure | SLA | Credits |
|---|---|---|
| Availability | 99.9% Monthly - (2.1 Minutes) | 1 Day per 30 Minutes |
| Latency | 55 ms Average | 25% MRC per Week |
| Packet Delivery | 99.5% Weekly - (5 per 1,000) | 1 Day per Occurrence |
| Jitter | DIA – Not Applicable<br>MPLS IP VPN – 5ms<br>ELINE – Not Applicable | 1 Day per Occurrence |
| Customer Service Response Time | 30 Minutes to Call Back | 1 Day per Occurrence |

1.7 Exclusions. The credits provided above are not applicable (1) if Initial Term of the Agreement is entered into for less than one year; (2) for Internet Service during the fifteen (15) days following provisioning; (3) if any Service degradation or disruption (a) occurs during EarthLink Business scheduled Network maintenance; (b) is related to acts or omissions of the Customer or authorized agent, or any use or user of the service authorized by Customer; (c) is the result of a malicious action by a third party against the Customer or authorized agent; (d) is caused by Customer applications, equipment, or facilities, including any Customer-ordered telephone company circuits; or (e) is caused by a Force Majeure event.

B. Any changes to the Agreement necessary to conform the Agreement to this Addendum are hereby deemed to be made. In all other respects not inconsistent with this Addendum, the terms of the Agreement not specifically or by necessary implication amended or modified by this Addendum, shall be and remain in full force and effect as modified hereby. This Addendum supersedes and replaces all prior and contemporaneous agreements, discussions and understandings, whether written or oral, concerning the subject matter hereof.

IN WITNESS WHEREOF, EarthLink Business and Customer have executed this Addendum to Agreement For Service, by their duly authorized representatives, on the day and year indicated below.

# SECTION 1: GENERAL INFORMATION

## 1.1 Introduction

The Florida Legislature (Legislature) intends to obtain competitive sealed responses to upgrade and improve the Legislature's Wide Area Networks and Internet services. The successful Respondent will be required to provide service as described in the Scope of Services, Section 3 of this ITN.

The successful Respondent must be a Primary Multi-Protocol Label Switching (MPLS) Provider or any State of Florida Agency Contract offering for Managed MPLS Service.

## 1.2 Objective

The Legislature is seeking responsible Respondents to provide network services as described in the Scope of Services, Section 3 of this ITN. The goal is to provide greater access and reduce the Legislature's overall communication cost.

The Legislature will cooperate fully with the successful Respondent in providing any information which is maintained by the Legislature that is necessary for the successful Respondent to perform assigned tasks.

## 1.3 Mandatory Pre-Response Conference

A Mandatory Pre-Response Conference will be held at 2:00 pm, March 8, 2011, in the Claude Pepper Building, 111 West Madison Street, Room G01, Tallahassee, Florida 32399-1400.

**Only respondents in attendance will be eligible to submit a response for these services.**

## 1.4 Questions/Inquiries

Questions for additional information or clarification may be submitted in writing (by mail, hand-delivery, email to bullock.sandra@leg.state.fl.us or by FAX to 850/414-1909) and received no later than March 11, 2011.

All questions should be addressed as follows:

**QUESTIONS ITN #851**
**NETWORK SERVICES**

Written responses to all questions will be posted on the website at www.leg.state.fl.us/ITN851 on the date listed in the Schedule of Events, Section 1.8.

**It is the responsibility of each Respondent to monitor the website at www.leg.state.fl.us/ITN851 for new and changing information.**

## 1.5 Submission of Responses

Sealed responses are to be submitted to the Office of Legislative Services (OLS) Purchasing Office, Room 880, Pepper Building, 111 W. Madison St., Tallahassee, FL 32399-1400 on or before March 31, 2011, **by 3:00 P.M.**

All responses must be submitted on forms furnished herein and as required by Evaluation, Section 5 of this ITN. Responses shall be properly executed in the name of and by the person, firm, or corporation submitting the response.

Responses must be returned in a sealed envelope indicating the date, time of response opening, response title, and ITN number.

Responses must be submitted in two **separate** sealed parts: a **Technical Response** and a **Cost Response,** due on or before March 31, 2011, **by 3:00 p.m.** Response packages must be boxed or sealed and identified as follows:

- Name of Vendor (Your Company's Name and any subcontracting entity)
- Type of Response: (Technical Response or Cost Response)
- ITN #851, Network Services

**The Technical Response must not contain any cost information.**
It shall be the sole responsibility of the Respondent to see that his or her response is received at the proper location on or before the stated time of response opening. All responses received after that time shall be returned unopened.

Note: A person or affiliate who has been placed on the convicted vendor list following a conviction for a public entity crime may not submit a response on a contract to provide goods or services for a period of 36 months from the date of being placed on the convicted vendor list.

### 1.6 Opening of Responses

Sealed responses will be opened by the OLS Purchasing Office of the Legislature in Room 880, Pepper Building, 111 West Madison Street, Tallahassee, FL 32399-1400 at **3:00 PM, March 31, 2011.** All responses are subject to the conditions specified herein.

**The Legislature reserves the right to waive any minor irregularities or technicalities in any responses received, to cancel any request or reject any or all responses in whole or in part, with or without cause, to solicit new responses or to accept the response which, in its judgment, will be in the best interest of the Legislature.**

### 1.7 ITN Coordinator

All Respondents' communications concerning this ITN, including but not limited to the "QUESTIONS/INQUIRIES", must be directed to the ITN Coordinator of the OLS Purchasing Office listed below. Unauthorized contact regarding this ITN with other Legislative employees may result in disqualification. Any oral communications will be considered unofficial and non-binding to the Legislature. Respondents should reply only in writing (mail, hand-delivered, email or fax) to the following:

Sandra Bullock
Office of Legislative Services
Purchasing Office
Room 880, Claude Pepper Building
111 West Madison Street
Tallahassee, FL 32399-1400
FAX (850) 414-1909
bullock.sandra@leg.state.fl.us

## 1.8 Schedule of Events

| | |
|---|---|
| Issuance of ITN | February 25, 2011 |
| Mandatory Pre-Response Conference | March 8, 2011, 2:00 p.m. |
| Last date to submit written questions | March 11, 2011 |
| Written responses to all questions posted On website at www.leg.state.fl.us/ITN851 (on or about) | March 17, 2011 |
| Responses due by 3:00 p.m. for opening (fax or email **not** acceptable) | March 31, 2011 |
| Anticipated review and evaluation of Technical and Cost responses completed | April 19, 2011 |
| Notification to the Respondents to begin Negotiations | April 26, 2011 |
| Contract negotiated and executed by the Parties (on or about) | May 3, 2011 |

Special Accommodation: Any person requiring a special accommodation because of disability should call the Purchasing Office at 850/488-2322 at least five (5) work days prior to the response opening date. If you are hearing or speech impaired, please contact the Purchasing Office by using the Florida Relay Service which can be reached at 1-800-955-8771 (TDD).

## 1.9 Contract Period and Final Contract Award

The contract term will begin upon completion of negotiations and execution of the contract between the Legislature and the Service Provider. The Legislature anticipates that the initial term of this contract will be four years from the Effective Date.

There may be up to (two) two-year renewals of the term at the discretion of the Legislature. Renewals are not guaranteed and are contingent upon funding and performance of the Service Provider.

The award will consist of this ITN, any addenda to this ITN, the successful Respondent's response to this ITN, the contract, any purchase order(s) issued as a result of this ITN, and such other terms and conditions agreed between the parties that may be necessary to the Legislature.

## 1.10 Contract Cancellation

This award may be canceled by the Legislature with 30 days advance written notice to the Service Provider. In the event an award is terminated by such notice from the Legislature, the Service Provider will be paid for services provided through the date of termination. Notice will be sufficient if it is hand-delivered personally, mailed by certified mail, or sent via courier service to the Service Provider.

## 1.11 Warranties

The Respondent represents that it is professionally qualified and possesses the requisite skills, knowledge, qualifications and experience to provide the required services specified. The following are warranty certification requirements that must be certified in writing (Appendix I) in the Administrative Documents Required (Section 4). If the Respondent cannot so certify to any of the following, the Respondent must submit with its Response a written explanation of why it cannot do so within the Administrative Documents Required.

**1.11.1** The Respondent or any other organization associated with the ITN is not currently under suspension or debarment by the State or any other governmental authority.

**1.11.2** To the best knowledge of the person signing the Response, the Respondent, its affiliates, subsidiaries, directors, officers, employees of any other organization associated with this ITN are not currently under investigation by any governmental authority and have not in the last ten years been convicted or found liable for any act prohibited by law in any jurisdiction involving conspiracy or collusion with respect to bidding on any public contract.

**1.11.3** To the best knowledge of the person signing the Response, the Respondent, its affiliates, subsidiaries, directors, officers or any other organization associated with this ITN have no delinquent obligations to the State, including a claim by the State for liquidated damages under any other contract.

**1.11.4** To the best knowledge of the person signing the Response, the Respondent, its affiliates, subsidiaries, directors, officers or any other organization associated with this ITN have not within the preceding three years been convicted of or had a civil judgment rendered against them or is presently under indictment for or otherwise criminally or civilly charged for commission of fraud or a criminal offense in connection with obtaining, attempting to obtain or performing a federal, state, or local government transaction or public contract; violation of federal or state antitrust statutes; or commission of embezzlement, theft, forgery, bribery, falsification or destruction of records, making false statements, or receiving stolen property.

**1.11.5** To the best knowledge of the person signing the Response, the Respondent, its affiliates, subsidiaries, directors, officers or any other organization associated with this ITN have not within a three-year period preceding this certification had one or more federal, state, or local government public transactions terminated for cause or default.

**1.12 Availability of Funds**

The performance of the Legislature under any awards from this ITN shall be subject to and contingent upon the availability of funds lawfully appropriated by and to the Legislature and applicable for the purpose of the services specified.

**1.13 Payment Terms**

All invoicing and payments will be made monthly in arrears and in accordance to Policy 2.151, Joint Policies and Procedures of the Presiding Officers (Appendix J). Payment will be made after receipt of a correct invoice and approval by the Legislature. Travel, when required, must be authorized in advance and is to be included in the total costs of this ITN.

**1.14 Insurance**

The successful Respondent shall not commence any work in connection with an award until it has obtained all of the appropriate insurance coverages to adequately protect the Legislature from any and all liability and property damage hazards which may result in the performance of an award. Furthermore, all insurance shall be with qualified insurers duly licensed to transact business in this state. The Legislature shall be exempt from, and in no way liable for, any sums of money which may represent a deductible in any insurance policy. The payment of such deductible shall be the sole responsibility of the successful Respondent providing such insurance. Upon request, the successful Respondent shall furnish the Legislature an insurance certificate which will evidence that all of the appropriate coverage's are fully in effect.

**1.15 Indemnification**

The successful Respondent shall be fully liable for the actions of its agents, employees, partners, or subcontractors and shall fully indemnify, defend, and hold harmless the Legislature and its officers, agents and employees from suits, actions, damages, and costs of every name and description, including attorney's fees, arising from or relating to personal injury and damage to real or personal tangible property alleged to be caused in whole or in part by the successful Respondent, its agents, employees, partners or subcontractors; provided however, that the successful Respondent shall not indemnify for that portion of any loss or damages proximately caused by the negligent act or omission of the Legislature.

The successful Respondent's obligations under the preceding paragraph with respect to any legal action are contingent upon the Legislature's giving the successful Respondent (1) written notice of any action or threatened action, (2) the opportunity to take over and settle or defend any such action at the successful Respondent's sole expense, and (3) assistance in defending the action at the successful Respondent's sole expense.

**1.16 *Limitation of Respondent's Liability***

Except as specified in the foregoing section 1.15, for all other claims against the successful Respondent under any award from this ITN, and regardless of the basis on which the claim is made, the successful Respondent's liability for direct damages shall be limited to the annual value of the Respondent's total Response under this ITN. No party shall be liable to another for special, indirect, punitive, or consequential damages, including lost data or records even if the party has been advised that such damages are possible. No party shall be liable for lost profits, lost revenue, or lost institutional operating savings. The Legislature may, in addition to other remedies available to it at law or in equity and upon notice to the successful Respondent, retain such monies from amounts due to the successful Respondent as may be necessary to satisfy any claim for damages, penalties, costs and the like asserted by or against

it. The Legislature may set off any liability or other obligation of the successful Respondent under any contract with the Legislature.

**1.17 Prohibition Against Assignment**

An award of this ITN is for services to be provided by the successful Respondent. The award may not be assigned by the successful Respondent in whole or in part, unless specified otherwise in this ITN. The successful Respondent will agree that its performance of any other services during the term of this award or future awards shall not interfere with the faithful and timely performance of this award.

**1.18 Collusion**

Response-rigging is a crime. The Florida Antitrust Act and the Sherman Antitrust Act prohibit agreements among actual or potential competitors as to which firm will win a contract put out for response. The antitrust laws also prohibit other forms of price-fixing, including agreements and conspiracies among actual or potential competitors with the purpose or effect of raising, fixing, pegging, or stabilizing prices, or allocating (dividing) geographic markets or contracts. Any suspicion of anticompetitive conduct in connection with this response should be reported to the State of Florida's Office of the Attorney General, Antitrust Section.

Please complete the enclosed *Non-Collusion Statement (Appendix G)* and enclose with your ITN package.

**1.19 Disclosure Information**

Please complete the enclosed *Disclosure Information Form (Appendix H)* and enclose with your ITN package.

**1.20 Consultant Review**

The Legislature reserves the right to share with any consultant of its choosing this ITN and ITN responses received in order to secure a second opinion.

**1.21 Waivers**

The Legislature shall not be deemed to have waived any of its rights or remedies hereunder unless such waiver is in writing and signed by the Legislature. No delay or omission on the part of the Legislature in exercising any rights or remedies shall operate as a waiver of such right or remedy or any other rights or remedies. A waiver on any one occasion shall not be construed as a bar or waiver of any right or remedy on future occasions.

**1.22 Cost of Reply Preparation**

The cost of preparing the Response is the sole responsibility of the Respondent, whether or not any award results from this ITN.

**1.23 Subcontractors or Third Party Vendors**

The successful Respondent will be responsible for all costs to subcontractors or third party vendors contracted for services by the Respondent.

**1.24 Resolution of Disputes**

Any disputes between the successful Respondent and the Legislature as to the application, meaning, or interpretation of any part of an award as a result of this ITN shall be resolved in Leon County, Florida, by application of Florida law.

**1.25 Confidential, Proprietary, Trade Secret**

If the Respondent considers any portion of the documents, data or records submitted with this ITN to be confidential, trade secret or otherwise not subject to disclosure pursuant to Section 11.0431, Florida Statutes, the Florida Constitution or other authority, Respondent must also simultaneously provide the Legislature with a separate redacted copy of its documents, data or records and briefly describe in writing the grounds for claiming exemption from the public records law, including the specific statutory citation for such exemption. This redacted copy shall contain the ITN number and Respondent's name on the cover and shall be clearly titled "Redacted Copy." The Redacted Copy shall be provided to the Legislature at the same time Respondent submits the document, data or records to the Legislature and must only exclude or obliterate those exact portions that are claimed confidential, proprietary, or trade secret.

Respondent shall be responsible for defending its determination that the redacted portions of its documents, data or records are confidential, trade secret or otherwise not subject to disclosure. Further, Respondent shall protect, defend, and indemnify the Legislature for any and all claims arising from or relating to Respondent's determination that the redacted portions of its response are confidential, proprietary, trade secret or otherwise not subject to disclosure.

If Respondent fails to submit a Redacted Copy with its reply, the Legislature may produce the entire documents, data or records submitted by Respondent in answer to a public records request for these records.

**1.26 Clarifications/Revisions**

Before award, the Legislature reserves the right to seek clarifications and to request any information deemed necessary for proper evaluation from all respondents deemed eligible for award.

## SECTION 2: CURRENT ENVIRONMENT

### 2.1 The Legislature

The Legislature maintains two separate Data Centers. The House Office of Information Technology (House OIT) provides Information Technology (IT) services for the Florida House of Representatives. The Office of Legislative Information Technology Services (OLITS) provides IT services for the Florida Senate, Joint Legislative Committees, and other Legislative Offices. OLITS also provides common shared IT services for the Florida House of Representatives.

### 2.2 Network Services

**OLITS-managed Wide Area Network**

The Florida Senate obtains its current Multiprotocol Label Switching (MPLS) service from Qwest. There are approximately 50 circuits statewide – 40 Senate district offices and 10 Senate satellite district offices connecting to the OLITS-managed network in Tallahassee. There are local servers in each of the 40 Senate district offices to provide DNS, DHCP and local file sharing. The Senate satellite district offices use the router for DNS and DHCP.

The Senate WAN also provides for connectivity to the Voice over IP service located in Tallahassee. All customer premise equipment (Cisco 2811s) in district offices have a PSTN connection should the WAN connection fail. This service is managed by another vendor. The configuration includes music on hold.

In addition to managing the Senate WAN, OLITS maintains two circuits in Tallahassee for district office support and testing. The Commission on Ethics also has two circuits for a total of 3mb. All circuits are logically connected to OLITS located in Tallahassee, and terminate into one 45MB circuit (DS3) in Tallahassee. The WAN is designed for redundancy at the core in Tallahassee. In the event of a failure in the MPLS Core router all traffic will seamlessly route through the Qwest provided Internet router.

There are three Metropolitan Area Network (MAN) connections in Tallahassee. The OLITS-managed Data Center (100MB) circuit provides 45Mbps Internet and 55Mbps Department of Management Services (DMS) Common Services. Two other circuits are 100Mbps layer 2 trunks used for failover between the Claude Pepper and Senate Building networks.

**House OIT-managed Wide Area Network**

The Florida House of Representatives Wide Area Network is made up of one hundred twenty (120) districts and approximately ten (10) satellite offices connecting to the House OIT-managed network in Tallahassee. Each district office connection is provided through local providers (DSL, cable, MFN). These offices are using split tunneling to allow internet traffic out their provider and VPN connection to allow for network connection to the House OIT-managed network. Tallahassee consists of two 33mb MFN lines that are set up for failover to each other.

### 2.3 Internet Access

**OLITS-managed Internet**

OLITS has two Internet connections, one 45MB DS3 circuit is provided by Qwest and one 45MB MAN circuit provided by CenturyLink Commercial Services. OLITS manually load balances outgoing traffic using Border Gateway Protocol (ASN 36514) based on subnet

address. The CenturyLink circuit also provides connectivity to the State of Florida Common Services offerings.

Internet access also provides for external customers' access to Legislative websites in the OLITS-managed DMZ.

**House OIT-managed Internet**
House OIT has two 33MB connections provided by MFN that are set up for failover to each other.

Internet access also provides for external customers' access to Legislative websites in the House-managed DMZ.

## 2.4 Firewall Services

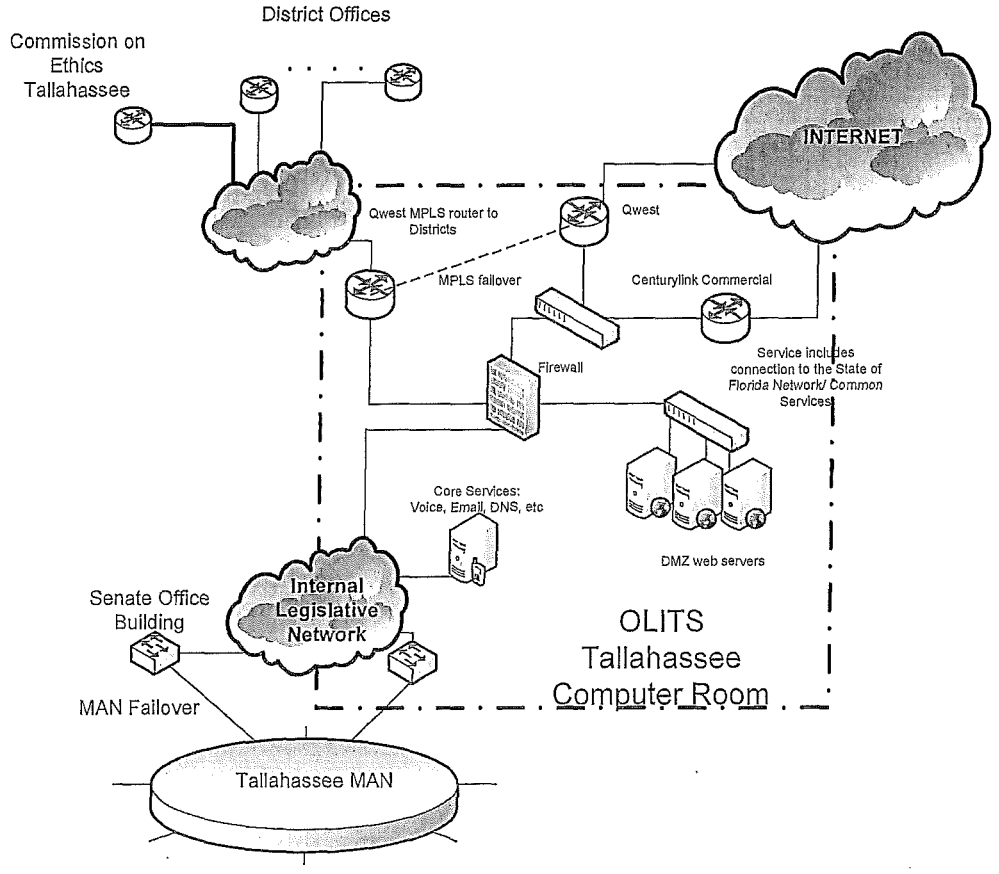
OLITS and House OIT maintain separate firewalls protecting and controlling access between the Internet and the internal legislative networks.

## 2.5 Remote Access Services

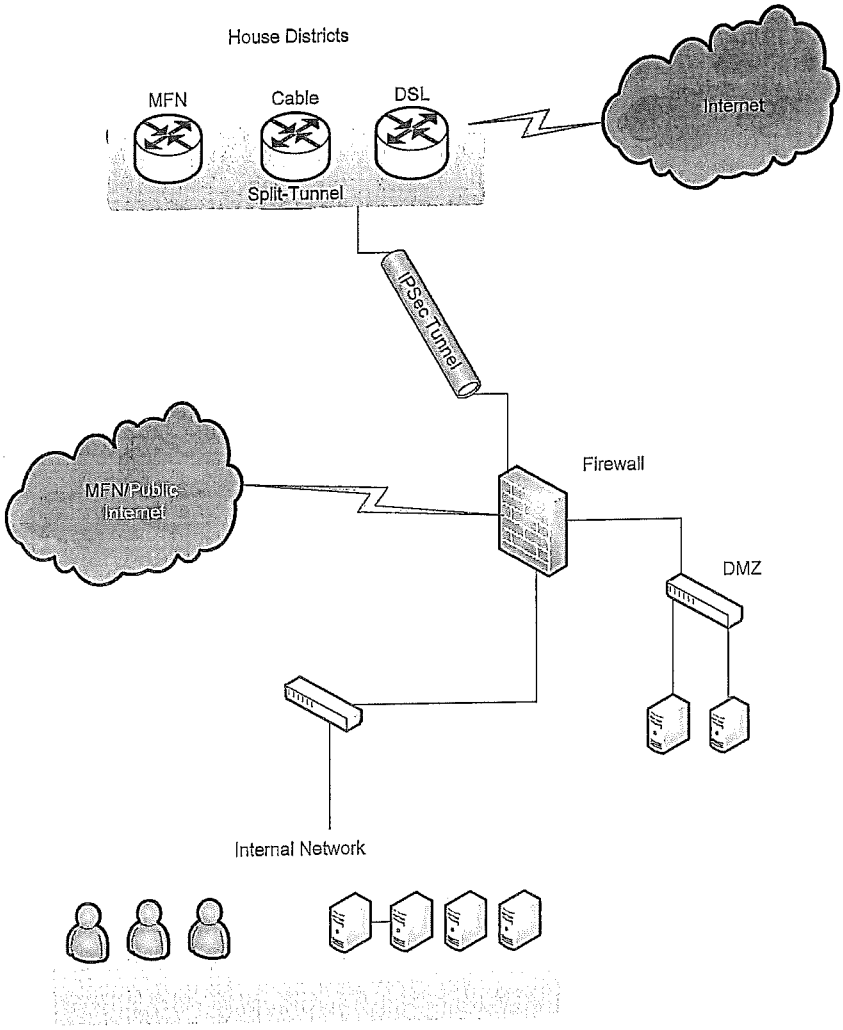
OLITS and House OIT provide separate VPN access for approved Legislative staff and contractors. OLITS maintains support for all Senate and Joint Committee employees for client based and SSL based VPN. House OIT maintains support for all House employees for client based and SSL based VPN.

## Current Network Diagrams

### OLITS-managed (Senate and Joint Committees)



## House OIT-managed (House of Representatives)



## SECTION 3: SCOPE OF SERVICES

**All technical requirements defined in Section 3 must be addressed and responded to by any Primary Multi-Protocol Label Switching (MPLS) Provider or any State of Florida Agency Contract offering for Managed MPLS Service.**

**In addition, Respondents must be able to fulfill the requirements labeled *[Mandatory – Respondents must confirm compliance]*. Failure to fulfill a Mandatory requirement will result in disqualification of a Respondent's Response.**

### 3.1 General Description of the Requested Scope of Services.

3.1.1 Managed Multi-Protocol Label Switching (MPLS) IP VPN Services

a. 40 Senate district offices including managed CPE for minimum 16 LAN ports and one WAN port, including management and support of the extended wiring as needed in each office. Each office must be equipped with VoIP failover to a PSTN.

b. Approximately 10 Senate satellite offices including managed CPE for minimum 8 LAN ports and one WAN port, including management and support of the extended wiring as needed in each office. Each office must be equipped with VoIP failover to a PSTN.

c. 1 Tallahassee remote office (Commission on Ethics)

d. 2 Tallahassee circuits with Senate district office configurations (one of each CPE solution, satellite and district) for development and testing

e. 120 House district offices including managed CPE for minimum 8 LAN ports and one WAN port, including management and support of the extended wiring as needed in each office. Each office must be equipped with VoIP failover to a PSTN.

f. Approximately 10 House satellite offices including managed CPE for minimum 4 LAN ports and one WAN port, including management and support of the extended wiring as needed in each office. Each office must be equipped with VoIP failover to a PSTN.

g. 2 Tallahassee circuits with House district office configurations (one of each CPE solution, satellite and district) for development and testing

EarthLink Business will comply.

3.1.2 Respondents will provide two unfiltered Internet service connections of at least 45Mbps – one physically located in the OLITS-managed Data Center and one in the House OIT-managed Data Center. The OLITS-managed Internet service must peer with OLITS BGP switches to accommodate failover between Internet service providers. The House-managed Internet service must peer with House BGP switches to accommodate failover between Internet service providers.

In addition the Legislature requests the **option** to add a managed Intrusion Prevention/ Intrusion Detection System (IPS/IDS) to the House OIT-managed internet circuit.

EarthLink Business will comply.

Earthlink Business does support BGP for failover. A private AS number can be used if all Internet Circuits terminate on the Earthlink Business network. Additionally, we offer a cloud-based product for IPS/IDS protection.

### 3.2 Managed MPLS VPN Design Requirements

The Legislature is seeking responses for a secure, Managed MPLS IP VPN and highly available Internet access service from **a Primary Multi-Protocol Label Switching (MPLS) Provider or any State of Florida Agency Contract offering for Managed MPLS Service.** The Managed MPLS VPN should enable legislative users to enjoy economical and reliable network access regardless of location and to expand secure remote access to staff. Implementation of network technology should help limit future cost growth for the network services needed to support mission-critical business requirements.
The Managed MPLS VPN will provide for data, video streaming and VOIP in its initial deployment, but will be positioned to include video conferencing and other possible services including WAN optimization technology.

At a minimum, the Managed MPLS VPN will include the OLITS managed devices (40 Senate District Offices, approximately 10 Senate Satellite Offices, 1 Tallahassee connection and 2 simulated district offices). Additionally, the 120 House District Offices, approximately 10 Satellite Offices, and the Tallahassee connections, may be included.

The managed solution will include the following.

- Fully managed end-to-end service with Service Level Agreements (SLAs). The respondent is required to manage and maintain all circuit wiring and equipment up to and including the LAN equipment. LAN wiring, that is the wiring from the CPE to the end user's device, is not part of the end-to-end service.
- Legislative district office connectivity: Four (4) bandwidth options are being requested for the district offices and must be provided by Respondents. The Legislature will evaluate all four (4) bandwidth options and reserves the right to select a bandwidth option that provides the performance required to meet business needs and is fiscally prudent. The Legislature will evaluate and select one or more of the bandwidth options. For each bandwidth option the Respondent's bandwidth must come as close as possible to the bandwidth options listed below.

  Option 1: minimum 512Kbps
  Option 2: minimum 1.5Mbps
  Option 3: minimum 3Mbps
  Option 4: minimum 6Mbps

  Dedicated circuits are preferred, however, other circuit types (Frame Relay, Digital Subscriber Line, etc.) providing the same bandwidth and quality features will be considered.
- Managed MPLS VPN technology must allow the use of Classes of Service to facilitate rationing and prioritizing bandwidth to best serve mission-critical applications.
- Managed security and resiliency to include VoIP failover to a PSTN

- Respondent-managed Customer Premise Equipment which includes for Senate districts one WAN port for uplink and 16 LAN ports for intra-office connectivity and Satellite offices may have one WAN and 8 LAN ports. For House districts the CPE must include one WAN port for uplink and 8 LAN ports for intra-office connectivity, House satellite office will require one WAN port and 4 LAN ports.

The Managed MPLS VPN should serve these legislative business requirements for more bandwidth for business-critical applications, provide the foundation for secure data, video, and voice communications, and provide a reliable and flexible core network.

The Legislature desires to achieve the advantages and practicality of Managed MPLS IP VPN to provide higher reliability through the ability to re-route around failed network nodes. The Managed MPLS VPN technology employed must allow the use of Classes of Service that should facilitate rationing and prioritizing bandwidth to best serve mission-critical applications.
The Managed MPLS VPN solution should allow for reliable, high-bandwidth connections to all district and satellite offices regardless of their geographical location. The Managed MPLS VPN network will also need to support the delivery of mobile solutions and secure remote network access.

EarthLink Business will comply.

### 3.2.1 Managed MPLS VPN Core Functionality

The Legislature requires that MPLS be a core technology of the proposed network. Respondent must describe their Managed MPLS VPN network in enough detail for the Legislature to evaluate the characteristics of the Respondent's network. Include the following:

3.2.1.1 Managed and Dynamic MPLS VPN Routing ***[Mandatory - Respondent must confirm compliance]*** The Legislature requires a core network that supports the Multi-Protocol Label Switching routing protocol.

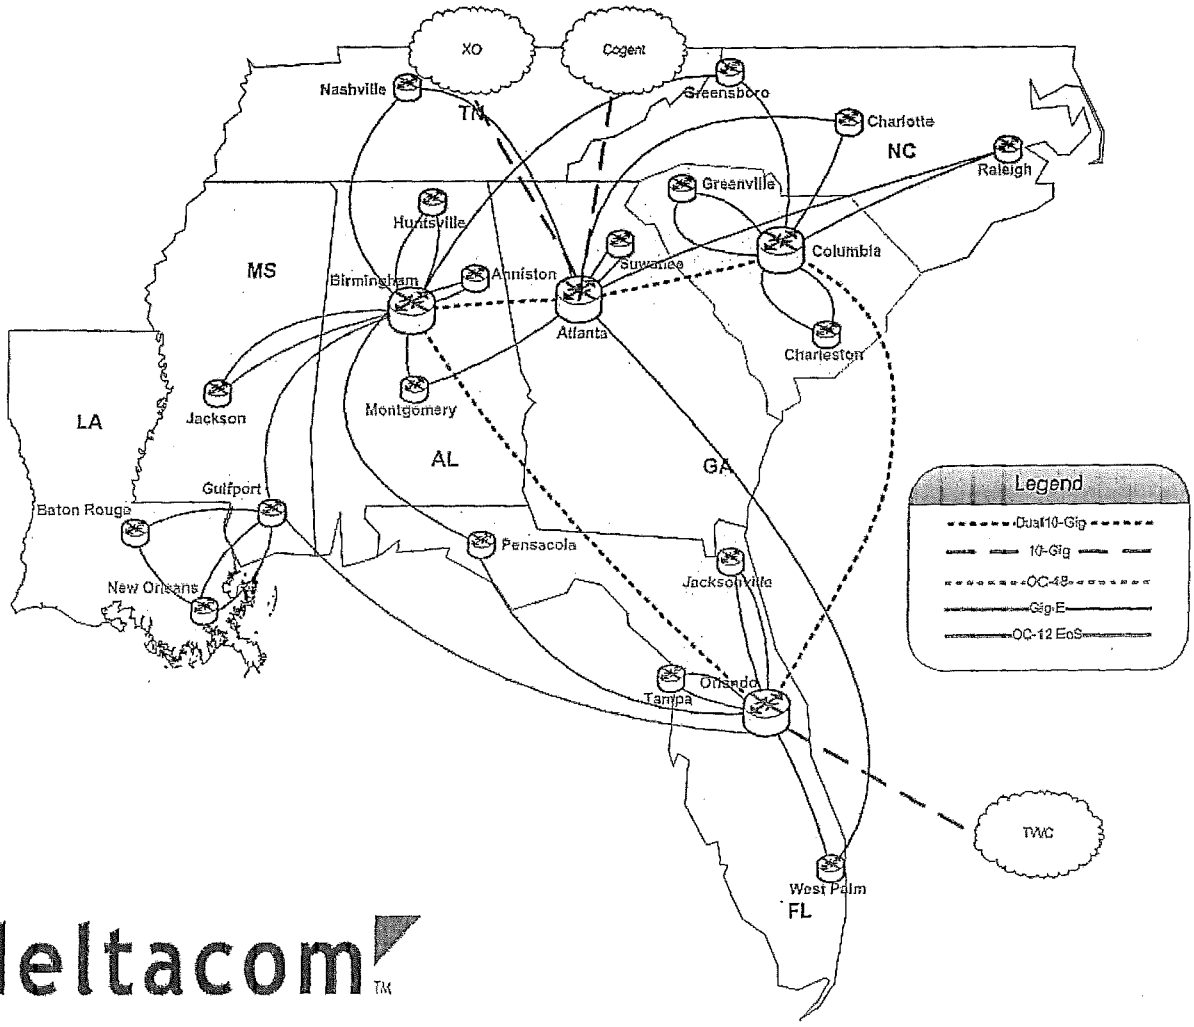
EarthLink Business will comply.

**Core Network: Describe the following:**

- Core/backbone with a drawing including any aggregation services.

  The core backbone consists of Cisco CRS-1's with a Dual 10Gig ring overlaying the Infinera DWDM network. This network consists of OSPF, BGP, and MPLS LDP for label distribution. Every remote POP is connected back to the network via a separate core router providing network diversity/resiliency.

Network Overview



deltacom™

- Access circuit options.

  Earthlink Business can provide T1/DS3 and Ethernet access.

- Location of Point of Presence (POP) that will serve this network.

  Refer to Diagram Network Overview

- Class of switches in the POPs.

  Carrier class Cisco 7609 routers with dual processor/dual power supplies and dual redundant Ethernet uplinks

- Network strategic plan for the next three years, including roadmap of when new product/services will be implemented.

  Over the next 3- 5 years, EarthLink Business will be growing the network with focus on strengthening nationwide data management and delivery capability (anytime, anywhere). This will include high capacity and operational efficiency with low latency and high security. EarthLink Business will continue to build on its current capability as a market leader in select managed services (VoIP, security, hosting, etc.).

Additionally, EarthLink Business will leverage its position as a nationally recognized managed services partner for multi-location regional and national accounts including improved control and simplicity for cloud services. This includes integrated, end-to-end solutions that cannot be easily replicated and a comprehensive management portal.

The following categories highlight the product sets that will be deployed to meet these objectives:

Voice: Nationwide IP-Based Local and Long Distance Voice

Data: Nationwide MPLS Data Network with Multiple Class of Service, supporting voice, data and video (wireless, xdsl, T-1 to Ethernet)

Security: The security opportunity will range from physical security to hardware to consulting to hosted security services.

Value Added Services: A Competitive Suite of Value Added Services from Phone Systems to Online Faxing to Disaster Recovery to Managed CPE

Virtualization / Application Exchange: Building value and increased margins through applications to reduce customer total cost of ownership

Customer Portal: A single, integrated customer portal

Mobile: Bundling both mobile voice and mobile data solutions with landline offerings for primary and back up service

EarthLink Business would be more than willing to meet with the State of FL OLITS to communicate a detailed network and product roadmap plan at the convenience of the State.

3.2.1.2 Non Standard-Based Services: the Legislature desires that the provisioning of services and related options will be handled by the Respondent resulting in a standard, routed, IP only enterprise environment. Describe and explicitly identify all non-standards-based services to be used to provide Managed MPLS VPN services.

All protocols used are standards based.

### 3.2.2 Connectivity

3.2.2.1 Statewide connectivity: ***[Mandatory - Respondent must confirm compliance]*** The Legislature requires connectivity throughout the State of Florida to

conduct its business. The Managed MPLS VPN core network must provide for the connectivity needs of all currently existing sites as listed in Appendix A.

EarthLink Business will comply.

3.2.2.2 Future Statewide Connectivity: The Legislature desires to ensure that the most cost effective access solutions are used for future connectivity to the Managed MPLS VPN network. Future needs will include new service addresses.
These sites will exist in rural as well as metro areas. Respondent should be prepared to connect these sites in an affordable manner. Responses must include a strategy to address these concerns.

EarthLink Business will comply.

To provide connectivity to these locations, the most cost effective access loop will be selected that meets the needs of the State of Florida Legislature. These loops include, but are not limited to, DS1s and native Ethernet.

### 3.2.3 High Availability and Reliability

The Legislature desires that the Managed MPLS VPN core network have High Availability to properly support its business requirements. Define the strategy and architecture for providing High Availability within the Respondent's core network to include distinguishing features and capabilities for proposed services.

The current Earthlink Business infrastructure is using carrier Cisco CRS-1's/7609's with redundant power supplies/dual processors/dual uplinks. The routers are running OSPF with LDP to support rapid failover in the case of any failure. The protocols do support non-stop forwarding and the capability is implemented.

EarthLink Business employs a fundamental engineering philosophy where all COs and POPs are served by dual entrance facilities that are geographically diverse from each other. Redundant power and backup systems are provided via diesel generators and batteries. All backup power systems are routinely verified on a monthly basis. Additionally, the EarthLink Business transport network is SONET protected between POPs and COs.

### 3.2.4 Quality of Service (QoS)

Quality of Service: It is important that critical applications receive SLA contracted resources across the network, despite varying network traffic loads.

3.2.4.1 QoS Functionality: ***[Mandatory – Respondent must confirm compliance]***
The Legislature requires end-to-end IP QoS features to preferentially handle traffic as one of the network's fundamental design philosophies to accomplish the task of managing resources within the core. The network must be able to prioritize traffic by tagging packets in order to utilize multiple queues for voice, video and other mission critical applications and to segregate such traffic from other traffic types that are more delay-tolerant.

EarthLink Business will comply.

Up to 6 classes are services are supported however they all do not have to be used. This includes 1 LLQ with weighted fair queues.

3.2.4.2 Non-standard QoS Services: Describe any QoS functionality that is unique to the Respondent's Managed MPLS VPN network that is not based on industry standards.

EarthLink Business only employs standards based functionality.

### 3.2.5 Class of Service (CoS)

3.2.5.1 CoS Functionality: ***[Mandatory – Respondent must confirm compliance]*** MPLS Class of Service forwarding is required to be able to classify different types of traffic based on traffic filters, input interface, either DSCP or CoS values, MPLS labels, or any IP traffic pattern. Confirm Respondent's compliance with this mandatory and define how the Respondent's Managed MPLS VPN network classifies different types of traffic.

EarthLink Business will comply.

Earthlink Business supports marked packets via DSCP etc or can match and mark traffic based on a customers requirements such as protocol/port.

3.2.5.2 Forwarding Equivalence Classes (FEC): ***[Mandatory – Respondent must confirm compliance]*** Minimum of four (FEC) are required. Respondent should describe the Respondent's FEC classes.

EarthLink Business will comply.

Earthlink Business supports up to 6 classes of service. There is a class of service for real-time, near real-time, mission critical, business critical, business, and best effort traffic.

### 3.2.6 Bandwidth Increases

The Legislature desires the capability of obtaining increases in bandwidth within a short timeframe. Beyond the logical service of altering CIR values, describe the technical features of the proposed Managed MPLS VPN that will provide for the bandwidth of specific Service Addresses to be increased within a few days. For example:

- The Respondent could participate with the Legislature's staff working to anticipate where additional bandwidth needs will develop.
- The Respondent could install high capacity Access Circuits and offer a reduction in monthly fees for unused capacity.

EarthLink Business will continually monitor the OLITS and OIT networks. During the monthly service reviews, the EarthLink Business support team will provide utilization reports and recommendations.

The timeframe required to upgrade services will depend on the bandwidth required and the access that is currently provisioned. For locations provisioned with DS1 access services, 30 days will be required to add additional DS1s. For locations upgrading to native Ethernet from DS1, 90 to 120 days will be required. However, for locations with native Ethernet services, upgrades can be accommodated in as little as 30 days.

### 3.2.7 Burst Capacity and Bursty Traffic

The Legislature will size circuits appropriately to provide the most cost effective transport based on the business needs of the service address. However, occasional bursty traffic must be accommodated. Respondent should describe its strategy for supplying and managing burst capacity on a circuit.

At this time Earthlink Business does not offer a burstable guaranteed service, but we will work with OLITS and OIT to design a solution that meets the needs of the applications deployed.

### 3.2.8 Traffic Engineering

3.2.8.1 Fault-Tolerance: *[Mandatory – Respondent must confirm compliance]* The Legislature requires fault-tolerance in the core network and for the Legislature's web services such as might be provided by backup tunnels. Respondent must describe its approach to fault-tolerance.

Fault-Tolerance must also include rerouting and load balancing the Legislature's public web services to a secondary Internet circuit should the primary Internet circuit fail or become overwhelmed.

EarthLink Business will comply.

Load balancing can be supported if both access circuits are purchased from Earthlink Business and provisioned off the same PE router and CPE router. However this approach removes all hardware redundancy. A non-load balanced fault tolerant approach can utilize multiple diverse loops provisioned between separate POPs and different CPE. Upon award, our engineers will design the best solution to meet the needs of OLITS and OIT.

3.2.8.2 Traffic Rerouting: [*Mandatory - Respondent must confirm compliance.*] The Legislature requires dynamic routing protocols for all district offices and the capability to automatically reroute traffic in the event transport troubles are detected. Describe the procedures to initiate automatic rerouting. Include any manual procedures. Describe rerouting actions; explain which transport facility has priority over others and who can in practice initiate manual rerouting of the Managed MPLS VPN.

Discuss the Legislature's role in this area including how the Legislature is notified when rerouting occurs.

EarthLink Business will comply.

Procedures for triggering automatic re-routing are based on routing tables in the network. The only time a manual procedure is used is during a maintenance procedure where EarthLink desires total control over the re-routing. If a transport facility fails, traffic re-routes automatically. If customers desire to manually re-route to a specific facility, a trouble ticket is required. Customers are notified immediately by phone and email in the event of a facility outage, at which point the customer can determine if re-routing is necessary.

3.2.8.3 Emergency Traffic Rerouting Notification: The Legislature desires prompt notification when rerouting occurs in the Managed MPLS VPN core network; especially if the rerouting directs the Legislature's traffic to an alternate POP. Describe the proposed tools or procedures for this.

We do not send notifications on reroutes today unless they will be performed manually. However, customers are notified immediately by phone and email in the event of a facility outage, at which point the customer can determine if rerouting is necessary.

### 3.2.9 Multimedia

The Managed MPLS VPN solution must accommodate the connectivity, transmission and convergence of voice, video, and data application traffic.

3.2.9.1 Signaling Protocols: ***[Mandatory – Respondent must confirm compliance]*** The Legislature requires that the proposed solution support signaling protocols including but not limited to the most currently approved versions of Session Initiation Protocol (SIP), H.323, H.264, Media Gateway Control Protocol (MGCP), and H.248/Megaco. SIP and H.323 use RTP to transport real-time transmission of multimedia data over network services. Real Time Protocol (RTP), Real Time Control Protocol (RTCP), and Real Time Streaming Protocol (RTSP) transport and manage the real-time transmission of multimedia data over network services. List the protocols Respondent intends to support. List and describe any non-standard protocols or extensions.

EarthLink Business will comply.

Earthlink Business supports the routing of unicast IPv4 packets. All protocols within IPv4 are supported.

3.2.9.2 Multicast: The Legislature highly desires the capability to use IP Multicast as a technique to provide various network-based services. Describe Respondent's capability.

At this time, multicast is currently not an offered feature, but we will work with OLITS and OIT to design a solution that meets the needs of the applications being deployed.

### 3.2.10 Voice

3.2.10.1 CODECs: ***[Mandatory – Respondent must confirm compliance]*** In order to support the Legislature, the network solution is required to support standard CODECs. Standard compression/decompression (CODEC) techniques, with their respective mean opinion scores (MOS), include but are not limited to G.711 – 4.3 MOS, G.729 – 4.0 MOS, G.723 3.8 MOS and h.264. What CODECs does Respondent's solution support? Responses should include descriptions of any non-standard protocols or extensions.

EarthLink Business will comply.

EarthLink Business supports all protocols routed within IPv4 packets. This includes those mentioned above.

3.2.10.2 Voice over IP: ***[Mandatory - Respondent must confirm compliance]*** The Legislature requires allowing telephony and other audio signals to be transported over the same network as regular data traffic. Describe how the proposed solution supports a VoIP solution. Include information regarding the support of both a network based or premise based solution and the risks and benefits of each approach.

EarthLink Business will comply.

EarthLink Business supports all protocols routed within IPv4 packets. This includes those mentioned above. Since OLITS and OIT will be utilizing Cisco Call managers and providing their own VoIP services, the proposed solution is focused on providing flawless and high availability trasport for those services.

3.2.10.3 Least-cost Routing: ***[Mandatory - Respondent must confirm compliance]*** The Legislature requires utilization of least cost routing. Describe the approach for implementing this feature.

EarthLink Business will comply as directed by the Q&A released on 3/18/2011 where this was deemed not a requirement.

3.2.10.4 QoS and DiffServ Signaling: ***[Mandatory – Respondent must confirm compliance]*** IP by itself is simply a best-effort service, not sufficient enough to provide the strict delay, jitter, and bandwidth guarantees required for voice over IP (VoIP) and other real-time traffic. The Legislature requires that the proposed solution support a standards-based QoS or DiffServ aware TE signaling mechanism when making forwarding decisions for passing VoIP traffic through tunnels. Respondent must describe the method for QoS or DiffServ TE signaling for VoIP traffic.

EarthLink Business will comply.

EarthLink Business applies standard based QoS on a per-hop behavior matching against EXP, DSCP, and TOS providing a low-latency queue controlling delay, jitter, and guaranteed bandwidth for applications such as voice and video.

3.2.10.5 VoIP Phone Failover to PSTN: ***[Mandatory - Respondent must confirm compliance]*** In the event of a WAN circuit failure, the Customer Premise Equipment is required to failover to the publically switched telephone network.

EarthLink Business will comply.

### 3.2.11 Access Circuits

3.2.11.1 Access Circuit Services: ***[Mandatory - Respondent must confirm compliance]*** The local access connection between the customer premise equipment and the Respondent's Point of Presence (POP) is required to use generally and commercially available transport services. Preference should be given to open, secure, scalable, industry-standards-based, packetized services, such as SONET, Frame Relay, ATM and others, providing end-to-end QoS capable of transporting voice, video, and data applications within a converged media stream. TDM-based transport services, such as T1 digital carrier, ISDN, DSL, etc., are acceptable with sufficient SLA's.

EarthLink Business will comply.

3.2.11.2 Access Circuits: ***[Mandatory - Respondent must confirm compliance]*** The Legislature requires that the Respondent supply the most economical physical Access Circuits that meet the service level and bandwidth requirements of the individual service address. Describe the strategy for providing the most economical accessibility while meeting Service Level Agreements (SLA).

EarthLink Business will comply.

EarthLink will provision services over DS1, DS3 and native Ethernet facilities as provided by the ILEC that services the location. Only the access type which meets the application needs of the location will be selected.

3.2.11.3 Availability: ***[Mandatory - Respondent must confirm compliance]*** The Legislature requires the ability to choose Access Circuit Availability per the business requirements of each service address. Using the spreadsheet located in Appendix C, list each Access Circuit type Respondent proposes with its accompanying bandwidth, Availability, Latency, Jitter, MTTR, and Installation.

EarthLink Business will comply.

3.2.11.4 Bandwidth: ***[Mandatory - Respondent must confirm compliance]*** The Respondent is required to specify the various types of access services offered including the bandwidth increments and ranges. Clearly define the various types of access services offered including the bandwidth increments and ranges.

EarthLink Business will comply.

### 3.2.12 Disaster Recovery

Loss of Data Center: In the event of a loss of either the OLITS-managed or House OIT managed Data Center, Access Circuits are desired to be provisioned in a manner that will allow the Legislature or the Respondent to swing circuits to an alternate, as yet undefined, location (Service Address, Data Center). Describe Respondent's strategy for providing connectivity to the alternate site in such an emergency. This includes provision for the rapid establishment or upgrade of Access Circuits to one or more alternate locations, and rapid establishment of temporary network service.

EarthLink Business recommends that the State of Florida pre-order access services to the alternate data center so that the services remain in an active-standby mode. This will allow periodic testing of all failover capabilities.

### 3.2.13 Internet Access

3.2.13.1 Internet Access (Internal User Access): ***[Mandatory - Respondent must confirm compliance]*** The Legislature requires secure Internet access for all sites connected to its Managed MPLS VPN network including Tallahassee Capitol Complex. Respondent must describe the strategy for providing access to the Internet. OLITS will provide for and manage the gateway to the OLITS-managed Internet. House OIT will provide for and manage the gateway to the internet for the House OIT-managed Network.

EarthLink Business will comply.

DS-3's will be delivered to the customer premises for those locations requiring greater than 9mbs for bandwidth. The State of Florida may choose to maintain and manage their own premise based firewall or EarthLink Business can provide a cloud based firewall solution using Fortinet.

3.2.13.2 Alternate Internet Access: ***[Mandatory - Respondent must confirm compliance]*** In order to provide protection against failures and emergencies, and to ensure business continuity, the Legislature requires Internet connections be fault tolerant and available. Respondent should identify configuration options to increase the resiliency of the Internet access services with preferably an alternate Internet backbone from a separate Internet Service Provider.

EarthLink Business will comply.

BGP can be used to protect network reachability in the case of circuit failure. Earthlink peers with multiple transit providers to automatically re-route in the case of failure to another upstream provider.

3.2.13.3 IPS/IDS: The Legislature desires an option for separate Managed IPS/IDS solutions for the House OIT managed Internet circuit. Respondent must describe the strategy for performing all management and maintenance of the IPS/IDS including:

- Signature tuning
- Signature updates
- Configuration changes
- Security event monitoring
- Performance and availability management

Signature tuning: EarthLink Business will distribute new signature files from a staging router to production routers via an automated process.

Signature updates: Updates are provided in near real-time, 24x7x365. This is an automated process, with updates being pushed by Fortinet.

Configuration changes: Changes are controlled with a process requiring a customer initiated change-order. That order is reviewed by our security staff and approved or modified. Then the change is implemented based on a mutually agreeable schedule. Configurations are performed by a distributed management system that offers revision control, validation, and change monitoring.

Security event monitoring: Event monitoring is primarily via standard reports and critical events can generate real-time notifications. These notifications are customizable and can be negotiated on an individual case basis.

Performance and availability management: The security service is provided by redundant, geographically diverse systems. These include redundant security appliances, connectivity, management, and reporting.

### 3.2.14 Network Security

The physical security of network components (such as buildings, power services, continuity of operations, etc.) and the security of the information that will traverse the network is a prime concern and must be defined as part of this Response.

3.2.14.1 Security Threats: ***[Mandatory - Respondent must confirm compliance]*** The Respondent is required to work with the Legislature to address security threats. This includes threat mitigation and event correlation and access to tools and reports to aid the Legislature in monitoring and tracing security threats. This also includes providing support for forensic investigation and incident response procedures in the event of malicious network activity. Describe how this will be addressed.

EarthLink Business will comply.

Utilizing the Equinox fraud system and other tools, EarthLink Business will be able to provide reporting and traces in the event that there is a security breach.

Further details of the EarthLink security procedures can be discussed during a meeting between the State of Florida security team and our security engineers at the convenience of the State of Florida.

3.2.14.2 Security Threats CPE: ***[Mandatory - Respondent must confirm compliance]*** The Respondent is required to work with the Legislature to address security threats at the CPE port level. This includes authentication, authorization and accounting of end devices/users. Describe how this will be addressed.

EarthLink Business will comply. EarthLink Business will work directly with the State of Florida to establish processes and procedures around access to managed CPE.

## 3.3 Managed MPLS VPN Management and Monitoring

### 3.3. 1 Evolving and Emerging Technologies

3.3.1.1 Evolving and Emerging Technologies: The Legislature requests that the Respondent have a method for incorporating evolving and emerging technologies. A Technology Plan is one method of achieving this goal. Describe how evolving and emerging technologies are addressed and the approach taken to incorporate changes into the overall Managed MPLS VPN architecture.

Earthlink Business continually evaluates new technologies for inclusion in its MPLS product offering. For a new technology to be included in the MPLS product it must be standards based and provide an improvement or expansion of product features and reliability. All new technologies are first proven in a lab environment and then deployed for beta testing before finally being deployed into the product network for general availability

### 3.3.2 Ongoing Technology Refresh *[Mandatory - Respondent must confirm compliance]*

The Legislature requires a partnership that is committed to meeting newly defined service needs and technological advances within advantageous timeframes and within a framework of cost effectiveness. The Legislature requires that the CPE and all components that make up the WAN service be replaced within 3 months of the manufacturer's end of support date. The Legislature intends that the installed CPE be neither state of the art nor fully mature or outdated.

EarthLink Business will comply.

An inventory of all CPE deployed and managed will be maintained. 120 days prior to the manufacturer end of support date for any deployed CPE, EarthLink Business will coordinate and dispatch technicians to physically replace affected CPE.

3.3.2.1 Technology Refresh: ***[Mandatory - Respondent must confirm compliance]*** Describe how technology refresh will be addressed in support of the Managed MPLS VPN for data, VoIP, multimedia services and CPE managed by Respondent. Include hardware upgrades or replacement, modifications to CPE IOS, modifications to routers and switches that support the Managed MPLS VPN.

EarthLink Business will comply.

Technology refreshes are handled by our Enterprise support team or an automated update from our server, which occur during off-peak hours (12 a.m. to 6 a.m.). Hardware upgrades would be ordered through the dedicated Enterprise account team.

3.3.2.2 Security Technology Refresh: ***[Mandatory - Respondent must confirm compliance]*** The Legislature requires that the Respondent manage and operate within manufacturers' security requirements across the entire Managed MPLS VPN for the life of the contract. Describe management of the Managed MPLS VPN from a security refresh standpoint.

EarthLink Business will comply.

Refer to procedure described in 3.3.2.1.

3.3.2.3 Competitive Market Refresh: ***[Mandatory – Respondent must confirm compliance]*** The Legislature requires that the cost, rates and terms offered to the Legislature during the contract term remains competitive with the cost, rates and terms offered in the market. Describe how Respondent will keep cost, rates and terms competitive.

EarthLink Business will comply.

Annually, at the anniversary of the Effective Date and at the request of the State of Florida OLITS, EarthLink Business and the State of FL OLITS will meet to review the cost, rates and terms. Acting in good faith, the parties will seek to determine whether market changes to the current contracted cost, rates, and terms are appropriate in light of then-current service alternatives and pricing available from EarthLink Business in the market place for similarly situated customers and services. "Similarly-situated customers" shall mean EarthLink Business' National Accounts customers that purchase like-kind services in the same market locations with substantially similar traffic patterns, usage volumes, financial commitment and other terms and conditions.

### 3.3.3 Operational Planning

Operational Planning: The Respondent should facilitate a forum that includes the Legislature when planning for routine maintenance outages, CPE upgrades, changes to Managed MPLS VPN Access Circuits, required technology refreshes and intrusive troubleshooting and testing. Describe procedures used for each and how the Legislature will be incorporated into the planning process. Address the planning process for proactive and preventive maintenance programs.

Proactive Maintenance Planning:
Prior to any proactive maintenance activity, whether on customer CPE or core network elements, EarthLink Business engineers conduct extensive lab testing and consultations with the hardware vendor. Real world scenarios are duplicated in our lab in Anniston, AL and then the maintenance activity is performed and the effects are stress tested. Once approved, customers are notified of the planned activity.

Maintenance within the EarthLink Business Infrastructure:

The EarthLink Business Change Management Team will contact OLITS and OIT prior to any mainteance occurring. This notification will include:

Date & time of maintenance
Activity to be performed
Services and circuits affected
Contact information

Maintenance affecting CPE:
The EarthLink Business support team will contact OLITS and OT prior to any activity that affects the CPE. Large scale CPE changes, including IOS upgrades and technology refreshes, will be treated as a project with a project manager and a project plan developed in conjunction with OLITS and OIT.

Intrusive Troubleshooing:
It is EarthLink's policy not to perform any intrusive troubleshooting on an active circuit until the customer has provided written approval.

### 3.3.4 Monthly Service and SLA Reviews

Monthly Service and SLA Reviews: The Legislature desires the Respondent to participate in monthly (and to be agreed upon later bi-monthly) service and SLA reviews with the Legislature. Describe the process and methodology to include future changes that will impact the proposed Managed MPLS VPN network.

The EarthLink Business National Accounts Support Team conducts monthly service and SLA reviews with customers.

### 3.3.5 Respondent's Help Desk and Operational Support

The Legislature is seeking technical assistance that is available around-the-clock to support the Managed MPLS VPN. This includes support for assisting the Legislature in resolving MPLS VPN network services issues.
The Legislature will operate level zero and one Help Desks and will require Respondent to operate the next level Help Desks which will support the Legislature. The Legislature will act as the liaison and will own the problem on behalf of legislative users.

3.3.5.1 Respondents' Help Desk: Describe the scope of help desk coverage offered to the Legislature's personnel and hours of operation for support of the Managed MPLS VPN. Include the type of assistance that would be extended to the Legislature for end-to-end network support, including connectivity and performance. Describe personnel qualifications and expertise that are offered in support of the technologies mentioned above, to include the various levels of Help Desk support for the Legislature such as Tier 1, Tier 2, Tier 3, and describe the services offered for each level of service.

EarthLink Business's Help Desk is available 24 hours a day, seven days a week year-round, with access to NOC and Engineering resources as needed. Customers can open a trouble ticket by phone or online. When a ticket is opened, the customer will speak with a technician, starting with physical testing on circuit problems. If the issue does not occur in the EarthLink Business network, EarthLink will generate a repair ticket

with the LEC, and we will work with their technicians to resolve the issue. Technicians also verify router configurations and can dispatch field technicians to repair equipment and verify voice and data configurations. State government and enterprise-level customers work with a designated support team and have their own dedicated hotline to call for support.

EarthLink Business maintains a staff of highly-qualified and specially-trained professionals in data and voice troubleshooting. Technicians are trained specifically for service to our network; they are trained by the equipment manufacturers and our in-house engineering team. Tier 3 data technicians possess Cisco certifications. Support levels are organized as follows:

- Tier 1 Level Service includes quick resolutions, such as configuration change, DNS record change, information requests.

- Tier 2 Level Service includes in-depth configuration and router troubleshooting, particularly with customers using customized usage configurations.

- Tier 3 Level Service includes higher-level issues that require additional research to determine solution that leans towards engineer-level support.

- DS3 Level Service is provided at the NOC level and includes circuit configuration troubleshooting.

3.3.5.2 Help Desk Integration: The Legislature desires Help Desk staff knowledgeable and familiar with our network and that functions logically within the overall Legislative Support Services team. A single call into the support service structure must cover questions concerning performance as well as typical end-to-end problem resolution. Requests for assistance could occur at any time day or night (24 hours a day, 7 days a week). Describe the approach for supporting this requirement.

EarthLink Business's Help Desk is staffed 24 hours a day, seven days a week year-round. Calls are routed directly to technicians with no intermediary between caller and technical staff.

3.3.5.3 Legislative Session Support: During legislative session, the importance of service availability is heightened and it is critical that resolutions to problems be handled with extreme expedience. What can the Respondent offer as a strategy for ensuring an appropriate support structure is in place to handle these unique periods?

Our standard Enterprise-level of support provides resolution for service availability. This support is available 24 hours per day with access to both tier 3 engineers and executive management. At any point during a critical outage, the State of Florida has the capability of contacting executive management or requesting escalation to the executive team.

### 3.3.6 Maintenance for Respondent-Managed CPE *[Mandatory – Respondent must confirm compliance]*

Maintenance for Respondent-Managed CPE: The Respondent is required to have maintenance policies and procedures regarding CPE that will be used in the delivery of the Managed MPLS VPN service. Describe the preventive maintenance routines, equipment swap-outs, the remove-repair-return procedures, and how activities are coordinated in advance with the Legislature. Identify available service levels and terms of coverage.

EarthLink Business will comply.

EarthLink Business handles preventive maintenance remotely, distributing periodic software updates to CPEs during off-peak hours. This approach ensures minimal disruption to customers' service.

EarthLink Business's approach utilizes regional depots for sparing. Equipment replacement occurs after troubleshooting. If equipment fails, a technician is dispatched to evaluate and replace on spot, as new equipment is carried on each maintenance truck.

Also, see response in section 3.3.3.

### 3.3.7 Configuration Management *[Mandatory – Respondent must confirm compliance]*

3.3.7.1 Configuration Management: ***[Mandatory - Respondent must confirm compliance]*** The Respondent is required to describe any system or application proposed for Configuration Management of Respondent-Managed CPE configurations. Describe how the systems and applications operate. Describe procedures and methodology associated with configuration management.

EarthLink will comply.

This is done with an automated process:

1. The server establishes a connection to the remote host. Generally this is done via telnet, but can also be done via ssh, http, https, depending on the capability and services running on the remote host.

2. Once the connection is established and the server successfully authenticates on the remote host; it runs the necessary commands to obtain the configuration of the host and then stores the configuration data in a buffer.

3. The configuration data is then validated by checking basic qualifiers such as an EOF marker and/or other methods to verify we have received all of the data needed.

4. The validated configuration data is then written to a MySQL database and verified that it was properly stored.

3.3.7.2 Configuration Records: ***[Mandatory - Respondent must confirm compliance]***The Legislature requires that current and accurate configuration records be kept for Managed MPLS VPN access and CPE managed by the Respondent at all locations found in Appendix A. Respondent must describe its approach to

maintaining these records and how access will be provided to these configuration records by the Legislature.

EarthLink Business will comply.

See 3.3.7 above.

3.3.7.3 Archiving Configuration Information: ***[Mandatory - Respondent must confirm compliance]*** The Legislature requires that all CPE configurations be archived on a regular basis. Describe the process and frequency proposed. Describe the policies affecting the retention periods and the depth of versions kept to include restoration testing. Clearly distinguish between transport and CPE configurations.

EarthLink Business will comply.

See 3.3.7 above.

3.3.7.4 Security Configuration Management: ***[Mandatory - Respondent must confirm compliance]*** The Respondent is required to describe its methodology and procedures to ensure the Managed MPLS VPN is kept current with security patches or upgrades.

EarthLink Business will comply.

The EarthLink Business National Accounts Support Team handles security patches and upgrades for CPEs, which occur during off-peak hours. After patches have been thoroughly tested and approved by both EarthLink engineers and customer engineers, they will be pushed to CPE on a schedule convenient to both the customer and EarthLink Business.

3.3.7.5 Rapid Modifications to Configurations: ***[Mandatory - Respondent must confirm compliance]*** The Respondent is required to describe the process and methodology for rapid modifications of configurations (rapid being within 5 minutes of notification). Address the time intervals required for change to occur for each type of configuration affected.

EarthLink Business will comply.

Modifications are handled through EarthLink Business's Help Desk. Upon authentication of caller, technician is able to modify configurations remotely within five minutes of call.

### 3.3.8 Monitoring

Monitoring: the Legislature desires around-the-clock monitoring of services for the Managed MPLS VPN. This includes operating a Network Operations Center (NOC), utilizing state-of-the-art monitoring tools, performing real-time analysis and diagnostics of accumulated traffic information and extending to the Legislature real-time access to these tools so that the Legislature is able to manage data, voice and multimedia Managed MPLS VPN services. Monitoring should be set up to allow

House OIT staff the ability to monitor House services and to allow OLITS staff the ability to monitor Senate and Joint services.

3.3.8.1 Respondent's NOC: The Respondent should provide and operate a network operations center (NOC) that performs network monitoring for the Managed MPLS VPN twenty-four hours a day, seven days per week. Describe the NOC that will be used and the type of activity the Legislature can expect from this NOC. Further identify which NOC will serve the Legislature and the Managed MPLS VPN. Describe how the Legislature's technical staff will communicate with Respondent's technical staff in the NOC, including telephone, e-mail, and other online contact. Identify which secondary NOC, if any, will be used as a backup.

EarthLink Business monitors the customer's network and CPE through Netcool, which is used for auto-ticketing and polling. The NOC is located in Anniston, Ala., and operates 24 hours a day, seven days a week. Communication with the NOC is available via phone and email, as well as chat through Deltaview. A secondary NOC is located in Birmingham, Ala.

All contact information, including e-mails and phone numbers, for escalation staff and executive management can be found in the Operations Document located in Appendix M.

3.3.8.2 Alarm and Alert Monitoring System or Application: ***[Mandatory - Respondent must confirm compliance]*** The Legislature requires that an alarm and alert system that receives, processes and displays alarms and alerts received from Access Circuits and hardware be used in the delivery of the Managed MPLS VPN. Respondent must describe in detail the system that will be utilized and how it will support the Legislature.

EarthLink Business will comply.

EarthLink Business employs the IBM Tivoli Netcool suite for alarm and alert monitoring. Calls are fielded by the Enterprise support group, which is staffed 24 hours a day, seven days a week year-round.

- Clearly identify the capabilities of the system for generating alarms and alerts. –

  With the Netcool suite, EarthLink Business monitors all network infrastructure, including DACS, muxes, switches, etc. The monitoring system will auto-generate a ticket to the support group, and will notify the customer via email. The support group will update the customer via phone and email with the status of their ticket.

- Provide examples of output from such system or application screen-shots.

| View_Stat | Last Occurrence | Node | Summary |
|---|---|---|---|
| Active | 3/14/2011 3:27:45 PM | ATLNGAFKCT0-19 | EQPT: 28 SCU Auto Upgrade on Module Failed |
| M-Parent | 3/14/2011 8:31:11 PM | PNSCFLBLO14 | T3: a-30 Line Error Seconds |
| Active | 3/14/2011 8:38:47 PM | RLGHNDKZ01A | DS1 G11 4: yellow |

- Describe policies and procedures that are followed to notify OLITS once major or catastrophic alarms/alerts are received. –

The customer will be notified by the support group via phone and email regarding a major alert. The Netcool suite is set up in an H-A pair in redundant locations, providing high availability of network monitoring.

- Describe the backup system if one exists. –

With the Netcool suite, the backup system is established in an H-A pair in redundant locations.

1) Viewing Alarms and Alerts: Describe what types of alarms and alerts are available for viewing and how and when they are generated.

   Alarm points are generated via ICMP, SNMP, ASCII and TL1 monitoring protocols, which are generated immediately upon impairment of the network.

2) Time Intervals: Identify time intervals Respondent has established that determine when an outage has occurred.

   EarthLink Business defines occurrence of an outage at fifteen minute intervals, at which point a ticket is generated.

3) Reaction to Alarms: Describe what immediate steps are taken once an alarm is received.

   For a physical layer, a ticket is generated, which is sent to the auto-tester to isolate the impairment. Results are reviewed by a technician, who will determine the next steps for fault isolation.

4) Recurring Events: Describe what procedures are in place to mitigate recurring events.

   If a customer has three tickets within thirty days , or upon customer request, the issue is escalated to the chronics group. Please see section 3.3.10.1 for further details.

5) Scope of Monitoring: Clearly identify, with examples, at what point in the transport architecture monitoring ends.

   The EarthLink managed CPE marks the demarcation point for monitoring.

   Examples:

"CPE fail" creates an event in our monitoring platform on a downstream device. This event would create an alert on the transport layer to auto generate a ticket in our ticketing system. This ticket will be auto tested and assigned to a support group. It will also generate an email to the customer.

"F2 cable pair is failure" or any equipment failure affecting the transport layer of the circuit – This event would create an alert on the transport layer to auto generate a ticket in our ticketing system. This ticket will be auto tested and assigned to a support group. It will also generate an email to the customer.

3.3.8.3 Performance and Error Monitoring of Managed MPLS VPN Access Circuits and CPE: The Legislature desires that the Respondent operate a real-time, modern performance and error monitoring system that will be used in the delivery of the Managed MPLS VPN.

- Describe in detail, the system provided and how it will be used to support the Legislature and the Managed MPLS VPN.

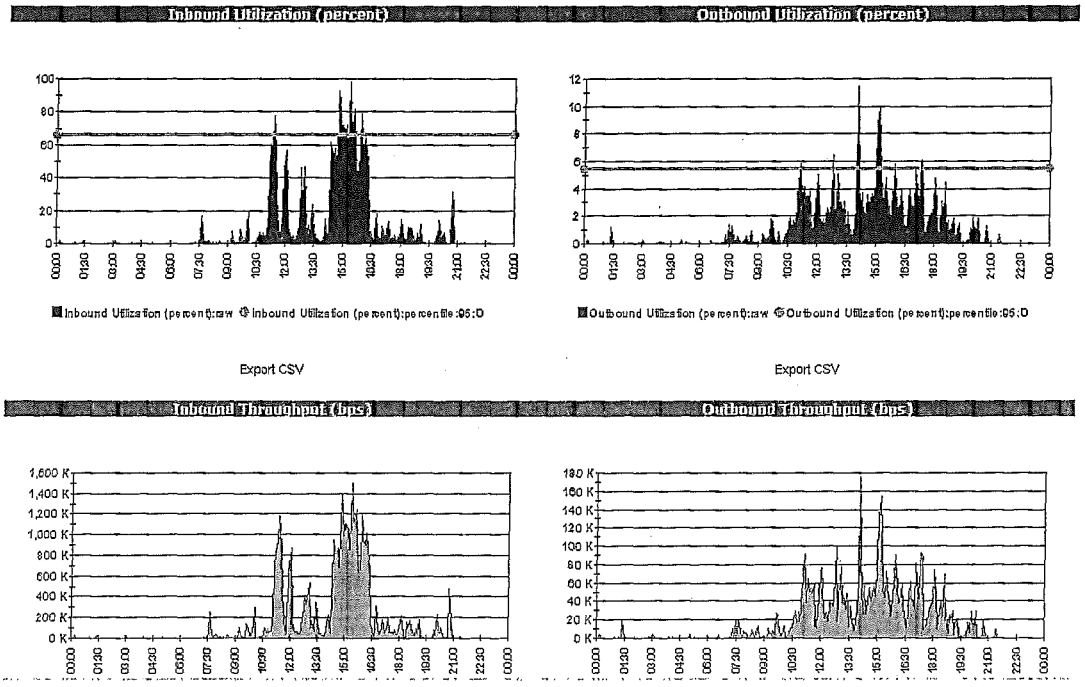
  EarthLink Business utilizes Netcool Proviso for its performance reporting tool. It is a carrier grade performance tool that is highly scalable with an oracle database backend. Performance statistics are real-time for bandwidth monitoring, trending, error statistics, baseline reporting, and Quality of Service "QoS" reporting to include maximum, average, minimum and percentile reporting. Reports are available on daily, weekly, monthly, quarterly, or yearly basis.

- Provide examples of output from such system or application screen-shots.

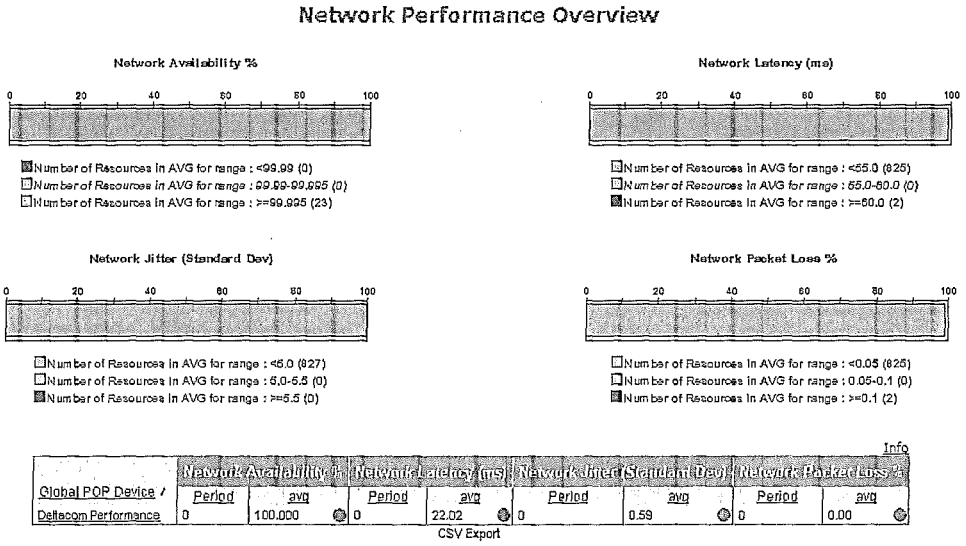
The below example is a sortable tabular view of all locations being monitored. From this point, each location may be clicked on to drill down and see detailed reports.

| Location | Speed | Inbound Utilization (percent) | | | Outbound Utilization (percent) | | | Inbound Throughput (bps) | | Outbound Throughput (bps) | |
|---|---|---|---|---|---|---|---|---|---|---|---|
| | | max | avg | 95% | max | avg | 95% | max | avg | max | avg |
| 115 OLD FORT RD W, FORT DEPOSIT AL | 1.54 Mbps | 78.59 | 6.80 | 28.34 | 21.68 | 5.53 | 16.27 | 1.21M | 104.78K | 335.54K | 85.05K |
| 475 GREENVILLE BYP, GREENVILLE AL | 1.54 Mbps | 23.36 | 3.71 | 12.13 | 25.87 | 3.25 | 10.37 | 358.61K | 57.06K | 397.43K | 49.97K |
| 40 LAFAYETTE ST, HAYNEVILLE AL | 1.54 Mbps | 97.99 | 7.33 | 56.21 | 10.89 | 1.19 | 3.78 | 1.51M | 113.96K | 166.20K | 18.31K |
| 17823 MONTGOMERY HWY, HIGHLAND HOME AL | 1.54 Mbps | 98.06 | 28.56 | 97.95 | 9.26 | 2.21 | 5.42 | 1.51M | 443.42K | 142.33K | 34.21K |

The following graphs are utilization graphs for an individual location.



The following graphs represent further details and statistics for an individual location.



- Describe policies and procedures that are followed to notify the Legislature once major or catastrophic performance issues are encountered.

  The customer will be notified by the support group via phone and email regarding a major or catastrophic alert. The support group will also provide timely updates to the customer.

1) Degradation of service: Identify specific types of performance information that is being evaluated and how degradation of service is determined.

Degradation of service occurs in varying ways that would affect different services that EarthLink Business offers. For MPLS networks, EarthLink Business has deployed Cisco SAA probes that measure Availability, Latency, Packet Loss, Jitter, DNS Queries, and MOS Scores across our MPLS Infrastructure to allow our NOC to detect possible issues in the network.

2) Reaction to Performance Issues: Identify the immediate steps that are taken once there is degradation of service or errors encountered and the procedures that are in place to address these events.

When a threshold has been breached, our NOC would be notified by a Netcool event. The NOC would take immediate action on the event to troubleshoot and resolve the issue.

3) Time Intervals: Define how long a problem must exist before it is reported.

For equipment failures or service affecting outages, the event would be reported immediately to the monitoring system. The NOC would take appropriate action on the event to include opening a trouble ticket, working the issue to resolution, provide timely updates, and drive escalations. Issues that are not service-affecting are addressed in a change management window only after the customer has been notified and given approval of the maintenance.

4) Problem Continuum: Identify what types of performance issues and errors are reported immediately and those that are monitored for a period of time.

EarthLink Business monitors its IP infrastructure for various types of performance issues. Any infrastructure interface down, CPU, memory alert would drive an immediate attention from the monitoring system to the NOC. Any infrastructure circuit that is utilized at greater than or equal to 85% for a period 15 minutes would create an event in the monitoring system. This necessarily does not create an outage for the customer, but would allow EarthLink Business to take proactive steps to prevent an over utilized interface.

5) Scope of Monitoring: Identify, with examples, at what point in the transport architecture monitoring ends.

The EarthLink managed CPE marks the demarcation point for monitoring.

3.3.8.4 Bandwidth Utilization and Exception Monitoring: the Legislature desires that the Respondent operates a real-time, modern bandwidth utilization and exception monitoring system that monitors bandwidth utilization and creates exception reports to be used in the management of the Managed MPLS VPN. Describe the system in

detail and how it will be used. Describe how the Legislature will be notified when exceptions have been encountered that impact service delivery.

The customer will be notified by the support group via phone and email regarding a major or catastrophic alert. The support group will also provide timely updates to the customer.

1) Traffic Usage by Technology-Type: Address specific performance monitoring criteria as it pertains to data, VoIP, and video bandwidth usage. Address each performance aspect individually, showing what is measured and how it is measured.

   The monitoring system supports class based Quality of Service "QoS" reporting. These measurements are taken by polling an interface for each DSCP bit marking for bandwidth monitoring of QoS policies to address data, VoIP, and video bandwidth utilization.

2) Polling Intervals: Identify polling intervals used for each technology-type.

   Monitoring system currently gathers information in real-time. Standard polling intervals are 5 minutes and can be modified depending on need.

3) Threshold Levels: Provide threshold levels observed for each technology-type including the latency time window adopted that generates an exception.

   The Monitoring system can support custom thresholds for over or under utilized bandwidth monitoring over a period of time. It also supports thresholds for bursting over an allotted threshold.

4) Time Interval: Define how long a problem must exist before it is reported.

   EarthLink Business has a fifteen minute interval on utilization thresholds that are not service affecting.

5) Problem Continuum: Identify the types of exceptions that are reported immediately and those that are monitored for a period of time.

   Any service affecting outage would be reported immediately while those that are deemed non-service affecting would be worked in an approved change management window.

3.3.8.5 Access to Alarm and Alert System or Application: ***[Mandatory – Respondent must confirm compliance]*** It is required that Internet-connected legislative information technology staff be able to access the alarm and alert system or application with a web browser. Identify any other needed hardware or software for access to the alarm and alert system or application. The alarm and alert system or

application should provide a graphical interface to the web browser. This system or application must support at least ten (10) concurrent authorized legislative information technology staff.

EarthLink will comply.

EarthLink Business provides Deltaview to all of its customers as an account management tool. This portal allows the customer to have access to billing, trouble tickets, order status, utilization reports, and other services that are applicable to the customer. The system is customizable in that it can be limited to what the user has access to in the portal by login or account number. This system is available by desktop or mobile web browser and supports at least ten concurrent users. It only requires the user to register and login with their user information.

3.3.8.6 Identification Options within Alarm and Alert System: ***[Mandatory – Respondent must confirm compliance]*** The Legislature requires to have the flexibility to view alarm and alert information by identifiers recognizable by the Legislature. Examples are Location Name; Circuit ID, and CPE name. Describe how the system offers this flexibility.

EarthLink Business will comply.

All circuits are named by the customer name and circuit ID. Identifiers within Proviso are customizable and can be renamed based on the customer's preference.

3.3.8.7 Alarm and Alert System or Application Training: ***[Mandatory – Respondent must confirm compliance]*** Training should be provided as to access and use of the alarm or alert system or application. Training must be provided for at least ten (10) legislative information technology staff. Describe the training.

EarthLink Business will comply.

The EarthLink account team dedicated to the State of Florida will provide customized and flexible training for all account management applications at a time that is convenient to the State.

3.3.8.8 Access to Performance and Error Monitoring of Managed MPLS VPN Access Circuits and CPE: The Legislature desires that their network engineers be able to access and view performance of the error monitoring system or application with a web browser. Identify any other needed hardware or software for access to performance and error monitoring system or application. The performance and error monitoring system or application should provide a graphical interface to the web browser. This system or application should support at least ten (10) concurrent authorized legislative information technology staff.

Access to performance and error monitoring is available to EarthLink Business customers through Deltaview and supports at least ten concurrent users. The portal has been tested for compatibility with Internet Explorer, Mozilla Firefox and Google Chrome web browsers, and the graphic interface is designed for viewing on any

software or hardware configuration. In addition, a mobile version displays when customers navigate to the portal through a mobile browser.

3.3.8.9 Identification Options within Performance and Error Monitoring System: The Legislature desires the flexibility to view performance and error monitoring information by identifiers recognizable by the Legislature. Examples are Location Name; Circuit ID and CPE name. Describe how the system offers this flexibility.

EarthLink Business's performance monitoring tool allows customizable options to be added to reports that are customer specific such as Location Name, Circuit ID, and CPE name. Custom properties can be added to interfaces or CPE to be displayed in the performance reports.

3.3.8.10 Monitoring Data Filtered: Is information contained in alarm and alert data or performance and error monitoring filtered before it will be disseminated to the Legislature? If yes, describe what is being filtered before it reaches the Legislature.

EarthLink Business allows the customer the same access as an internal user. The performance tool is integrated with the customer care portal which gives the customer the same access to the tool.

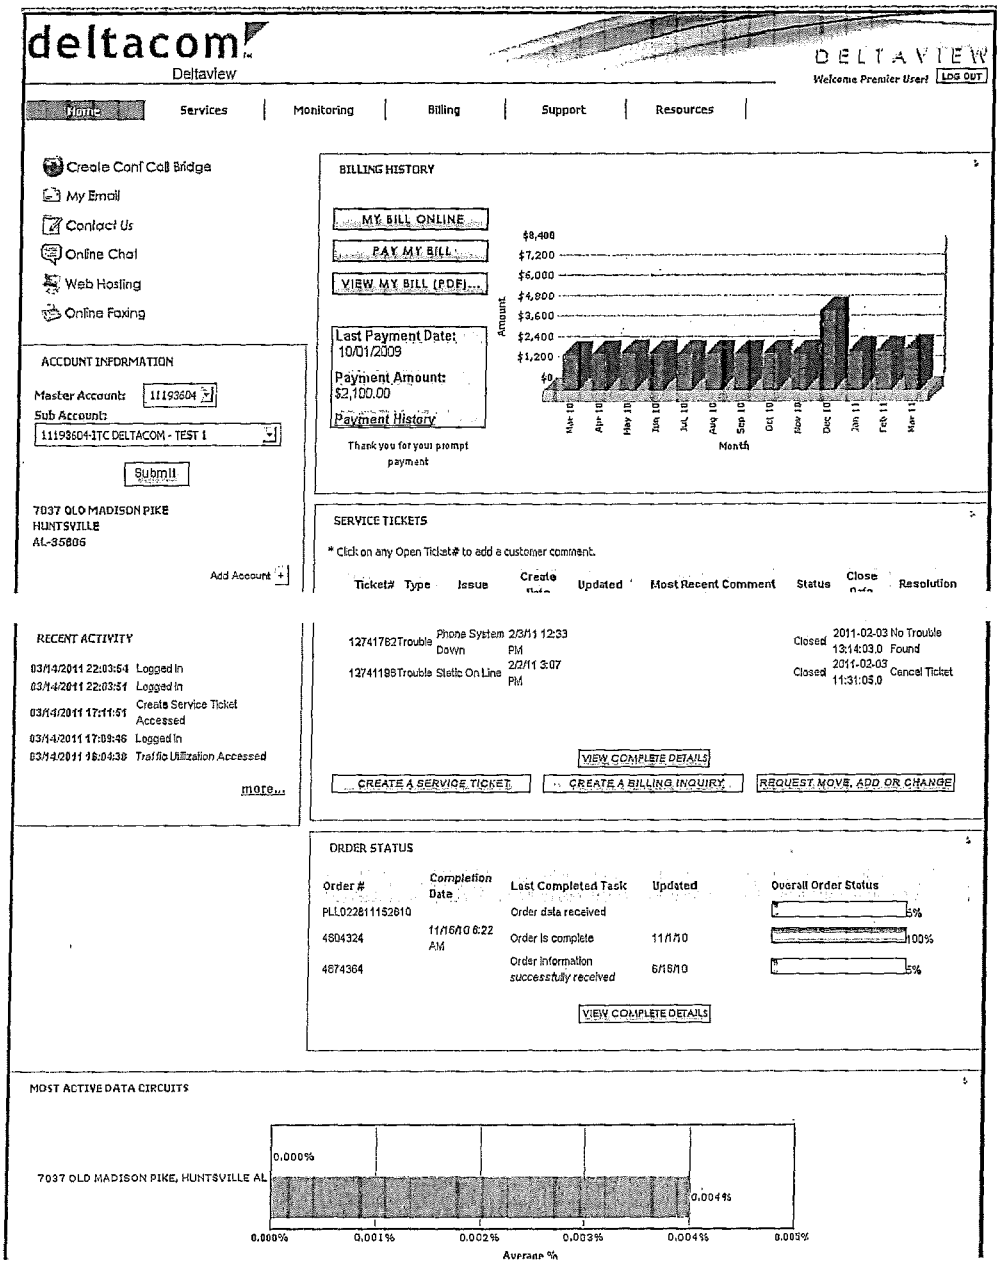
3.3.8.11 Extracting Information from CPE Owned and Managed by Respondent: The Legislature desires direct secure access to CPE hardware used in the delivery of the Managed MPLS VPN service. The Legislature would poll CPE and re-process that information on the Legislature's own network management system, ZenOss. Describe the Legislature's level of access, types of output, the frequency of polling allowed and the method allowed to poll data (SNMP, SNMPv2, SAA, etc.).

EarthLink Business will work with the Florida Legislature to provide the customer with a read only community string to the CPE to gather utilization statistics.

### 3.3.9 Reporting

3.3.9.1 Reporting: The Legislature desires web-browser access to online reporting as it pertains to performance of Managed MPLS VPN services. Examples of needed reports include alarms and alerts, threshold exceptions, user access, trend analysis, chronic Access Circuits or CPE, threat analysis, verification of traffic processing, etc. Describe the reports available and differentiate between reports that are scheduled and those that are available on demand. Provide example screenshots of the various reports and describe the Legislature's options with respect to viewing (GUI, text, diagrams, etc).

Reports generated by Netcool are provided to the customer through Deltaview. Deltaview is the front end web portal that customers use to access detailed data for individual locations. Deltaview provides access to billing information, network utilization and inventory management.



3.3.9.2 Report on Verification of Managed MPLS VPN Traffic Processing: The Respondent should provide the Legislature with verification that Managed MPLS VPN traffic is being processed at QoS and CoS levels prescribed by the Legislature. Provide screenshots of this report.

3.3.9.3 Proactive Monitoring on Managed MPLS VPN transport: Describe how the result of the event correlation analysis of the Managed MPLS VPN transport is utilized to prevent future service affecting events.

Every event or ticket generated is analyzed by highly trained NOC or support technicians for improvements in maintaining SLAs. The data from each event is collected and analyzed by other technicians and management to help prevent or reduce mean time to repair "MTTR" in the future.

3.3.9.4 Proactive Monitoring on CPE Managed by the Respondent: Describe how the result of the event correlation analysis of the Respondent managed CPE transport is utilized to prevent future service affecting events.

All event or ticket generation is analyzed by highly trained NOC or support technicians. The data from each event is collected and analyzed by other technicians and management to help prevent or reduce mean time to repair "MTTR" in the future.

3.3.9.5 Proactive Analysis: Describe how the Trouble Ticketing System is used in support of the Managed MPLS VPN. Describe if both transport and CPE Trouble Tickets are used in analysis.

Both mechanisms for "CPE" and "Transport" tickets are used to analyze and remedy any outages on the network. There are predetermined closure codes for each equipment type and device on the network in the ticketing system. The data is analyzed to see if there are certain types of devices, physical cards, or software codes that are responsible for outages and are used to drive business decisions on the network.

3.3.9.6 Degradation of Service: Describe how degradation tracking of Managed MPLS VPN Access Circuits is accomplished and examples of the types of Access Circuits tracked. Provide thresholds that trigger opening of a trouble ticket and provide remediation. Describe any variations of tracking as it pertains to data, VoIP and video.

EarthLink Business monitors performance thresholds on the network for access circuits. These thresholds are monitored by warnings generated from the equipment being monitored to our NOC center. The NOC would then create a trouble ticket and perform fault isolation. If the problem was service impairing, the NOC would take immediate actions. If the problem was non-service affecting, the NOC would schedule an approved change management window to remediate the issue. The customer would be notified of the change management window. This impairment could be related to voice, date, VoIP, or video applications.

### 3.3.10 Trouble Ticketing

The Legislature desires that the Respondent operate a Trouble Ticketing Function that includes an online system. The Trouble Ticketing Function must include processes and procedures that can be used by the Legislature to open, update, close and track Trouble Tickets for the Managed MPLS VPN and related services covered in this ITN. Trouble ticketing should be set up to allow House OIT the ability to access House tickets and to allow OLITS the ability to access Senate and Joint tickets.

3.3.10.1 Trouble Ticketing System ***[Mandatory - Respondent must confirm compliance]***: The Legislature requires that all trouble ticket activity initiated by the Legislature is done through an online Trouble Ticketing System provided by the Respondent. The system must be available for use by the Legislature twenty-four hours per day, seven days per week excluding maintenance time. Respondent must provide applicable policies and procedures used to support this system.

EarthLink Business will comply.

EarthLink Business customers are afforded the option to open, update, close and track Trouble Tickets through Deltaview, a web-based account management portal.

1) Trouble Ticket Activity Types: Identify the types of items and activities that flow through the Trouble Ticketing System and how open ticket confirmations are communicated back to the Legislature.

   Trouble Ticket activity types include T-1 down, bouncing, latency, one or more lines down, feature troubles and configuration changes. Open tickets are communicated back to customers by email.

2) Notification Back to the Legislature: Describe how the Legislature is kept current on the progress of trouble tickets that were opened by the Respondent and by the Legislature.

   Progress on Trouble Tickets is communicated by email. Status updates to customers are also conducted by phone.

3) Affect on SLAs: Define the time relationship between opening of a trouble ticket and the effects on supported SLAs.

   EarthLink Business begins tracking outage time from the moment when a trouble ticket is opened. For periods of time when site access is not available or when technicians are not permitted to actively troubleshoot an issue, the incident ticket will be placed into deferred status. Time in deferred status is not counted as outage/disruption time.

4) Severity Levels: Describe how Trouble Tickets are treated differently based upon their Severity and Priority Levels. (Severity refers to the technical impact of a problem. Priority refers to the degree of business necessity for resolving the problem.)

   Trouble Tickets are classified as P2, which refers to an out-of-service condition and takes highest priority, and P4, which designates one line down or intermittent troubles.

5) Chronic Problems: Provide policies and procedures of how a problem becomes chronic and the resolution. Clearly identify time intervals between chronic events before a trouble ticket is opened.

   Chronic problems are defined as three Trouble Tickets occurring within 30 days. Once an account is identified, or the customer has requested, with a chronic issue, it is turned over to the Chronics team, who are responsible for resolution of the issue.

3.3.10.2 Advanced Outage Notification ***[Mandatory - Respondent must confirm compliance]***: The Legislature requires to be notified prior to a planned outage affecting the Legislature's Managed MPLS VPN network, Access Circuits, CPE, or other associated IP-based services including Internet. The Legislature requires at least twenty-four (24) hours prior notice for short-term, routine outages. Provide a policy that complies with this requirement. List maintenance window types, time frames allotted, and identify which windows are excluded from any calculations of Availability.

EarthLink Business will comply.

EarthLink Business notifies customers of routine maintenance outages by email five days prior to the event. Routine maintenance occurs between 12:00 a.m. and 6:00 a.m. local time to minimize disruption to customers' operations.

See section 3.3.3 for additional information.

3.3.10.3 Emergency Maintenance Windows: Provide the procedure as to when and how Respondent will notify the Legislature when emergency maintenance is required.

In case of emergency maintenance outage, EarthLink Business notifies customers via email two hours prior to the event where possible.

3.3.10.4 Access to Trouble Ticketing System: It is desired that Internet-connected Legislative support users be able to access the Trouble Ticketing System with a web browser. Identify any other needed hardware or software for access to the Trouble Ticketing System. The Trouble Ticketing System should provide a graphical interface to the web browser. The Trouble Ticketing System must support at least ten (10) concurrent authorized legislative information technology staff.

EarthLink Business' Deltaview account management portal is accessible through desktop and mobile web browsers, with no additional hardware or software required. Deltaview is navigable through a graphic interface within the web browser, and supports ten or more concurrent authorized users.

3.3.10.5 Trouble Ticketing System Training: ***[Mandatory - Respondent must confirm compliance]*** Training must be provided for access and use of the Trouble Ticketing System. Training must be provided for at least ten (10) legislative information technology staff. Describe the training that will be offered.

EarthLink Business will comply.

The EarthLink account team will customize all training for the State and provide it a time that is convenient to the State.

3.3.10.6 Trouble Ticketing Tracking: Describe how the Legislature would track Trouble Ticket status with as close to real-time reporting as possible. Clearly identify what can be tracked, by what identifier, and how that information is communicated back to the Legislature.

In Deltaview, any trouble ticket status is tracked by an assigned ticket number. Customers can also view tickets based on circuit ID. Customers are also notified by phone regarding the status of their open tickets as updates are available.

3.3.10.7 Service Restoration: Describe procedures with respect to service restoration both for Managed MPLS VPN Access Circuits and hardware, including CPE. Address levels of Severity and Priority if applicable.

Service restoration on P2 tickets occur within four hours. All other tickets are addressed within 24 hours. (Refer to 3.3.10.1 for ticket classifications.)

See appendix M for the EarthLink Business Operations Document that outlines all of the procedures.

3.3.10.8 Troubleshooting and Testing: Describe the troubleshooting and testing procedures in place to support the integrity of the Managed MPLS VPN, including Managed MPLS VPN access and managed CPE operating in a production environment. When is troubleshooting initiated? Include what time of day troubleshooting is conducted for non-emergencies.

Based on system alerts and alarms, the EarthLink Business support team will respond and conduct troubleshooting as warranted. Please refer to section 3.3.8.2 for more details.

3.3.10.9 Intrusive Testing ***[Mandatory - Respondent must confirm compliance.]***: The Legislature requires that the Respondent notify the Legislature prior to any intrusive troubleshooting or testing on Access Circuits and CPE used to support the Managed MPLS VPN when a trouble ticket does not exist for same or if the circumstance does not require immediate intervention. Provide policy and guidelines for intrusive testing.

EarthLink Business will comply.

EarthLink Business does not perform intrusive testing on access circuits or CPE without first opening a trouble ticket. Furthermore, prior to performing intrusive testing, technicians will contact the State of Florida for clearance to begin testing.

3.3.10.10 Trouble Ticketing System Reports ***[Mandatory - Respondent must confirm compliance]***: The Trouble Ticketing System is required to be able to produce both scheduled and ad hoc reports and provide web browser access for the Legislature. Provide screenshots of standard reports. Describe creation of ad hoc reports with the Trouble Ticketing System.

EarthLink Business will comply.

Deltaview provides scheduled reports, accessible by web browser. Any requests for ad hoc reports are channeled through the account team.

3.3.10.11 Customized Reports: The Legislature desires to create customized reports either on-demand or a scheduled basis. Describe the capabilities of the

Trouble Ticketing System in this area. Below are examples of reports that the Legislature would be interested in generating (reports to include, but not limited to):

- Number of troubles reported within time frames: Time of day, day of week, month of year.
- Number of repeat troubles reported within a thirty-day period.
- Trouble Tickets by Service Location
- Mean-time-to-repair statistics for all Priority Levels.
- By type of trouble reported as defined by Respondents' classifications.
- By Priority Levels.
- Troubles reported by site ID, circuit ID, originator's name or ID.
- Number of troubles that were escalated by level of escalation.
- Number of trouble tickets opened by Priority Levels.
- Number of trouble tickets closed by Priority Levels.
- Number of trouble tickets unresolved by Priority Levels.
- Access into trouble ticketing system by user.
- Bandwidth utilization (in, out, and total)
- Latency
- Jitter
- Packet Delivery

EarthLink Business will work with the State of Florida to create all of the reports mentioned above and others as they are needed.

3.3.10.12 Escalation ***[Mandatory - Respondent must confirm compliance]***: The Respondent is required to list and describe trouble Severity and Priority Levels and how they apply to the WAN service. (Severity refers to the technical impact of a problem. Priority refers to the degree of business necessity for resolving the problem.) Provide examples for each.

Describe Respondent's escalation policies and procedures for WAN service troubles and what drives troubles to be escalated to the next level. Identify professional skill levels that are required to perform each level of escalation. Describe communication methods that will be used by the Legislature to track initial escalations and escalations between Severity and Priority Levels.

EarthLink Business will comply.

See appendix M for the EarthLink Business Operations Document that outlines all of the procedures.

Tickets are automatically escalated every hour until resolved if not resolved within the specified timeframe. Each escalation level involves a higher level of leadership. First level escalation involves the on-call supervisor. Second level escalations involve the group supervisor. Third level escalations are routed to a manager. Fourth level escalations are handled at the Vice President level. Escalations on open tickets are tracked through Deltaview, with additional communications available via phone and email.

The table below outlines the severity level for troubles.

| Severity Level | Impact | Definition | Examples |
|---|---|---|---|
| Severity Level: 1 | Very High Impact | Catastrophic failure with critical impact on public safety beyond business functions. Requires immediate management attention and dedicated resources to resolve immediately. | • Major fiber cut (more than 10 T-1's).<br>• Backbone issues (HSSI and T-3 outage).<br>• DMS Switch hardware or software failures affecting multiple customers. |
| Severity Level: 2 | High Impact | Problems with critical impact to business function(s) or customer(s). Customer requires immediate management attention and dedicated resources to resolve as soon as possible. | • DS-1 outages.<br>• Customer can't dial any numbers.<br>• Customer can't receive any calls.<br>• No dial tone. |
| Severity Level: 3 | Mediu m Impact | Problems causing outage of service resulting in impact to business function(s) or customer(s). Impact justifies priority attention and application of resources to resolve in a timely manner. | • Data circuit outages. |
| Severity Level: 4 | Low Impact | Problems causing low impact to business function(s) or customer(s). Impact justifies resource allocation in accordance with normal managerial planning and prioritization. | • Customer can't dial a specific number.<br>• Intermittent problems.<br>• Customer feature not working.<br>• Fast busies when dialing specific numbers.<br>• Monitoring.<br>• 800, DAL, equal accesses, recordings.<br>• Circuit quality such as noise, echo, delays, and cross talk. |

EarthLink Business will provide the State of Florida with the contact information for the executive team responsible for network operations. Should the automatic escalation process be inadequate for the severity of the outage, the State will be able to contact the appropriate executive for resolution.

## 3.4 Managed MPLS VPN Service Level Agreement (SLA)

### 3.4.1 SLA Purpose and Objective

This section provides requirements for the Service Level Agreement (SLA) to be established between the Legislature and the Respondent. The paragraphs following describe the SLA that the Respondent must submit with the Respondent's Response.

3.4.1.1 SLA: ***[Mandatory - Respondent must confirm compliance.]*** The Respondent is required to submit a SLA with the Respondent's Response. The SLA to be submitted with the Respondent's Response is to contain the specific service standards, provisions, and remedies proposed by the Respondent in response to this ITN.

EarthLink Business will comply.

See appendix O.

### 3.4.2 Scope

Scope Statement: The SLA should include a statement of scope that indicates that the SLA covers all services to be delivered, including services for planning, provisioning, testing, operating, managing, and improving the legislative Managed MPLS VPN and related network services that are the subject of this ITN. SLAs are tracked by the sum of occurrences within the monthly billing cycle.

EarthLink Business will comply.

### 3.4.3 Related Documents

Related Documents: The Respondent should list related documents that will support the SLA, including documentation standards and separate procedures for problem resolution, escalation, network management, service payment calculations and payments, and change management. Procedures for emergency provisioning or support of disaster recovery must be listed. The Respondent should provide document numbers, version numbers, and publication dates where available, and describe how these standards and procedures are made available to the Respondent's management, operational, and engineering staff.

EarthLink Business has provoided our standard SLA document in Appendix O. Our escalation process and contact information is provided in our operations document in Appendix M.

### 3.4.4 Key Contact Personnel

Key Contacts: The Respondent should identify and maintain an accurate list, in the SLA, of the Respondent's key and backup points of contact. These are individuals who will directly support the SLA. This should include name, title, business address, phone, and e-mail contact information. The Respondent should provide space in the SLA for contact information for the Legislature's key points of contact.

The successful Respondent shall replace the liaison or any assigned key contacts at the request of the Legislature.

| Network Operations Center Key Contact/Escalation List | | | |
|---|---|---|---|
| **Contact Name/Title** | **E-Mail Address** | **Office Phone** | **Mobile Phone** |
| Tony Wood, Supervisor | Tony.Wood@corp.earthlink.com | 256-241-4425 | 256-453-6168 |
| Lee Whitney, Director | Lee.Whitney@corp.earthlink.com | 256-241-4438 | 256-504-0845 |
| Joe Haines, VP Service Delivery | Joseph.Haines@corp.earthlink.com | 256-241-7956 | 256-452-6774 |
| Jim O'Brien, EVP Operations | Jim.O'Brien@corp.earthlink.com | 256-382-3910 | 256-452-9128 |

### 3.4.5 WAN Services

The Service Standards, provisions, and Remedies listed in this section refer to the Respondent's proposed WAN services.

**Guarantees and Exclusions:**

3.4.5.1 Guarantees: The Respondent should offer, in the SLA, Service Standard guarantees for the WAN services. The guarantees should include Availability, Latency, Jitter, Packet Delivery, and Outage Notification.

EarthLink Business will comply.

3.4.5.2 Exclusions: With respect to calculating Availability, any exclusions for scheduled maintenance, time lost waiting for premises access, or other reasons should be clearly detailed in the Respondent's Response.

The SLA credits provided are not applicable (1) if Initial Term of the Agreement is entered into for less than one year; (2) for Internet Service during the fifteen (15) days following provisioning; (3) if any Service degradation or disruption (a) occurs during EarthLink Business scheduled Network maintenance; (b) is related to acts or omissions of the Customer or authorized agent, or any use or user of the service authorized by customer; (c) is the result of a malicious action by a third party against the Customer or authorized agent; (d) is caused by Customer applications, equipment, or facilities, including any Customer-ordered telephone company circuits; or (e) is caused by a Force Majeure event.

Respondents must respond to each Mandatory SLA measure and should document its remedy.

| Service Level Agreement | | | |
|---|---|---|---|
| Core | | | |
| | **SLA Measure** | **Mandatory Service Standard** | **Preferred Remedy** |
| 3.4.5.3 | Availability (PE-PE) | It is required the Respondent offer a service standard guarantee for availability of the core network. | 1 day's charges prorated for each affected site for each hour of |

| | | | |
|---|---|---|---|
| | | | outage, not to exceed one month's MRC for the service affected. |
| 3.4.5.4 | Latency | ≤ 55 ms round trip → PE-PE Router | 10% of WAN port MRC for 10% outside service standard<br>30% of WAN port MRC for 30% outside service standard<br>50% of WAN port MRC for 50% outside service standard, not to exceed one month's MRC for the service affected. |
| 3.4.5.5 | Jitter | ≤ 20 ms round trip → PE-PE Router | |
| 3.4.5.6 | Packet Loss | ≤ 1% → PE-PE Router | |
| **Access Circuit & CPE** | | | |
| | **SLA Measure** | **Mandatory Service Standard** | **Preferred Remedy** |
| 3.4.5.7 | Access Circuit and/or CPE Availability | It is required that the Respondent offer a service standard guarantee for access circuit and CPE availability. | 1 day's charges prorated for affected site<br>for each hour of outage, not to exceed one month's MRC for the service affected. |
| 3.4.5.8 | Latency | ≤ 55 ms round trip for ≥ T1 speeds | 10% of WAN port MRC for 10% outside service standard<br>30% of WAN port MRC for 30% outside service standard<br>50% of WAN port MRC for 50% outside service standard, not to exceed one month's MRC for the service affected. |
| 3.4.5.9 | Jitter | ≤ 20 ms round trip for both CPE-CPE router | |
| 3.4.5.10 | Packet Loss | ≤ 1% for both CPE-CPE router | |
| **Operational** | | | |
| | **SLA Measure** | **Mandatory Service Standard** | **Preferred Remedy** |
| 3.4.5.11 | Install, Moves, Adds, Changes | 512kbps to 6Mbps = 30 business days<br>45Mbps = 40 business days | 10% of install fee if service standard is not met, not to exceed one month's MRC for the service affected. |
| 3.4.5.12 | Service outage alerting | <15 minutes | 5% CPE MRC, not to exceed one month's MRC for the service affected. |

| Internet Service | | | |
|---|---|---|---|
| | **SLA Measure** | **Mandatory Service Standard** | **Preferred Remedy** |
| 3.4.5.13 | Internet Circuit Availability | It is required that the Respondent offer a service standard guarantee for Internet access circuit. | 1 day's charges prorated for affected site for each hour of outage, not to exceed one month's MRC for the service affected. |
| 3.4.5.14 | Latency | ≤ 55 ms round trip for ≥ DS3 speeds | 10% of WAN port MRC for 10% outside service standard<br>30% of WAN port MRC for 30% outside service standard<br>50% of WAN port MRC for 50% outside service standard, not to exceed one month's MRC for the service affected. |
| 3.4.5.15 | Jitter | ≤ 20 ms round trip for both CPE-PE router | |
| 3.4.5.16 | Packet Loss | ≤ 1% for both CPE-PE router | |

**Additional Guarantees and Provisions:**

3.4.5.17 Additional Guarantees: It is desired that the Respondent offer additional Service Standard guarantees, provisions, and remedies with respect to the Respondent's WAN services. These might include such measures as Mean Time to Repair (MTTR) or Maximum Service Affecting Outage Duration.

EarthLink Business offers a 4hr MTTR SLA. It should be noted that the company average is less than 2 hrs.

3.4.5.18 Chronic Outages and Missed Service Standards: The Respondent should offer provisions and remedies for chronic outages and chronic missed Service Standards.

EarthLink Business will adhere to the SLAs and offer credits that do not exceed one month's MRC.

**Additional Guarantees and Provisions:**

3.4.5.19 Additional Guarantees: It is desired that the Respondent offer additional Service Standard guarantees and provisions with respect to Access Circuits.

EarthLink Business will adhere to the SLAs and offer credits that do not exceed one month's MRC.

3.4.5.20 Chronic Outages and Missed Service Standards: The Respondent should offer provisions and remedies for chronic outages and chronic missed Service Standards.

EarthLink Business will adhere to the SLAs and offer credits that do not exceed one month's MRC.

### 3.4.6 Disaster Recovery Loss of Service Address Standard

It is desired that the Respondent support a primary plan for Loss of Service Address that would cover a variety of needs. These include temporary use of an alternate site and reconstruction of Access Circuits and CPE for the lost Service Address, as needed. This would also include provisions for rapid establishment or upgrade of Access Circuits to an alternate site, rapid establishment of temporary Private Virtual Circuits (PVC's) to the alternate site, and rapid label propagation in support of the new PVC's, for all Classes of Service. This would also include provisions for upgrade of CPE as needed.

EarthLink Business is able to assist the State of Florida Legislature with the implementation of a disaster recovery plan. In the event that a DR plan is activated, EarthLink Business will be able to expedite the delivery of a circuit or circuits to the alternate location. Furthermore, any bandwidth upgrades may be expedited as well.

### 3.4.7 Security

Security Service Standards: It is desirable that the Respondent offer Service Standards, provisions, and remedies applicable to Security Services. Examples include response to Denial of Service attacks, blocking known malicious IP addresses and URLs, providing authentication, authorization and accounting for network infrastructure components and secure management of said infrastructure (SSH).

EarthLink's security applications monitor all network traffic for suspicious behavior. Upon detection, the NOC is notified and immediate action is taken to isolate the suspicious traffic and to quarantine it so that it is not service affecting to our customers. This is not limited to just IP traffic but also includes the monitoring of all activities on the network infrastructure.

### 3.4.8 VoIP

It is desired that the Respondent offer Service Standards, provisions, and remedies applicable to VoIP. At a minimum, the Respondent must offer a Service Standard guarantee and remedy with respect to the service guarantee.

EarthLink Business complies with this minimum requirement with respect to VoIP services provided by us.

### 3.4.9 Billing

Billing Service Standards: It is desired that the Respondent offer Service Standards, provisions, and remedies applicable to billing.

### 3.4.10 SLA Management

**Reporting:**

3.4.10.1 It is desired that the Respondent offer Service Standards, provisions, and remedies applicable to Reporting for Support of SLA Management.

EarthLink Business will have a monthly meeting with the State of Florida to review all reports and SLA violations. At this time, SLA violation credits may be requested.

**Service Review:**

3.4.10.2 It is desired that the Respondent offer Service Standards, provisions, and remedies applicable to participation in Service Review.

EarthLink Business will have a monthly meeting with the State of Florida to review all reports and SLA violations. At this time, SLA violation credits may be requested.

**SLA Review:**

3.4.10.3 It is desired that the Respondent offer Service Standards, provisions, and remedies applicable to participation in SLA Review.

EarthLink Business will have a monthly meeting with the State of Florida to review all reports and SLA violations. At this time, SLA violation credits may be requested.

## 3.5 Billing

### 3.5.1 Fixed Cost and Renegotiation

3.5.1.1 Fixed Cost: The Legislature desires that **all** cost be fixed during the initial contract and renewal terms unless there is a reduction in cost.

EarthLink Business understands and agrees.

3.5.1.2 Renegotiation: The Legislature desires a renegotiation process to begin at least sixty (60) days prior to the end of the initial term and renewal terms of the Contract. Describe Respondent's approach for addressing renegotiation and define driving factors for reduction in cost.

EarthLink Business understands and agrees.

Refer to section 3.3.2.3.

### 3.5.2 Competitive Rates

3.5.2.1 Rates: ***[Mandatory – Respondent must confirm compliance]*** The Legislature requires that the cost, rates and terms offered to the Legislature during the renewal terms of the Contract is at least as favorable as the cost, rates and terms offered to Respondent's similarly situated users. Describe Respondent's approach for

keeping the Legislature's cost, rates and terms at least as favorable as those offered to Respondent's other users.

EarthLink Business will comply.

3.5.2.2 Competitive Market: ***[Mandatory – Respondent must confirm compliance]*** The Legislature requires that the cost, rates and terms offered to the Legislature during the renewal terms of the Contract remains competitive with the cost, rates and terms offered in the market. Describe how Respondent will keep cost, rates and terms competitive.

EarthLink Business will comply.

### 3.5.3 Invoice Presentation

3.5.3.1 Categorization: Propose a billing hierarchy that presents invoice details categorized by the following:

- Site (Service Address)
- Circuit type
- Circuit ID

EarthLink Business will work with the State of Florida to design an invoice that meets these requirements. Our current billing system is able to do this.

3.5.3.2 Circuit ID: The Legislature desires all invoice components (e.g. FCC charges, one time charges, credits, recurring charges, cancellations, escalations, etc.) be linked to a Circuit ID.

Regulated charges (such as State USF) would not itemize to the Circuit it applies to. Credits do not apply to a specific circuit, however they are noted in the account as to the purpose. All posted billing elements can be posted with applicable circuit ID as the item which would present on the bill. A customized report addressing these requirements can be created and delivered along with the invoice.

3.5.3.3 Sample of Categorization: Provide a sample invoice of no more than ten (10) pages demonstrating understanding of the requirements previously listed.

See appendix N.

3.5.3.4 Electronic File Format: ***[Mandatory - Respondent must confirm compliance]*** The Legislature requires the electronic submission of a single monthly invoice that is able to be downloaded to an office application (such as: XML, RTF, HTML, XLS) and be searchable by every data field and service code. Confirm Respondent's compliance with this mandatory requirement and describe the proposed methodology.

EarthLink Business will comply.

Customers have access to their PDF copy of the bill via DeltaView. A text file copy of the invoice (Magmedia) if also available. Additionally we can provide a special report as we do for several of our larger customers, sent monthly to the account team and then provided to the customer.

3.5.3.5 Itemization: The Legislature desires that invoices be presented in an itemized format with all abbreviations described. Respondent should supply a current glossary (and describe process for maintaining the glossary) of all abbreviations for any and all invoice components.

EarthLink Business is able to provide descriptors on the invoice without abbreviations as designated by the State. Our billing system allows for customized item descriptions.

3.5.3.6 Penalties: The Legislature will not be held liable for penalties of any kind, including cancellation charges, and early termination charges. Confirm Respondent's acknowledgement and agreement.

EarthLink Business understands and agrees.

3.5.3.7 Records: The Legislature desires that the Respondent will, and will require each of its subcontractors, to maintain accurate books, records, documents and other evidence concerning its financial status, costs, expenses, formulas for computing prices, and provision of services (collectively, "Records") for five (5) years after the final payment made by the Legislature. Confirm that Respondent's accounting procedures and practices conform to generally accepted accounting principles ("GAAP") and that the costs applicable to the Legislature will be readily ascertainable from Respondent's Records.

EarthLink understands and agrees.

### 3.5.4 Billing Cycle

3.5.4.1 Bill Cycle: Describe the bill date cutoff process.

The current State of Florida invoice cuts off on the last day of every month.

3.5.4.2 New Service Billing: The Legislature's obligation to pay shall begin only after the Legislature accepts the service.

EarthLink understands and agrees.

### 3.5.5 Billing for Moves, Adds, Changes and Deletions (MACD)

3.5.5.1 MACD Charges: The Legislature desires that all charges associated with any work order activity will appear on the invoice to the legislature within a maximum of two (2) billing cycles from acceptance date. The Legislature will not accept any MACDs that were not authorized by the Legislature. Describe Respondent's process.

EarthLink understands and agrees.

### 3.5.6 Credits

3.5.6.1 Credits for Billing Errors: The Legislature desires that credits for items billed in error or for other reasons must be refunded in the form of a credit against the monthly invoice. Describe Respondent's approach.

EarthLink understands and agrees.

3.5.6.2 Credits: The Legislature desires all credits must be resolved within a maximum of three (3) billing cycles. Describe Respondent's approach.

EarthLink understands and agrees. When formally notified in writing via e-mail, the dedicated customer service representative will begin investigating the issue. At the conclusion of the investigation, executive management will be notified for a final decision. The majority of issues can be resolved within one or two billing cycles.

### 3.5.7 Single Point of Contact

3.5.7.1 Communications: The Legislature desires that Respondent provide the Legislature a single point of contact for all billing issues/inquiries including a toll free number and email address. All communications should go through the Respondent's single point of contact. Describe the process for this requirement.

EarthLink understands and agrees.

EarthLink Business will assign a dedicated customer service representative to handle all requests.

### 3.5.8 Dispute Resolution Process

3.5.8.1 Dispute Resolution Process: Define the billing dispute resolution process and benchmark timelines to resolve. Include the Legislature's responsibilities.

EarthLink understands and agrees.

When formally notified in writing via e-mail, the dedicated customer service representative will begin investigating the issue. At the conclusion of the investigation, executive management will be notified for a final decision. The majority of issues can be resolved within one or two billing cycles.

3.5.8.2 Dispute Resolution: The Legislature desires that all disputes must be resolved within a maximum of three (3) billing cycles. Describe the approach.

EarthLink understands and agrees.

### 3.5.9 Billing Escalation

3.5.9.1 Billing Escalation: The Legislature desires that the Respondent establish and document a billing escalation process to resolve any billing issue including discrepancies, errors, omissions, or unrecognized charges. Describe Respondent's billing escalation process.

EarthLink understands and agrees. A dedicated customer service representative will handle all billing issues. Any issue not satisfactorily addressed can be escalated to the VP of National Accounts.

3.5.9.2 Tracking of all Billing Issues: Describe the process for tracking the status of all billing issues, inquiries, credits, refunds, and disputes.

The EarthLink customer service representative will track all billing issues, etc., and provide weekly updates.

## 3.6 Service Order Provisioning to include Moves, Adds, Changes, Disconnects (MACD)

### 3.6.1 Service Ordering

3.6.1.1 Service Ordering: The Legislature desires that the Respondent operate a Service Order Function that includes an online (web browser) system. The Service Order Function should include processes and procedures that can be used by the Legislature to initiate requests for new service on the WAN services and related services covered in this ITN. Provide the processes and procedures for Service Ordering.

EarthLink Business provides all state and large national account customers with a dedicated back office team. This team supports the account team in processing and provisioning all orders. As such, all orders originate with the account team and are closely monitored by them. EarthLink Business will work with state to develop online systems, if required.

3.6.1.2 Service Order System: The Legislature desires that all orders for new service in the delivery of the WAN services should be requested through an online Service Order System (web browser) provided by the Respondent. Describe how orders for new service are treated differently based upon their Priority Levels. Examples of Service Orders would include, but not be limited to, Access Circuits, CPE installation and configuration, QoS/CoS establishment, bandwidth establishment. Identify all turn-around times tied to each type of new service request. Provide policies and procedures utilized including alternate access methods if web is unavailable. Identify the types of items and activities that flow through the order management system and how confirmations are communicated back to the Legislature.

EarthLink Business provides all state and large national account customers with a dedicated back office team. This team supports the account team in processing and provisioning all orders. As such, all orders originate with the account team and are closely monitored by them. Any order that requires priority processing can be

designated as such by notifying a member of the account team. The customer service representative and the sales engineer will provide the State of Florida weekly updates on all new orders and requests. These updates can be provided via e-mail or periodic conference calls. EarthLink Business will work with state to develop online systems, if required.

3.6.1.3 Service Order System Integration: Describe how the Respondent's Service Order System is integrated with Moves, Adds, Changes, and Deletions, Provisioning, Problem Management, and Billing Systems.

EarthLink's customer service representative will track all service requests. EarthLink Business will work with state to develop online systems, if required.

3.6.1.4 Access to Order System: The Legislature desires that authorized users be able to access the Service Order System with a web browser. Identify any other needed hardware or software for access to the Service Order System. The Service Order System should provide a graphical interface to the web browser. The Service Order System should support at least ten (10) concurrent authorized legislative information technology staff.

EarthLink's online portal is accessed via a web browser and can support multiple concurrent logins.

3.6.1.5 Service Order System Training: Training should be provided as to access and use of the Service Order System. Training should be provided for at least ten (10) legislative information technology staff. Describe the training that will be offered.

The EarthLink account team will provide customized training to all individuals that require it at a time that is convenient to the State of Florida.

3.6.1.6 Service Order System Reports: The Service Order System should be able to produce both scheduled and ad hoc reports and provide online (web browser) viewing by the Legislature. Describe the standard reports available. The Legislature should be able to develop and view customized reports using the Service Order System. Examples of Service Order reports may include but not limited to Service Order activity by site, specific time periods, order status or by type of activity or circuit. Describe how the Service Order System can satisfy this requirement.

EarthLink handles all state and large national accounts via a flexible and customizable process. If an online report is not available, the account team will work with the State to develop a report that meets the State's requirements.

3.6.1.7 Provisioning of Additional WAN services: Describe processes and procedures for engineering (preparation) of Managed MPLS VPN services, Access Circuits, and other related services described in this ITN for the delivery of services. Describe initial engineering, installation, configuration, testing, cutover, acceptance testing and billing establishment. Identify when the billing cycle begins. Detail coordination of activities with the Legislature, including, but not limited to, site preparation (site survey) and establishment of access arrangements with other providers.

1. The State of Florida places an order with the account team.
2. Within 24hrs, the sales engineer and/or customer service representative will contact the State with confirmation of order reception and request any additional details. At this time, the State will be asked to provide technical and physical details of the location and service to be delivered. The State will also be required to provide contact information for the site.
3. During processing, all services are engineered to the design standards as set forth by the sales engineer for the State of Florida.
4. The customer service representative will notify the State of the approximate dates that technicians will require access. An ILEC technician will require site access for circuit delivery and an EarthLink technician will require site access for CPE installation and pre-testing.
5. Once the order is nearing completion, the customer service representative will contact the state to schedule a pre-test and a final activation date.
6. During the pre-test, all services are tested and verified.
7. During activation, a conference bridge is established with EarthLink engineers, the account team and the State of Florida engineers. At the conclusion of the activation, the State will either accept the service or request modifications so that it will meet all requirements. Should the service be unacceptable, management will be notified for resolution and another activation date will be established.
8. Once the service is accepted, the service will begin billing.

3.6.1.8 Inventory: ***[Mandatory - Respondent must confirm compliance]***
Respondent is required to maintain a current and accurate inventory that would incorporate all the items to include, but not limited to: Circuit ID, IP, CPE IOS, CPE configuration archive, service address, on-site contact information and access circuits. The Respondent must provide inventory information to the Legislature on a regular basis and on request. The Respondent must maintain a current copy of inventory to include service items once the deployment of Managed MPLS VPN services begin. Inventory information must be available for secure viewing via web browser as well as in spreadsheet format. Provide the policies and procedures around this requirement.

EarthLink Business will comply.

The State will work with the account team on designing the report required and the frequency of delivery.

## 3.7 Implementation and Acceptance

**The requirements specified in Section 3.7 apply specifically to the installation and implementation of the Respondent's services for the Legislature.**

### 3.7.1 Design Plan

3.7.1.1 Design Plan: ***[Mandatory - Respondent must confirm compliance]***
Respondent is required to provide a recommended design to include Access Circuits and CPE for each of the Service Addresses listed in Appendix A. Use the spreadsheets in Appendix B to propose the four requested bandwidth configurations .

EarthLink Business will comply.

### 3.7.2 Project Plan

3.7.2.1 Project Plan: ***[Mandatory - Respondent must confirm compliance]*** The Respondent is required to submit a representative but detailed project management plan that includes items such as: methodology, processes, procedures, WBS and schedule, demonstrating understanding of the scope and issues involved. The project plan is especially critical to the success of this effort. The Legislature realizes that the sequence of cutovers, (See Section 3.1.1) (includes two OLITS lab and two House lab) will have to be created in collaboration with the Respondent.

EarthLink Business will comply.

The EarthLink transition plan is provided in Appendix K. The timeline presented is a sample timeline for consideration. Upon contract award, a finalized timeline will be presented to the State of Florida.

### 3.7.3 Respondent Qualifications

3.7.3.1 Prior Project Experience: Identify at least one example of a prior project in which Respondent performed transition and installation of Managed MPLS VPN services. The experience requirement can be satisfied with the use of a sub-contractor that will participate in this project. Attach a project plan (not including any proprietary customer information) that was used for this installation. State Respondent's level of involvement in the prior project (i.e., whether it was as a prime or subcontractor).

EarthLink Business recently completed a complete network migration for a moderately sized financial institution (100+ locations) that resembles many of the requirements in this ITN. This project had the following characteristics:

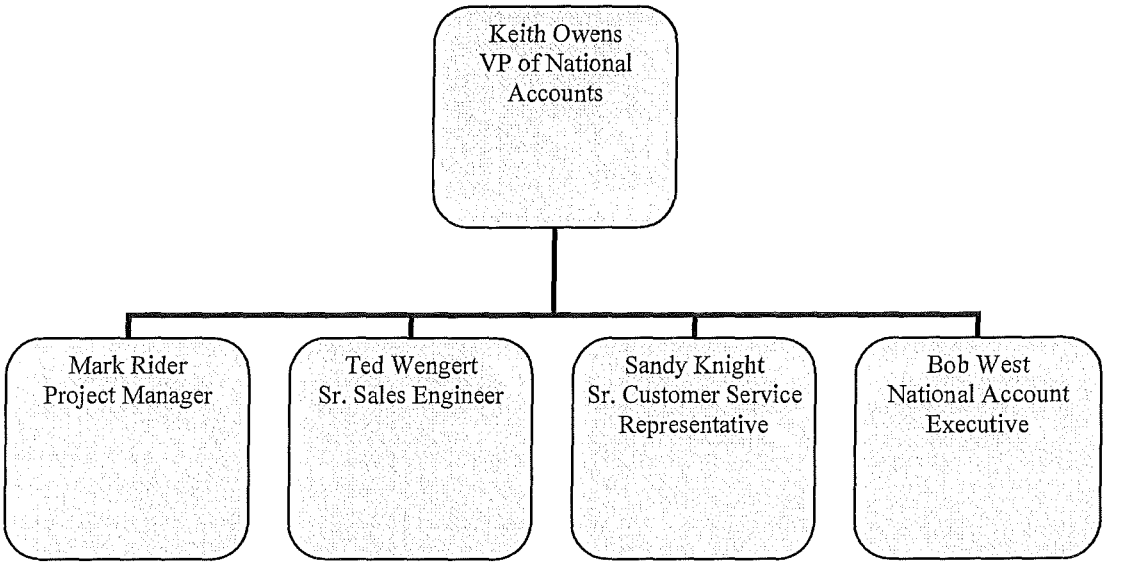
100+ locations with MPLS with QOS.
Redundant Internet service
3 host locations with redundant connections and high survivability.
Fully managed and maintained customer owned CPE, with depot sparing
Customized QOS reporting
Customized inventory reporting
Customized billing reporting
Short timeframe – all remotes converted within 30 days of host establishment.
Remotes with Cisco CME operating on the CPE

3.7.3.2 Customer References: ***[Mandatory - Respondent must confirm compliance]*** The Respondent is required to provide three references of users of like size (more than 40 sites). The references do not need to be utilizing MPLS VPN technology, but they do need to be utilizing a routed network. Using Appendix D, references must describe in detail the type and duration of services, dates of service, and effectiveness of the services provided. Each reference will be evaluated for content and relevance. Respondent's reference information shall not exceed five pages in total for each reference. If the Respondent is partnering with a subcontractor, two separate

references should be provided for the subcontractor in the same form as defined in Appendix D – References. The Legislature reserves the right to contact references as well as develop its own references. See 5.5 References.

EarthLink Business will comply.

3.7.3.3 Organizational Chart: Provide an organizational chart for the personnel who will be providing deliverables and/or performing the services requested during the transition. Changes of Key Personnel during the transition are subject to the Legislature's approval. Such approval will not be unreasonably withheld.



3.7.3.4 Resources: Describe the resources the Legislature will need to provide for the transition and the length of time.

EarthLink Business requires the State to provide personnel to fulfill the following roles:

Project Manager or Project Contact – This person will be the single point of contact for a project related inquiries and communications. This person will also be responsible for establishing the order of implementation.

Role of Office Coordination – Will communicate to the offices the transition schedule and activities affecting the office. The office coordinator will ensure appropriate support is provided to EarthLink Business for initial circuit installation, pre-test, and the actual cut.

Role of Technical Contact – Will provide all technical details required for a service installation.

Role of Billing Coordination – Will provide all requirements to establish all billing and reporting. This individual will participate in all discussions around billing and be the primary contact for billing issues and resolutions.

3.7.3.5 Staff Experience: Submit resumes with references for each proposed key staff member employed by either Respondent or subcontractor.

Please see the resume document in appendix L.

### 3.7.4 Staffing Plan

3.7.4.1 Staffing Response: The Respondent should present a staffing Response that illustrates the best mix of skills and experience to achieve project objectives.

All of the EarthLink Business project team members have experience implementing MPLS networks. The project manager is a former sales engineer responsible for designing and implementing a 700+ node MPLS network, along with managing the project mentioned in 3.7.3.1. The sales engineer has designed and implemented multiple large scale MPLS networks with SONET, native Ethernet and TDM access. The customer service representative has managed several large accounts with customized reporting and billing requirements, including the State of Florida.

3.7.4.2 Key Personnel: Describe and provide names, resumes and responsibilities of all Key Personnel (if any) and time commitments of proposed staff (full time/part time and/or number of man days/months/ per person) over the course of the transition project. At a minimum, include the project leader and the technical lead.

Please see resumes in appendix L. All staff assigned to the project will be assigned on a full-time basis.

### 3.7.5 Subcontractors

3.7.5.1 Named Subcontractors: The Respondent should disclose the planned use of any subcontractor that will perform **five percent (5%)** or more of the total cost of services described in the ITN. In addition, Respondent may choose to identify any other subcontractor that Respondent believes may add value.

3.7.5.2 Named Subcontractor Information: Respondent should provide the following information: Name and address of each Named Subcontractor and the work the subcontractor will be performing.

Complete Communication Services
301A Cahaba Valley Parkway
Pelham, AL 35214
866.842.4236 (Phone)
800.975.3218 (Fax)

EarthLink Business may utilize the services of Complete Communication Services to augment our own field techs to install and maintain CPE.

3.7.5.3 Subcontractor Approval: Adding or changing Named Subcontractors during the contract requires prior legislative approval.

EarthLink Business understands and agrees.

3.7.5.4 Subcontractor Performance: The Respondent will be responsible for the performance of any subcontractors and will not be relieved by non-performance of any sub-contractors. Respondent shall provide a summary of qualifications, years of experience, and references for all Named Subcontractors.

CCS background:
With more than 20 years of experience in the telecom industry, CCS has built an undeniable presence as the choice for service and support excellence in a variety of areas, including hardware installation, maintenance, networking, software installation and support, and VoIP installation and support, in addition to general telecom and data services. Our executive management team boasts a combined 86 years of direct experience in the telecom industry.

Nationwide Support of installation and maintenance for voice and data services with full inventory management of truck stock and spares.
Sherman Henderson – Lightyear Network Solutions, Inc. – CEO,
sherm@lightyear.net, 502-244-6666

3.7.5.5 The successful Respondent should replace the liaison or any assigned key contact at the request of the Legislature.

EarthLink Business understands and agrees.

### 3.7.6 Access Circuits

3.7.6.1 Access Circuit: Attach a sample project plan and schedule for the transition of a district office and all other activities associated with the transition. The project plan should address, at a minimum, the following areas:

- Moves, Adds, Changes, and Deletions plan
- Provisioning
- Installation
- Testing
- Cutover
- Acceptance
- Risk Management plan
- Escalation procedure
- Assumptions on times to deal with other parties (the Legislature, district office personnel, local access providers, CPE order/delivery, etc.)

The project transition plan has been provided in appendix K. The operations document supplied in appendix M outlines the process for escalation once services are installed and accepted.

### 3.7.7 Timeline

3.7.7.1 All Sites: Propose a representative timeline for the transition of the Data Center, (Sites listed in Section 3.1.1) and testing sites. It is not necessary to call out individual sites, but the Respondent must provide justification for the proposed timeline.

See attached transition guide and project plan in appendix K.

3.7.7.2 Liquidated Damages for Missed Timeline: Prior to award, the Legislature and Respondent will negotiate a mutually agreeable final timeline, based on the Respondent's proposed timeline. For each Access Circuit that is not transitioned more than ten (10) business days after the date set forth in the timeline due to delays not caused by the Legislature, acts of God, wars, acts of public enemies, strikes, fires, floods, or other similar cause wholly beyond the Respondent's control, the Respondent shall pay to the Legislature, as liquidated damages, an amount equal to two (2) times the current MRC for such circuit.

EarthLink Business will comply except for the following exclusions:
EarthLink will not be responsible if a delay (a) is caused by 3rd party required construction that falls outside normal requirements to deliver services, (b) is related to acts or omissions of the Customer or authorized agent, or any use or user of the service authorized by customer; (c) is the result of a malicious action by a third party against the Customer or authorized agent; (d) is caused by Customer applications, equipment, or facilities, including any Customer-ordered telephone company circuits; or (e) is caused by a Force Majeure event.

### 3.7.8 Cutover

The Legislature desires a seamless cutover strategy that minimizes any negative impact on the ongoing delivery of services, especially the applications discussed in Section 3.2.9. The Legislature requires that the Respondent address the following:

3.7.8.1 Cutover Methodology: Describe the methodology, processes, and procedures for the logical and physical cutover of the network.

Prior to any conversion, EarthLink Business will pre-test all new services to validate service configuration. Furthermore, all conversions can occur after normal business hours to minimize any disruption of day to day business activities.

3.7.8.2 Cutover Backout: Describe the methodology, processes and procedures if the site conversion fails.

EarthLink Business strives to make all conversions successful, should a conversion fail, the current CPE will be placed on the original circuit until such time as a new activation date can be arranged.

3.7.8.3 Cutover Change Management: Describe the change management plan for transition.

Any changes received in writing will be coordinated through the project manager for the duration of the project.

3.7.8.4 Cutover Test Plan: Describe the test plan for cutting over each site.

Aside from circuit and layer 3 testing during the pre-test of the circuit, the actual test plan will be developed with the State of Florida. This plan must include testing of critical applications and VoIP services, including failover to the PSTN. Host testing must include failover testing, as well.

### 3.7.9 Acceptance

The acceptance of the circuits is to ensure that bandwidth, latency, and throughput have been provisioned successfully. The Legislature desires the following:

3.7.9.1 Acceptance Methodology of Respondent: Describe the methodology, processes and procedures for acceptance after the transition has been completed.

During the conference call referenced in 3.6.1.7, the State will have the opportunity to either accept or reject the service.

3.7.9.2 Acceptance Reports: Describe and provide sample of the reports that are provided to ensure that, after the transition, the network is operating within specified parameters.

At the conclusion of the project, utilization, inventory and monitoring reports will be presented that show the services are operating according to specified parameters.

3.7.9.3 Acceptance Billing: The Legislature's obligation to pay shall begin only after the Legislature accepts the service and the Respondent issues a disconnect order for current service.

EarthLink Business will begin billing upon acceptance of the service. It is assumed that the same day service is accepted, the State will issue the appropriate disconnects to the current service provider.

### 3.7.10 Training

3.7.10.1 Initial Training: Describe the initial training that is provided for network management, ordering, billing, and problem management. There are various methods of accomplishing the training, i.e. offsite courses, web-based, on customer site, etc.

EarthLink Business customizes all training for all of our customers based on skill level and desired goals. The online training will be provided by the sales engineer and customer service representative.

3.7.10.2 Professional Development Training: Describe the ongoing training that is provided for network management, ordering, billing and problem management. There are various methods of accomplishing the training, i.e. offsite courses, web-based, on customer site, etc.

EarthLink Business does not provide any formal training. However, EarthLink will be pleased to provide informal "Lunch-N-Learns" on different topics of interest.

These informal trainings may be conducted by the account team or by individuals with expertise in specialized areas employed by EarthLink Business.

## 3.8 Disentanglement

The Legislature expects full, complete, and timely cooperation in disentangling the relationship in the event that the Contract expires or terminates for any reason. In the event of expiration or termination, the Legislature expects that the Respondent shall, among other things: return all legislative data and documentation to the Legislature, including but not limited to configuration information and allow the Legislature or the replacement provider(s) continued access to all billing, ordering, and trouble ticketing systems, and processes that have been employed in servicing the Legislature, in accordance with methods and procedures to be agreed upon and established in the Contract. In the event of the expiration or termination of the relationship between the Legislature and the Respondent, the Respondent shall:

3.8.1 Disentanglement Approach and Process: The Respondent's Response should describe its specific approach to the Disentanglement process. Specifically, state the Respondent's proposed plan for Disentanglement, including key milestones and the Legislature/Respondent roles and responsibilities. Provide time estimates for the Disentanglement process based upon the number of locations detailed in this ITN.

EarthLink Business values all relationships. Customers who migrate services away from EarthLink are viewed as potential new customers. With that in mind, EarthLink will provide whatever assistance, technical and billing, required to perform a smooth migration from our services.

3.8.2 Cooperation and Information: Respondent is requested to agree to cooperate with the Legislature and/or the replacement provider(s) and otherwise take all reasonable steps to assist the Legislature in effecting a smooth disentanglement upon the expiration or termination of the Contract, including the provision of information necessary to enable the Legislature's personnel, or that of a replacement provider(s), to fully assume and continue without interruption the provision of Services. Respondent's Response should state its understanding of this paragraph and provide any details, conditions or assumptions.

EarthLink Business understands and agrees.

3.8.3 Continued Service: Agree not to: (i) interrupt the provision of Services to the Legislature and its users or any obligations related to disentanglement, (ii) disable any hardware used to provide Services, or (iii) perform any other action that prevents, slows down, or reduces in any way the provision of Services to Legislative Network sites until the Legislature agrees that a satisfactory disentanglement has occurred. Respondent's Response should state their acknowledgement and agreement to each of the subparts of this paragraph and provide any details, conditions or assumptions.

EarthLink Business understands and agrees.

## SECTION 4: Administrative Documents Required

### 4.1 Economy of Presentation

Each Response shall be prepared simply and economically, providing straightforward, concise delineation of Respondent's capabilities to satisfy the requirements of this ITN. Fancy bindings, colored displays, and promotional materials are not required. Emphasis on each Response must be on completeness and clarity of content. To expedite the evaluation of Responses, it is essential that Respondents follow the format and instructions contained herein.

EarthLink Business will comply.

### 4.2 Submission of Responses

Responses must be submitted in two (2) separate sealed parts: a Technical Response and a Cost Response, See Schedule of Events, Section 1.8 of this ITN.

The Response packages must be boxed or sealed and identified as follows:

- Response of (Your Company's Name and any subcontracting entity)
- Type of Response: (Technical or Cost)
- ITN #851, Network Services

EarthLink Business will comply.

### 4.3 Part 1 - Administrative Documents and Technical Response Content

**All Respondents must complete this section.**

#### 4.3.1 Administrative Documents *[Mandatory - Respondent must confirm compliance]*

The following items must be included in the Response:

- Completed Respondents Information Coversheet (page 1) of the ITN
- Signed Addenda Document(s) to the ITN (if applicable)
- Non-Collusion Statement (Appendix G)
- Disclosure Information (Appendix H)
- Copy of Respondent's Standard Contract
- Warranties (Appendix I)

EarthLink Business will comply.

#### 4.3.2 Technical Response Copies

One (1) original version, seven (7) copies and two (2) CD-ROM copies of the following Technical Response components must be packaged and identified as the Technical Response.

EarthLink Business will comply.

#### 4.3.3 Technical Response Content *[Mandatory - Respondent must confirm compliance]*

4.3.3.1 Cover Page

4.3.3.2 Table of Contents

4.3.3.3 Respondent's Mandatory Response Checklist, ITN Appendix F

4.3.3.4 Response to ITN Section 3.0 SCOPE OF SERVICES

In order to facilitate the Legislature's evaluation of the Responses, the Respondent must provide a complete description of how each requirement will be met, not merely an acknowledgement.

The Respondent's Technical Response must provide its approach/solution to all of the requirements in the Scope of Services Section 3.0. **The Technical Response must not contain any cost information.**

The Respondent's organization of responses to the requirements **must** be arranged in the sequence in which the requirements are referenced, and formatted with responses inserted directly after the requirement or request. Specific answers may be cross-referenced throughout Respondent's response to avoid duplication of material. Additional information may be submitted to accompany the Response. **In submitting additional information, please mark it as supplemental to the required response.**

**Response to Requirements**

All technical requirements defined in Section 3 must be addressed and responded to by Respondents. In addition, Respondents must be able to fulfill the requirements labeled ***[Mandatory – Respondent must confirm compliance]***. Failure to meet a **mandatory requirement** will result in disqualification of a Respondent's Response. General Business Information: The Respondent and any Named Subcontractors must indicate the name, address, telephone number, Email address, FAX number, and Employer Identification Number (EIN) of the legal entity with which the contract is to be written.

Legal Status of the Company: The Respondent **must** indicate the legal status of the company (e.g., sole proprietorship, partnership, or corporation).

Financial Information: The Legislature reserves the right to request evidence of a Respondent's financial capability or stability if the Legislature has a question as to such Respondent's abilities.

EarthLink Business will comply.

**4.4 Part 2 – Cost Response *[Mandatory - Respondent must confirm compliance]***

The first cost component is composed of the Legislature's total locations, (see Section 3.1.1). Current configurations are provided to the Respondent in Appendix A. The Respondent is to submit all four (4) bandwidth cost spreadsheets (Appendix B) back to the Legislature with costs for a recommended solution. The Legislature will evaluate all four (4) bandwidth options and reserves the right to select one (1) or more of the bandwidth options.

The Respondent must provide in a supplemental spreadsheet within Appendix B, explanations for any cost that includes a variable or estimated component (e.g. Access One Time and MRC cost, CPE One Time and MRC cost) and component level cost. Component level cost will include all service codes that make up the cost of the item including any pass through charges such as FCC mandated charges and taxes. Respondent will provide formulas used for computing costs including FCC mandated charges, franchise fees, and taxes that are clearly auditable and provide methodology for performing such audit.

The component level cost will be used to verify cost submitted in the four (4) bandwidth cost spreadsheets for the total locations (see Section 3.1.1). Respondent must submit detailed all inclusive component level cost. Respondent must include monthly recurring charges for all services proposed including first and subsequent mileage (from any given CE to the PE located anywhere in the state), training, consulting/design/engineering service, custom documentation, firewalls, quality of service (Qo S), security, licenses, service generation charges, time and material fees, upgrade costs for router components, expedite charges, etc.

EarthLink Business will comply.

**4.4.1 Cost Spreadsheets Appendix B (Four (4) Bandwidth Options must submit all 4)**

4.4.1.1 ***[Mandatory - Respondent must confirm compliance]*** Cost Response Spreadsheets: The Legislature requires that the Respondent complete and submit the Four (4) Bandwidth Cost Response Spreadsheets in Appendix B in electronic format. Instructions for completing the spreadsheets are provided therein.

EarthLink Business will comply.

4.4.1.2 Cost Consistency: Where the Legislature requests cost information in more than one place and the four (4) bandwidth cost spreadsheets, the Legislature requires that the Respondent's stated cost for such items or components must be the same or consistent in all places. Failure to provide consistency may result in a negative impact on the evaluation.

EarthLink Business will comply.

4.4.1.3 ***[Mandatory - Respondent must confirm compliance]*** End to End Inclusive Cost: Submit cost that is all-inclusive (including travel) of costs end to end.

EarthLink Business will comply.

**All Respondents must follow the instructions in this section carefully.**

Copies: An original and seven (7) hard copies, and two (2) electronic versions of the Cost Response contents are required.

The Respondent shall submit **all four (4) Bandwidth Cost Responses** in the Appendix B Cost Response format and in a separately sealed package.

Four (4) Spreadsheets have been prepared for Respondents to submit cost for the full scope of services as provided in Appendix B.

Respondents must use the tables in Excel to submit their four (4) Bandwidth Cost Responses. No other method of submitting cost information will be accepted, and failure to comply will result in rejection of Respondent's Response. **See Mandatory Requirement 4.4.1.1.**

EarthLink Business will comply.

## SECTION 5: Evaluation

### 5.1 Overview

Any Response that does not meet one or more of the mandatory requirements will be disqualified. The Legislature reserves the right at any time and for any reason to cancel this ITN. The Legislature reserves the right to waive any immaterial defects or irregularities in any Response and the Legislature reserves the right to reject any and/or all Responses.

### 5.2 Overall Evaluation of Technical Response

Incompleteness, inconsistencies or inaccuracies in the Technical Response may result in a negative impact on the evaluation.

Respondents must convey the technical, management, key personnel and other factors necessary to meet the requirements of this ITN in sufficient detail within their written Response. Responses which simply affirm and restate this ITN, or which do not adequately convey the technical approach proposed to meet this ITN's scope of services are not desired. Such an approach may result in a negative impact on the evaluation of the Response or a determination that the Respondent's Response is non-responsive.

### 5.3 Oral Presentations (Optional)

After the initial technical evaluation, the Respondents may be requested to make one or more oral presentations regarding their Responses, at dates, times and locations determined by the Legislature. The purpose of such presentations will be to allow Responsive Respondents to explain their proposed solutions and key points of their Responses. Additionally, Respondents may be asked questions in order to provide a better understanding of how the Responsive Respondent's proposed solution will meet the requirements of this ITN. It is critical that Respondents bring staff familiar with the detailed contents and solutions presented within Responsive Respondent's Response in order to maximize the productivity of the Oral Presentation sessions. Oral presentations may not be required, may not occur, and are not substitutes for a well-written Response.

### 5.4 Evaluation of Cost Responses

Respondents failing to submit cost in compliance with the Mandatory Requirements set forth in Sections 4.4.1.1 and 4.4.1.3 will be disqualified and removed from further evaluation.

The Legislature will evaluate all four (4) bandwidth options and reserves the right to select one (1) or more of the four (4) bandwidth options.

### 5.5 References

References shall be provided by the Respondent as outlined in Sections 3.7.3.2, 3.7.3.5 and 3.7.5.4 and shall be submitted using Appendix D – References. **References submitted using a format other than the Appendix D will not be considered.**

### 5.6 Notification of Negotiations

Negotiations will be with the Respondents meeting all the Mandatory requirements in this ITN.

Notification of Negotiations will be made to the respondents on or about April 26, 2011.

Negotiations shall be made with the responsive and responsible Respondents whose Responses are determined to be the most advantageous to the Legislature, taking into account all evaluation and negotiation factors set forth in this ITN.

## 5.7 Selection of Successful Respondent and Contract Award

The Legislature reserves the right to enter into contract negotiations with the Respondents to arrive at a final agreement incorporating this ITN, any addenda to this ITN, the successful Respondent's response to this ITN, the contract, any purchase order(s) issued as a result of this ITN, and such other terms and conditions agreed between the parties that may be necessary to the Legislature. If, however, the negotiations impasse with each of the respondents, the Legislature reserves the right to negotiate with any respondent who successfully responded to this ITN. The Legislature intends to award a contract to the respondent whose response through negotiations best meets the needs of the Legislature.

# Appendix C – SLA Parameters

List all Access Circuit Types, associated bandwidth; service level Availability; Latency; Jitter; and MTTR under each column as appropriate. Respondents failure to utilize the spreadsheet will result in rejection of response.

| Access Circuit Type | Bandwidth | Availability | Latency (one way) | Jitter (one way) | MTTR | Installation |
|---|---|---|---|---|---|---|
| T1 | 1.5 M | 99.99% | ≤ 22.5 ms | ≤ 10 ms | 4 hr | 30 bus. days |
| 2 X T1 | 3 M | 99.99% | ≤ 22.5 ms | ≤ 10 ms | 4 hr | 30 bus. days |
| Ethernet | 3 M | 99.99% | ≤ 22.5 ms | ≤ 10 ms | 4 hr | 80 bus. days |
| Ethernet | 6 M | 99.99% | ≤ 22.5 ms | ≤ 10 ms | 4 hr | 80 bus. days |
| 4 X T1 | 6 M | 99.99% | ≤ 22.5 ms | ≤ 10 ms | 4 hr | 30 bus. days |
| MPLS DS3 | 45 M | 99.99% | ≤ 22.5 ms | ≤ 10 ms | 4 hr | 40 bus. days |
| Internet DS3 | 45 M | 99.9% | ≤ 22.5 ms | ≤ 10 ms | 4 hr | 40 bus. days |
| | | | | | | |
| | | | | | | |
| | | | | | | |
| | | | | | | |

27.5ms (change all)

List all Managed Customer Premise Equipment (CPE) Make, Model , Ports and associated SLA parameters under each column as appropriate.

2911 (change all 2811)

| Managed CPE | Make | Model | Ports | MTTR | Installation | Configuration |
|---|---|---|---|---|---|---|
| Remote Router | Cisco | 2811 | 16 | 4 hr | Provided | 4 Port FXO |
| Remote Router | Cisco | 2811 | 8 | 4 hr | with access | 4 Port FXO |
| Remote Router | Cisco | 2811 | 4 | 4 hr | circuit | 4 Port FXO |
| Host Router | Cisco | 2951 | 3 | 4 hr | listed | T3 Network Mod |
| Internet Router | Cisco | 2951 | 3 | 4 hr | above | T3 Network Mod |

3925 (change all 2951)

## Appendix D – References

Please use the format below for submitting references as outlined in the ITN.

Organization 1: AirTran
Point of Contact: James Nolin
Mailing Address:
Phone Number: 678-254-7025
Email Address: James.Nolin@AirTran.com
Number of Sites: 28
Type and Duration of Services: MPLS, Internet, Local PRI, Toll Free & LD
Dates of Service: Services provided since late 2009
Effectiveness of the Services Provided: Data, Internet and Voice services
Description of Project: MPLS Supports VoIP and Data to data center, operation centers, and airports.

Organization 2: Regions Bank
Point of Contact: Fred Braune
Mailing Address:
Phone Number: 205-261-6155
Email Address: Fred.Braune@regions.com
Number of Sites: 780
Type and Duration of Services: MPLS, Toll Free & LD, Private Lines
Dates of Service: Services provided since 1991
Effectiveness of the Services Provided: Data and Voices services
Description of Project: MPLS supports Data to data center and branches.

Organization 3: SCANA
Point of Contact: Oscie Brown
Mailing Address:
Phone Number: 803-217-8807
Email Address: Obrown@SCANA.com
Number of Sites: 65
Type and Duration of Services: Local, Toll Free & LD, Internet, Private Lines
Dates of Service: services provided since 1996
Effectiveness of the Services Provided: Voice, Data and Internet
Description of Project: Supports Operation Centers and Data Centers with Voice, Data and Internet

## Appendix G

## NON-COLLUSION STATEMENT

I certify that this response is made without prior understanding, agreement, or connection with any corporation, firm or person submitting a response for the same materials, supplies, or equipment, and is in all respects fair and without collusion or fraud. I agree to abide by all conditions of this Response and certify that I am authorized to sign this response for the Respondent and that the Respondent is in compliance with all requirements of the Invitation to Negotiate (ITN) including, but not limited to, certification requirements. In submitting a response to an agency of the State of Florida, the respondent offers and agrees that, upon the respondent's acceptance, the Respondent is deemed to have sold, assigned, and transferred to the State of Florida all rights, title, and interest in and to all causes of action it may now or hereafter acquire under the Antitrust laws of the United States and the State of Florida relating to the particular commodities or services purchased or acquired by the State of Florida or political subdivision thereof.

## WARRANTIES

The successful Respondent represents that it is professionally qualified and possesses the requisite skills, knowledge, qualifications and experience to provide the required services specified. The following are warranty certification requirements which must be certified in writing (Appendix I) in the Administrative Documents Required (Section 4). If the Respondent cannot so certify to any of the following, the Respondent must submit with its Response a written explanation of why it cannot do so within the Administrative Documents Required.

**1.11.1** The Respondent or any other organization associated with the ITN is not currently under suspension or debarment by the State or any other governmental authority.

**1.11.2** To the best knowledge of the person signing the Response, the Respondent, its affiliates, subsidiaries, directors, officers, employees of any other organization associated with this ITN are not currently under investigation by any governmental authority and have not in the last ten years been convicted or found liable for any act prohibited by law in any jurisdiction involving conspiracy or collusion with respect to bidding on any public contract.

**1.11.3** To the best knowledge of the person signing the Response, the Respondent, its affiliates, subsidiaries, directors, officers or any other organization associated with this ITN have no delinquent obligations to the State, including a claim by the State for liquidated damages under any other contract.

**1.11.4** To the best knowledge of the person signing the Response, the Respondent, its affiliates, subsidiaries, directors, officers or any other organization associated with this ITN have not within the preceding three years been convicted of or had a civil judgment rendered against them or is presently under indictment for or otherwise criminally or civilly charged for commission of fraud or a criminal offense in connection with obtaining, attempting to obtain or performing a federal, state, or local government transaction or public contract; violation of federal or state antitrust statutes; or commission of embezzlement, theft, forgery, bribery, falsification or destruction of records, making false statements, or receiving stolen property.

**1.11.5** To the best knowledge of the person signing the Response, the Respondent, its affiliates, subsidiaries, directors, officers or any other organization associated with this ITN have not within a three-year period preceding this certification had one or more federal, state, or local government public transactions terminated for cause or default.

# 1. EXECUTIVE SUMMARY

Today, the State of Florida Legislature WAN is serviced by Qwest. This includes the 53 Senate locations and the 132 House locations. All of which have fully managed CPE and security. This document will lay out the process that EarthLink Business will use to convert all of these locations to an EarthLink Business fully managed network solution.

## 1.1 Objective of the Data Transition Plan

This document is intended to provide a detailed description of the transition plan and the activities associated with transitioning Qwest's service to EarthLink Business' service. Within this document you will find sections that describe:

- Project Scope
- Project Team roles and responsibilities
- EarthLink Business conversion process
- Project conclusion

# 2. PROJECT SCOPE

The EarthLink Business project management approach will be to view the network conversion as a single project encompassing both the Senate and House locations. To do this, the total number of locations will be grouped into "batches" of about 25 locations to a batch. To achieve this, EarthLink will implement the project as follows:

1. Host locations, including Internet
2. Lab circuits
3. Remotes

As each location is implemented the network management portion will be configured and sites will be managed and monitored. Since host circuit will take up to 90 calendar days to install, much of the preparation work and ordering for the remotes will take place during this period. Upon the activation of the host circuits, there will be a brief "ramp-up" period of a few remotes from each division before the project is fully executed. While the project plan envisions 25 locations per week, this can be accelerated to up to 25 locations per day for rapid completion at the discretion of the State of Florida.

## 2.1 Services to be implemented

EarthLink Business will be iplementing a fully managed Gold MPLS service which has multiple queuing options. At this time it has been determined the following quantities of locations and services will be included in the conversion plan:

1. 2 45 mbs Internet connections for OLITS
2. 1 45mbs host DS3 connections for OLITS
3. 1 45mbs Internet DS3 connection for OIT.
4. 40 Senate district offices including managed CPE for minimum 16 LAN ports and one WAN port, including management and support of the extended wiring as needed in each office. Each office must be equipped with VoIP failover to a PSTN.
5. Approximately 10 Senate satellite offices including managed CPE for minimum 8 LAN ports and one WAN port, including management and support of the extended wiring as needed in each office. Each office must be equipped with VoIP failover to a PSTN.
6. 1 Tallahassee remote office (Commission on Ethics)

7. 2 Tallahassee circuits with Senate district office configurations (one of each CPE solution, satellite and district) for development and testing
8. 120 House district offices including managed CPE for minimum 8 LAN ports and one WAN port, including management and support of the extended wiring as needed in each office. Each office must be equipped with VoIP failover to a PSTN.
9. Approximately 10 House satellite offices including managed CPE for minimum 4 LAN ports and one WAN port, including management and support of the extended wiring as needed in each office. Each office must be equipped with VoIP failover to a PSTN.
10. 2 Tallahassee circuits with House district office configurations (one of each CPE solution, satellite and district) for development and testing.

#### 2.1.1 Managed CPE

EarthLink Business will be replacing the current vendor managing the CPE. For the OLITS network, EarthLink will be providing CPE with:

- Integrated WAN cards
- Inetegrated LAN switch cards with POE
- FXS Port(s) for PSTN failover
- CME licenses
- Monitoring of customer's routers 24x7x365
- DeltaView
- Router install for new & relocating offices.

For the OIT network, EarthLink Business will take over management of the existing CPE.

#### 2.1.2 MPLS Gold Service

EarthLink Business will provide 1.5MB MPLS Service (Gold-level QoS) to the State's remote locations.

#### 2.1.3 MPLS QOS Options

EarthLink Business will configure our Gold MPLS.

The State of Florida will select a QOS profile prior to ordering service.

## 2.2 EarthLink Business Responsibilities

The following is the scope of the project with respect to the responsibilities of EarthLink Business:

- EarthLink Business will act as project lead for the entire transition.
- EarthLink Business will be providing MPLS services.
- EarthLink Business will pre-test all new circuit installations prior to conversion to EarthLink services.
- EarthLink Business will configure MPLS services to interact with the State of Florida equipment as directed by the State of Florida. The State of Florida will be responsible for configuring CME services.
- EarthLink Business will test and verify IP functionality prior to transitioning any services.

## 2.3 The State of Florida Responsibilities

The following is the scope of the project with respect to the responsibilities of The State of Florida:

- The State of Florida will provide the desired order of implementation.

- The State of Florida will provide validation of EarthLink Business provided order information.
- The State of Florida will provide the required additional order information and IP addressing.
- The State of Florida will provide an equipment list and IOS rev. for locations where existing CPE will be utilized so that EarthLink Business may validate compatibility.
- The State of Florida will be responsible for moving the circuit to the existing router or replacing the existing router with the new routers.
- The State of Florida will test and validate services provided by EarthLink Business.
- The State of Florida will be responsible for configuring voice services.
- The State of Florida will be responsible for formally issuing disconnect orders with the incumbent.

# 3. PROJECT TEAM ROLES AND RESPONSIBILITIES

The project team is made up of members from both EarthLink Business and the State of Florida. Weekly project team meetings will take place until the conclusion of the project.

## 3.1 EarthLink Business Project Team Structure

There are two facets to the EarthLink Business project team. The first are the project team members that will interface with the State of Florida and their related titles and responsibilities. The second are the project team members that will work with the project manager within the back office.

The following is a list of the team members that will interface with the State of Florida:

**Project Management**

- Mark Rider – Sr. Applications Consultant / Project Manager
    - Mark will act as the overall project manager for the this project. He will manage the project from a macro level and will be responsible for interfacing with EarthLink Business management and the the State of Florida project team regarding the overall progress of the project. Mark will be managing the project and providing all of the required documentation and updates.
    - Mark reports to Keith Owens.
    - Mark.rider@corp.earthlink.com
    - 205-380-3086 (Office and cellular)
- Bri Smith – Service Activation Project Manager
    - Bri will act as the project manager responsible for monitoring all orders sent to the ILECs for the office service installation. She will be in contact with the State regarding any issues with these orders.
    - Bri reports to Sharron Jones
    - bri.smith@corp.earthlink.com
    - 256-264-1926 (Office)

**Account Team**

- Bob West - National Account Executive - Your NAE is responsible for the overall management of your account and is considered the EarthLink Business account team leader, responsible for directing EarthLink Business account resources to provide you with the

highest level of service possible. The NAE is the primary point of contact during the sales process and also provides additional consultation and proposals as needed.

- Office number: 859-333-6066
- Mobile number: 859-333-6066
- E-mail address: bob.west@corp.earthlink.com

- Sales Engineer (SE) - Ted Wengert - Your SE is responsible for understanding your needs and providing network design and engineering assistance throughout the pre-implementation process and as new networking needs arise.
  - Office Number: 770-349-4557
  - Mobile number: 404-402-8249
  - E-mail address: ted.wengert@corp.earthlink.com
- Client Service Representative (CSR) - Sandy Knigth - Your CSR is closely aligned with your NAE and, as needed, can provide direct reach into all functional areas of EarthLink Business. The CSR responsibilities include assisting with order initiation, monitoring trouble tickets, and assisting with billing issues.
  - Office number: 205-380-3026
  - Mobile number: 205-746-0354
  - E-mail: sandy.knight@corp.earthlink.com

**Executive Team**

- Keith Owens – VP (Vice President of National Accounts) Escalation and Oversight
  - Keith will be responsible for escalating internal EarthLink Business issues to ensure a smooth transition.
  - Keith.owens@EarthLink Business.com
  - 205-380-3008 (Office)
  - 256-426-7270 (Cellular)

## 3.2 The State of Florida Project Team Structure

The The State of Florida project team will be critical in establishing communications to the end users and disseminating information from the project meetings internally within The State of Florida. The personnel for the following roles will need to be established.

- Project Manager or Project Contact – This person will be the single point of contact for a project related inquiries and communications. This person will also be responsible for establishing the order of implementation.
- Role of Office Coordination – Will communicate to the offices the transition schedule and activities affecting the office. The office coordinator will ensure appropriate support is provided to EarthLink Business for initial circuit installation, pre-test, and the actual cut.
- Role of Technical Contact – Will provide all technical details required for a service installation.
- Role of Billing Coordination – Will provide all requirements to establish all billing and reporting. This individual will participate in all discussions around billing and be the primary contact for billing issues and resolutions.

# 4. EARTHLINK BUSINESS COMMUNICATION PROCESS FOR TECH VISITS

EarthLink Business recognizes the sensitive nature of technician visits in the legislature environment. During the MPLS network transition, there will be 2 separate visits by technicians over a 90 day perior to all locations. To ease the concerns of the State of Florida, the EarthLink Business project manager will abide by the processes listed below.

## 4.1 Visit #1 – LEC Circuit Installs

1. The State of Florida will send an e-mail to all offices informing them that a LEC technician will be arriving on site to install a new circuit.
2. As FOC dates (firm order commitment, aka, loop delivery) are received for EarthLink Business loop orders, the EarthLink Business project manager will inform the State of Florida of those dates. The State of Florida will distribute the list to _____.
3. One week prior to the FOC date for a particular office, the State of Florida project manager will send an e-mail to the office manager.

## 4.2 Visit #2 – Circuit Pre-Test

1. The State of Florida will send an e-mail to all offices informing them that a EarthLink Business technician will be arriving in the near future to perform a pre-test of the new circuit that was installed and to install new equipment (only for Senate offices)
2. The EarthLink Business project manager will provide The State of Florida with a daily schedule the week before each week's set of visits.
3. The night before an EarthLink Business technician arrives at the office for the pre-test, the State of Florida project manager will send an e-mail to the office manager.
    a. This e-mail will contain the technician name and estimated arrival time.
    b. The body of the e-mail will briefly explain what the technician will do.

## 4.3 Visit #3 – Actual Conversion

1. The State of Florida will send an e-mail to all offices informing them that a State of Florida technician will be arriving in the near future to perform a network conversion to the new data network.
2. The EarthLink Business project manager will provide The State of Florida with a daily schedule the week before each week's set of visits.
3. The night before a EarthLink Business technician arrives at the office for the conversion, the State of Florida project manager will send an e-mail to the office manager.
    c. This e-mail will contain the technician name and estimated arrival time.
    d. The body of the e-mail will briefly explain what the technician will do.

# 5. EARTHLINK BUSINESS CONVERSION PROCESS - DATA

The following activities will occur within EarthLink Business to complete each installation:

- Pre-Order Actions:
    - Compile order forms
    - Present preliminary order forms to The State of Florida
    - Validate orders received

- Order Activities:
  - Enter validated orders into EarthLink Business's order system
  - Order and provision MPLS services to the customer premise
- Circuit Scheduling and Turn up
  - Coordinate and complete circuit and MPLS installation with The State of Florida.

### 5.1 Pre-order activities

Prior to placing an order, EarthLink Business will perform several actions to help to insure a complete and accurate order.

Prior to the order process commencing, completed order forms will have to be submitted to EarthLink Business with the pertinent information.

- A State of Florida technician will perform site surveys for DS1 delivery to ensure that proper backboard, conduit and ground wire is available.. The results of the site surveys will be provided to EarthLink Business and the information will be included in the order form.
- The EarthLink Business technical consultant will collect the necessary information for a complete and accurate order form. Some of the required information includes:
  - IP addressing of the customer WAN interface
  - IP addressing of the for the LAN
  - Application details for MPLS QOS
  - BGP AS number
  - BGP routing information
- Once the order form is completed, it will be reviewed with The State of Florida.
- Once approved, it will be processed by EarthLink Business.

### 5.2 Order Activities

- The order entry team will begin keying orders into the EarthLink Business system.
- Once the order is keyed, it will trigger an order for a loop for locations requiring a new loop.
- Loop Delivery
  - The loop delivery process can take from 30 to 45 calendar days to complete.
  - EarthLink Business will have an approximate date for loop delivery. This date is called the FOC (Firm Order Commitment) date.
  - The FOC date is NOT the date that a LEC technician will arrive at the office. It is the date that the LEC will complete its order and turn it over to EarthLink Business. Generally, the LEC will arrive on site 1 to 2 days prior to the FOC date.
  - The LEC has until 5pm local time to turn the circuit over to EarthLink Business on the FOC date.

## 6. EARTHLINK BUSINESS SITE ACTIVITIES - DATA

Several activities will occur at each office leading up to and including the day of the cut. These activities include:

- Circuit Installation
- MPLS Installation
- Service Transition

### 6.1 Initial Circuit Installation

At the time that EarthLink Business places an order for the services, we will receive a Firm Order Commitment (FOC) date for the delivery of the new circuit. The following tasks will occur once that FOC date is received:

- EarthLink Business will notify the The State of Florida project team of the dates for the FOC.

- The State of Florida will notify each individual office of the date when they can expect an LEC service technician to arrive. The LEC service technician may arrive several days prior to the FOC date.
- The FOC date is the date that the LEC turns the local loop over to EarthLink Business.

### 6.1.1 Circuit Installation Activities

1. A LEC technician will arrive on site one to two or more days prior to the FOC (Firm Order Commitment) date for the location.
2. The LEC technician will be asked to install the demarc next to the existing circuit. This may or may not actually occur.
3. If it is known at the time of the order placement that an extended demarc will be required, the order for the circuit will include this request. At this time, the LEC technician will extend the demarc to the PBX room.
4. The LEC will depart and EarthLink Business will be notified that the circuit is ready on the FOC date.
5. A EarthLink Business technician in Anniston, Alabama will test with the LEC to verify the circuit is good on the FOC date. This is called Loop Accept Testing.
    a. If the circuit is bad, the EarthLink Business technician and the LEC will determine where the problem is located.
    b. If the problem is located at the premise, the LEC technician will be dispatched for repair. The EarthLink Business technician will notify the project team that a LEC technician must be dispatched. The EarthLink Business project team will communicate this to the The State of Florida project team.
6. Once the circuit is accepted by EarthLink Business, the installation technician will notify the project team.
7. The project team will confirm with the pre-test technician that the circuit is ready for pre-testing. The pre-test will be scheduled a minimum of 15 days prior to the actual conversion.
8. The EarthLink Business Technician will install new CPE, if required, and pre-test the circuit. This pre-test will be to verify loop connectivity, IP continuity and speed verification.
    a. If the pre-test fails, the EarthLink Business technician will determine if it is a loop or layer 3 issue.
    b. If a loop problem exists, the LEC will be dispatched for repair.
9. Once the pre-test is complete and successful, the EarthLink Business technician will notify the project team.
10. The project team will finalize the conversion date and notify Superior of the date for the conversion.
11. The State of Florida may issue the Qwest disconnect to be effective a minimum of 14 days after the conversion.

## 6.2 MPLS Installation

After the loop is successfully accepted, EarthLink Business will contact the State of Florida to coordinate the establishment of an MPLS VPN. If The State of Florida will be providing CPE, EarthLink Business will work with the on-site State of Florida technician for provisioning the circuit.

The EarthLink Business technician will work with the installation group to establish MPLS routing and configure the appropriate QOS settings.

- EarthLink Business will notify The State of Florida of the date and time of the EarthLink Business MPLS installation.
- The State of Florida will prepare the office, applications and workstations to convert to EarthLink Business MPLS.

#### 6.2.1 MPLS Installation Activities

1. The on-site technician will locate the termination point for the circuit.
2. If the on-site technician is unable to establish an MPLS VPN:
    a. The technician will work with EarthLink Business installs to troubleshoot the circuit
        i. If it is determined that the circuit needs repair, then the ILEC will be dispatched.
        ii. If the trouble is isolated to a central office, then the circuit will be repaired remotely and installation will proceed normally.
    b. If it is determined that the circuit is not defective, the technician will work with the installation team to troubleshoot the MPLS configuration.
3. After the MPLS IPVPN is complete, The State of Florida will convert their existing data network to the EarthLink Business MPLS IPVPN.

### 6.3 Conversion

After a successful MPLS VPN pre-install

- The State of Florida will confirm that their existing applications work as before.
- The State of Florida will issue disconnect orders to their current provider.
- EarthLink Business will validate connectivity to the router for Managed Router Services

## 7. CONFIGURATION INFORMATION

### 7.1 IP Addressing

To be provided.

### 7.2 BGP Configuration (if applicable)

To be provided.

### 7.3 Application configuration (Applications by MPLS queue)

To be provided

## 8. MANAGED ROUTER SERVICE

One for the major concerns regarding a transition of services relates to network availability and advanced support. EarthLink Business has proposed the Managed Router Service (MRS) to alleviate The State of Florida's concerns. This service provides for the regional deployment of router spares. This service will provide customized monthly reporting and advanced analysis complete with recommendations.

# 9. IMPORTANT PROCESS NOTES / ASSUMPTIONS

## 9.1 Additional Sites

Additional sites may be added at any time. They will initially be added at the end of the schedule. Any sites added after the initiation of the project will be handled individually by the account team.

## 9.2 Conversion Delays

If for any reason, a conversion date changes, the new date cannot occur less than 10 business days from when the decision to delay is made.

## 9.3 Site Visits by 3rd Party Personnel

The State of Florida can expect 3rd party vendors to appear at each site during various phases of the project:

1. A LEC technician will make 1 or 2 visits for the LEC circuit installation during normal business hours
2. A EarthLink Business certified technician will arrive on-site for data service pre-testing during normal business hours
3. A technician will be on site for the data service conversion during the appointed data conversion time

# 10. PROJECT CONCLUSION

## 10.1 Billing Audits

- The billing cycle following the conclusion of the project, the audit of the first full month's billing will be presented to the State of Florida. Sandy Knight will verify that the bill has not deviated from previous audits and that all new locations were added.

## 10.2 Project Completion Signoff

Once the final bill audit has been completed, a final project meeting will be held signifying the completion of the project. During this meeting the completed project binder will be provided to the State of Florida and the project management team will no longer be involved in the account. Any new conversions will be handled individually by the account team.

## 10.3 Post Project Meeings

Following the conclusion of this project, the State of Florida has requested that regular monthly meetings be held with the account team. These meetings are to review the following:

1. Billing
2. Network Utilization and to make recommendations
3. Trouble tickets

| | Task Name | Duration | Start |
|---|---|---|---|
| 1 | Signed Contract | 1 day | Tue 5/3/11 |
| 2 | Send Site Survey Forms to ELNK Tech for | 23 days | Mon 5/9/11 |
| 3 | Host & Lab Circuits | 60 days | Mon 5/16/11 |
| 4 | Lab Testing | 5 days | Mon 8/8/11 |
| 5 | **Remote Conversions** | **102 days** | **Thu 6/9/11** |
| 6 | **Remote Order Forms to SoFL for Review** | **40 days** | **Thu 6/9/11** |
| 7 | Group 1 (6 locations) | 5 days | Thu 6/9/11 |
| 8 | Group 2 (25 locations) | 5 days | Thu 6/16/11 |
| 9 | Group 3 (25 locations) | 5 days | Thu 6/23/11 |
| 10 | Group 4 (25 locations) | 5 days | Thu 6/30/11 |
| 11 | Group 5 (25 locations) | 5 days | Thu 7/7/11 |
| 12 | Group 6 (25 locations) | 5 days | Thu 7/14/11 |
| 13 | Group 7 (25 locations) | 5 days | Thu 7/21/11 |
| 14 | Group 8 (25 locations) | 5 days | Thu 7/28/11 |
| 15 | **Remote Order Confirmations / Verification** | **45 days** | **Thu 6/16/11** |
| 16 | Group 1 (6 locations) | 5 days | Thu 6/16/11 |

# Ted R. Wengert

300 Satellite Blvd. NW ♦ Suwanee, Georgia 30024
Phone: (770) 349-4557 ted.wengert@corp.earthlink.com

## SUMMARY

Have over twenty years in the communications industry with over ten years in telecommunications as a Sales Engineer developing network solutions for large business customers.

## EXPERIENCE

**Senior Sales Engineer.** *EarthLink Business, Suwanee, GA* *July 2009 to present*

- Provide technical support for enterprise customers in the areas of pre-sale activities, design and analysis of products and services
- Worked with customer implementation team to order and install services

**Technical Sales Consultant.** *AT&T, Atlanta, GA* *Dec 2007 to Dec 2008*

- Performed technical designs of network solutions for large business customers including SONET rings, Metro Ethernet, OCn private line, MPLS, local and long distance services

**Sales Account Executive.** *AT&T, Atlanta, GA* *April 2007 to Dec 2007*

- Responsible for new sales and overall revenue responsibility of over 50 customers
- Identify voice and data needs through understanding the customer's business and effectively develop solutions to meet their needs

**Solution Sales Engineer.** *BellSouth, Atlanta, GA* *June 1999 to April 2007*

- Provide technical support for complex services to the sales team in the areas of pre-sale activities, design and analysis of products and services, and the determination of pricing and implementation requirements
- Extensive design and implementation experience with SONET (OC-3 to OC-48), ATM, DSL, DS-0 to DS-3, Frame Relay, MPLS, and Metro Ethernet

**Engineering Manager.** *Scientific-Atlanta, Norcross, GA* *May 1996 to June 1999*

- Managed an engineering group consisting of eight electrical engineers and two technicians. The Engineering group was responsible for the design of optical receivers, transmitters, and RF
  amplifiers for the delivery of cable television networks.

**Electrical Engineer.** *Scientific-Atlanta, Norcross, GA* *June 1990 to May 1996*

- Designed RF and Optical products used in the delivery of cable television networks. This included developing RF amplifiers and receivers.

## Education

Bachelor of Science, Electrical Engineering, May 1990
University of Illinois, Champaign, IL

Master of Science, Technology Management, May 1999
Mercer University, Atlanta, GA

# Mark D. Rider

Phone: (256) 283-3386 mark.rider@corp.earthlink.com

## SUMMARY

**Have over eleven years working at EarthLink Business performing Project Management, Product Management and Technical Consulting. I am the lead Project Manager for Enterprise type customers and am familiar with leading large projects installing voice, data, and internet services.**

**Education:** Bachelor of Arts from Oral Roberts University, Tulsa, OK., 1987-1990.

## Experience:

October, 2007 to present – EarthLink Business Sr. Sales Engineer

- As Sr. Applications Consultant I am primarily responsible for Project Management and solution selling. I interface with product development and engineering on new products, leading project teams within EarthLink Business for process enhancement, assisting marketing with creation of marketing materials, leading implementation teams for large customer implementations, and coordinating responses for large RFPs.
- Am the lead Project Manager for all EarthLink Business Enterprise projects. Project managed the conversion of local service at 200+ locations for a large financial institution as well as project managed the deployment of EarthLink Business's first SIP trunking customer.

October, 2005 to October 2007 – EarthLink Business Enterprise Product Manager

- As enterprise product manager I focused on development and deployment of products and product enhancements for customers billing $50,000 per month or more.
- Established and executed a two year product road map that would deploy a variety of new technologies into the network.
- Successfully coordinated with IT to deploy a toll free re-route web portal and toll free reporting portal
- Developed a roadmap for IT to deploy a comprehensive customer portal
- Successfully introduced and rolled out Ethernet based transport services for EarthLink Business in a product known as E-Line.
- Developed a referral partnership with a SAN vendor so that EarthLink Business could deploy a SAN service that included transport and equipment.
- Re-packaged the multi-link frame relay product as Data Connect 3.0 & 4.5 and INET 3.0 & 4.5, launched the MPLS Phase II product, initiated Ethernet services
- Maintained and grew my account base while performing product management responsibilities. My account base grew 20% during this time.

August, 1998 to October, 2005 – EarthLink Business Technical Consultant III

- As a technical consultant, I was responsible for working with account executives on creating designs for new prospects
- Telecommunications consultation, design and implementation for large accounts that utilize voice, data, VoIP, MPLS, VoATM, and satellite technologies
- Designed, implemented, and project managed 700+ node network for Regions Bank
- Developed, coordinated, and managed internal customer network optimization projects involving multiple departments.

January, 1997 to August, 1998 – Insol, Senior Consultant, Atlanta, Ga.

- Consultation, design, and implementation of LAN/WAN solutions
- Managed large-scale implementations

March, 1996 to January, 1997 – AlphaData, Senior Consultant, Atlanta, Ga.

- Consultation, design and post-sales implementation of LAN/WAN solutions
- Responsible for designing and implementing the Novell 4.x upgrade for Promina Health Systems, an upgrade project for 13 hospitals and the corporate headquarters

September, 1994 to March, 1996 – Ceridian Employer Services, TSR, Atlanta, Ga.

- Technical Support for Ceridian application on variety of platforms using a variety of technologies

# Sandy Knight

Phone: 205-380-3026 sandy.knight@corp.earthlink.com

## Operations Manual Overview

EarthLink Business is committed to creating satisfied customers. We believe in providing service excellence and we do that by treating our customers the way we want to be treated - with truthfulness, commitment and respect. Our employees are tenured telecommunications veterans who are self-motivated to do their job to the best of their ability. They gain great personal satisfaction from implementing networking solutions that truly solve our customer's needs and then effectively and efficiently maintaining those solutions throughout the lifecycle of the service.

The purpose of this document is to provide information that helps our customers easily do business with EarthLink Business. This document provides organizational contacts and operational procedures for service implementation, instances of maintenance or trouble, and billing resolution.

*All material provided herein is EarthLink Business (formerly Deltacom, Inc.) proprietary and confidential and is subject to NDA.*

## Your EarthLink Business National Account Team

Your account team is an experienced group of resources that will provide ongoing support for your services with EarthLink Business. Your account team contacts and their corresponding areas of support are outlined below.

**National Account Executive (NAE):** Your NAE is responsible for the overall management of your account and is considered the EarthLink Business account team leader, responsible for directing EarthLink Business account resources to provide you with the highest level of service possible. The NAE is the primary point of contact during the sales process and also provides additional consultation and proposals as needed.

Name: Bob West
Office number: 859-333-6066
Mobile number: 859-333-6066
E-mail address: bob.west@corp.earthlink.com

**Sales Engineer (SE):** Your SE is responsible for understanding your needs and providing network design and engineering assistance throughout the pre-implementation process and as new networking needs arise.

Name: Ted Wengert
Office Number: 770-349-4557
Mobile number: 404-402-8249
E-mail address: ted.wengert@corp.earthlink.com

**Client Service Representative (CSR):** Your CSR is closely aligned with your NAE and, as needed, can provide direct reach into all functional areas of EarthLink Business. The CSR responsibilities include assisting with order initiation, monitoring trouble tickets, and assisting with billing issues.

Name: Sandy Knight
Office number: 205-380-3026
Mobile number: 205-746-0354
E-mail: sandy.knight@corp.earthlink.com

*All material provided herein is EarthLink Business (formerly Deltacom, Inc.) proprietary and confidential and is subject to NDA.*

# EarthLink Business Service Implementation & Maintenance

**Service Implementation**

The information below provides an outline of the EarthLink Business service implementation process. This process is the most efficient way to submit your new service orders to EarthLink Business.

- Your NAE or CSR will provide you with the appropriate new service order form(s)
- Your Customer Service Representative (CSR) will coordinate requested service due date(s) with you. Due dates for multiple circuits or service types will be coordinated with the entire project scope in mind.
- The installation team will receive your order from your CSR and will begin working to meet your customer requested due date(s). Please note that installation requires a minimum timeframe of 72 hours prior to the customer requested due date for proper testing and verification.
- The CSR will contact you to coordinate date(s) and time(s) for your service installation.
- The EarthLink Business installation technician and the CSR will conduct testing with you and turn up service in correlation with your customer requested due date.

**Service Maintenance**

The information below provides an outline of the EarthLink Business service maintenance process. When you suspect a service outage or experience degradation of network performance, please utilize the following process.

- Please contact the 24X7 EarthLink Business Service Maintenance Center (SMC) at 1-888-482-3762).
- A EarthLink Business technician will create a ticket in Remedy, EarthLink Business's trouble ticket system, to track and monitor your issue through the resolution process.
- You will be asked to provide:
  - Customer name and location
  - Circuit identification or line number in trouble
  - Type of trouble with example (for example slow response, down hard, etc.)
  - Local contact name and phone number at the trouble location (our technician may need to correspond directly with this contact to isolate and troubleshoot your issue)
- The technician will coordinate trouble resolution by assessing the problem, troubleshooting within the EarthLink Business network, and if applicable referring the trouble to the appropriate LEC or OCC until resolution is reached. Internal escalations processes/timelines will be followed as necessary to ensure rapid resolution of your issue (see severity matrix).
- The technician will provide you with timely updates throughout the process and will close the ticket upon your confirmed satisfaction. Trouble severity will determine frequency of contact throughout the process (see severity matrix).

*All material provided herein is EarthLink Business (formerly Deltacom, Inc.) proprietary and confidential and is subject to NDA.*

**Service Implementation and Maintenance Contacts**

You can contact the EarthLink Business Service Maintenance Center at any time at 1-888-482-3762). The contacts below can also provide assistance should an escalation be necessary.

| Implementation and Maintenance Key Contact/Escalation List | | | |
|---|---|---|---|
| **Contact Name/Title** | **E-Mail Address** | **Office Phone** | **Mobile Phone** |
| Michelle Knockel, Mgr Implementation | Michelle.knockel@corp.earthlink.com | 256-264-2766 | 256-452-8589 |
| Tony Wood, Supervisor Service Delivery | tony.wood@corp.earthlink.com | 256-241-4425 | 256-453-6168 |
| Lee Whitney, Director Service Delivery | lee.whitney@corp.earthlink.com | 256-241-4438 | 256-504-0845 |
| Joe Haines, VP Service Reliability | Joseph.Haines@corp.earthlink.com | 256-241-7956 | 256-452-6774 |
| Jim O'Brien, EVP Network Operations | Jim.O'Brien@corp.earthlink.com | 256-382-3910 | 256-452-9128 |

*All material provided herein is EarthLink Business (formerly Deltacom, Inc.) proprietary and confidential and is subject to NDA.*

## Trouble Reporting Severity Matrix

The matrix below indicates the level of urgency and expected response for various service impacting events.

| Severity Level | Impact | Definition | Examples |
|---|---|---|---|
| Severity Level: 1 | Very High Impact | Catastrophic failure with critical impact on public safety beyond business functions. Requires immediate management attention and dedicated resources to resolve immediately. | • Major fiber cut (more than 10 T-1's).<br>• Backbone issues (HSSI and T-3 outage).<br>• DMS Switch hardware or software failures affecting multiple customers. |
| Severity Level: 2 | High Impact | Problems with critical impact to business function(s) or customer(s). Customer requires immediate management attention and dedicated resources to resolve as soon as possible. | • DS-1 outages.<br>• Customer can't dial any numbers.<br>• Customer can't receive any calls.<br>• No dial tone. |
| Severity Level: 3 | Medium Impact | Problems causing outage of service resulting in impact to business function(s) or customer(s). Impact justifies priority attention and application of resources to resolve in a timely manner. | • Data circuit outages. |
| Severity Level: 4 | Low Impact | Problems causing low impact to business function(s) or customer(s). Impact justifies resource allocation in accordance with normal managerial planning and prioritization. | • Customer can't dial a specific number.<br>• Intermittent problems.<br>• Customer feature not working.<br>• Fast busies when dialing specific numbers.<br>• Monitoring.<br>• 800, DAL, equal accesses, recordings.<br>• Circuit quality such as noise, echo, delays, and cross talk. |

*All material provided herein is EarthLink Business (formerly Deltacom, Inc.) proprietary and confidential and is subject to NDA.*

## Escalation / Notification Matrix

The matrix below indicates the expected notification intervals and response times for trouble tickets given their various levels of event severity.

| Severity Level: 1 Events | | | |
|---|---|---|---|
| **Level** | **Party** | **Notification Time** | **Receive Support** |
| First | SMC Lead Technician | Immediate | Immediate |
| Second | Manager | Immediate | Immediate |
| Third | Director | Immediate | 1 hr |
| Fourth | Network Vice President | Immediate | 2 hrs |
| Fifth | Executive Vice President | 4 hrs | 6 hrs |
| **Severity Level: 2 Events** | | | |
| **Level** | **Party** | **Notification Time** | **Receive Support** |
| First | SMC Lead Technician | Immediate | Immediate |
| Second | Manager | Immediate | Immediate |
| Third | Director | 1 hr | 1 hr |
| Fourth | Network Vice President | 2 hrs | 2 hrs |
| Fifth | Executive Vice President | 4 hrs | 6 hrs |
| **Severity Level: 3 Events** | | | |
| **Level** | **Party** | **Notification Time** | **Receive Support** |
| First | SMC Lead Technician | Immediate | 30 min |
| Second | Manager | Immediate | 1 hr |
| Third | Director | 2 hrs | 2 hrs |
| Fourth | Network Vice President | 4 hrs | 4 hrs |
| Fifth | Executive Vice President | 12 hrs | 12 hrs |
| **Severity Level: 4 Events** | | | |
| **Level** | **Party** | **Notification Time** | **Receive Support** |
| First | SMC Lead Technician | 1 hr | 1 hr |
| Second | Manager | 1 hr | 4 hrs |
| Third | Director | 2 hrs | 12 hrs |
| Fourth | Network Vice President | 4 hrs | None |

*All material provided herein is EarthLink Business (formerly Deltacom, Inc.) proprietary and confidential and is subject to NDA.*

## EarthLink Business Network Operations Center (NOC)

The Network Operations Center (NOC) is the surveillance team that monitors EarthLink Business's voice and data networks and Internal Environmental Alarms. The NOC operates 27X7X365 and a shift leader is available at all times.

### Customer Network Maintenance Notifications

The NOC is your point of contact to coordinate change management requests. In the event that you need to perform maintenance on equipment that may cause network alarms, please inform the NOC either by phone at 1-800-374-2350 or by email to TheNOCITCD@deltacom.com prior to taking action.

### EarthLink Business Change/Scheduled Maintenance

EarthLink Business will periodically require scheduled maintenance to the network. These changes will include software and hardware upgrades, installations and other maintenance to our network equipment. The EarthLink Business Network Operations Center (NOC) will notify your Sales Engineer and Client Service Representative via email with details of the pending scheduled maintenance. Your TC will then notify you in your pre-approved methodology.

EarthLink Business's standard maintenance window is 12:00AM through 6:00AM Central Standard Time.

### Expedited Change

Emergency maintenance is sometimes necessary to address an impacting event. The NOC will provide your SE and CSR with as much advanced notice as possible. Your SE will then notify you in a pre-approved methodology.

| Network Operations Center Key Contact/Escalation List | | | |
|---|---|---|---|
| Contact Name/Title | E-Mail Address | Office Phone | Mobile Phone |
| Tony Wood, Supervisor | Tony.Wood@corp.earthlink.com | 256-241-4425 | 256-453-6168 |

## Billing Options

Deltacom provides several flexible billing options, each tailored to your business needs and preferences. Pay via:

- Deltaview℠ at deltaview.deltacom.com
- Our Voice Response Unit (VRU) at 877.729.4823
- Recurring monthly draft at deltacom.com/payment_remittance.asp
- Check or money order. See deltacom.com/payment_remittance.asp for the address.

*Debit cards and credit cards (Visa, MasterCard and Discover) also accepted.*

## Invoice

All customers receive an Invoice Summary via mail informing them of their upcoming due date and a summary of charges due. For invoice details, Deltacom has two invoice options - Deltaview and Paper Invoice.

Payment is due on the date printed on your Invoice. If the printed due date falls on a weekend or federal holiday, payment is due on the prior business day. Late payment charges will apply if payment is received after the "Due By" date.

### Deltaview (formerly My Bill Online)

At Deltaview (deltaview.deltacom.com), you can view/pay your monthly invoice, create/check the status of a billing inquiry/service ticket, access online resources such as FAQs or equipment user guides, and view your Deltacom services and account details. Call Customer Care at 800.239.3000 for your PIN.

### Paper Invoice

Some businesses prefer invoices in a traditional, hard copy format. Deltacom provides a simple, easy to read detailed paper bill for these customers. An Account Maintenance Fee may apply for the cost of processing.

*Our Customer Care team is available to answer your questions or concerns Monday through Friday, 7 am - 6 pm CST, at 800.239.3000.*

## Public Utility Information

**Connecticut:** Either initially or upon dissatisfaction with our resolution of your complaint, you may notify the Department of Public Utility Control, Consumer Assistance, 10 Franklin Square, New Britain, CT 06051. The Department may also be reached toll free within Connecticut at 800.382.4586 or 860.827.2622 from out of state.
**Mississippi:** MPSC Utility ID# TC-123-1076-01
**Montana:** Montana Public Service Commission, PO Box 202601, Helena, MT 59620-2601 800.646.6150, (Fax: 406.444.7618)
**New Hampshire:** You may contact the NHPSC at 603.271.2431 or TDD 800.735.2964 for further assistance after first attempting to resolve a dispute with Deltacom.
**New Mexico:** You have the right to dispute your bill. Should you wish to do so, please call the Consumer Relations Division of the Commission at 888.427.5772. *Usted tiene el derecho de disputar su factura. Si desea disputar su factura, por favor pongase en contacto con el Departamento de Relaciones con el Consumidor de la Comision en el numero 888.427.5772.*
**Ohio:** If your questions are not resolved after you have called Deltacom, customers may call the Public Utilities Commission of Ohio (PUCO), toll free at 800.686.7826, or for TDD/TTY toll free at 800.686.1570, from 8 am to 5 pm weekdays, or visit the PUCO website at www.puco.ohio.gov. Residential customers may call the Ohio Consumers' Counsel (OCC), toll free at 877.742.5622 from 8:00 am to 5:00 pm weekdays, or visit the OCC website at www.pickocc.org.
**Texas:** If you believe your bill includes unauthorized charges, you may contact the Public Utility Commission of Texas, PO Box 13326, Austin, Texas 78711-3326, 512.936.7120 or toll-free in Texas at 888.782.8477. Hearing and speech impaired individuals with text telephones (TTY) may contact the commission at 512.936.7136.
**Washington:** You may view Deltacom's Price List at http://www.deltacom.com/terms_conditions.asp.
**West Virginia:** This Company is a utility regulated by the Public Service Commission of West Virginia.
**All States:** Nonpayment of services other than basic local service will not result in the termination of your basic local service. Failure to pay any remaining charges may result in the removal of these remaining services or further collection action. To initiate a billing or service inquiry, or an informal complaint, contact us at DeltaCom, Inc. Customer Care, P.O. Box 1301 Arab, AL 35016, 800.239.3000 (Fax: 256.264.9906) or CustomerResolution@deltacom.com.

# The Florida Legislature - ITN #851
## Appendix B - Respondent's Recommendation and Cost

### Instructions

**The Respondents must complete Appendix B – Respondent's Recommendation and Cost spreadsheets with proposed solutions and all inclusive Cost for each of the four network bandwidth options. Each spreadsheet is composed of the following six (6) sections:**

**1. Tallahassee Core** – Should include all costs associated with the OLITS-Managed & House OIT-Managed network services, with the exception of IPS/IDS.

**2. Internet Access Failover** - Internet Circuits in the Pepper Building and Capitol should allow failover to a separate Internet Service Provider.

**3. Commission on Ethics** – Should include all costs associated with providing the Commission on Ethics access to the Legislative MPLS Network.

**4. Wide Area Network** – Should include all costs associated with providing all district and satellite office's connectivity to the Legislative MPLS network for each of the four bandwidth options. This section must include all costs for Respondent managed customer premise equipment to include 16 network ports per district office and 8 ports per satellite office.

**5. Other Implementation Cost** – Should include any and all remaining costs not identified in the sections above.

**6. Intrusion Prevention / Intrusion Detection System (IPS/IDS)** – Optional Cost

Respondents may include optional services on the cost spreadsheets labeled Optional Services. These options will not be evaluated as components of the Cost response.

The Cost spreadsheets should indicate the total cost for each proposed network option for years one through four and total cost for renewal of the fifth and sixth year; and total cost for renewal of the seventh and eighth years.

### Spreadsheet Columns

| | |
|---|---|
| Service Address / Service | The location of the access circuit or a description of the service being proposed. |
| City, State, Zip | The city, state and zip of proposed access circuit or service proposed. |
| Exch | The telephone exchange for named service addresses. |
| Managed CPE Type | The proposed managed customer premise equipment (CPE). Each managed CPE type proposed must be identified in Appendix C – SLA Parameters. |
| Access Circuit Type | The proposed access circuit type. Each circuit access type proposed must be identified in Appendix C – SLA Parameters. |

| | |
|---|---|
| Bandwidth | The bandwidth proposed for the service address. Bandwidth for district offices must equal the minimum required for each option. |
| PVC CIR | If applicable, the Private Virtual Circuit Committed Information Rate must be included. If not applicable, indicate N/A. |
| Managed CPE One Time Cost | If applicable, all one time cost associated with the managed customer premise equipment (CPE). |
| Managed CPE MRC Cost | All monthly recurring charges (MRC) associated with the managed customer premise equipment (CPE). |
| Annual Managed CPE Cost (CPE MRC * 12) | Annual cost of the managed CPE equal to CPE MRC * 12. |
| Circuit One Time Cost | If applicable, all one time access circuit cost for the service address or service being provided. |
| Circuit MRC Cost | All monthly recurring charges (MRC) associated with the access circuit for the service address or service being provided. Include estimated Federal Fees MRC, WAN Port MRC, Local Loop MRC, and Management MRC as applicable. |
| Circuit Annual Cost (MRC * 12) | Annual circuit cost equal to Managed CPE Cost – MRC * 12 months. |
| 1st Year Total Cost (One Time + Annual Recurring) | A field for the first year total cost of service. Equals the sum of One Time Managed CPE Cost, Annual Managed CPE Cost, One Time Circuit Cost, and Annual Circuit Cost. |
| 2nd Year Total Cost (Not To Exceed) | A field for the second year total cost of service. |
| 3rd Year Total Cost (Not To Exceed) | A field for the third year total cost of service. |
| 4th Year Total Cost (Not To Exceed) | A field for the fourth year total cost of service. |
| 5th Year Total Cost | A field for the renewal of the fifth year total cost of service. |
| 6th Year Total Cost | A field for the renewal of the sixth year of total cost of service. |
| 7th Year Total Cost | A field for the renewal of the seventh year of total cost of service. |
| 8th Year Total Cost | A field for the renewal of the eighth year of total cost of service. |

EarthLink Business

Optional Available Services

| Secure Access on Internet Services | Description | MRC | One-Time |
|---|---|---|---|
| Secure Access on Internet Services | Secure Access | $103.95 | |
| Secure Access on Internet Services | Secure Access Setup Fee | | $250.00 |
| Secure Access on Internet Services | Secure Access Change Fee | | $50.00 |
| Secure Access on Internet Services | IP VPN dial user | $26.19 | |
| Secure Access on Internet Services | IP VPN dial (5-19) | $20.79 | |
| Secure Access on Internet Services | IP VPN (20+) | $18.32 | |
| Secure Access on Internet Services | IP VPN-Internet Dial | $26.19 | |
| Secure Access on Internet Services | IP VPN-Internet Dial (5-19) | $20.79 | |
| Secure Access on Internet Services | IP VPN-Internet Dial (20+) | $18.32 | |
| Secure Access on Internet Services | IP VPN Extranet Client | $29.34 | |
| Secure Access on Internet Services | IP VPN Extranet Client (5-19) | $24.09 | |
| Secure Access on Internet Services | IP VPN Extranet Client (20+) | $20.53 | |
| Secure Access on Internet Services | IPVPN ISDN DIAL | $52.50 | |
| Secure Access on Internet Services | IPVPN-INTERNET ISDN DIAL | $52.50 | |
| Secure Access on Internet Services | IPVPN DIAL 128K ISDN PKG 1 | $78.75 | |
| Secure Access on Internet Services | IP VPN Remote User Setup Fee | | $10.00 |
| Secure Access on Internet Services | IP VPN 800# (No MRC) | $0.00 | |
| Secure Access on Internet Services | IP VPN 800+ PIN Account | $7.87 | |
| Extended Wiring Fee | Standard non-plenum extension of cabling without building alterations or conduit | | $150.00 |
| Expedite Fee | Best Effort to improve LEC due date | | $1,500.00 |
| Move, Add and Cancellation fees | For DS1 circuits in service less then 12 months | | $1,661.00 |
| | For 3 MBPS circuits in service less then 12 months | | $2,461.00 |
| | For 6 MBPS circuits in service less then 12 months | | $4,061.00 |
| | For all circuits in service more then 12 months | | $0.00 |
| Configuration Changes | Simple router configuration changes | | $25.00 |
| 3G Wireless, 5 GB data Plan | | $125.00 | $299.00 |
| 3G Wireless, 10 GB data Plan | | $179.00 | $299.00 |

# The Florida Legislature - ITN #851
## Appendix B - Respondent's Recommendation and Cost

### Instructions

**The Respondents must complete Appendix B – Respondent's Recommendation and Cost spreadsheets with proposed solutions and all inclusive Cost for each of the four network bandwidth options. Each spreadsheet is composed of the following six (6) sections:**

**1. Tallahassee Core** – Should include all costs associated with the OLITS-Managed & House OIT-Managed network services, with the exception of IPS/IDS.

**2. Internet Access Failover** - Internet Circuits in the Pepper Building and Capitol should allow failover to a separate Internet Service Provider.

**3. Commission on Ethics** – Should include all costs associated with providing the Commission on Ethics access to the Legislative MPLS Network.

**4. Wide Area Network** – Should include all costs associated with providing all district and satellite office's connectivity to the Legislative MPLS network for each of the four bandwidth options. This section must include all costs for Respondent managed customer premise equipment to include 16 network ports per district office and 8 ports per satellite office.

**5. Other Implementation Cost** – Should include any and all remaining costs not identified in the sections above.

**6. Intrusion Prevention / Intrusion Detection System (IPS/IDS)** – Optional Cost

Respondents may include optional services on the cost spreadsheets labeled Optional Services. These options will not be evaluated as components of the Cost response.

The Cost spreadsheets should indicate the total cost for each proposed network option for years one through four and total cost for renewal of the fifth and sixth year; and total cost for renewal of the seventh and eighth years.

### Spreadsheet Columns

| | |
|---|---|
| Service Address / Service | The location of the access circuit or a description of the service being proposed. |
| City, State, Zip | The city, state and zip of proposed access circuit or service proposed. |
| Exch | The telephone exchange for named service addresses. |
| Managed CPE Type | The proposed managed customer premise equipment (CPE). Each managed CPE type proposed must be identified in Appendix C – SLA Parameters. |
| Access Circuit Type | The proposed access circuit type. Each circuit access type proposed must be identified in Appendix C – SLA Parameters. |

| | |
|---|---|
| Bandwidth | The bandwidth proposed for the service address. Bandwidth for district offices must equal the minimum required for each option. |
| PVC CIR | If applicable, the Private Virtual Circuit Committed Information Rate must be included. If not applicable, Indicate N/A. |
| Managed CPE One Time Cost | If applicable, all one time cost associated with the managed customer premise equipment (CPE). |
| Managed CPE MRC Cost | All monthly recurring charges (MRC) associated with the managed customer premise equipment (CPE). |
| Annual Managed CPE Cost (CPE MRC * 12) | Annual cost of the managed CPE equal to CPE MRC * 12. |
| Circuit One Time Cost | If applicable, all one time access circuit cost for the service address or service being provided. |
| Circuit MRC Cost | All monthly recurring charges (MRC) associated with the access circuit for the service address or service being provided. Include estimated Federal Fees MRC, WAN Port MRC, Local Loop MRC, and Management MRC as applicable. |
| Circuit Annual Cost (MRC * 12) | Annual circuit cost equal to Managed CPE Cost – MRC * 12 months. |
| 1st Year Total Cost (One Time + Annual Recurring) | A field for the first year total cost of service. Equals the sum of One Time Managed CPE Cost, Annual Managed CPE Cost, One Time Circuit Cost, and Annual Circuit Cost. |
| 2nd Year Total Cost (Not To Exceed) | A field for the second year total cost of service. |
| 3rd Year Total Cost (Not To Exceed) | A field for the third year total cost of service. |
| 4th Year Total Cost (Not To Exceed) | A field for the fourth year total cost of service. |
| 5th Year Total Cost | A field for the renewal of the fifth year total cost of service. |
| 6th Year Total Cost | A field for the renewal of the sixth year of total cost of service. |
| 7th Year Total Cost | A field for the renewal of the seventh year of total cost of service. |
| 8th Year Total Cost | A field for the renewal of the eighth year of total cost of service. |

EarthLink Business

Optional Available Services

| | Description | MRC | One-Time |
|---|---|---|---|
| Secure Access on Internet Services | Secure Access | $103.95 | |
| Secure Access on Internet Services | Secure Access Setup Fee | | $250.00 |
| Secure Access on Internet Services | Secure Access Change Fee | | $50.00 |
| Secure Access on Internet Services | IP VPN dial user | $26.19 | |
| Secure Access on Internet Services | IP VPN dial (5-19) | $20.79 | |
| Secure Access on Internet Services | IP VPN (20+) | $18.32 | |
| Secure Access on Internet Services | IP VPN-Internet Dial | $26.19 | |
| Secure Access on Internet Services | IP VPN-Internet Dial (5-19) | $20.79 | |
| Secure Access on Internet Services | IP VPN-Internet Dial (20+) | $18.32 | |
| Secure Access on Internet Services | IP VPN Extranet Client | $29.34 | |
| Secure Access on Internet Services | IP VPN Extranet Client (5-19) | $24.09 | |
| Secure Access on Internet Services | IP VPN Extranet Client (20+) | $20.53 | |
| Secure Access on Internet Services | IPVPN ISDN DIAL | $52.50 | |
| Secure Access on Internet Services | IPVPN-INTERNET ISDN DIAL | $52.50 | |
| Secure Access on Internet Services | IPVPN DIAL 128K ISDN PKG 1 | $78.75 | |
| Secure Access on Internet Services | IP VPN Remote User Setup Fee | | $10.00 |
| Secure Access on Internet Services | IP VPN 800# (No MRC) | $0.00 | |
| Secure Access on Internet Services | IP VPN 800+ PIN Account | $7.87 | |
| Extended Wiring Fee | Standard non-plenum extension of cabling without building alterations or conduit | | $150.00 |
| Expedite Fee | Best Effort to improve LEC due date | | $1,500.00 |
| Move, Add and Cancellation fees | For DS1 circuits in service less then 12 months | | $1,661.00 |
| | For 3 MBPS circuits in service less then 12 months | | $2,461.00 |
| | For 6 MBPS circuits in service less then 12 months | | $4,061.00 |
| | For all circuits in service more then 12 months | | $0.00 |
| Configuration Changes | Simple router configuration changes | | $25.00 |
| 3G Wireless, 5 GB data Plan | | $125.00 | $299.00 |
| 3G Wireless, 10 GB data Plan | | $179.00 | $299.00 |

# The Florida Legislature - ITN #851
## Appendix B - Respondent's Recommendation and Cost

### Instructions

**The Respondents must complete Appendix B – Respondent's Recommendation and Cost spreadsheets with proposed solutions and all inclusive Cost for each of the four network bandwidth options. Each spreadsheet is composed of the following six (6) sections:**

1. **Tallahassee Core** – Should include all costs associated with the OLITS-Managed & House OIT-Managed network services, with the exception of IPS/IDS.

2. **Internet Access Failover** - Internet Circuits in the Pepper Building and Capitol should allow failover to a separate Internet Service Provider.

3. **Commission on Ethics** – Should include all costs associated with providing the Commission on Ethics access to the Legislative MPLS Network.

4. **Wide Area Network** – Should include all costs associated with providing all district and satellite office's connectivity to the Legislative MPLS network for each of the four bandwidth options. This section must include all costs for Respondent managed customer premise equipment to include 16 network ports per district office and 8 ports per satellite office.

5. **Other Implementation Cost** – Should include any and all remaining costs not identified in the sections above.

6. **Intrusion Prevention / Intrusion Detection System (IPS/IDS)** – Optional Cost

Respondents may include optional services on the cost spreadsheets labeled Optional Services. These options will not be evaluated as components of the Cost response.

The Cost spreadsheets should indicate the total cost for each proposed network option for years one through four and total cost for renewal of the fifth and sixth year; and total cost for renewal of the seventh and eighth years.

### Spreadsheet Columns

| | |
|---|---|
| Service Address / Service | The location of the access circuit or a description of the service being proposed. |
| City, State, Zip | The city, state and zip of proposed access circuit or service proposed. |
| Exch | The telephone exchange for named service addresses. |
| Managed CPE Type | The proposed managed customer premise equipment (CPE). Each managed CPE type proposed must be identified in Appendix C – SLA Parameters. |
| Access Circuit Type | The proposed access circuit type. Each circuit access type proposed must be identified in Appendix C – SLA Parameters. |

| | |
|---|---|
| Bandwidth | The bandwidth proposed for the service address. Bandwidth for district offices must equal the minimum required for each option. |
| PVC CIR | If applicable, the Private Virtual Circuit Committed Information Rate must be included. If not applicable, indicate N/A. |
| Managed CPE One Time Cost | If applicable, all one time cost associated with the managed customer premise equipment (CPE). |
| Managed CPE MRC Cost | All monthly recurring charges (MRC) associated with the managed customer premise equipment (CPE). |
| Annual Managed CPE Cost (CPE MRC * 12) | Annual cost of the managed CPE equal to CPE MRC * 12. |
| Circuit One Time Cost | If applicable, all one time access circuit cost for the service address or service being provided. |
| Circuit MRC Cost | All monthly recurring charges (MRC) associated with the access circuit for the service address or service being provided. Include estimated Federal Fees MRC, WAN Port MRC, Local Loop MRC, and Management MRC as applicable. |
| Circuit Annual Cost (MRC * 12) | Annual circuit cost equal to Managed CPE Cost – MRC * 12 months. |
| 1st Year Total Cost (One Time + Annual Recurring) | A field for the first year total cost of service. Equals the sum of One Time Managed CPE Cost, Annual Managed CPE Cost, One Time Circuit Cost, and Annual Circuit Cost. |
| 2nd Year Total Cost (Not To Exceed) | A field for the second year total cost of service. |
| 3rd Year Total Cost (Not To Exceed) | A field for the third year total cost of service. |
| 4th Year Total Cost (Not To Exceed) | A field for the fourth year total cost of service. |
| 5th Year Total Cost | A field for the renewal of the fifth year total cost of service. |
| 6th Year Total Cost | A field for the renewal of the sixth year of total cost of service. |
| 7th Year Total Cost | A field for the renewal of the seventh year of total cost of service. |
| 8th Year Total Cost | A field for the renewal of the eighth year of total cost of service. |

# EarthLink Business

## Executive Briefing
## For
## The Florida Legislature

August 2011

Proprietary and Confidential

EarthLink® BUSINESS

# Meeting Agenda - items requested by OLITS

1. Draft Contract
2. Proposed SLA and Penalties
3. Detailed technical design of the network
4. Pricing including costs for:
   - Extended wiring
   - Expedite fees
   - Adds/Moves/Changes/Deletes
5. Proposed scheduling and sequencing for transition
6. Additional references for specific services

EarthLink® BUSINESS

# Network Requirements

Requirements were for a managed MPLS network with options for both OLITS and OIT utilizing a DS3 host and various remote speeds – 512K, T1, 2 X T1, and 4 X T1. Class of Service is required as are end to end SLA's. Additionally, internet DS3 circuits were required with two requirements:

a. The MPLS DS3 Host at OLITS can failover to the internet DS3 should the MPLS host fail.

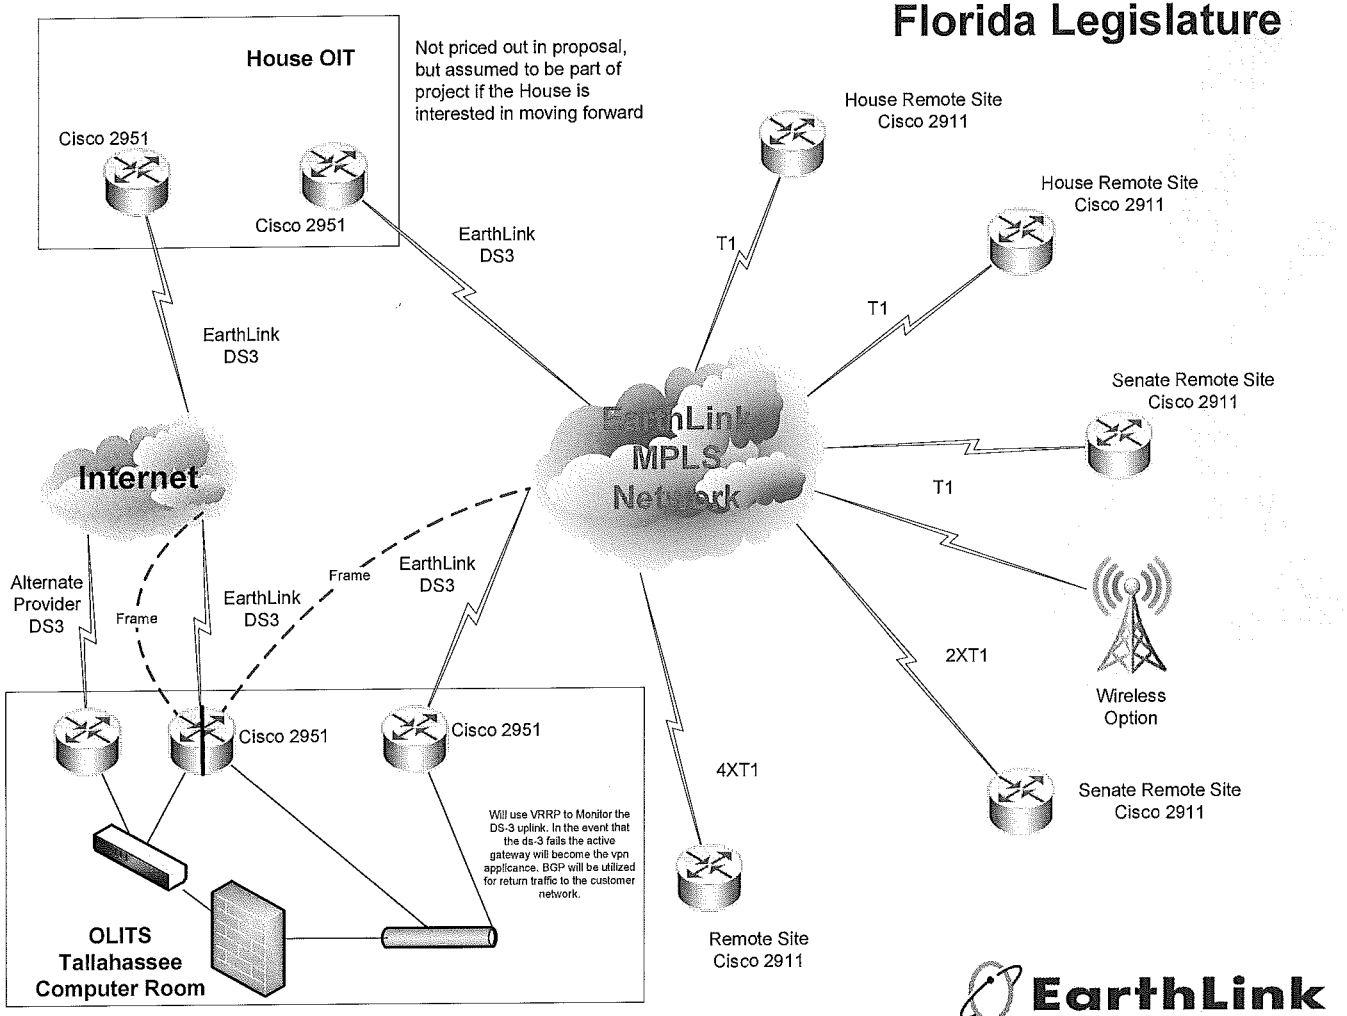
b. The internet DS3 can failover to a 2nd third party provider internet DS3.

EarthLink Business will meet those requirements by designing an MPLS network with managed router service, utilizing Class of Service, and capable of the meeting the failover requirements.

In addition, EarthLink Business is also offering a wireless solution for the quick turn up requirements mentioned in our last meeting. Our EVDO offering will allow a new Representative or Senator to obtain quick access to the network soon after an election.

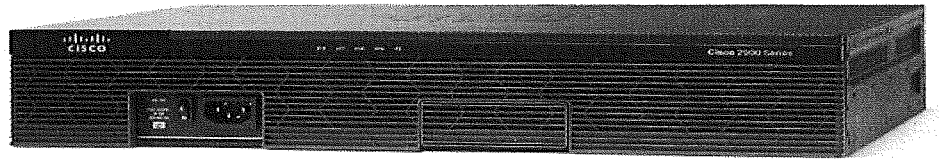
EarthLink BUSINESS

# Florida Legislature



EarthLink BUSINESS™

EarthLink® BUSINESS



**Cisco 2951- proposing that the Cisco 3925 replaces the 2951.**

The router originally quoted for the host DS3 is the Cisco 2951 configured with a DS3 module for the 45mbs circuit. Our engineers found a better router (Cisco 3925) that has more processing power and we can provide at no additional charge

**Cisco 2911**

The router to be deployed at the remotes is the Cisco 2911. The routers will be configured to support the office configurations on the next slide.

We will deploy the Cisco 2911 with one WAN port and the number of LAN ports specified in the RFP for each location.

EarthLink® BUSINESS

# Project Implementation

**Two Options for Project Implementation**

- Two separate OLITS and OIT projects
- One unified project

**For Two Individual Projects**

1. Approximately 53/132 offices to be installed
2. Approximately 53/62 per month
3. Approximately 16 per week
4. Approx. 4 per day (assumes 4 day conversion week avoiding Fridays).

**I. OLITS Start Date: 9/1/11 Finish Date: 12/28/11**

**II. OIT Start Date: 9/1/11 Finish Date: 1/25/12**

EarthLink® BUSINESS

# Project Implementation

**For One Unified Project**

1. Approximately 185 offices to be installed
2. Approximately 62 per month
3. Approximately 16 per week
4. Approx. 4 per day (assumes 4 day conversion week avoiding Fridays).

I. **Start Date: 9/1/11 Finish Date: 2/22/12**

EarthLink® BUSINESS

# SLA's and Penalties

**EarthLink Business agrees to the SLA's and penalties listed in the RFP Section 3.4.5 WAN Services and summarized in the table below**

| Access Circuit Types | Bandwidth | Availability | Latency (one way) | Jitter (one way) | MTTR | Installation |
|---|---|---|---|---|---|---|
| T1 | 1.5M | 99.99% | less than or equal to 27.5 ms | less than or equal to 10 ms | 4 hrs | 30 bus days |
| 2 X T1 | 3M | 99.99% | less than or equal to 27.5 ms | less than or equal to 10 ms | 4 hrs | 30 bus days |
| Ethernet | 3M | 99.99% | less than or equal to 27.5 ms | less than or equal to 10 ms | 4 hrs | 80 bus days |
| Ethernet | 6M | 99.99% | less than or equal to 27.5 ms | less than or equal to 10 ms | 4 hrs | 80 bus days |
| 4 X T1 | 6M | 99.99% | less than or equal to 27.5 ms | less than or equal to 10 ms | 4 hrs | 30 bus days |
| MPLS DS3 | 45M | 99.99% | less than or equal to 27.5 ms | less than or equal to 10 ms | 4 hrs | 45 bus days |
| Internet DS3 | 45M | 99.99% | less than or equal to 27.5 ms | less than or equal to 10 ms | 4 hrs | 45 bus days |

EarthLink® BUSINESS

# MSA – Contract

**We have supplied our MSA contract per OLITS' request. We have four potential options to consider:**

1. Use EarthLink Business MSA and attach RFP and associated pricing
2. Use EarthLink Business MSA with SLA's and associated pricing as attachments
3. Use Florida Legislature MSA and attach RFP and associated pricing
4. Use Florida Legislature MSA with SLA's and associated pricing as attachments

EarthLink® BUSINESS

# Pricing Addendum

EarthLink® BUSINESS

- Extended wiring fee - $150
- Expedite fee - $1500
- Move, add, change, & disconnect fees
    - Move fees waived on circuits installed more than 12 months or equal to the following fees if installed less than 12 months
        - $1,661 for T1, $2,461 for 3M, $4,061 for 6M
    - Add fees waived on circuits installed more than 12 months or equal to the following fees if installed less than 12 months
        - $1,661 for T1, $2,461 for 3M, $4,061 for 6M
    - Configuration changes - $100 per occurrence
    - Cancellation fees waived on circuits installed more than 12 months or equal to the following fees if installed less than 12 months
        - $1,661 for T1, $2,461 for 3M, $4,061 for 6M
- 3G Wireless, 5GB Plan MRC $125 and NRC $299
- 3G Wireless, 10GB Plan MRC $179 and NRC $299

EarthLink® BUSINESS

## Why EarthLink Business?

Met requirements of RFP – MPLS network with failover to internet and even offered additional wireless solution

Flexible and willing to work with the Florida Legislature to meet their needs

Excellent Customer Service

Dedicated Account Team

## What are the next steps to move forward?

## BULLOCK.SANDRA

# Clarifications For:

INVITATION TO NEGOTIATE (ITN)

ITN #851

FOR

**THE FLORIDA LEGISLATURE**

**NETWORK SERVICES**

ISSUE DATE:
June 24, 2011

**Response prepared by**

Response DATE:
July 11, 2011

| | |
|---|---|
| 3.2.5.1 | CofS Functionality – Description is not clear |

**Original Response:**

CoS Functionality: ***[Mandatory – Respondent must confirm compliance]*** MPLS Class of Service forwarding is required to be able to classify different types of traffic based on traffic filters, input interface, either DSCP or CoS values, MPLS labels, or any IP traffic pattern. Confirm Respondent's compliance with this mandatory and define how the Respondent's Managed MPLS VPN network classifies different types of traffic.

EarthLink Business will comply.

Earthlink Business supports marked packets via DSCP etc or can match and mark traffic based on a customers requirements such as protocol/port.

| | |
|---|---|
| 3.2.5.2 | No description of method for handling Forwarding Equivalency Classes (FEC). What are the DSCP values? |

**Original Response:**

Forwarding Equivalence Classes (FEC): ***[Mandatory – Respondent must confirm compliance]*** Minimum of four (FEC) are required. Respondent should describe the Respondent's FEC classes.

EarthLink Business will comply.

Earthlink Business supports up to 6 classes of service. There is a class of service for real-time, near real-time, mission critical, business critical, business, and best effort traffic.

**Clarification for 3.2.5.1 & 3.2.5.2:**

## MPLS SERVICE DESCRIPTION

Multi-Protocol Label Switching (MPLS) is a highly scalable, protocol agnostic, data-carrying mechanism. In an MPLS network, data packets are assigned labels. Packet-forwarding decisions are made solely on the contents of this label, without the need to examine the packet itself. This allows one to create end-to-end circuits across any type of transport medium, using any protocol. It provides the flexibility of IP addressing with the security and quality of service (QoS) of private access. MPLS is unique in several ways, but the most important difference for most of our customers is that it allows prioritization of data traffic at the packet level, even over ADSL.

EarthLink Business' MPLS network solution is a private, any-to-any, IP-based product that uses MPLS technology to transfer data between customer locations. Using the customers' tagging specifications, the Customer Premises Equipment (CPE) assigns a priority to various types of traffic, and New Edge honors that priority across the entire network.

The assigned priority is called Class of Service or CoS. The EarthLink Business MPLS product allows the customer to prioritize traffic into six different CoS with the choice of seven different profiles. These profiles can offer the customer to ability to customize and prioritize their voice, video and data applications while consolidating all traffic types in a single network. We offer a competitive Service Level Agreement (SLA) for higher classes of traffic.

EarthLink Business can also provide Class of Service (CoS) on ADSL. This will allow customers who need CoS on their ADSL connection. Six classes of service are available on ADSL with upload speeds greater than 512kbps. Less than 512kbps is limited to two classes of service, real-time and best effort.

EarthLink Business can also provide private wireless access to the MPLS network. This new access medium allows for the quick deployment of locations, offers a cost effective alternative to T-1 access, and provides for greater parity when used in a back-up configuration with existing high speed access. Wireless access is best effort and does not support CoS.

**Six Classes of Service**

- C5 – Real-time (VoIP, jitter-sensitive applications) – DSCP 40, 46, 48, 56
- C4 – Interactive (Interactive video) – 32, 34, 36, 38
- C3 – Premium (Mission-critical business systems) - DSCP 24, 26, 28, 30
- C2 – Business (Internet access) – DSCP 16, 18, 20, 22
- C1 – Standard (Bulk data) – 8, 10, 12, 14
- C0 – Best Effort – DSCP 0

**Seven Standard Profile offerings**

Based upon percentage of CoS0-5 distribution, when Frame T1 access is used, the maximum C1 designation for that location is 50% of traffic.

| | CoS5 | CoS4 | CoS3 | CoS2 | Cos1 | CoS0 |
|---|---|---|---|---|---|---|
| Profile 1 | 100% | 0 | 0 | 0 | 0 | 0 |
| Profile 2 | 75% | 15% | 5% | 5% | 0 | 0 |
| Profile 3 | 50% | 25% | 15% | 10% | 0 | 0 |
| Profile 4 | 25% | 50% | 15% | 10% | 0 | 0 |
| Profile 5 | 20% | 20% | 20% | 20% | 20% | 0 |
| Profile 6 | 0 | 75% | 15% | 10% | 0 | 0 |
| Profile 7 | 75% | 25% | 0 | 0 | 0 | 0 |

| | |
|---|---|
| 3.2.8.1 | Description indicates Earthlink can do either Load Balancing or Fault Tolerance (failover) but not both. Load balancing cannot be provided unless both access circuits are purchased from Earthlink. |

**Original response:**

Fault-Tolerance: ***[Mandatory – Respondent must confirm compliance]*** The Legislature requires fault-tolerance in the core network and for the Legislature's web

services such as might be provided by backup tunnels. Respondent must describe its approach to fault-tolerance.

Fault-Tolerance must also include rerouting and load balancing the Legislature's public web services to a secondary Internet circuit should the primary Internet circuit fail or become overwhelmed.

EarthLink Business will comply.

Load balancing can be supported if both access circuits are purchased from Earthlink Business and provisioned off the same PE router and CPE router. However this approach removes all hardware redundancy. A non-load balanced fault tolerant approach can utilize multiple diverse loops provisioned between separate POPs and different CPE. Upon award, our engineers will design the best solution to meet the needs of OLITS and OIT.

**Clarification:**

EarthLink supports BGP routing for Internet circuits. Should 2 Internet circuits be purchased from 2 different providers, EarthLink cannot guarantee true load balancing. However, our engineers will assist the State in configuring BGP for load sharing utilizing the maxpaths statement. Since BGP will choose the best route, true load balancing cannot be achieved when two ISPs are utilized. However, BGP can provide fault tolerance with its ability to re-route in the event of a failure of one of the circuits.

If the State chooses to purchase both circuits from EarthLink, load balancing can be more closely achieved by provisioning both circuits from the same PE to the same CPE. However, this approach removes fault tolerance. Greater fault tolerance can be achieved by provisioning geographically diverse circuits between POPs and the data center. If the service is provisioned from two different PEs, BGP will only provide load sharing since it will select the best path.

| | |
|---|---|
| 3.2.9.1 | Insufficient detail to evaluate. |

**Original Response:**

Signaling Protocols: ***[Mandatory – Respondent must confirm compliance]*** The Legislature requires that the proposed solution support signaling protocols including but not limited to the most currently approved versions of Session Initiation Protocol (SIP), H.323, H.264, Media Gateway Control Protocol (MGCP), and H.248/Megaco. SIP and H.323 use RTP to transport real-time transmission of multimedia data over network services. Real Time Protocol (RTP), Real Time Control Protocol (RTCP), and Real Time Streaming Protocol (RTSP) transport and manage the real-time transmission of multimedia data over network services. List the protocols Respondent intends to support. List and describe any non-standard protocols or extensions.

EarthLink Business will comply.

Earthlink Business supports the routing of unicast IPv4 packets. All protocols within IPv4 are supported.

**Clarification:**

All protocols listed are unicast protocols that are functions of the higher layers in the OSI model above the network layer. EarthLink seamlessly transports IPv4 unicast packets at the network layer in the OSI model. All other protocols contained in the higher layers (Application, Presentation, Session, and Transport layers) are passed without disruption and are invisible to EarthLink PEs. The State will be provided with MPLS configuration options that will allow certain higher layer protocols to be transported with a higher priority allowing the real-time protocols to be transported in real-time.

| | |
|---|---|
| 3.2.10.2 | Not responsive. Does not address the question. |

**Original Response:**

CODECs: ***[Mandatory – Respondent must confirm compliance]*** In order to support the Legislature, the network solution is required to support standard CODECs. Standard compression/decompression (CODEC) techniques, with their respective mean opinion scores (MOS), include but are not limited to G.711 – 4.3 MOS, G.729 – 4.0 MOS, G.723 3.8 MOS and h.264. What CODECs does Respondent's solution support? Responses should include descriptions of any non-standard protocols or extensions.

EarthLink Business will comply.

EarthLink Business supports all protocols routed within IPv4 packets. This includes those mentioned above.

**Clarification:**

It is EarthLink's understanding that the State will be providing the Voice solutions via State owned and operated Cisco Call Managers. As such, the protocols listed are higher layer protocols within the OSI model and are passed without modification.

If the State were to choose to purchase voice services from EarthLink Business, such as SIP Trunking, detailed configuration options would be provided. Our SIP Trunking production only supports G.711 and G.729.

| | |
|---|---|
| 3.2.13.2 | Configuration options were not defined. |

**Original Response:**

Alternate Internet Access: *[Mandatory - Respondent must confirm compliance]* In order to provide protection against failures and emergencies, and to ensure business continuity, the Legislature requires Internet connections be fault tolerant and available. Respondent should identify configuration options to increase the resiliency of the Internet access services with preferably an alternate Internet backbone from a separate Internet Service Provider.

EarthLink Business will comply.

BGP can be used to protect network reachability in the case of circuit failure. Earthlink peers with multiple transit providers to automatically re-route in the case of failure to another upstream provider.

**Clarification:**

Routing involves two basic activities: determination of optimal routing paths and the transport of packets through an internetwork. To utilize multiple providers the BGP protocol is implemented. The primary function of a BGP system is to exchange network-reachability information, including information about the list of autonomous system paths, with other BGP systems. This information can be used to construct a graph of autonomous system connectivity from which routing loops can be pruned and with which autonomous system-level policy decisions can be enforced. Each BGP router maintains a routing table that lists all feasible paths to a particular network. The router does not refresh the routing table, however. Instead, routing information received from peer routers is retained until an incremental update is received Peer routers in these systems use BGP to maintain a consistent view of the internetwork topology. In this case BGP would be implemented to monitor multiple Internet providers and used to maintain Internet Service connectivity.

To improve fault tolerance, EarthLink recommends the State select one of the two configuration options:

1. To geographically and physically diverse access loops provisioned out of two geographically diverse POPs within the EarthLink network. This option may incur additional construction fees. BGP will be utilized to determine which circuit is active and which is not.
2. Two separate Internet loops from two separate Internet providers. Both loops should be geographically diverse from each other. BGP will be utilized to determine which circuit is active and which is not.

|---|---|
| 3.2.14.2 | No description of options, methods, techniques or protocol/processes |

**Original Response:**

Security Threats CPE: ***[Mandatory - Respondent must confirm compliance]*** The Respondent is required to work with the Legislature to address security threats at the CPE port level. This includes authentication, authorization and accounting of end devices/users. Describe how this will be addressed.

EarthLink Business will comply. EarthLink Business will work directly with the State of Florida to establish processes and procedures around access to managed CPE.

**Clarification**

At this time EarthLink does not allow any customers to access CPE provided by EarthLink. Strict security controls are maintained so that only EarthLink personnel have access to the CPE. Furthermore, EarthLink does not monitor LAN access at customer locations. Since the State is requesting EarthLink to provide access to the CPE by State employees and the State is asking EarthLink to monitor LAN access, EarthLink will work with the state in developing a solution and the processes since processes do not exist for this solution. EarthLink will provide access to our security engineering team to develop these.

| | |
|---|---|
| 3.3.2.1 | Need further explanation |

**Original Response:**

3.3.2.1 Technology Refresh: ***[Mandatory - Respondent must confirm compliance]*** Describe how technology refresh will be addressed in support of the Managed MPLS VPN for data, VoIP, multimedia services and CPE managed by Respondent. Include hardware upgrades or replacement, modifications to CPE IOS, modifications to routers and switches that support the Managed MPLS VPN.

EarthLink Business will comply.

Technology refreshes are handled by our Enterprise support team or an automated update from our server, which occur during off-peak hours (12 a.m. to 6 a.m.). Hardware upgrades would be ordered through the dedicated Enterprise account team.

**Clarification:**

As a matter of standard operating procedures, EarthLink Business will only upgrade CPE IOS when new security threats are discovered, significant service disrupting bugs are discovered, or a customer makes a specific request for access to functionality not currently provided. Prior to any IOS upgrade, significant lab testing is conducted.

When the EarthLink engineering team determines that an IOS upgrade is warranted, the account teams will contact affected customers and determine a roll out plan to minimize disruption. This conversation will include the justifications for the upgrade.

Hardware upgrades are only performed when the manufacturer has determined that the current platform has reached its end of life and will no longer be supported. Customers who require an upgrade to hardware due to a desire for additional functionality may request an upgrade for an additional cost. In either case, hardware replacement will be performed according to a plan that is dictated by the affected customers. The account team will work with the State on the roll out plan.

| | |
|---|---|
| 3.3.2.2 | Does not address any security risks. How are hardware, software, firmware and configuration security refreshed? |

**Original Response:**

Security Technology Refresh: ***[Mandatory - Respondent must confirm compliance]*** The Legislature requires that the Respondent manage and operate within manufacturers' security requirements across the entire Managed MPLS VPN for the life of the contract. Describe management of the Managed MPLS VPN from a security refresh standpoint.

EarthLink Business will comply.

Refer to procedure described in 3.3.2.1.

**Clarification:**

See clarification for 3.3.2.1.

Additionally, as a matter of standard processes, the EarthLink security engineering team monitors all security threats and manufacturer suggested modifications / IOS upgrades. We are constantly performing security testing in our labs and only deploy IOS upgrades when warranted.

| | |
|---|---|
| 3.3.7.1 | Need further explanation |

**Original Response:**

Configuration Management: ***[Mandatory - Respondent must confirm compliance]*** The Respondent is required to describe any system or application proposed for Configuration Management of Respondent-Managed CPE configurations. Describe how the systems and applications operate. Describe procedures and methodology associated with configuration management.

EarthLink will comply.

This is done with an automated process:

1. The server establishes a connection to the remote host. Generally this is done via telnet, but can also be done via ssh, http, https, depending on the capability and services running on the remote host.

2. Once the connection is established and the server successfully authenticates on the remote host; it runs the necessary commands to obtain the configuration of the host and then stores the configuration data in a buffer.

3. The configuration data is then validated by checking basic qualifiers such as an EOF marker and/or other methods to verify we have received all of the data needed.

4. The validated configuration data is then written to a MySQL database and verified that it was properly stored.

**Clarification:**

Prior to the steps listed above, Earthlink provisioning technicians will pre-configure the routers prior to shipping to customer site. The configuration is deployed on the router by the onsite installation technician. Any site specific changes to the configuration will be tweaked during test and turnup. Then the configurations are stored per steps above.

| | |
|---|---|
| 3.3.7.2 | Need further explanation |

**Original Response:**

Configuration Records: ***[Mandatory - Respondent must confirm compliance]***The Legislature requires that current and accurate configuration records be kept for Managed MPLS VPN access and CPE managed by the Respondent at all locations found in Appendix A. Respondent must describe its approach to maintaining these records and how access will be provided to these configuration records by the Legislature.

EarthLink Business will comply.

See 3.3.7 above.

**Clarification:**

At this time EarthLink does not allow any customers to access configurations managed by EarthLink. Strict security controls are maintained so that only EarthLink personnel have

access to the configurations. Since the Florida Legislature is requesting EarthLink to provide access to the configurations by their employees, EarthLink will work with the state in developing a solution and the processes since processes do not exist for this solution.

| | |
|---|---|
| 3.3.7.3 | Describe retention policy and depth of versions. |

**Original Response:**

Archiving Configuration Information: ***[Mandatory - Respondent must confirm compliance]*** The Legislature requires that all CPE configurations be archived on a regular basis. Describe the process and frequency proposed. Describe the policies affecting the retention periods and the depth of versions kept to include restoration testing. Clearly distinguish between transport and CPE configurations.

EarthLink Business will comply.

See 3.3.7 above.

**Clarification:**

Currently EarthLink Business backs up CPE configs on a monthly basis and stores the most current data on servers located in our NOC data centers. As an additional measure of safety, CPE configs are backed-up any time a CPE config change is made. EarthLink Business would be willing to work with the State of FL to adjust the back-up frequency based on the requirements from the State of FL.

CPE configs could be restored within thirty (30) minutes based on opening a trouble ticket with our enterprise support team provided we have network connectivity.

| | |
|---|---|
| 3.3.10.10 | No ability for the Legislature to produce ad hoc reports. Ad hoc reports can only be run by Earthlink. |

**Original Response:**

Trouble Ticketing System Reports ***[Mandatory - Respondent must confirm compliance]***: The Trouble Ticketing System is required to be able to produce both scheduled and ad hoc reports and provide web browser access for the Legislature. Provide screenshots of standard reports. Describe creation of ad hoc reports with the Trouble Ticketing System.

EarthLink Business will comply.

Deltaview provides scheduled reports, accessible by web browser. Any requests for ad hoc reports are channeled through the account team.

**Clarification:**

The EarthLink online reporting portal does not have the capability at this time to allow customers to create their own ad hoc reports. EarthLink will be willing to work with the State to determine the requirements for this capability and develop a portal for this function. However, until that is developed, the account team is able to submit requests to internal DB admins to generate reports not currently available. If the State has a specific report or report format required at specific intervals, this can be developed and delivered as a standard report.

| | |
|---|---|
| 3.5.2.1 | Need description of process or method. |

**Original Response:**

Rates: ***[Mandatory – Respondent must confirm compliance]*** The Legislature requires that the cost, rates and terms offered to the Legislature during the renewal terms of the Contract is at least as favorable as the cost, rates and terms offered to Respondent's similarly situated users. Describe Respondent's approach for keeping the Legislature's cost, rates and terms at least as favorable as those offered to Respondent's other users.

EarthLink Business will comply.

**Clarification:**

EarthLink Business continually reviews market pricing for the services it offers. New technologies, standard operation practices and techniques are continually peer reviewed for their application into the services offered by EarthLink Business. Business decisions are made based on the core company beliefs and as directed and approved by the management team that trigger such process improvements or technology upgrades. These efficiencies, as they are implemented, drive down the cost of providing services and flow through to the portfolio of products offered. As other responses for service requests are received, the account team reviews the desired offering with an internal team who manages the company response to such requests. This meeting reviews any floors established by company directives and considers the situations of each customer needs to avoid any conflicts in terms, conditions, services, offerings made to similarly situated prospects.

| | |
|---|---|
| 3.5.2.2 | Need description of process or method for how rates are reviewed for competitiveness. |

**Original Response:**

Competitive Market: ***[Mandatory – Respondent must confirm compliance]*** The Legislature requires that the cost, rates and terms offered to the Legislature during the renewal terms of the Contract remains competitive with the cost, rates and terms offered in the market. Describe how Respondent will keep cost, rates and terms competitive.

EarthLink Business will comply.

**Clarification:**

EarthLink Business continually reviews market pricing for the services it offers. New technologies, standard operation practices and techniques are continually peer reviewed for their application into the services offered by EarthLink Business. Business decisions are made based on the core company beliefs and as directed and approved by the management team that trigger such process improvements or technology upgrades. These efficiencies, as they are implemented, drive down the cost of providing services and flow through to the portfolio of products offered. As other responses for service requests are received, the account team reviews the desired offering with an internal team who manages the company response to such requests. This meeting reviews any floors established by company directives and considers the situations of each customer needs to avoid any conflicts in terms, conditions, services, offerings made to similarly situated prospects.

| | |
|---|---|
| 3.6.1.8 | No policy or procedures listed. |

**Original Response:**

Inventory: ***[Mandatory - Respondent must confirm compliance]*** Respondent is required to maintain a current and accurate inventory that would incorporate all the items to include, but not limited to: Circuit ID, IP, CPE IOS, CPE configuration archive, service address, on-site contact information and access circuits. The Respondent must provide inventory information to the Legislature on a regular basis and on request. The Respondent must maintain a current copy of inventory to include service items once the deployment of Managed MPLS VPN services begin. Inventory information must be available for secure viewing via web browser as well as in spreadsheet format. Provide the policies and procedures around this requirement.

EarthLink Business will comply.

The State will work with the account team on designing the report required and the frequency of delivery.

**Clarification:**

At this time this requirement is not part of a current offering provided by EarthLink. However, EarthLink views this requirement as one that can easily

be supported. The account team will work directly with the State to develop the policy and procedures for this inventory report so that it meets the specifications of the State.

| | |
|---|---|
| | No CPE cost provided. |

**Clarification:**

This is correct. The pricing model utilized does not provide CPE cost as a separate line item. Our Managed CPE cost was included in the MRC in the Circuit Management column.

## SECTION 1: GENERAL INFORMATION

### 1.1 Introduction

The Florida Legislature (Legislature) intends to obtain competitive sealed responses to upgrade and improve the Legislature's Wide Area Networks and Internet services. The successful Respondent will be required to provide service as described in the Scope of Services, Section 3 of this ITN.

The successful Respondent must be a Primary Multi-Protocol Label Switching (MPLS) Provider or any State of Florida Agency Contract offering for Managed MPLS Service.

### 1.2 Objective

The Legislature is seeking responsible Respondents to provide network services as described in the Scope of Services, Section 3 of this ITN. The goal is to provide greater access and reduce the Legislature's overall communication cost.

The Legislature will cooperate fully with the successful Respondent in providing any information which is maintained by the Legislature that is necessary for the successful Respondent to perform assigned tasks.

### 1.3 Mandatory Pre-Response Conference

A Mandatory Pre-Response Conference will be held at 2:00 pm, March 8, 2011, in the Claude Pepper Building, 111 West Madison Street, Room G01, Tallahassee, Florida 32399-1400.

**Only respondents in attendance will be eligible to submit a response for these services.**

### 1.4 Questions/Inquiries

Questions for additional information or clarification may be submitted in writing (by mail, hand-delivery, email to bullock.sandra@leg.state.fl.us or by FAX to 850/414-1909) and received no later than March 11, 2011.

All questions should be addressed as follows:

**QUESTIONS ITN #851**
**NETWORK SERVICES**

Written responses to all questions will be posted on the website at www.leg.state.fl.us/ITN851 on the date listed in the Schedule of Events, Section 1.8.

**It is the responsibility of each Respondent to monitor the website at www.leg.state.fl.us/ITN851 for new and changing information.**

### 1.5 Submission of Responses

Sealed responses are to be submitted to the Office of Legislative Services (OLS) Purchasing Office, Room 880, Pepper Building, 111 W. Madison St., Tallahassee, FL 32399-1400 on or before March 31, 2011, **by 3:00 P.M.**

All responses must be submitted on forms furnished herein and as required by Evaluation, Section 5 of this ITN. Responses shall be properly executed in the name of and by the person, firm, or corporation submitting the response.

Responses must be returned in a sealed envelope indicating the date, time of response opening, response title, and ITN number.

Responses must be submitted in two **separate** sealed parts: a **Technical Response** and a **Cost Response,** due on or before March 31, 2011, **by 3:00 p.m.** Response packages must be boxed or sealed and identified as follows:

- Name of Vendor (Your Company's Name and any subcontracting entity)
- Type of Response: (Technical Response or Cost Response)
- ITN #851, Network Services

**The Technical Response must not contain any cost information.**
It shall be the sole responsibility of the Respondent to see that his or her response is received at the proper location on or before the stated time of response opening. All responses received after that time shall be returned unopened.

Note: A person or affiliate who has been placed on the convicted vendor list following a conviction for a public entity crime may not submit a response on a contract to provide goods or services for a period of 36 months from the date of being placed on the convicted vendor list.

**1.6 Opening of Responses**

Sealed responses will be opened by the OLS Purchasing Office of the Legislature in Room 880, Pepper Building, 111 West Madison Street, Tallahassee, FL 32399-1400 at **3:00 PM, March 31, 2011.** All responses are subject to the conditions specified herein.

**The Legislature reserves the right to waive any minor irregularities or technicalities in any responses received, to cancel any request or reject any or all responses in whole or in part, with or without cause, to solicit new responses or to accept the response which, in its judgment, will be in the best interest of the Legislature.**

**1.7 ITN Coordinator**

All Respondents' communications concerning this ITN, including but not limited to the "QUESTIONS/INQUIRIES", must be directed to the ITN Coordinator of the OLS Purchasing Office listed below. Unauthorized contact regarding this ITN with other Legislative employees may result in disqualification. Any oral communications will be considered unofficial and non-binding to the Legislature. Respondents should reply only in writing (mail, hand-delivered, email or fax) to the following:

Sandra Bullock
Office of Legislative Services
Purchasing Office
Room 880, Claude Pepper Building
111 West Madison Street
Tallahassee, FL 32399-1400
FAX (850) 414-1909
bullock.sandra@leg.state.fl.us

## 1.8 Schedule of Events

| | |
|---|---|
| Issuance of ITN | February 25, 2011 |
| Mandatory Pre-Response Conference | March 8, 2011, 2:00 p.m. |
| Last date to submit written questions | March 11, 2011 |
| Written responses to all questions posted On website at www.leg.state.fl.us/ITN851 (on or about) | March 17, 2011 |
| Responses due by 3:00 p.m. for opening (fax or email **not** acceptable) | March 31, 2011 |
| Anticipated review and evaluation of Technical and Cost responses completed | April 19, 2011 |
| Notification to the Respondents to begin Negotiations | April 26, 2011 |
| Contract negotiated and executed by the Parties (on or about) | May 3, 2011 |

Special Accommodation: Any person requiring a special accommodation because of disability should call the Purchasing Office at 850/488-2322 at least five (5) work days prior to the response opening date. If you are hearing or speech impaired, please contact the Purchasing Office by using the Florida Relay Service which can be reached at 1-800-955-8771 (TDD).

## 1.9 Contract Period and Final Contract Award

The contract term will begin upon completion of negotiations and execution of the contract between the Legislature and the Service Provider. The Legislature anticipates that the initial term of this contract will be four years from the Effective Date.

There may be up to (two) two-year renewals of the term at the discretion of the Legislature. Renewals are not guaranteed and are contingent upon funding and performance of the Service Provider.

The award will consist of this ITN, any addenda to this ITN, the successful Respondent's response to this ITN, the contract, any purchase order(s) issued as a result of this ITN, and such other terms and conditions agreed between the parties that may be necessary to the Legislature.

## 1.10 Contract Cancellation

This award may be canceled by the Legislature with 30 days advance written notice to the Service Provider. In the event an award is terminated by such notice from the Legislature, the Service Provider will be paid for services provided through the date of termination. Notice will be sufficient if it is hand-delivered personally, mailed by certified mail, or sent via courier service to the Service Provider.

## 1.11 Warranties

The Respondent represents that it is professionally qualified and possesses the requisite skills, knowledge, qualifications and experience to provide the required services specified. The following are warranty certification requirements that must be certified in writing (Appendix I) in the Administrative Documents Required (Section 4). If the Respondent cannot so certify to any of the following, the Respondent must submit with its Response a written explanation of why it cannot do so within the Administrative Documents Required.

**1.11.1** The Respondent or any other organization associated with the ITN is not currently under suspension or debarment by the State or any other governmental authority.

**1.11.2** To the best knowledge of the person signing the Response, the Respondent, its affiliates, subsidiaries, directors, officers, employees of any other organization associated with this ITN are not currently under investigation by any governmental authority and have not in the last ten years been convicted or found liable for any act prohibited by law in any jurisdiction involving conspiracy or collusion with respect to bidding on any public contract.

**1.11.3** To the best knowledge of the person signing the Response, the Respondent, its affiliates, subsidiaries, directors, officers or any other organization associated with this ITN have no delinquent obligations to the State, including a claim by the State for liquidated damages under any other contract.

**1.11.4** To the best knowledge of the person signing the Response, the Respondent, its affiliates, subsidiaries, directors, officers or any other organization associated with this ITN have not within the preceding three years been convicted of or had a civil judgment rendered against them or is presently under indictment for or otherwise criminally or civilly charged for commission of fraud or a criminal offense in connection with obtaining, attempting to obtain or performing a federal, state, or local government transaction or public contract; violation of federal or state antitrust statutes; or commission of embezzlement, theft, forgery, bribery, falsification or destruction of records, making false statements, or receiving stolen property.

**1.11.5** To the best knowledge of the person signing the Response, the Respondent, its affiliates, subsidiaries, directors, officers or any other organization associated with this ITN have not within a three-year period preceding this certification had one or more federal, state, or local government public transactions terminated for cause or default.

**1.12 Availability of Funds**

The performance of the Legislature under any awards from this ITN shall be subject to and contingent upon the availability of funds lawfully appropriated by and to the Legislature and applicable for the purpose of the services specified.

**1.13 Payment Terms**

All invoicing and payments will be made monthly in arrears and in accordance to Policy 2.151, Joint Policies and Procedures of the Presiding Officers (Appendix J). Payment will be made after receipt of a correct invoice and approval by the Legislature. Travel, when required, must be authorized in advance and is to be included in the total costs of this ITN.

**1.14 Insurance**

The successful Respondent shall not commence any work in connection with an award until it has obtained all of the appropriate insurance coverages to adequately protect the Legislature from any and all liability and property damage hazards which may result in the performance of an award. Furthermore, all insurance shall be with qualified insurers duly licensed to transact business in this state. The Legislature shall be exempt from, and in no way liable for, any sums of money which may represent a deductible in any insurance policy. The payment of such deductible shall be the sole responsibility of the successful Respondent providing such insurance. Upon request, the successful Respondent shall furnish the Legislature an insurance certificate which will evidence that all of the appropriate coverage's are fully in effect.

**1.15 Indemnification**

The successful Respondent shall be fully liable for the actions of its agents, employees, partners, or subcontractors and shall fully indemnify, defend, and hold harmless the Legislature and its officers, agents and employees from suits, actions, damages, and costs of every name and description, including attorney's fees, arising from or relating to personal injury and damage to real or personal tangible property alleged to be caused in whole or in part by the successful Respondent, its agents, employees, partners or subcontractors; provided however, that the successful Respondent shall not indemnify for that portion of any loss or damages proximately caused by the negligent act or omission of the Legislature.

The successful Respondent's obligations under the preceding paragraph with respect to any legal action are contingent upon the Legislature's giving the successful Respondent (1) written notice of any action or threatened action, (2) the opportunity to take over and settle or defend any such action at the successful Respondent's sole expense, and (3) assistance in defending the action at the successful Respondent's sole expense.

**1.16 Limitation of Respondent's Liability**

Except as specified in the foregoing section 1.15, for all other claims against the successful Respondent under any award from this ITN, and regardless of the basis on which the claim is made, the successful Respondent's liability for direct damages shall be limited to the annual value of the Respondent's total Response under this ITN. No party shall be liable to another for special, indirect, punitive, or consequential damages, including lost data or records even if the party has been advised that such damages are possible. No party shall be liable for lost profits, lost revenue, or lost institutional operating savings. The Legislature may, in addition to other remedies available to it at law or in equity and upon notice to the successful Respondent, retain such monies from amounts due to the successful Respondent as may be necessary to satisfy any claim for damages, penalties, costs and the like asserted by or against

it. The Legislature may set off any liability or other obligation of the successful Respondent under any contract with the Legislature.

**1.17 Prohibition Against Assignment**

An award of this ITN is for services to be provided by the successful Respondent. The award may not be assigned by the successful Respondent in whole or in part, unless specified otherwise in this ITN. The successful Respondent will agree that its performance of any other services during the term of this award or future awards shall not interfere with the faithful and timely performance of this award.

**1.18 Collusion**

Response-rigging is a crime. The Florida Antitrust Act and the Sherman Antitrust Act prohibit agreements among actual or potential competitors as to which firm will win a contract put out for response. The antitrust laws also prohibit other forms of price-fixing, including agreements and conspiracies among actual or potential competitors with the purpose or effect of raising, fixing, pegging, or stabilizing prices, or allocating (dividing) geographic markets or contracts. Any suspicion of anticompetitive conduct in connection with this response should be reported to the State of Florida's Office of the Attorney General, Antitrust Section.

Please complete the enclosed *Non-Collusion Statement (Appendix G)* and enclose with your ITN package.

**1.19 Disclosure Information**

Please complete the enclosed *Disclosure Information Form (Appendix H)* and enclose with your ITN package.

**1.20 Consultant Review**

The Legislature reserves the right to share with any consultant of its choosing this ITN and ITN responses received in order to secure a second opinion.

**1.21 Waivers**

The Legislature shall not be deemed to have waived any of its rights or remedies hereunder unless such waiver is in writing and signed by the Legislature. No delay or omission on the part of the Legislature in exercising any rights or remedies shall operate as a waiver of such right or remedy or any other rights or remedies. A waiver on any one occasion shall not be construed as a bar or waiver of any right or remedy on future occasions.

**1.22 Cost of Reply Preparation**

The cost of preparing the Response is the sole responsibility of the Respondent, whether or not any award results from this ITN.

**1.23 Subcontractors or Third Party Vendors**

The successful Respondent will be responsible for all costs to subcontractors or third party vendors contracted for services by the Respondent.

**1.24 Resolution of Disputes**

Any disputes between the successful Respondent and the Legislature as to the application, meaning, or interpretation of any part of an award as a result of this ITN shall be resolved in Leon County, Florida, by application of Florida law.

**1.25 Confidential, Proprietary, Trade Secret**

If the Respondent considers any portion of the documents, data or records submitted with this ITN to be confidential, trade secret or otherwise not subject to disclosure pursuant to Section 11.0431, Florida Statutes, the Florida Constitution or other authority, Respondent must also simultaneously provide the Legislature with a separate redacted copy of its documents, data or records and briefly describe in writing the grounds for claiming exemption from the public records law, including the specific statutory citation for such exemption. This redacted copy shall contain the ITN number and Respondent's name on the cover and shall be clearly titled "Redacted Copy." The Redacted Copy shall be provided to the Legislature at the same time Respondent submits the document, data or records to the Legislature and must only exclude or obliterate those exact portions that are claimed confidential, proprietary, or trade secret.

Respondent shall be responsible for defending its determination that the redacted portions of its documents, data or records are confidential, trade secret or otherwise not subject to disclosure. Further, Respondent shall protect, defend, and indemnify the Legislature for any and all claims arising from or relating to Respondent's determination that the redacted portions of its response are confidential, proprietary, trade secret or otherwise not subject to disclosure.

If Respondent fails to submit a Redacted Copy with its reply, the Legislature may produce the entire documents, data or records submitted by Respondent in answer to a public records request for these records.

**1.26 Clarifications/Revisions**

Before award, the Legislature reserves the right to seek clarifications and to request any information deemed necessary for proper evaluation from all respondents deemed eligible for award.

## SECTION 2: CURRENT ENVIRONMENT

### 2.1 The Legislature

The Legislature maintains two separate Data Centers. The House Office of Information Technology (House OIT) provides Information Technology (IT) services for the Florida House of Representatives. The Office of Legislative Information Technology Services (OLITS) provides IT services for the Florida Senate, Joint Legislative Committees, and other Legislative Offices. OLITS also provides common shared IT services for the Florida House of Representatives.

### 2.2 Network Services

**OLITS-managed Wide Area Network**

The Florida Senate obtains its current Multiprotocol Label Switching (MPLS) service from Qwest. There are approximately 50 circuits statewide – 40 Senate district offices and 10 Senate satellite district offices connecting to the OLITS-managed network in Tallahassee. There are local servers in each of the 40 Senate district offices to provide DNS, DHCP and local file sharing. The Senate satellite district offices use the router for DNS and DHCP.

The Senate WAN also provides for connectivity to the Voice over IP service located in Tallahassee. All customer premise equipment (Cisco 2811s) in district offices have a PSTN connection should the WAN connection fail. This service is managed by another vendor. The configuration includes music on hold.

In addition to managing the Senate WAN, OLITS maintains two circuits in Tallahassee for district office support and testing. The Commission on Ethics also has two circuits for a total of 3mb. All circuits are logically connected to OLITS located in Tallahassee, and terminate into one 45MB circuit (DS3) in Tallahassee. The WAN is designed for redundancy at the core in Tallahassee. In the event of a failure in the MPLS Core router all traffic will seamlessly route through the Qwest provided Internet router.

There are three Metropolitan Area Network (MAN) connections in Tallahassee. The OLITS-managed Data Center (100MB) circuit provides 45Mbps Internet and 55Mbps Department of Management Services (DMS) Common Services. Two other circuits are 100Mbps layer 2 trunks used for failover between the Claude Pepper and Senate Building networks.

**House OIT-managed Wide Area Network**

The Florida House of Representatives Wide Area Network is made up of one hundred twenty (120) districts and approximately ten (10) satellite offices connecting to the House OIT-managed network in Tallahassee. Each district office connection is provided through local providers (DSL, cable, MFN). These offices are using split tunneling to allow internet traffic out their provider and VPN connection to allow for network connection to the House OIT-managed network. Tallahassee consists of two 33mb MFN lines that are set up for failover to each other.

### 2.3 Internet Access

**OLITS-managed Internet**

OLITS has two Internet connections, one 45MB DS3 circuit is provided by Qwest and one 45MB MAN circuit provided by CenturyLink Commercial Services. OLITS manually load balances outgoing traffic using Border Gateway Protocol (ASN 36514) based on subnet

address. The CenturyLink circuit also provides connectivity to the State of Florida Common Services offerings.

Internet access also provides for external customers' access to Legislative websites in the OLITS-managed DMZ.

**House OIT-managed Internet**
House OIT has two 33MB connections provided by MFN that are set up for failover to each other.

Internet access also provides for external customers' access to Legislative websites in the House-managed DMZ.

## 2.4 Firewall Services

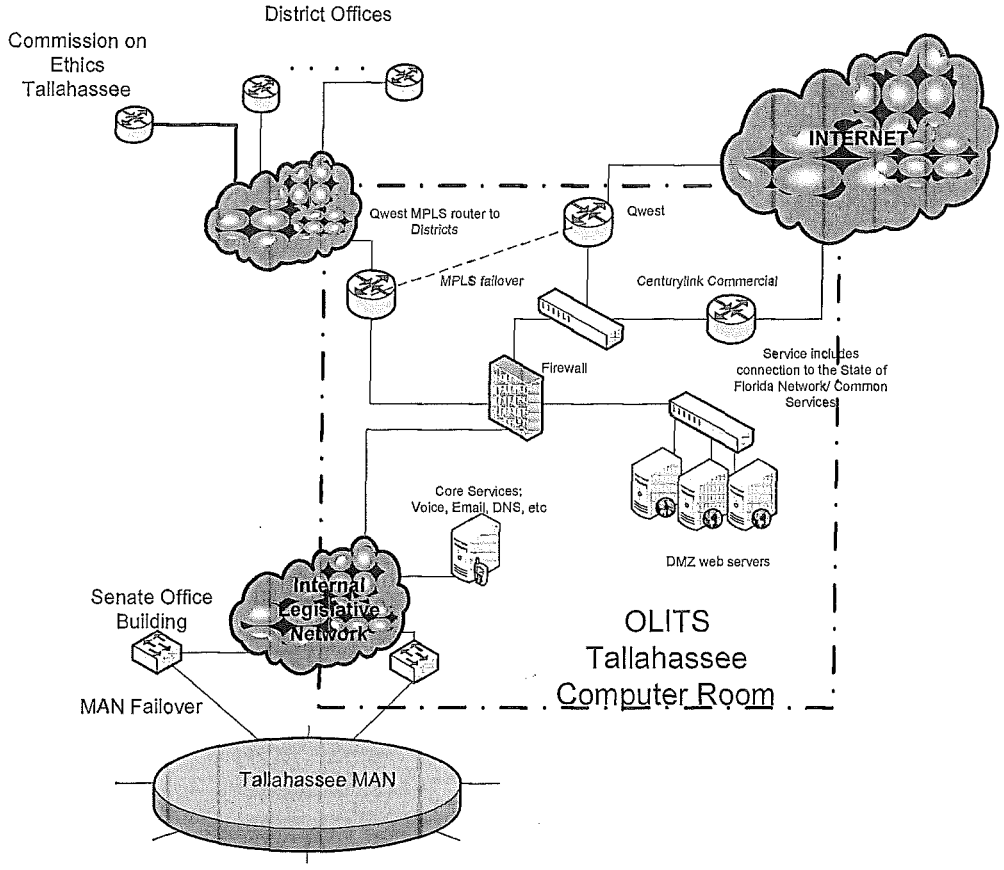
OLITS and House OIT maintain separate firewalls protecting and controlling access between the Internet and the internal legislative networks.

## 2.5 Remote Access Services

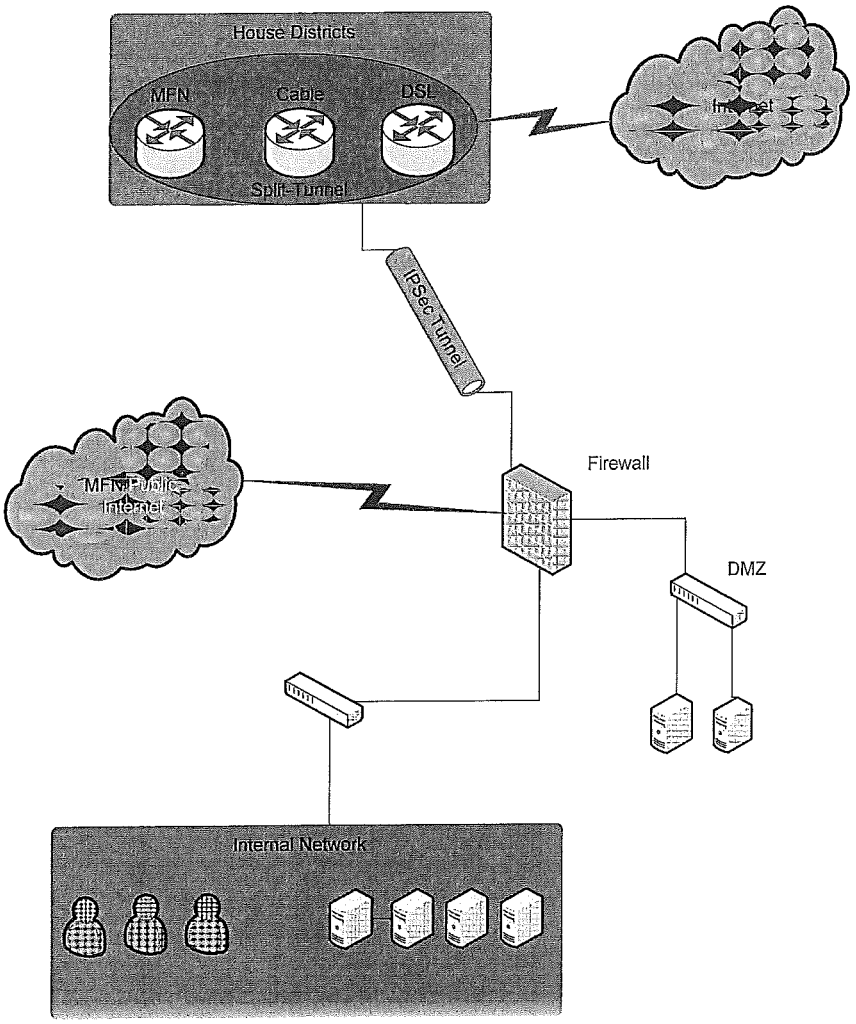
OLITS and House OIT provide separate VPN access for approved Legislative staff and contractors. OLITS maintains support for all Senate and Joint Committee employees for client based and SSL based VPN. House OIT maintains support for all House employees for client based and SSL based VPN.

## Current Network Diagrams

### OLITS-managed (Senate and Joint Committees)



## House OIT-managed (House of Representatives)



## SECTION 3: SCOPE OF SERVICES

**All technical requirements defined in Section 3 must be addressed and responded to by any Primary Multi-Protocol Label Switching (MPLS) Provider or any State of Florida Agency Contract offering for Managed MPLS Service.**

**In addition, Respondents must be able to fulfill the requirements labeled *[Mandatory – Respondents must confirm compliance]*. Failure to fulfill a Mandatory requirement will result in disqualification of a Respondent's Response.**

### 3.1 General Description of the Requested Scope of Services.

3.1.1 Managed Multi-Protocol Label Switching (MPLS) IP VPN Services

a. 40 Senate district offices including managed CPE for minimum 16 LAN ports and one WAN port, including management and support of the extended wiring as needed in each office. Each office must be equipped with VoIP failover to a PSTN.

b. Approximately 10 Senate satellite offices including managed CPE for minimum 8 LAN ports and one WAN port, including management and support of the extended wiring as needed in each office. Each office must be equipped with VoIP failover to a PSTN.

c. 1 Tallahassee remote office (Commission on Ethics)

d. 2 Tallahassee circuits with Senate district office configurations (one of each CPE solution, satellite and district) for development and testing

e. 120 House district offices including managed CPE for minimum 8 LAN ports and one WAN port, including management and support of the extended wiring as needed in each office. Each office must be equipped with VoIP failover to a PSTN.

f. Approximately 10 House satellite offices including managed CPE for minimum 4 LAN ports and one WAN port, including management and support of the extended wiring as needed in each office. Each office must be equipped with VoIP failover to a PSTN.

g. 2 Tallahassee circuits with House district office configurations (one of each CPE solution, satellite and district) for development and testing

3.1.2 Respondents will provide two unfiltered Internet service connections of at least 45Mbps – one physically located in the OLITS-managed Data Center and one in the House OIT-managed Data Center. The OLITS-managed Internet service must peer with OLITS BGP switches to accommodate failover between Internet service providers. The House-managed Internet service must peer with House BGP switches to accommodate failover between Internet service providers.

In addition the Legislature requests the **option** to add a managed Intrusion Prevention/ Intrusion Detection System (IPS/IDS) to the House OIT-managed internet circuit.

### 3.2 Managed MPLS VPN Design Requirements

The Legislature is seeking responses for a secure, Managed MPLS IP VPN and highly available Internet access service from **a Primary Multi-Protocol Label Switching (MPLS) Provider or any State of Florida Agency Contract offering for Managed MPLS Service.** The Managed MPLS VPN should enable legislative users to enjoy economical and reliable network access regardless of location and to expand secure remote access to staff. Implementation of network technology should help limit future cost growth for the network services needed to support mission-critical business requirements.
The Managed MPLS VPN will provide for data, video streaming and VOIP in its initial deployment, but will be positioned to include video conferencing and other possible services including WAN optimization technology.

At a minimum, the Managed MPLS VPN will include the OLITS managed devices (40 Senate District Offices, approximately 10 Senate Satellite Offices, 1 Tallahassee connection and 2 simulated district offices). Additionally, the 120 House District Offices, approximately 10 Satellite Offices, and the Tallahassee connections, may be included.

The managed solution will include the following.

- Fully managed end-to-end service with Service Level Agreements (SLAs). The respondent is required to manage and maintain all circuit wiring and equipment up to and including the LAN equipment. LAN wiring, that is the wiring from the CPE to the end user's device, is not part of the end-to-end service.
- Legislative district office connectivity: Four (4) bandwidth options are being requested for the district offices and must be provided by Respondents. The Legislature will evaluate all four (4) bandwidth options and reserves the right to select a bandwidth option that provides the performance required to meet business needs and is fiscally prudent. The Legislature will evaluate and select one or more of the bandwidth options. For each bandwidth option the Respondent's bandwidth must come as close as possible to the bandwidth options listed below.

  Option 1: minimum 512Kbps
  Option 2: minimum 1.5Mbps
  Option 3: minimum 3Mbps
  Option 4: minimum 6Mbps

  Dedicated circuits are preferred, however, other circuit types (Frame Relay, Digital Subscriber Line, etc.) providing the same bandwidth and quality features will be considered.
- Managed MPLS VPN technology must allow the use of Classes of Service to facilitate rationing and prioritizing bandwidth to best serve mission-critical applications.
- Managed security and resiliency to include VoIP failover to a PSTN
- Respondent-managed Customer Premise Equipment which includes for Senate districts one WAN port for uplink and 16 LAN ports for intra-office connectivity and Satellite offices may have one WAN and 8 LAN ports. For House districts the CPE must include one WAN port for uplink and 8 LAN ports for intra-office connectivity, House satellite office will require one WAN

port and 4 LAN ports.

The Managed MPLS VPN should serve these legislative business requirements for more bandwidth for business-critical applications, provide the foundation for secure data, video, and voice communications, and provide a reliable and flexible core network.

The Legislature desires to achieve the advantages and practicality of Managed MPLS IP VPN to provide higher reliability through the ability to re-route around failed network nodes. The Managed MPLS VPN technology employed must allow the use of Classes of Service that should facilitate rationing and prioritizing bandwidth to best serve mission-critical applications.
The Managed MPLS VPN solution should allow for reliable, high-bandwidth connections to all district and satellite offices regardless of their geographical location. The Managed MPLS VPN network will also need to support the delivery of mobile solutions and secure remote network access.

### 3.2.1 Managed MPLS VPN Core Functionality

The Legislature requires that MPLS be a core technology of the proposed network. Respondent must describe their Managed MPLS VPN network in enough detail for the Legislature to evaluate the characteristics of the Respondent's network. Include the following:

3.2.1.1 Managed and Dynamic MPLS VPN Routing ***[Mandatory - Respondent must confirm compliance]*** The Legislature requires a core network that supports the Multi-Protocol Label Switching routing protocol.

**Core Network: Describe the following:**

- Core/backbone with a drawing including any aggregation services.
- Access circuit options.
- Location of Point of Presence (POP) that will serve this network.
- Class of switches in the POPs.
- Network strategic plan for the next three years, including roadmap of when new product/services will be implemented.

3.2.1.2 Non Standard-Based Services: the Legislature desires that the provisioning of services and related options will be handled by the Respondent resulting in a standard, routed, IP only enterprise environment. Describe and explicitly identify all non-standards-based services to be used to provide Managed MPLS VPN services.

### 3.2.2 Connectivity

3.2.2.1 Statewide connectivity: ***[Mandatory - Respondent must confirm compliance]*** The Legislature requires connectivity throughout the State of Florida to conduct its business. The Managed MPLS VPN core network must provide for the connectivity needs of all currently existing sites as listed in Appendix A.

3.2.2.2 Future Statewide Connectivity: The Legislature desires to ensure that the most cost effective access solutions are used for future connectivity to the Managed MPLS VPN network. Future needs will include new service addresses.

These sites will exist in rural as well as metro areas. Respondent should be prepared to connect these sites in an affordable manner. Responses must include a strategy to address these concerns.

### 3.2.3 High Availability and Reliability

The Legislature desires that the Managed MPLS VPN core network have High Availability to properly support its business requirements. Define the strategy and architecture for providing High Availability within the Respondent's core network to include distinguishing features and capabilities for proposed services.

### 3.2.4 Quality of Service (QoS)

Quality of Service: It is important that critical applications receive SLA contracted resources across the network, despite varying network traffic loads.

3.2.4.1 QoS Functionality: ***[Mandatory – Respondent must confirm compliance]*** The Legislature requires end-to-end IP QoS features to preferentially handle traffic as one of the network's fundamental design philosophies to accomplish the task of managing resources within the core. The network must be able to prioritize traffic by tagging packets in order to utilize multiple queues for voice, video and other mission critical applications and to segregate such traffic from other traffic types that are more delay-tolerant.

3.2.4.2 Non-standard QoS Services: Describe any QoS functionality that is unique to the Respondent's Managed MPLS VPN network that is not based on industry standards.

### 3.2.5 Class of Service (CoS)

3.2.5.1 CoS Functionality: ***[Mandatory – Respondent must confirm compliance]*** MPLS Class of Service forwarding is required to be able to classify different types of traffic based on traffic filters, input interface, either DSCP or CoS values, MPLS labels, or any IP traffic pattern. Confirm Respondent's compliance with this mandatory and define how the Respondent's Managed MPLS VPN network classifies different types of traffic.

3.2.5.2 Forwarding Equivalence Classes (FEC): ***[Mandatory – Respondent must confirm compliance]*** Minimum of four (FEC) are required. Respondent should describe the Respondent's FEC classes.

### 3.2.6 Bandwidth Increases

The Legislature desires the capability of obtaining increases in bandwidth within a short timeframe. Beyond the logical service of altering CIR values, describe the technical features of the proposed Managed MPLS VPN that will provide for the bandwidth of specific Service Addresses to be increased within a few days. For example:

- The Respondent could participate with the Legislature's staff working to anticipate where additional bandwidth needs will develop.
- The Respondent could install high capacity Access Circuits and offer a reduction in monthly fees for unused capacity.

### 3.2.7 Burst Capacity and Bursty Traffic

The Legislature will size circuits appropriately to provide the most cost effective transport based on the business needs of the service address. However, occasional bursty traffic must be accommodated. Respondent should describe its strategy for supplying and managing burst capacity on a circuit.

### 3.2.8 Traffic Engineering

3.2.8.1 Fault-Tolerance: ***[Mandatory – Respondent must confirm compliance]*** The Legislature requires fault-tolerance in the core network and for the Legislature's web services such as might be provided by backup tunnels. Respondent must describe its approach to fault-tolerance.

Fault-Tolerance must also include rerouting and load balancing the Legislature's public web services to a secondary Internet circuit should the primary Internet circuit fail or become overwhelmed.

3.2.8.2 Traffic Rerouting: [***Mandatory - Respondent must confirm compliance.***] The Legislature requires dynamic routing protocols for all district offices and the capability to automatically reroute traffic in the event transport troubles are detected. Describe the procedures to initiate automatic rerouting. Include any manual procedures. Describe rerouting actions; explain which transport facility has priority over others and who can in practice initiate manual rerouting of the Managed MPLS VPN.

Discuss the Legislature's role in this area including how the Legislature is notified when rerouting occurs.

3.2.8.3 Emergency Traffic Rerouting Notification: The Legislature desires prompt notification when rerouting occurs in the Managed MPLS VPN core network; especially if the rerouting directs the Legislature's traffic to an alternate POP. Describe the proposed tools or procedures for this.

### 3.2.9 Multimedia

The Managed MPLS VPN solution must accommodate the connectivity, transmission and convergence of voice, video, and data application traffic.

3.2.9.1 Signaling Protocols: ***[Mandatory – Respondent must confirm compliance]*** The Legislature requires that the proposed solution support signaling protocols including but not limited to the most currently approved versions of Session Initiation Protocol (SIP), H.323, H.264, Media Gateway Control Protocol (MGCP), and H.248/Megaco. SIP and H.323 use RTP to transport real-time transmission of multimedia data over network services. Real Time Protocol (RTP), Real Time Control Protocol (RTCP), and Real Time Streaming Protocol (RTSP) transport and manage the real-time transmission of multimedia data over network services. List the protocols Respondent intends to support. List and describe any non-standard protocols or extensions.

3.2.9.2 Multicast: The Legislature highly desires the capability to use IP Multicast as a technique to provide various network-based services. Describe Respondent's capability.

### 3.2.10 Voice

3.2.10.1 CODECs: ***[Mandatory – Respondent must confirm compliance]*** In order to support the Legislature, the network solution is required to support standard CODECs. Standard compression/decompression (CODEC) techniques, with their respective mean opinion scores (MOS), include but are not limited to G.711 – 4.3 MOS, G.729 – 4.0 MOS, G.723 3.8 MOS and h.264. What CODECs does Respondent's solution support? Responses should include descriptions of any non-standard protocols or extensions.

3.2.10.2 Voice over IP: ***[Mandatory - Respondent must confirm compliance]*** The Legislature requires allowing telephony and other audio signals to be transported over the same network as regular data traffic. Describe how the proposed solution supports a VoIP solution. Include information regarding the support of both a network based or premise based solution and the risks and benefits of each approach.

3.2.10.3 Least-cost Routing: ***[Mandatory - Respondent must confirm compliance]*** The Legislature requires utilization of least cost routing. Describe the approach for implementing this feature.

3.2.10.4 QoS and DiffServ Signaling: ***[Mandatory – Respondent must confirm compliance]*** IP by itself is simply a best-effort service, not sufficient enough to provide the strict delay, jitter, and bandwidth guarantees required for voice over IP (VoIP) and other real-time traffic. The Legislature requires that the proposed solution support a standards-based QoS or DiffServ aware TE signaling mechanism when making forwarding decisions for passing VoIP traffic through tunnels. Respondent must describe the method for QoS or DiffServ TE signaling for VoIP traffic.

3.2.10.5 VoIP Phone Failover to PSTN: ***[Mandatory - Respondent must confirm compliance]*** In the event of a WAN circuit failure, the Customer Premise Equipment is required to failover to the publically switched telephone network.

### 3.2.11 Access Circuits

3.2.11.1 Access Circuit Services: ***[Mandatory - Respondent must confirm compliance]*** The local access connection between the customer premise equipment

and the Respondent's Point of Presence (POP) is required to use generally and commercially available transport services. Preference should be given to open, secure, scalable, industry-standards-based, packetized services, such as SONET, Frame Relay, ATM and others, providing end-to-end QoS capable of transporting voice, video, and data applications within a converged media stream. TDM-based transport services, such as T1 digital carrier, ISDN, DSL, etc., are acceptable with sufficient SLA's.

3.2.11.2 Access Circuits: ***[Mandatory - Respondent must confirm compliance]*** The Legislature requires that the Respondent supply the most economical physical Access Circuits that meet the service level and bandwidth requirements of the individual service address. Describe the strategy for providing the most economical accessibility while meeting Service Level Agreements (SLA).

3.2.11.3 Availability: ***[Mandatory - Respondent must confirm compliance]*** The Legislature requires the ability to choose Access Circuit Availability per the business requirements of each service address. Using the spreadsheet located in Appendix C, list each Access Circuit type Respondent proposes with its accompanying bandwidth, Availability, Latency, Jitter, MTTR, and Installation.

3.2.11.4 Bandwidth: ***[Mandatory - Respondent must confirm compliance]*** The Respondent is required to specify the various types of access services offered including the bandwidth increments and ranges. Clearly define the various types of access services offered including the bandwidth increments and ranges.

### 3.2.12 Disaster Recovery

Loss of Data Center: In the event of a loss of either the OLITS-managed or House OIT managed Data Center, Access Circuits are desired to be provisioned in a manner that will allow the Legislature or the Respondent to swing circuits to an alternate, as yet undefined, location (Service Address, Data Center). Describe Respondent's strategy for providing connectivity to the alternate site in such an emergency. This includes provision for the rapid establishment or upgrade of Access Circuits to one or more alternate locations, and rapid establishment of temporary network service.

### 3.2.13 Internet Access

3.2.13.1 Internet Access (Internal User Access): ***[Mandatory - Respondent must confirm compliance]*** The Legislature requires secure Internet access for all sites connected to its Managed MPLS VPN network including Tallahassee Capitol Complex. Respondent must describe the strategy for providing access to the Internet. OLITS will provide for and manage the gateway to the OLITS-managed Internet. House OIT will provide for and manage the gateway to the internet for the House OIT-managed Network.

3.2.13.2 Alternate Internet Access: ***[Mandatory - Respondent must confirm compliance]*** In order to provide protection against failures and emergencies, and to ensure business continuity, the Legislature requires Internet connections be fault tolerant and available. Respondent should identify configuration options to increase the resiliency of the Internet access services with preferably an alternate Internet backbone from a separate Internet Service Provider.

3.2.13.3 IPS/IDS: The Legislature desires an option for separate Managed IPS/IDS solutions for the House OIT managed Internet circuit. Respondent must describe the strategy for performing all management and maintenance of the IPS/IDS including:

- Signature tuning
- Signature updates
- Configuration changes
- Security event monitoring
- Performance and availability management

### 3.2.14 Network Security

The physical security of network components (such as buildings, power services, continuity of operations, etc.) and the security of the information that will traverse the network is a prime concern and must be defined as part of this Response.

3.2.14.1 Security Threats: ***[Mandatory - Respondent must confirm compliance]*** The Respondent is required to work with the Legislature to address security threats. This includes threat mitigation and event correlation and access to tools and reports to aid the Legislature in monitoring and tracing security threats. This also includes providing support for forensic investigation and incident response procedures in the event of malicious network activity. Describe how this will be addressed.

3.2.14.2 Security Threats CPE: ***[Mandatory - Respondent must confirm compliance]***

The Respondent is required to work with the Legislature to address security threats at the CPE port level. This includes authentication, authorization and accounting of end devices/users. Describe how this will be addressed.

## 3.3 Managed MPLS VPN Management and Monitoring

### 3.3. 1 Evolving and Emerging Technologies

3.3.1.1 Evolving and Emerging Technologies: The Legislature requests that the Respondent have a method for incorporating evolving and emerging technologies. A Technology Plan is one method of achieving this goal. Describe how evolving and emerging technologies are addressed and the approach taken to incorporate changes into the overall Managed MPLS VPN architecture.

### 3.3.2 Ongoing Technology Refresh *[Mandatory - Respondent must confirm compliance]*

The Legislature requires a partnership that is committed to meeting newly defined service needs and technological advances within advantageous timeframes and within a framework of cost effectiveness. The Legislature requires that the CPE and all components that make up the WAN service be replaced within 3 months of the manufacturer's end of support date. The Legislature intends that the installed CPE be neither state of the art nor fully mature or outdated.

3.3.2.1 Technology Refresh: ***[Mandatory - Respondent must confirm compliance]*** Describe how technology refresh will be addressed in support of the Managed MPLS VPN for data, VoIP, multimedia services and CPE managed by Respondent. Include hardware upgrades or replacement, modifications to CPE IOS, modifications to routers and switches that support the Managed MPLS VPN.

3.3.2.2 Security Technology Refresh: ***[Mandatory - Respondent must confirm compliance]*** The Legislature requires that the Respondent manage and operate within manufacturers' security requirements across the entire Managed MPLS VPN for the life of the contract. Describe management of the Managed MPLS VPN from a security refresh standpoint.

3.3.2.3 Competitive Market Refresh: ***[Mandatory – Respondent must confirm compliance]*** The Legislature requires that the cost, rates and terms offered to the Legislature during the contract term remains competitive with the cost, rates and terms offered in the market. Describe how Respondent will keep cost, rates and terms competitive.

### 3.3.3 Operational Planning

Operational Planning: The Respondent should facilitate a forum that includes the Legislature when planning for routine maintenance outages, CPE upgrades, changes to Managed MPLS VPN Access Circuits, required technology refreshes and intrusive troubleshooting and testing. Describe procedures used for each and how the Legislature will be incorporated into the planning process. Address the planning process for proactive and preventive maintenance programs.

### 3.3.4 Monthly Service and SLA Reviews

Monthly Service and SLA Reviews: The Legislature desires the Respondent to participate in monthly (and to be agreed upon later bi-monthly) service and SLA reviews with the Legislature. Describe the process and methodology to include future changes that will impact the proposed Managed MPLS VPN network.

### 3.3.5 Respondent's Help Desk and Operational Support

The Legislature is seeking technical assistance that is available around-the-clock to support the Managed MPLS VPN. This includes support for assisting the Legislature in resolving MPLS VPN network services issues.
The Legislature will operate level zero and one Help Desks and will require Respondent to operate the next level Help Desks which will support the Legislature. The Legislature will act as the liaison and will own the problem on behalf of legislative users.

3.3.5.1 Respondents' Help Desk: Describe the scope of help desk coverage offered to the Legislature's personnel and hours of operation for support of the Managed MPLS VPN. Include the type of assistance that would be extended to the Legislature for end-to-end network support, including connectivity and performance. Describe personnel qualifications and expertise that are offered in support of the technologies mentioned above, to include the various levels of Help Desk support for the Legislature such as Tier 1, Tier 2, Tier 3, and describe the services offered for each level of service.

3.3.5.2 Help Desk Integration: The Legislature desires Help Desk staff knowledgeable and familiar with our network and that functions logically within the overall Legislative Support Services team. A single call into the support service structure must cover questions concerning performance as well as typical end-to-end problem resolution. Requests for assistance could occur at any time day or night (24 hours a day, 7 days a week). Describe the approach for supporting this requirement.

3.3.5.3 Legislative Session Support: During legislative session, the importance of service availability is heightened and it is critical that resolutions to problems be handled with extreme expedience. What can the Respondent offer as a strategy for ensuring an appropriate support structure is in place to handle these unique periods?

### 3.3.6 Maintenance for Respondent-Managed CPE *[Mandatory – Respondent must confirm compliance]*

Maintenance for Respondent-Managed CPE: The Respondent is required to have maintenance policies and procedures regarding CPE that will be used in the delivery of the Managed MPLS VPN service. Describe the preventive maintenance routines, equipment swap-outs, the remove-repair-return procedures, and how activities are coordinated in advance with the Legislature. Identify available service levels and terms of coverage.

### 3.3.7 Configuration Management *[Mandatory – Respondent must confirm compliance]*

3.3.7.1 Configuration Management: ***[Mandatory - Respondent must confirm compliance]*** The Respondent is required to describe any system or application proposed for Configuration Management of Respondent-Managed CPE configurations. Describe how the systems and applications operate. Describe procedures and methodology associated with configuration management.

3.3.7.2 Configuration Records: ***[Mandatory - Respondent must confirm compliance]***The Legislature requires that current and accurate configuration records be kept for Managed MPLS VPN access and CPE managed by the Respondent at all locations found in Appendix A. Respondent must describe its approach to maintaining these records and how access will be provided to these configuration records by the Legislature.

3.3.7.3 Archiving Configuration Information: ***[Mandatory - Respondent must confirm compliance]*** The Legislature requires that all CPE configurations be archived on a regular basis. Describe the process and frequency proposed. Describe the policies affecting the retention periods and the depth of versions kept to include restoration testing. Clearly distinguish between transport and CPE configurations.

3.3.7.4 Security Configuration Management: ***[Mandatory - Respondent must confirm compliance]*** The Respondent is required to describe its methodology and procedures to ensure the Managed MPLS VPN is kept current with security patches or upgrades.

3.3.7.5 Rapid Modifications to Configurations: ***[Mandatory - Respondent must confirm compliance]*** The Respondent is required to describe the process and methodology for rapid modifications of configurations (rapid being within 5 minutes of notification). Address the time intervals required for change to occur for each type of configuration affected.

### 3.3.8 Monitoring

Monitoring: the Legislature desires around-the-clock monitoring of services for the Managed MPLS VPN. This includes operating a Network Operations Center (NOC), utilizing state-of-the-art monitoring tools, performing real-time analysis and diagnostics of accumulated traffic information and extending to the Legislature real-time access to these tools so that the Legislature is able to manage data, voice and multimedia Managed MPLS VPN services. Monitoring should be set up to allow House OIT staff the ability to monitor House services and to allow OLITS staff the ability to monitor Senate and Joint services.

3.3.8.1 Respondent's NOC: The Respondent should provide and operate a network operations center (NOC) that performs network monitoring for the Managed MPLS VPN twenty-four hours a day, seven days per week. Describe the NOC that will be used and the type of activity the Legislature can expect from this NOC. Further identify which NOC will serve the Legislature and the Managed MPLS VPN. Describe how the Legislature's technical staff will communicate with Respondent's technical staff in the NOC, including telephone, e-mail, and other online contact. Identify which secondary NOC, if any, will be used as a backup.

3.3.8.2 Alarm and Alert Monitoring System or Application: ***[Mandatory - Respondent must confirm compliance]*** The Legislature requires that an alarm and alert system that receives, processes and displays alarms and alerts received from Access Circuits and hardware be used in the delivery of the Managed MPLS VPN. Respondent must describe in detail the system that will be utilized and how it will support the Legislature.

- Clearly identify the capabilities of the system for generating alarms and alerts.
- Provide examples of output from such system or application screen-shots.
- Describe policies and procedures that are followed to notify OLITS once major or catastrophic alarms/alerts are received.
- Describe the backup system if one exists.

1) Viewing Alarms and Alerts: Describe what types of alarms and alerts are available for viewing and how and when they are generated.

2) Time Intervals: Identify time intervals Respondent has established that determine when an outage has occurred.

3) Reaction to Alarms: Describe what immediate steps are taken once an alarm is received.

4) Recurring Events: Describe what procedures are in place to mitigate recurring events.

5) Scope of Monitoring: Clearly identify, with examples, at what point in the transport architecture monitoring ends.

3.3.8.3 Performance and Error Monitoring of Managed MPLS VPN Access Circuits and CPE: The Legislature desires that the Respondent operate a real-time, modern performance and error monitoring system that will be used in the delivery of the Managed MPLS VPN.

- Describe in detail, the system provided and how it will be used to support the Legislature and the Managed MPLS VPN.
- Provide examples of output from such system or application screen-shots.
- Describe policies and procedures that are followed to notify the Legislature once major or catastrophic performance issues are encountered.

1) Degradation of service: Identify specific types of performance information that is being evaluated and how degradation of service is determined.

2) Reaction to Performance Issues: Identify the immediate steps that are taken once there is degradation of service or errors encountered and the procedures that are in place to address these events.

3) Time Intervals: Define how long a problem must exist before it is reported.

4) Problem Continuum: Identify what types of performance issues and errors are reported immediately and those that are monitored for a period of time.

5) Scope of Monitoring: Identify, with examples, at what point in the transport architecture monitoring ends.

3.3.8.4 Bandwidth Utilization and Exception Monitoring: the Legislature desires that the Respondent operates a real-time, modern bandwidth utilization and exception monitoring system that monitors bandwidth utilization and creates exception reports to be used in the management of the Managed MPLS VPN. Describe the system in detail and how it will be used. Describe how the Legislature will be notified when exceptions have been encountered that impact service delivery.

1) Traffic Usage by Technology-Type: Address specific performance monitoring criteria as it pertains to data, VoIP, and video bandwidth usage. Address each performance aspect individually, showing what is measured and how it is measured.

2) Polling Intervals: Identify polling intervals used for each technology-type.

3) Threshold Levels: Provide threshold levels observed for each technology-type including the latency time window adopted that generates an exception.

4) Time Interval: Define how long a problem must exist before it is reported.

5) Problem Continuum: Identify the types of exceptions that are reported immediately and those that are monitored for a period of time.

3.3.8.5 Access to Alarm and Alert System or Application: ***[Mandatory – Respondent must confirm compliance]*** It is required that Internet-connected legislative information technology staff be able to access the alarm and alert system or application with a web browser. Identify any other needed hardware or software for access to the alarm and alert system or application. The alarm and alert system or application should provide a graphical interface to the web browser. This system or application must support at least ten (10) concurrent authorized legislative information technology staff.

3.3.8.6 Identification Options within Alarm and Alert System: ***[Mandatory – Respondent must confirm compliance]*** The Legislature requires to have the flexibility to view alarm and alert information by identifiers recognizable by the Legislature. Examples are Location Name; Circuit ID, and CPE name. Describe how the system offers this flexibility.

3.3.8.7 Alarm and Alert System or Application Training: ***[Mandatory – Respondent must confirm compliance]*** Training should be provided as to access and use of the alarm or alert system or application. Training must be provided for at least ten (10) legislative information technology staff. Describe the training.

3.3.8.8 Access to Performance and Error Monitoring of Managed MPLS VPN Access Circuits and CPE: The Legislature desires that their network engineers be able to access and view performance of the error monitoring system or application with a web browser. Identify any other needed hardware or software for access to performance and error monitoring system or application. The performance and error monitoring system or application should provide a graphical interface to the web browser. This system or application should support at least ten (10) concurrent authorized legislative information technology staff.

3.3.8.9 Identification Options within Performance and Error Monitoring System: The Legislature desires the flexibility to view performance and error monitoring information by identifiers recognizable by the Legislature. Examples are Location Name; Circuit ID and CPE name. Describe how the system offers this flexibility.

3.3.8.10 Monitoring Data Filtered: Is information contained in alarm and alert data or performance and error monitoring filtered before it will be disseminated to the Legislature? If yes, describe what is being filtered before it reaches the Legislature.

3.3.8.11 Extracting Information from CPE Owned and Managed by Respondent: The Legislature desires direct secure access to CPE hardware used in the delivery of the Managed MPLS VPN service. The Legislature would poll CPE and re-process that information on the Legislature's own network management system, ZenOss. Describe the Legislature's level of access, types of output, the frequency of polling allowed and the method allowed to poll data (SNMP, SNMPv2, SAA, etc.).

### 3.3.9 Reporting

3.3.9.1 Reporting: The Legislature desires web-browser access to online reporting as it pertains to performance of Managed MPLS VPN services. Examples of needed reports include alarms and alerts, threshold exceptions, user access, trend analysis, chronic Access Circuits or CPE, threat analysis, verification of traffic processing, etc. Describe the reports available and differentiate between reports that are scheduled and those that are available on demand. Provide example screenshots of the various reports and describe the Legislature's options with respect to viewing (GUI, text, diagrams, etc).

3.3.9.2 Report on Verification of Managed MPLS VPN Traffic Processing: The Respondent should provide the Legislature with verification that Managed MPLS VPN traffic is being processed at QoS and CoS levels prescribed by the Legislature. Provide screenshots of this report.

3.3.9.3 Proactive Monitoring on Managed MPLS VPN transport: Describe how the result of the event correlation analysis of the Managed MPLS VPN transport is utilized to prevent future service affecting events.

3.3.9.4 Proactive Monitoring on CPE Managed by the Respondent: Describe how the result of the event correlation analysis of the Respondent managed CPE transport is utilized to prevent future service affecting events.

3.3.9.5 Proactive Analysis: Describe how the Trouble Ticketing System is used in support of the Managed MPLS VPN. Describe if both transport and CPE Trouble Tickets are used in analysis.

3.3.9.6 Degradation of Service: Describe how degradation tracking of Managed MPLS VPN Access Circuits is accomplished and examples of the types of Access Circuits tracked. Provide thresholds that trigger opening of a trouble ticket and provide remediation. Describe any variations of tracking as it pertains to data, VoIP and video.

### 3.3.10 Trouble Ticketing

The Legislature desires that the Respondent operate a Trouble Ticketing Function that includes an online system. The Trouble Ticketing Function must include processes and procedures that can be used by the Legislature to open, update, close and track Trouble Tickets for the Managed MPLS VPN and related services covered in this ITN. Trouble ticketing should be set up to allow House OIT the ability to access House tickets and to allow OLITS the ability to access Senate and Joint tickets.

3.3.10.1 Trouble Ticketing System ***[Mandatory - Respondent must confirm compliance]***: The Legislature requires that all trouble ticket activity initiated by the Legislature is done through an online Trouble Ticketing System provided by the Respondent. The system must be available for use by the Legislature twenty-four hours per day, seven days per week excluding maintenance time. Respondent must provide applicable policies and procedures used to support this system.

1) Trouble Ticket Activity Types: Identify the types of items and activities that flow through the Trouble Ticketing System and how open ticket confirmations are communicated back to the Legislature.

2) Notification Back to the Legislature: Describe how the Legislature is kept current on the progress of trouble tickets that were opened by the Respondent and by the Legislature.

3) Affect on SLAs: Define the time relationship between opening of a trouble ticket and the effects on supported SLAs.

4) Severity Levels: Describe how Trouble Tickets are treated differently based upon their Severity and Priority Levels. (Severity refers to the technical impact of a problem. Priority refers to the degree of business necessity for resolving the problem.)

5) Chronic Problems: Provide policies and procedures of how a problem becomes chronic and the resolution. Clearly identify time intervals between chronic events before a trouble ticket is opened.

3.3.10.2 Advanced Outage Notification ***[Mandatory - Respondent must confirm compliance]***: The Legislature requires to be notified prior to a planned outage affecting the Legislature's Managed MPLS VPN network, Access Circuits, CPE, or other associated IP-based services including Internet. The Legislature requires at least twenty-four (24) hours prior notice for short-term, routine outages. Provide a policy that complies with this requirement. List maintenance window types, time frames allotted, and identify which windows are excluded from any calculations of Availability.

3.3.10.3 Emergency Maintenance Windows: Provide the procedure as to when and how Respondent will notify the Legislature when emergency maintenance is required.

3.3.10.4 Access to Trouble Ticketing System: It is desired that Internet-connected Legislative support users be able to access the Trouble Ticketing System with a web browser. Identify any other needed hardware or software for access to the Trouble Ticketing System. The Trouble Ticketing System should provide a graphical interface to the web browser. The Trouble Ticketing System must support at least ten (10) concurrent authorized legislative information technology staff.

3.3.10.5 Trouble Ticketing System Training: ***[Mandatory - Respondent must confirm compliance]*** Training must be provided for access and use of the Trouble Ticketing System. Training must be provided for at least ten (10) legislative information technology staff. Describe the training that will be offered.

3.3.10.6 Trouble Ticketing Tracking: Describe how the Legislature would track Trouble Ticket status with as close to real-time reporting as possible. Clearly identify what can be tracked, by what identifier, and how that information is communicated back to the Legislature.

3.3.10.7 Service Restoration: Describe procedures with respect to service restoration both for Managed MPLS VPN Access Circuits and hardware, including CPE. Address levels of Severity and Priority if applicable.

3.3.10.8 Troubleshooting and Testing: Describe the troubleshooting and testing procedures in place to support the integrity of the Managed MPLS VPN, including Managed MPLS VPN access and managed CPE operating in a production environment. When is troubleshooting initiated? Include what time of day troubleshooting is conducted for non-emergencies.

3.3.10.9 Intrusive Testing ***[Mandatory - Respondent must confirm compliance.]***: The Legislature requires that the Respondent notify the Legislature prior to any intrusive troubleshooting or testing on Access Circuits and CPE used to support the Managed MPLS VPN when a trouble ticket does not exist for same or if the circumstance does not require immediate intervention. Provide policy and guidelines for intrusive testing.

3.3.10.10 Trouble Ticketing System Reports ***[Mandatory - Respondent must confirm compliance]***: The Trouble Ticketing System is required to be able to produce both scheduled and ad hoc reports and provide web browser access for the Legislature. Provide screenshots of standard reports. Describe creation of ad hoc reports with the Trouble Ticketing System.

3.3.10.11 Customized Reports: The Legislature desires to create customized reports either on-demand or a scheduled basis. Describe the capabilities of the Trouble Ticketing System in this area. Below are examples of reports that the Legislature would be interested in generating (reports to include, but not limited to):

- Number of troubles reported within time frames: Time of day, day of week, month of year.
- Number of repeat troubles reported within a thirty-day period.
- Trouble Tickets by Service Location
- Mean-time-to-repair statistics for all Priority Levels.
- By type of trouble reported as defined by Respondents' classifications.
- By Priority Levels.
- Troubles reported by site ID, circuit ID, originator's name or ID.
- Number of troubles that were escalated by level of escalation.
- Number of trouble tickets opened by Priority Levels.
- Number of trouble tickets closed by Priority Levels.
- Number of trouble tickets unresolved by Priority Levels.
- Access into trouble ticketing system by user.
- Bandwidth utilization (in, out, and total)
- Latency
- Jitter
- Packet Delivery

3.3.10.12 Escalation ***[Mandatory - Respondent must confirm compliance]***: The Respondent is required to list and describe trouble Severity and Priority Levels and how they apply to the WAN service. (Severity refers to the technical impact of a problem. Priority refers to the degree of business necessity for resolving the problem.) Provide examples for each.

Describe Respondent's escalation policies and procedures for WAN service troubles and what drives troubles to be escalated to the next level. Identify professional skill levels that are required to perform each level of escalation. Describe communication methods that will be used by the Legislature to track initial escalations and escalations between Severity and Priority Levels.

## 3.4 Managed MPLS VPN Service Level Agreement (SLA)

### 3.4.1 SLA Purpose and Objective

This section provides requirements for the Service Level Agreement (SLA) to be established between the Legislature and the Respondent. The paragraphs following describe the SLA that the Respondent must submit with the Respondent's Response.

3.4.1.1 SLA: ***[Mandatory - Respondent must confirm compliance.]*** The Respondent is required to submit a SLA with the Respondent's Response. The SLA

to be submitted with the Respondent's Response is to contain the specific service standards, provisions, and remedies proposed by the Respondent in response to this ITN.

### 3.4.2 Scope

Scope Statement: The SLA should include a statement of scope that indicates that the SLA covers all services to be delivered, including services for planning, provisioning, testing, operating, managing, and improving the legislative Managed MPLS VPN and related network services that are the subject of this ITN. SLAs are tracked by the sum of occurrences within the monthly billing cycle.

### 3.4.3 Related Documents

Related Documents: The Respondent should list related documents that will support the SLA, including documentation standards and separate procedures for problem resolution, escalation, network management, service payment calculations and payments, and change management. Procedures for emergency provisioning or support of disaster recovery must be listed. The Respondent should provide document numbers, version numbers, and publication dates where available, and describe how these standards and procedures are made available to the Respondent's management, operational, and engineering staff.

### 3.4.4 Key Contact Personnel

Key Contacts: The Respondent should identify and maintain an accurate list, in the SLA, of the Respondent's key and backup points of contact. These are individuals who will directly support the SLA. This should include name, title, business address, phone, and e-mail contact information. The Respondent should provide space in the SLA for contact information for the Legislature's key points of contact.

The successful Respondent shall replace the liaison or any assigned key contacts at the request of the Legislature.

### 3.4.5 WAN Services

The Service Standards, provisions, and Remedies listed in this section refer to the Respondent's proposed WAN services.

**Guarantees and Exclusions:**

3.4.5.1 Guarantees: The Respondent should offer, in the SLA, Service Standard guarantees for the WAN services. The guarantees should include Availability, Latency, Jitter, Packet Delivery, and Outage Notification.

3.4.5.2 Exclusions: With respect to calculating Availability, any exclusions for scheduled maintenance, time lost waiting for premises access, or other reasons should be clearly detailed in the Respondent's Response.

**WAN Service Standards Table**

Respondents must respond to each Mandatory SLA measure and should document its remedy.

| Service Level Agreement | | | |
|---|---|---|---|
| **Core** | | | |
| | **SLA Measure** | **Mandatory Service Standard** | **Preferred Remedy** |
| 3.4.5.3 | Availability (PE-PE) | It is required the Respondent offer a service standard guarantee for availability of the core network. | 1 day's charges prorated for each affected site for each hour of outage. |
| 3.4.5.4 | Latency | ≤ 55 ms round trip → PE-PE Router | 10% of WAN port MRC for 10% outside service standard<br>30% of WAN port MRC for 30% outside service standard<br>50% of WAN port MRC for 50% outside service standard |
| 3.4.5.5 | Jitter | ≤ 20 ms round trip → PE-PE Router | |
| 3.4.5.6 | Packet Loss | ≤ 1% → PE-PE Router | |
| **Access Circuit & CPE** | | | |
| | **SLA Measure** | **Mandatory Service Standard** | **Preferred Remedy** |
| 3.4.5.7 | Access Circuit and/or CPE Availability | It is required that the Respondent offer a service standard guarantee for access circuit and CPE availability. | 1 day's charges prorated for affected site for each hour of outage. |
| 3.4.5.8 | Latency | ≤ 55 ms round trip for ≥ T1 speeds | 10% of WAN port MRC for 10% outside service standard<br>30% of WAN port MRC for 30% outside service standard<br>50% of WAN port MRC for 50% outside service standard |
| 3.4.5.9 | Jitter | ≤ 20 ms round trip for both CPE-CPE router | |
| 3.4.5.10 | Packet Loss | ≤ 1% for both CPE-CPE router | |
| **Operational** | | | |
| | **SLA Measure** | **Mandatory Service Standard** | **Preferred Remedy** |
| 3.4.5.11 | Install, Moves, Adds, Changes | 512kbps to 6Mbps = 30 business days | 10% of install fee if service standard is not met. |
| | | 45Mbps = 40 business days | |
| 3.4.5.12 | Service outage alerting | <15 minutes | 5% CPE MRC |
| **Internet Service** | | | |
| | **SLA Measure** | **Mandatory Service Standard** | **Preferred Remedy** |
| 3.4.5.13 | Internet Circuit Availability | It is required that the Respondent offer a service | 1 day's charges prorated for affected |

| | | | |
|---|---|---|---|
| | | standard guarantee for Internet access circuit. | site for each hour of outage. |
| 3.4.5.14 | Latency | ≤ 55 ms round trip for ≥ DS3 speeds | 10% of WAN port MRC for 10% outside service standard<br>30% of WAN port MRC for 30% outside service standard<br>50% of WAN port MRC for 50% outside service standard |
| 3.4.5.15 | Jitter | ≤ 20 ms round trip for both CPE-PE router | |
| 3.4.5.16 | Packet Loss | ≤ 1% for both CPE-PE router | |

**Additional Guarantees and Provisions:**

3.4.5.17 Additional Guarantees: It is desired that the Respondent offer additional Service Standard guarantees, provisions, and remedies with respect to the Respondent's WAN services. These might include such measures as Mean Time to Repair (MTTR) or Maximum Service Affecting Outage Duration.

3.4.5.18 Chronic Outages and Missed Service Standards: The Respondent should offer provisions and remedies for chronic outages and chronic missed Service Standards.

**Additional Guarantees and Provisions:**

3.4.5.19 Additional Guarantees: It is desired that the Respondent offer additional Service Standard guarantees and provisions with respect to Access Circuits.

3.4.5.20 Chronic Outages and Missed Service Standards: The Respondent should offer provisions and remedies for chronic outages and chronic missed Service Standards.

### 3.4.6 Disaster Recovery Loss of Service Address Standard

It is desired that the Respondent support a primary plan for Loss of Service Address that would cover a variety of needs. These include temporary use of an alternate site and reconstruction of Access Circuits and CPE for the lost Service Address, as needed. This would also include provisions for rapid establishment or upgrade of Access Circuits to an alternate site, rapid establishment of temporary Private Virtual Circuits (PVC's) to the alternate site, and rapid label propagation in support of the new PVC's, for all Classes of Service. This would also include provisions for upgrade of CPE as needed.

### 3.4.7 Security

Security Service Standards: It is desirable that the Respondent offer Service Standards, provisions, and remedies applicable to Security Services. Examples include response to Denial of Service attacks, blocking known malicious IP addresses and URLs, providing authentication, authorization and accounting for network infrastructure components and secure management of said infrastructure (SSH).

### 3.4.8 VoIP

It is desired that the Respondent offer Service Standards, provisions, and remedies applicable to VoIP. At a minimum, the Respondent must offer a Service Standard guarantee and remedy with respect to the service guarantee.

### 3.4.9 Billing

Billing Service Standards: It is desired that the Respondent offer Service Standards, provisions, and remedies applicable to billing.

### 3.4.10 SLA Management

**Reporting:**

3.4.10.1 It is desired that the Respondent offer Service Standards, provisions, and remedies applicable to Reporting for Support of SLA Management.

**Service Review:**

3.4.10.2 It is desired that the Respondent offer Service Standards, provisions, and remedies applicable to participation in Service Review.

**SLA Review:**

3.4.10.3 It is desired that the Respondent offer Service Standards, provisions, and remedies applicable to participation in SLA Review.

## 3.5 Billing

### 3.5.1 Fixed Cost and Renegotiation

3.5.1.1 Fixed Cost: The Legislature desires that **all** cost be fixed during the initial contract and renewal terms unless there is a reduction in cost.

3.5.1.2 Renegotiation: The Legislature desires a renegotiation process to begin at least sixty (60) days prior to the end of the initial term and renewal terms of the Contract. Describe Respondent's approach for addressing renegotiation and define driving factors for reduction in cost.

### 3.5.2 Competitive Rates

3.5.2.1 Rates: ***[Mandatory – Respondent must confirm compliance]*** The Legislature requires that the cost, rates and terms offered to the Legislature during the renewal terms of the Contract is at least as favorable as the cost, rates and terms

offered to Respondent's similarly situated users. Describe Respondent's approach for keeping the Legislature's cost, rates and terms at least as favorable as those offered to Respondent's other users.

3.5.2.2 Competitive Market: ***[Mandatory – Respondent must confirm compliance]*** The Legislature requires that the cost, rates and terms offered to the Legislature during the renewal terms of the Contract remains competitive with the cost, rates and terms offered in the market. Describe how Respondent will keep cost, rates and terms competitive.

### 3.5.3 Invoice Presentation

3.5.3.1 Categorization: Propose a billing hierarchy that presents invoice details categorized by the following:

- Site (Service Address)
- Circuit type
- Circuit ID

3.5.3.2 Circuit ID: The Legislature desires all invoice components (e.g. FCC charges, one time charges, credits, recurring charges, cancellations, escalations, etc.) be linked to a Circuit ID.

3.5.3.3 Sample of Categorization: Provide a sample invoice of no more than ten (10) pages demonstrating understanding of the requirements previously listed.

3.5.3.4 Electronic File Format: ***[Mandatory - Respondent must confirm compliance]*** The Legislature requires the electronic submission of a single monthly invoice that is able to be downloaded to an office application (such as: XML, RTF, HTML, XLS) and be searchable by every data field and service code. Confirm Respondent's compliance with this mandatory requirement and describe the proposed methodology.

3.5.3.5 Itemization: The Legislature desires that invoices be presented in an itemized format with all abbreviations described. Respondent should supply a current glossary (and describe process for maintaining the glossary) of all abbreviations for any and all invoice components.

3.5.3.6 Penalties: The Legislature will not be held liable for penalties of any kind, including cancellation charges, and early termination charges. Confirm Respondent's acknowledgement and agreement.

3.5.3.7 Records: The Legislature desires that the Respondent will, and will require each of its subcontractors, to maintain accurate books, records, documents and other evidence concerning its financial status, costs, expenses, formulas for computing prices, and provision of services (collectively, "Records") for five (5) years after the final payment made by the Legislature. Confirm that Respondent's accounting procedures and practices conform to generally accepted accounting principles ("GAAP") and that the costs applicable to the Legislature will be readily ascertainable from Respondent's Records.

### 3.5.4 Billing Cycle

3.5.4.1 Bill Cycle: Describe the bill date cutoff process.

3.5.4.2 New Service Billing: The Legislature's obligation to pay shall begin only after the Legislature accepts the service.

### 3.5.5 Billing for Moves, Adds, Changes and Deletions (MACD)

3.5.5.1 MACD Charges: The Legislature desires that all charges associated with any work order activity will appear on the invoice to the legislature within a maximum of two (2) billing cycles from acceptance date. The Legislature will not accept any MACDs that were not authorized by the Legislature. Describe Respondent's process.

### 3.5.6 Credits

3.5.6.1 Credits for Billing Errors: The Legislature desires that credits for items billed in error or for other reasons must be refunded in the form of a credit against the monthly invoice. Describe Respondent's approach.

3.5.6.2 Credits: The Legislature desires all credits must be resolved within a maximum of three (3) billing cycles. Describe Respondent's approach.

### 3.5.7 Single Point of Contact

3.5.7.1 Communications: The Legislature desires that Respondent provide the Legislature a single point of contact for all billing issues/inquiries including a toll free number and email address. All communications should go through the Respondent's single point of contact. Describe the process for this requirement.

### 3.5.8 Dispute Resolution Process

3.5.8.1 Dispute Resolution Process: Define the billing dispute resolution process and benchmark timelines to resolve. Include the Legislature's responsibilities.

3.5.8.2 Dispute Resolution: The Legislature desires that all disputes must be resolved within a maximum of three (3) billing cycles. Describe the approach.

### 3.5.9 Billing Escalation

3.5.9.1 Billing Escalation: The Legislature desires that the Respondent establish and document a billing escalation process to resolve any billing issue including discrepancies, errors, omissions, or unrecognized charges. Describe Respondent's billing escalation process.

3.5.9.2 Tracking of all Billing Issues: Describe the process for tracking the status of all billing issues, inquiries, credits, refunds, and disputes.

## 3.6 Service Order Provisioning to include Moves, Adds, Changes, Disconnects (MACD)

### 3.6.1 Service Ordering

3.6.1.1 Service Ordering: The Legislature desires that the Respondent operate a Service Order Function that includes an online (web browser) system. The Service Order Function should include processes and procedures that can be used by the Legislature to initiate requests for new service on the WAN services and related services covered in this ITN. Provide the processes and procedures for Service Ordering.

3.6.1.2 Service Order System: The Legislature desires that all orders for new service in the delivery of the WAN services should be requested through an online Service Order System (web browser) provided by the Respondent. Describe how orders for new service are treated differently based upon their Priority Levels. Examples of Service Orders would include, but not be limited to, Access Circuits, CPE installation and configuration, QoS/CoS establishment, bandwidth establishment. Identify all turn-around times tied to each type of new service request. Provide policies and procedures utilized including alternate access methods if web is unavailable. Identify the types of items and activities that flow through the order management system and how confirmations are communicated back to the Legislature.

3.6.1.3 Service Order System Integration: Describe how the Respondent's Service Order System is integrated with Moves, Adds, Changes, and Deletions, Provisioning, Problem Management, and Billing Systems.

3.6.1.4 Access to Order System: The Legislature desires that authorized users be able to access the Service Order System with a web browser. Identify any other needed hardware or software for access to the Service Order System. The Service Order System should provide a graphical interface to the web browser. The Service Order System should support at least ten (10) concurrent authorized legislative information technology staff.

3.6.1.5 Service Order System Training: Training should be provided as to access and use of the Service Order System. Training should be provided for at least ten (10) legislative information technology staff. Describe the training that will be offered.

3.6.1.6 Service Order System Reports: The Service Order System should be able to produce both scheduled and ad hoc reports and provide online (web browser) viewing by the Legislature. Describe the standard reports available. The Legislature should be able to develop and view customized reports using the Service Order System. Examples of Service Order reports may include but not limited to Service Order activity by site, specific time periods, order status or by type of activity or circuit. Describe how the Service Order System can satisfy this requirement.

3.6.1.7 Provisioning of Additional WAN services: Describe processes and procedures for engineering (preparation) of Managed MPLS VPN services, Access Circuits, and other related services described in this ITN for the delivery of services. Describe initial engineering, installation, configuration, testing, cutover, acceptance testing and billing establishment. Identify when the billing cycle begins. Detail

coordination of activities with the Legislature, including, but not limited to, site preparation (site survey) and establishment of access arrangements with other providers.

3.6.1.8 Inventory: ***[Mandatory - Respondent must confirm compliance]*** Respondent is required to maintain a current and accurate inventory that would incorporate all the items to include, but not limited to: Circuit ID, IP, CPE IOS, CPE configuration archive, service address, on-site contact information and access circuits. The Respondent must provide inventory information to the Legislature on a regular basis and on request. The Respondent must maintain a current copy of inventory to include service items once the deployment of Managed MPLS VPN services begin. Inventory information must be available for secure viewing via web browser as well as in spreadsheet format. Provide the policies and procedures around this requirement.

## 3.7 Implementation and Acceptance

**The requirements specified in Section 3.7 apply specifically to the installation and implementation of the Respondent's services for the Legislature.**

### 3.7.1 Design Plan

3.7.1.1 Design Plan: ***[Mandatory - Respondent must confirm compliance]*** Respondent is required to provide a recommended design to include Access Circuits and CPE for each of the Service Addresses listed in Appendix A. Use the spreadsheets in Appendix B to propose the four requested bandwidth configurations .

### 3.7.2 Project Plan

3.7.2.1 Project Plan: ***[Mandatory - Respondent must confirm compliance]*** The Respondent is required to submit a representative but detailed project management plan that includes items such as: methodology, processes, procedures, WBS and schedule, demonstrating understanding of the scope and issues involved. The project plan is especially critical to the success of this effort. The Legislature realizes that the sequence of cutovers, (See Section 3.1.1) (includes two OLITS lab and two House lab) will have to be created in collaboration with the Respondent.

### 3.7.3 Respondent Qualifications

3.7.3.1 Prior Project Experience: Identify at least one example of a prior project in which Respondent performed transition and installation of Managed MPLS VPN services. The experience requirement can be satisfied with the use of a sub-contractor that will participate in this project. Attach a project plan (not including any proprietary customer information) that was used for this installation. State Respondent's level of involvement in the prior project (i.e., whether it was as a prime or subcontractor).

3.7.3.2 Customer References: ***[Mandatory - Respondent must confirm compliance]*** The Respondent is required to provide three references of users of like size (more than 40 sites). The references do not need to be utilizing MPLS VPN technology, but they do need to be utilizing a routed network. Using Appendix D, references must describe in detail the type and duration of services, dates of service, and effectiveness

of the services provided. Each reference will be evaluated for content and relevance. Respondent's reference information shall not exceed five pages in total for each reference. If the Respondent is partnering with a subcontractor, two separate references should be provided for the subcontractor in the same form as defined in Appendix D – References. The Legislature reserves the right to contact references as well as develop its own references. See 5.5 References.

3.7.3.3 Organizational Chart: Provide an organizational chart for the personnel who will be providing deliverables and/or performing the services requested during the transition. Changes of Key Personnel during the transition are subject to the Legislature's approval. Such approval will not be unreasonably withheld.

3.7.3.4 Resources: Describe the resources the Legislature will need to provide for the transition and the length of time.

3.7.3.5 Staff Experience: Submit resumes with references for each proposed key staff member employed by either Respondent or subcontractor.

### 3.7.4 Staffing Plan

3.7.4.1 Staffing Response: The Respondent should present a staffing Response that illustrates the best mix of skills and experience to achieve project objectives.

3.7.4.2 Key Personnel: Describe and provide names, resumes and responsibilities of all Key Personnel (if any) and time commitments of proposed staff (full time/part time and/or number of man days/months/ per person) over the course of the transition project. At a minimum, include the project leader and the technical lead.

### 3.7.5 Subcontractors

3.7.5.1 Named Subcontractors: The Respondent should disclose the planned use of any subcontractor that will perform **five percent (5%)** or more of the total cost of services described in the ITN. In addition, Respondent may choose to identify any other subcontractor that Respondent believes may add value.

3.7.5.2 Named Subcontractor Information: Respondent should provide the following information: Name and address of each Named Subcontractor and the work the subcontractor will be performing.

3.7.5.3 Subcontractor Approval: Adding or changing Named Subcontractors during the contract requires prior legislative approval.

3.7.5.4 Subcontractor Performance: The Respondent will be responsible for the performance of any subcontractors and will not be relieved by non-performance of any sub-contractors. Respondent shall provide a summary of qualifications, years of experience, and references for all Named Subcontractors.

3.7.5.5 The successful Respondent should replace the liaison or any assigned key contact at the request of the Legislature.

### 3.7.6 Access Circuits

3.7.6.1 Access Circuit: Attach a sample project plan and schedule for the transition of a district office and all other activities associated with the transition. The project plan should address, at a minimum, the following areas:

- Moves, Adds, Changes, and Deletions plan
- Provisioning
- Installation
- Testing
- Cutover
- Acceptance
- Risk Management plan
- Escalation procedure
- Assumptions on times to deal with other parties (the Legislature, district office personnel, local access providers, CPE order/delivery, etc.)

### 3.7.7 Timeline

3.7.7.1 All Sites: Propose a representative timeline for the transition of the Data Center, (Sites listed in Section 3.1.1) and testing sites. It is not necessary to call out individual sites, but the Respondent must provide justification for the proposed timeline.

3.7.7.2 Liquidated Damages for Missed Timeline: Prior to award, the Legislature and Respondent will negotiate a mutually agreeable final timeline, based on the Respondent's proposed timeline. For each Access Circuit that is not transitioned more than ten (10) business days after the date set forth in the timeline due to delays not caused by the Legislature, acts of God, wars, acts of public enemies, strikes, fires, floods, or other similar cause wholly beyond the Respondent's control, the Respondent shall pay to the Legislature, as liquidated damages, an amount equal to two (2) times the current MRC for such circuit.

### 3.7.8 Cutover

The Legislature desires a seamless cutover strategy that minimizes any negative impact on the ongoing delivery of services, especially the applications discussed in Section 3.2.9. The Legislature requires that the Respondent address the following:

3.7.8.1 Cutover Methodology: Describe the methodology, processes, and procedures for the logical and physical cutover of the network.

3.7.8.2 Cutover Backout: Describe the methodology, processes and procedures if the site conversion fails.

3.7.8.3 Cutover Change Management: Describe the change management plan for transition.

3.7.8.4 Cutover Test Plan: Describe the test plan for cutting over each site.

### 3.7.9 Acceptance

The acceptance of the circuits is to ensure that bandwidth, latency, and throughput have been provisioned successfully. The Legislature desires the following:

3.7.9.1 Acceptance Methodology of Respondent: Describe the methodology, processes and procedures for acceptance after the transition has been completed.

3.7.9.2 Acceptance Reports: Describe and provide sample of the reports that are provided to ensure that, after the transition, the network is operating within specified parameters.

3.7.9.3 Acceptance Billing: The Legislature's obligation to pay shall begin only after the Legislature accepts the service and the Respondent issues a disconnect order for current service.

### 3.7.10 Training

3.7.10.1 Initial Training: Describe the initial training that is provided for network management, ordering, billing, and problem management. There are various methods of accomplishing the training, i.e. offsite courses, web-based, on customer site, etc.

3.7.10.2 Professional Development Training: Describe the ongoing training that is provided for network management, ordering, billing and problem management. There are various methods of accomplishing the training, i.e. offsite courses, web-based, on customer site, etc.

## 3.8 Disentanglement

The Legislature expects full, complete, and timely cooperation in disentangling the relationship in the event that the Contract expires or terminates for any reason. In the event of expiration or termination, the Legislature expects that the Respondent shall, among other things: return all legislative data and documentation to the Legislature, including but not limited to configuration information and allow the Legislature or the replacement provider(s) continued access to all billing, ordering, and trouble ticketing systems, and processes that have been employed in servicing the Legislature, in accordance with methods and procedures to be agreed upon and established in the Contract. In the event of the expiration or termination of the relationship between the Legislature and the Respondent, the Respondent shall:

3.8.1 Disentanglement Approach and Process: The Respondent's Response should describe its specific approach to the Disentanglement process. Specifically, state the Respondent's proposed plan for Disentanglement, including key milestones and the Legislature/Respondent roles and responsibilities. Provide time estimates for the Disentanglement process based upon the number of locations detailed in this ITN.

3.8.2 Cooperation and Information: Respondent is requested to agree to cooperate with the Legislature and/or the replacement provider(s) and otherwise take all reasonable steps to assist the Legislature in effecting a smooth disentanglement upon the expiration or termination of the Contract, including the provision of information necessary to enable the Legislature's personnel, or that of a replacement provider(s), to fully assume and continue without interruption the provision of Services.

Respondent's Response should state its understanding of this paragraph and provide any details, conditions or assumptions.

3.8.3 Continued Service: Agree not to: (i) interrupt the provision of Services to the Legislature and its users or any obligations related to disentanglement, (ii) disable any hardware used to provide Services, or (iii) perform any other action that prevents, slows down, or reduces in any way the provision of Services to Legislative Network sites until the Legislature agrees that a satisfactory disentanglement has occurred. Respondent's Response should state their acknowledgement and agreement to each of the subparts of this paragraph and provide any details, conditions or assumptions.

## SECTION 4: Administrative Documents Required

### 4.1 Economy of Presentation

Each Response shall be prepared simply and economically, providing straightforward, concise delineation of Respondent's capabilities to satisfy the requirements of this ITN. Fancy bindings, colored displays, and promotional materials are not required. Emphasis on each Response must be on completeness and clarity of content. To expedite the evaluation of Responses, it is essential that Respondents follow the format and instructions contained herein.

### 4.2 Submission of Responses

Responses must be submitted in two (2) separate sealed parts: a Technical Response and a Cost Response, See Schedule of Events, Section 1.8 of this ITN.

The Response packages must be boxed or sealed and identified as follows:

- Response of (Your Company's Name and any subcontracting entity)
- Type of Response: (Technical or Cost)
- ITN #851, Network Services

### 4.3 Part 1 - Administrative Documents and Technical Response Content

**All Respondents must complete this section.**

#### 4.3.1 Administrative Documents *[Mandatory - Respondent must confirm compliance]*

The following items must be included in the Response:

- Completed Respondents Information Coversheet (page 1) of the ITN
- Signed Addenda Document(s) to the ITN (if applicable)
- Non-Collusion Statement (Appendix G)
- Disclosure Information (Appendix H)
- Copy of Respondent's Standard Contract
- Warranties (Appendix I)

#### 4.3.2 Technical Response Copies

One (1) original version, seven (7) copies and two (2) CD-ROM copies of the following Technical Response components must be packaged and identified as the Technical Response.

#### 4.3.3 Technical Response Content *[Mandatory - Respondent must confirm compliance]*

4.3.3.1 Cover Page

4.3.3.2 Table of Contents

4.3.3.3 Respondent's Mandatory Response Checklist, ITN Appendix F

4.3.3.4 Response to ITN Section 3.0 SCOPE OF SERVICES

In order to facilitate the Legislature's evaluation of the Responses, the Respondent must provide a complete description of how each requirement will be met, not merely an acknowledgement.

The Respondent's Technical Response must provide its approach/solution to all of the requirements in the Scope of Services Section 3.0. **The Technical Response must not contain any cost information.**

The Respondent's organization of responses to the requirements **must** be arranged in the sequence in which the requirements are referenced, and formatted with responses inserted directly after the requirement or request. Specific answers may be cross-referenced throughout Respondent's response to avoid duplication of material. Additional information may be submitted to accompany the Response. **In submitting additional information, please mark it as supplemental to the required response.**

**Response to Requirements**

All technical requirements defined in Section 3 must be addressed and responded to by Respondents. In addition, Respondents must be able to fulfill the requirements labeled ***[Mandatory – Respondent must confirm compliance]***. Failure to meet a **mandatory requirement** will result in disqualification of a Respondent's Response. General Business Information: The Respondent and any Named Subcontractors must indicate the name, address, telephone number, Email address, FAX number, and Employer Identification Number (EIN) of the legal entity with which the contract is to be written.

Legal Status of the Company: The Respondent **must** indicate the legal status of the company (e.g., sole proprietorship, partnership, or corporation).

Financial Information: The Legislature reserves the right to request evidence of a Respondent's financial capability or stability if the Legislature has a question as to such Respondent's abilities.

4.4 **Part 2 – Cost Response *[Mandatory - Respondent must confirm compliance]***

The first cost component is composed of the Legislature's total locations, (see Section 3.1.1). Current configurations are provided to the Respondent in Appendix A. The Respondent is to submit all four (4) bandwidth cost spreadsheets (Appendix B) back to the Legislature with costs for a recommended solution. The Legislature will evaluate all four (4) bandwidth options and reserves the right to select one (1) or more of the bandwidth options.

The Respondent must provide in a supplemental spreadsheet within Appendix B, explanations for any cost that includes a variable or estimated component (e.g. Access One Time and MRC cost, CPE One Time and MRC cost) and component level cost. Component level cost will include all service codes that make up the cost of the item including any pass through charges such as FCC mandated charges and taxes. Respondent will provide formulas used for computing costs including FCC mandated charges, franchise fees, and taxes that are clearly auditable and provide methodology for performing such audit.

The component level cost will be used to verify cost submitted in the four (4) bandwidth cost spreadsheets for the total locations (see Section 3.1.1). Respondent must submit detailed all

inclusive component level cost. Respondent must include monthly recurring charges for all services proposed including first and subsequent mileage (from any given CE to the PE located anywhere in the state), training, consulting/design/engineering service, custom documentation, firewalls, quality of service (Qo S), security, licenses, service generation charges, time and material fees, upgrade costs for router components, expedite charges, etc.

### 4.4.1 Cost Spreadsheets Appendix B (Four (4) Bandwidth Options must submit all 4)

4.4.1.1 *[Mandatory - Respondent must confirm compliance]* Cost Response Spreadsheets: The Legislature requires that the Respondent complete and submit the Four (4) Bandwidth Cost Response Spreadsheets in Appendix B in electronic format. Instructions for completing the spreadsheets are provided therein.

4.4.1.2 Cost Consistency: Where the Legislature requests cost information in more than one place and the four (4) bandwidth cost spreadsheets, the Legislature requires that the Respondent's stated cost for such items or components must be the same or consistent in all places. Failure to provide consistency may result in a negative impact on the evaluation.

4.4.1.3 *[Mandatory - Respondent must confirm compliance]* End to End Inclusive Cost: Submit cost that is all-inclusive (including travel) of costs end to end.

**All Respondents must follow the instructions in this section carefully.**

Copies: An original and seven (7) hard copies, and two (2) electronic versions of the Cost Response contents are required.

The Respondent shall submit **all four (4) Bandwidth Cost Responses** in the Appendix B Cost Response format and in a separately sealed package.

Four (4) Spreadsheets have been prepared for Respondents to submit cost for the full scope of services as provided in Appendix B.

Respondents must use the tables in Excel to submit their four (4) Bandwidth Cost Responses. No other method of submitting cost information will be accepted, and failure to comply will result in rejection of Respondent's Response. **See Mandatory Requirement 4.4.1.1.**

**SECTION 5:** Evaluation

## 5.1 Overview

Any Response that does not meet one or more of the mandatory requirements will be disqualified. The Legislature reserves the right at any time and for any reason to cancel this ITN. The Legislature reserves the right to waive any immaterial defects or irregularities in any Response and the Legislature reserves the right to reject any and/or all Responses.

## 5.2 Overall Evaluation of Technical Response

Incompleteness, inconsistencies or inaccuracies in the Technical Response may result in a negative impact on the evaluation.

Respondents must convey the technical, management, key personnel and other factors necessary to meet the requirements of this ITN in sufficient detail within their written Response. Responses which simply affirm and restate this ITN, or which do not adequately convey the technical approach proposed to meet this ITN's scope of services are not desired. Such an approach may result in a negative impact on the evaluation of the Response or a determination that the Respondent's Response is non-responsive.

## 5.3 Oral Presentations (Optional)

After the initial technical evaluation, the Respondents may be requested to make one or more oral presentations regarding their Responses, at dates, times and locations determined by the Legislature. The purpose of such presentations will be to allow Responsive Respondents to explain their proposed solutions and key points of their Responses. Additionally, Respondents may be asked questions in order to provide a better understanding of how the Responsive Respondent's proposed solution will meet the requirements of this ITN. It is critical that Respondents bring staff familiar with the detailed contents and solutions presented within Responsive Respondent's Response in order to maximize the productivity of the Oral Presentation sessions. Oral presentations may not be required, may not occur, and are not substitutes for a well-written Response.

## 5.4 Evaluation of Cost Responses

Respondents failing to submit cost in compliance with the Mandatory Requirements set forth in Sections 4.4.1.1 and 4.4.1.3 will be disqualified and removed from further evaluation.

The Legislature will evaluate all four (4) bandwidth options and reserves the right to select one (1) or more of the four (4) bandwidth options.

## 5.5 References

References shall be provided by the Respondent as outlined in Sections 3.7.3.2, 3.7.3.5 and 3.7.5.4 and shall be submitted using Appendix D – References. **References submitted using a format other than the Appendix D will not be considered.**

## 5.6 Notification of Negotiations

Negotiations will be with the Respondents meeting all the Mandatory requirements in this ITN.

Notification of Negotiations will be made to the respondents on or about April 26, 2011.

Negotiations shall be made with the responsive and responsible Respondents whose Responses are determined to be the most advantageous to the Legislature, taking into account all evaluation and negotiation factors set forth in this ITN.

## 5.7 Selection of Successful Respondent and Contract Award

The Legislature reserves the right to enter into contract negotiations with the Respondents to arrive at a final agreement incorporating this ITN, any addenda to this ITN, the successful Respondent's response to this ITN, the contract, any purchase order(s) issued as a result of this ITN, and such other terms and conditions agreed between the parties that may be necessary to the Legislature. If, however, the negotiations impasse with each of the respondents, the Legislature reserves the right to negotiate with any respondent who successfully responded to this ITN. The Legislature intends to award a contract to the respondent whose response through negotiations best meets the needs of the Legislature.

# Amendment One

## Invitation to Negotiate (ITN) #851

The Florida Legislature is amending Invitation to Negotiate (ITN) 851, Network Services to revise the following Sections:

- **Section 1.8 Revised Schedule of Events, Page 5 – These revised Schedule of Events' dates replace and supersede all original dates with ITN 851.**

**1.8 Schedule of Events**

| | |
|---|---|
| Issuance of ITN | February 25, 2011 |
| Mandatory Pre-Response Conference | March 8, 2011, 2:00 p.m. |
| Last date to submit written questions | March 11, 2011 |
| Written responses to all questions posted On website at www.leg.state.fl.us/ITN851 (on or about) | March 17, 2011 |
| Responses due by 3:00 p.m. for opening (fax or email **not** acceptable) | ~~March 31, 2011~~ April 15, 2011 |
| Anticipated review and evaluation of Technical and Cost responses completed | ~~April 19, 2011~~ May 4, 2011 |
| Notification to the Respondents to begin Negotiations | ~~April 26, 2011~~ May 11, 2011 |
| Contract negotiated and executed by the Parties (on or about) | ~~May 3, 2011~~ May 18, 2011 |

Special Accommodation: Any person requiring a special accommodation because of disability should call the Purchasing Office at 850/488-2322 at least five (5) work days prior to the response opening date. If you are hearing or speech impaired, please contact the Purchasing Office by using the Florida Relay Service which can be reached at 1-800-955-8771 (TDD).

- **Replaces Appendix A, Service Address Listing, which includes revisions to bandwidths, adding information on current connectivity types, additional locations and some address changes for the House Offices. Maps of Senate and House districts are included as Annex 1 and Annex 2 to this revised Appendix A.**

Questions and Answers to ITN 851

Senate – below represents the Senate and Office of Legislative Information Technology Services responses
House – below represents the House of Representatives responses

1. Is there a way to get ITN 851 Appendix A in Excel format

   The Legislature anticipates an amendment to revise Appendix A.

2. Are there diverse risers in building at the OLITS Senate Data Center building?
   **Senate:** The Pepper Building has two communication demarcation points. The first is on the West side of the building. Here the conduit runs from a communications manhole to the main demarcation room for the building on B1. The second demarcation point is sourced from the Capitol Bldg, room P7. The conduit runs from P-7 to the North East side of the Pepper Building and then on to the Pepper Building main demarcation room on B1.

   Conduits from the Pepper Building main demarcation room on B1 run to the Pepper Building Data Center on the Ground level. A separate demarcation point to the Pepper Building Data Center is available on the South side and this side needs conduit installed to be used.
   a. IF yes, please provide riser diagram if available
   No diagram available.

3. Are there diverse risers in building at the OIT House Data Center building?
   **House:** The House has two demarcation points in the P-7 of the Capitol.
   a. IF yes, please provide riser diagram if available
   No diagram available.

4. Are there dual conduits at the OIT House Data Center?
   **House:** There are conduits up one elevator shaft from P-7 to the 8th Floor of the Capitol.
   a. IF yes, please provide location and diagram if available
   No diagram available.

5. Can we get the existing bandwidth in place today by location?
   a. IF yes, please include the current connectivity type. i.e., DSL, T1, etc
   **Senate:** The Senate has a DS-3 for the WAN aggregation circuit.
   The Senate has a DS-3 for the Internet circuit. 15Mbps of this circuit is reserved for WAN Failover should the WAN DS-3 fail.
   All Districts have T-1.

**House:** The Legislature anticipates an amendment to revise Appendix A.

6. Can we get a list of the number of existing Analog lines (POTS) by location today?
**Senate:** Please see Attachment One to Questions and Answers.
**House:** There is one analog line in each district office.

7. How is faxing being handled today for each location? I.e., Fax Server, E-Fax, Local Fax machine with analog line
**Senate:** Each district office has an analog line which is dedicated to their standalone fax machine. The standalone fax machine is not integrated with the VOIP or network.
**House:** Faxing is done by fax machine and fax server.

8. What information is expected at the switch level from a Managed Services partner?
All Simple Network Management Protocol (SNMP) pollable objects + Debugging Syslogs.

9. Are the House and Senate considering using SIP Trunking in the Future?
Yes.

10. Can we get a list of the number of phones and staff by location?
**Senate:** Please see Attachment One to Questions and Answers.
**House:** The number of phones is not available but each district office has a staff of 3 and each satellite office has a staff of 2.

11. Describe your current least cost routing confirguation. Is the expectation that the vendor would manage the LCR tables in the Cisco Call manager and routers? Or, is there an expectation that the vendor will be providing hosted VoIP services?
**Senate and House:** The Senate does not use least cost routing. The House does not currently have VOIP deployed. The vendor will not be responsible for managing LCR tables. Hosted VOIP services is not part of this procurement.

12. Please describe current voip configuration and failover methods. Will the current PSTN remain in place or does it need to be quoted by the vendor?
**Senate and House:** Calls go over the WAN T-1 at the districts. If the T-1 fails, calls fail over to a reduced feature set on the FXS ports using Cisco Survivable Remote Site Telephony.

13. Is security required at each location or is security in the cloud an option?
**Senate and House:** Security in the cloud is an option.

14. What locations/circuit speeds need to burst?
**Senate and House:** None, all should be a set guaranteed bandwidth.

15. What is the network configuration today with respect to internet access at the remotes?
**Senate:** Remotes connect to Tallahassee LAN to access the Internet
**House:** Refer to network diagram in ITN, page 13.

16. Is the vendor responsible for managing the alternate internet provider?
No.

17. Can you provided a CPE inventory to include cards and IOS rev.? Can you specify the specific requirements for any voip services on the managed router? Which IOS services are required to run?

**Senate:**

18. Can we get an excel/word version of the location address list in Appendix A. The Legislature anticipates an amendment to revise Appendix A.

19. Is real-time reporting required within a class of service?
**Senate and House:** Yes.

20. Is alternate to Cisco CPE an option?
**Senate and House:** No, Cisco CPE is required.

21. Are the house and senate networks completely separate?
**Senate and House:** Yes
If not, how are they connected? Will the house host remain INET with MFN or does it need to be priced as well?

**House:** The house will be keeping MFN as one provider, will still need pricing for additional provider.

22. Who is to provide intrusion detection equipment?
**Senate and House:** Vendor

23. What is the preferred method for intrusion detection/prevention?
**Senate and House:** Please provide options.

24. Does State of Florida have intrusion detection/prevention in place today?
**Senate:** The Senate has 4 IPS Modules monitoring all inbound traffic and internal traffic, including WAN traffic routing through the Pepper Building Data Center.
**House:** The House has two IPS modules

25. What is the preferred access delivery method for the 45meg circuits? Please clarify options

26. For the dedicated circuits to satellite offices, are T1s acceptable?
**Senate and House:** Technology agnostic as long as it meets the bandwidth requirements.

27. Are Quest and OIT managed networks separate networks?
**Senate and House:** Yes.

28. Does state of Florida own the Cisco 2811 routers?
**House:** The House owns the 2811 routers installed in district offices. Will they remain in place?
**House:** Pricing options should be provided for a) keeping the current 2811's in place, or b) replacing them.
**Senate:** the Senate does not own the 2811 routers.

29. For monitoring, what level of access is desired for the customer/end user?
**Senate and House:** Read/Write.

30. Does state of Florida have real time monitoring capability today?
**Senate and House:** Yes.

31. What type of tools for the OIT and OLIT staff are desired for monitoring?
**Senate and House:** Standards-based SNMP & Syslog tools.

32. House Data Center 402 South Monroe Street, Tallhassee NPA-NXX missing. Is it 850-488? N/A

33. House site 025 Umatilla - NPA-NXX invalid. Is it 352-669? The Legislature anticipates an amendment to revise Appendix A.

34. House site 0732120 Main Street Fort Myers - MPA-NXX invalid. Is it 239-335? The Legislature anticipates an amendment to revise Appendix A.

35. Will the Legislature accept bids that present pricing as an all inclusive bid or does the Legislature require individual site pricing?
**Senate and House:** No, individual site pricing is required.

36. Does the Legislature require Internet at all locations (reference page 21 section 3.2.13.1) or Internet access to the OLITS and House OIT locations? If to all locations, what bandwidth is needed to locations?
**Senate and House:** All Internet will be routed out of Tallahassee, so no Internet is needed at the district offices.

37. Does the Legislature require VOIP as a stand alone service or does the Legislature need a vendor to supply CoS so that the Legislature will deliver VOIP?
**Senate and House:** The Legislature will deliver and manage VOIP, as well as the VOIP configuration on district routers. The vendor will supply end-to-end CoS and QoS capabilities across the WAN.

38. If the Legislature requires stand alone VOIP, what type of equipment does the Legislature currently have in place to support this service?
**Senate and House:** The Legislature does not require standalone VOIP from the vendor.

39. What signaling protocol is your current VOIP system using (SIP, IP Telephony)? SCCP (Skinny)

40. Do you own the process and the the equipment of your voice system failover to the PSTN?
**Senate and House:** Yes

41. What type/brand of voice equipment do you own?
**Senate and House:** CISCO

42. What applications will you use over the MPLS/VPN network that uses Multicast?
**Senate and House:** Video

43. Is there a different between Managed CPE and CPE?
**Senate and House:** No

3.1.1 Managed Multi-Protocol Label Switching (MPLS) IP VPN Services
A. 40 Senate district offices including managed CPE for minimum 16 LAN ports and one WAN port, including management and support of the extended wiring as needed in each office. Each office must be equipped with VoIP failover to a PSTN.

NOTE:
The House does not have a VOIP system in place at this time. All Answers that refer to VOIP were answered with the Senate VOIP system architecture in mind. When implemented the House will base its VOIP architecture on the Senate design.

44. Question: In Section 2.2, VoIP services are said to be managed by a specific provider, and that PSTN connections for resilience currently exist. Given the requirement stated in Section 3.1.1, why would "new" PSTN connections be needed? Does this requirement refer to an assumption that the existing remote site router supporting data and VoIP traffic would be replaced in this project and configuration requirements include PSTN resilience for VoIP traffic?
**Senate:** Senate district and satellite offices are currently equipped with managed CPE that handles VOIP failover to PSTN lines, using Cisco SRST modules, when the WAN link is unavailable. The vendor's solution must maintain this capability. The vendor is not responsible for the PSTN connections.

45. Question: What if any Voip configurations are on the routers? Or is the traffic pass through IP traffic with only QOS on the routers?
**Senate:** The Senate district and satellite office routers contain VoIP settings which include local, long distance, international dialing, music on hold, SRST fallback and PSTN settings. VoIP phones are configured to communicate first with Call Manager servers in Tallahasee, and failover to the local switch when the WAN connection is unavailable. The VoIP section of the configuration is managed and maintained by Legislative staff.

46. Question: Please describe the voice call path for VoIP and PSTN traffic, including 911 calls.
**Senate:** For Senate district and satellite offices, VoIP calls are carried over the WAN and local calls utilize the PSTN, including 911.

47. Question: What role does the current VoIP provider have in managing the remote site CPE? What will be their role regarding VoIP in a new network and managed services environment?
**Senate:** The VoIP portion of the remote site CPE is managed by the Senate VOIP administration team, which includes read and write access.

The requirement will remain the same with the new network and managed services environment.

48. Question: Please confirm that only VoIP traffic will traverse the local PSTN connection at remote sites in the event of a WAN failure.
**Senate:** Correct.

49. Question: Please specify the type of PSTN line at each location.
**Senate:** There are two to three standard analog land lines per office.

50. Question: Does "extended wiring" refer to network demarcation extensions specifically?
**Senate and House:** Yes, all wiring from the demarcation point to the router and if applicable, from the router to the switch, is considered extended wiring and the vendor is responsible for all extended wiring repairs and installations.

51. If such are required in certain locations, do they not already exist based on building entrance facilities and location of telecommunication(s) rooms?
**Senate:** All operational sites will have extended wiring already present in the facility.
**House:** Not all offices have designated demarcation points and offices that currently do, could change.

52. Will that wiring be removed/replaced due to condition?
**Senate and House:** It is the Service Provider's responsibility to maintain the extended wiring to the extent that it provides the service levels defined in the ITN.

53. Will you require that bidder certify the existing (or new if needed) extended demarcation cabling?
**Senate and House:** Only if the bidder requires certification of extended wiring before accepting maintenance responsibility.

54. If existing cable is to be retained/reused, and supported by service provider, what information will be provided specific to the condition of that cabling?
**Senate and House:** If a site is not operating or in service is degraded due to extended wiring, the Service Provider will be provided with that information. Specifics on the wiring condition will not be provided.

Section 3.2 -
Respondent-managed Customer Premise Equipment which includes for Senate districts one WAN port for uplink and 16 LAN ports for intra-office connectivity and Satellite offices may have one WAN and 8 LAN ports. For House districts the CPE must include one WAN port for uplink and 8 LAN

ports for intra-office connectivity, House satellite office will require one WAN port and 4 LAN ports.

55. Question: Is Cisco CPE preferred based on pre-existing configuration and operations conditions, specifically in regard to the Cisco VoIP environment?
**Senate and House:** No, from a management standpoint Cisco is preferred, not just for VoIP.

56. Does the current VoIP configuration in remote site routers require the use of SRST or equivalent?
**Senate and House:** Yes

57. Do the remote site routers run Cisco Call Manager Express?
**Senate:** Yes, Cisco CPE is preferred based on the pre-existing configuration and requirements. Yes, the current VoIP configuration in remote site routers requires the use of SRST. No, remote sites are configured as H323 gateways.

58. Question: Please provide specific design detail regarding the VoIP systems so that remote site CPE can be appropriately selected and configured. Please indicate specific equipment and software license requirements for remote site CPE in regard to the existing VoIP systems environment.
**Senate and House:** The remote site CPE must contain the FXO Interface Cards for four ports, POE modules for 16 ports and the appropriate Unified Communication feature set license for enabling SRST. Please see Attachment 1 for counts of VoIP phones by site.

59. Question: What is the intended use of LAN ports in the remote site routers?
**Senate:** Phone and end user computer access.
**House:** End-user device connectivity.

60. Do the router-based LAN ports require POE?
**Senate and House:** Yes.

61. Do the remote sites utilize a LAN switch for end-user device connectivity (PC, VoIP phone, Video?)
**Senate and House:** They use an integrated switch card inserted in the 2811.

62. Do the LAN switches exist, and if so, will they be retained or replaced as part of this initiative?
**Senate:** They exist only as integrated switch cards. They are the sole property of Qwest.

**House:** They exist only as integrated switch cards in the 2811 routers, which may be replaced with the routers depending on pricing.

63. Question: Are the remote site WAN routers the same device as that which supports VoIP, notably since the requirements indicate the need for WAN and LAN ports?
**Senate and House:** Yes.

64. Question: Will the Legislature provide the required "clean" power for the CPE? Does that include UPS equipment? If not, what is the expectation of the Legislature in this regard?
**Senate and House:** Yes.

Fully managed end-to-end service with Service Level Agreements (SLAs). The respondent is required to manage and maintain all circuit wiring and equipment up to and including the LAN equipment. LAN wiring, that is the wiring from the CPE to the end user's device, is not part of the end-to-end service.

65. Question: The ITN specifies remote site router CPE that includes a WAN port and switch ports (16 or 8, depending on location requirement). What is intended by the text, "The respondent is required to manage and maintain all circuit wiring and equipment up to and including the LAN equipment."?
**Senate and House:** If the provider issues a LAN switch separate from the WAN router, the provider is responsible for management and maintenance on the wiring from the switch to the router.

66. What LAN equipment exists at respective locations apart from the router CPE (with 16 or 8 LAN ports) already noted? Please specify the make/model/software version of the LAN equipment.
**Senate and House:** None, all LAN equipment is part of the current router CPE with 16 or 8 LAN ports.

3.2.4.1 QoS Functionality: ***[Mandatory – Respondent must confirm compliance]*** The Legislature requires end-to-end IP QoS features to preferentially handle traffic as one of the network's fundamental design philosophies to accomplish the task of managing resources within the core. The network must be able to prioritize traffic by tagging packets in order to utilize multiple queues for voice, video and other mission critical applications and to segregate such traffic from other traffic types that are more delay-tolerant.

67. Question: Please describe the historical nature and anticipated requirements of network traffic types in regard to data, voice, and video at remote locations? QoS policies can govern prioritized consumption (and

reservation) of network bandwidth, please describe the current method of policing such traffic over various link speeds.

**Senate:** The Senate WAN presently uses four classes of service. One for voice live video, one for voice control, one for video and then a default traffic class.

3.2.8.1 Fault-Tolerance: ***[Mandatory – Respondent must confirm compliance]*** The Legislature requires fault-tolerance in the core network and for the Legislature's web services such as might be provided by backup tunnels. Respondent must describe its approach to fault-tolerance. Fault-Tolerance must also include rerouting and load balancing the Legislature's public web services to a secondary Internet circuit should the primary Internet circuit fail or become overwhelmed.

And

3.2.11.2 Access Circuits: ***[Mandatory - Respondent must confirm compliance]*** The Legislature requires that the Respondent supply the most economical physical Access Circuits that meet the service level and bandwidth requirements of the individual service address. Describe the strategy for providing the most economical accessibility while meeting Service Level Agreements (SLA).

68. Question: Please describe any requirements for access (physical circuit) redundancy at remote locations, distinct from fault-tolerance within the provider's core network (cloud).
**Senate and House:** None

Please describe the single-point-of-contact requirements for managed network, managed CPE, managed security, and service (help) desk.

69. Question: Please clarify the statement, "Fault-Tolerance must also include rerouting and load balancing the Legislature's public web services to a secondary Internet circuit should the primary Internet circuit fail or become overwhelmed." Does the requirement intend that Respondent provide hosting and/or load balancing of network traffic to/from the Legislature's public web services?
**Senate:** Yes. The Senate currently advertises all its networks out both Internet circuits. The web-hosting network is the 199.44.254.0/24 network for the Senate. Using BGP peering with CenturyLink and Qwest, the 199.44.254.0/24 network is advertised with a path pad on the Qwest link and without a path pad on the Centurylink circuit, making Centurylink preferable. The Service Provider will be expected to do the same.
**House:** Yes, The House will require the Service Provider to provide load balancing.

70. Question: In regard to Section 3.2.8.1, and its relation to the MPLS WAN and not Internet, please clarify the requirement for this statement, "Fault-Tolerance must also include rerouting and load balancing the Legislature's public web services to a secondary Internet circuit should the primary Internet circuit fail or become overwhelmed."
**Senate and House:** Public web services are not hosted on the MPLS WAN and this ITN does not expect the WAN circuit to host web sites to the public.
**Senate:** Under the current configuration, Senate WAN resiliency is provided through the Qwest Internet circuit should the primary WAN DS-3 fail. A similar function is expected of the Service Provider.

3.2.1.1 Managed and Dynamic MPLS VPN Routing ***[Mandatory - Respondent must confirm compliance]*** The Legislature requires a core network that supports the Multi-Protocol Label Switching routing protocol.
**Core Network: Describe the following:**

- Core/backbone with a drawing including any aggregation services.

71. Question: Please expand on what you mean by "aggregation services"
**Senate and House:** Any circuit that transports multiple remote office circuits. Example: If there are 28 T1s aggregated into a single DS-3, the DS-3 is the aggregation service.

3.2.8.2 Traffic Rerouting: [***Mandatory - Respondent must confirm compliance.***] The Legislature requires dynamic routing protocols for all district offices and the capability to automatically reroute traffic in the event transport troubles are detected. Describe the procedures to initiate automatic rerouting. Include any manual procedures. Describe rerouting actions; explain which transport facility has priority over others and who can in practice initiate manual rerouting of the Managed MPLS VPN. Discuss the Legislature's role in this area including how the Legislature is notified when rerouting occurs.

72. Question: Please define failure types related to procedures to initiate rerouting?
**Senate and House:** Loss of uplink or severe degregation of service, enough to overcome the BGP path-pad.

73. Question: Please clarify the dynamic routing protocols under consideration.
**Senate and House:** Standards based only. OSPF & BGP

74. Question: Please clarify the requirement with distinction between what the Respondent may perform as a core (provider cloud) network provider and

the Legislature's expectation/anticipation of having a role in core network routing operation.
**Senate and House:** All WAN links should be multipoint to multipoint within the core. Dynamic routing protocols are preferable when peering with the Pepper Bldg Data Center and HOIT core network.

3.2.10 Voice

75. Question: Do you seek both an on-net (site to site calls) as well as off-net VoIP solution which leverages the MPLS network?
**Senate and House:** A VoIP solution is not part of this procurement. The existing VoIP system will utilize the MPLS network to make on-net calls. The vendor's solution will need to meet the requirements as specified in the ITN.

Various Sections

76. Question: Numerous sections within the ITN reference QoS / CoS as well as VoIP.
How much remote site (each) bandwidth needs to be dedicated to voice traffic?
**Senate and House:** policy-map qos-wan
class wan-voice-livevideo
priority percent 40
set ip precedence 5
class wan-voice-control
bandwidth 15
set ip precedence 4
class VIDEO
bandwidth 25
set ip precedence 3
class class-default
fair-queue
random-detect
shape average 1400000

77. How much bandwidth will be needed for voice at the centralized / hub sites?
(For example, within Appendix B Option 1, the full port size specified at the remotes is 512K. Of this 512K, how much traffic will be prioritized for VoIP?)
**Senate and House:** policy-map qos-wan

class wan-voice-data-livevideo
priority percent 40
set ip precedence 5
class wan-voice-control
bandwidth 10
set ip precedence 4
class VIDEO
bandwidth 20
set ip precedence 3

78. Will this VoIP prioritized value be the same when applied to Appendix B Options 2, 3 and 4?
**Senate and House:** Yes.
If not, what VoIP bandwidth values are requested?

**3.2.14 Network Security**
The physical security of network components (such as buildings, power services, continuity of operations, etc.) and the security of the information that will traverse the network is a prime concern and must be defined as part of this Response.
3.2.14.1 Security Threats: ***[Mandatory - Respondent must confirm compliance]*** The Respondent is required to work with the Legislature to address security threats. This includes threat mitigation and event correlation and access to tools and reports to aid the Legislature in monitoring and tracing security threats. This also includes providing support for forensic investigation and incident response procedures in the event of malicious network activity. Describe how this will be addressed.

79. Question: Please describe what is intended by the term, "work with."
**Senate and House:** Senate and House: "work with" is defined as a good faith attempt to fulfill any request of the Service Provider by the legislature to help in any investigation as it pertains to data loss, tampering or improper use.

80. Question: Please describe the intention of the requirement for access to tool and reports?
**Senate and House:** Any tools or reports that would help in an investigation prompted by the legislature.
Is the Legislature seeking a provider-based (hosted and managed) Vulnerability Management System capability?
Senate and House: No.

81. Question: Please describe the requirement for incident response and forensic investigation?
**Senate and House:** Any tools or reports that would help in an investigation prompted by the legislature.
Is the legislature requiring this service to be included in pricing or as an optional retainer service?
**Senate and House:** Yes, to be included.
Does the Legislature require training on forensics response?
**Senate and House:** No.
Is the desired forensics response capability constrained to what can be offered via reporting of information as output of managed security services?
**Senate and House:** Yes.
Does the Legislature require incident response and forensic response as a component of managed security services (vulnerability scanning, for example)?
**Senate and House:** No.
If retainer services are desired, how many sites will be considered in scope and what response times are required?

3.2.14.2 Security Threats CPE: ***[Mandatory - Respondent must confirm compliance]*** The Respondent is required to work with the Legislature to address security threats at the CPE port level. This includes authentication, authorization and accounting of end devices/users. Describe how this will be addressed.

82. Question: Does the Legislature maintain an existing 802.1x based capability for controlling network access for users and devices?
**House:** For the House, not in the District Offices, but will implement once all offices have been moved to a managed network.
If so, please describe that capability and expectations for its utilization going forward? We will be using Cisco NAC to stop rogue devices.
**Senate:** The Senate does not use 802.1x in the districts. It uses MAC address filtering and Cisco port-security to stop rogue network devices from accessing the network. We will not be using Cisco NAC to stop rogue devices.

83. Question: Does the Legislature intend the utilization of 802.1x or another network access control method?
**House:** For the House, NAC.
If so, does the Legislature intend to provide the "Directory" services, or authentication, authorization, and accounting (AAA) systems?

**Senate:** If NAC is deployed, the Senate will provide the AAA system for its users.
**House:** Yes.

84. Question: Please describe the extent of service/support required to satisfy working "with the Legislature to address security threats at the CPE port level."
**Senate and House:** The Senate expects the Service Provider to work in good faith and extend every resource available to assist the Legislature in tracking and eliminating sources of security threats

85. Question: Regarding the Legislature requirement for AAA services, please describe requirements in terms of:
Two-factor authentication to the environment and applications, e.g. tokens?
Cloud-based Identity and access management (IAM), e.g. single sign-on?
Premise-based or cloud-based PKI services?
**Senate:** A NAC Solution is not required for this ITN. If AAA issues arise at a remote district, the Legislature expects cooperation from the Service Provider to track down the AAA issues to the source LAN port on the WAN. If the LAN port requires configuration to fix the issue (i.e. take the port out of a err-disabled state) the Legislature expects the Service Provider to take the necessary action.
**House:** For the House, If AAA issues arise at a remote district, the Legislature expects cooperation from the Service Provider to track down the AAA issues to the source LAN port on the WAN. If the LAN port requires configuration to fix the issue (i.e. take the port out of a err-disabled state) the Legislature expects the Service Provider to take the necessary action.

86. Question: What is the definition of "threat mitigation", does the Legislature expect Respondent to provide on-site professional services assistance?
**Senate and House:** No.
Or is Legislature satisfied with recommended remediation actions as detailed in Incident Reporting as output of managed security services?
**Senate and House:** Yes.

87. Question: As for the "event correlation" – what is the position of the Legislature concerning the event correlation occurring offsite in Respondent datacenters? Does the Legislature require event correlation to be done onsite within Legislature premises?
**Senate and House:** Event correlation will be provided within the Legislature's premises.

88. Question: Apart from what is proposed for remote site managed CPE, what devices are in scope for managed security services and/or incident response and forensic response? Please specify Vendor/Model#/Software Version etc.
**Senate and House:** None.

Appendix B

89. Question: Is it possible for the Legislature to modify the Appendix B Cost Summary worksheets to include:

A column that states the prioritized VoIP bandwidth required for each remote location?
**Senate and House:** Each remote site requires 600k of prioritized traffic for VoIP for 1.5Mbps circuits and higher. A 512K circuit requires 200kbps of VoIP prioritized traffic.

90. Question: What is the minimum bandwidth required at Tallahassee OLITS and House OIT MPLS WAN network hubs for the network options noted in Appendix B, Options 1 through 4?
**Senate:** Minimum for the Senate is 45Mbps.
**House:** For the House, 33Mbps

3.2.11.3 Availability: ***[Mandatory - Respondent must confirm compliance]*** The Legislature requires the ability to choose Access Circuit Availability per the business requirements of each service address. Using the spreadsheet located in Appendix C, list each Access Circuit type Respondent proposes with its accompanying bandwidth, Availability, Latency, Jitter, MTTR, and Installation.
**AND**

Appendix C

91. Question: Does the requirement for availability as stated within Section 3.2.11.3 suggest that the Legislature would consider various SLA parameters for the respective Access Circuit types proposed?
See Appendix C.

92. Question: Please provide a sample Appendix C, including example contents (data format) of each spreadsheet cell that meets your expectations for information provided.
See Appendix C.

**3.2.13 Internet Access**

3.2.13.1 Internet Access (Internal User Access): ***[Mandatory - Respondent must confirm compliance]*** The Legislature requires secure Internet access for all sites connected to its Managed MPLS VPN network including Tallahassee Capitol Complex. Respondent must describe the strategy for providing access to the Internet. OLITS will provide for and manage the gateway to the OLITS-managed Internet. House OIT will provide for and manage the gateway to the internet for the House OIT-managed Network.

93. Question: Please clarify the requirement for secure Internet access for all sites. Does this requirement intend that remote sites will route Internet bound traffic to Legislature Internet topology in Tallahassee data centers? Does this requirement intend that Internet access is available locally at each remote site and that a security function (firewalling) is included?
**Senate and House:** Traffic should be secured through separation using MPLS VPN standards while on the WAN. Internet access is provided in the Pepper Building (Senate) and Capitol Building (House) and is secured using the Senate and House Firewalls.

94. Question: Please clarify the statement, "OLITS will provide for and manage the gateway to the OLITS-managed Internet. House OIT will provide for and manage the gateway to the internet for the House OIT-managed Network." Does this intend that Internet circuits provided at Tallahassee will terminate on respective Legislature routers/gateways?
**Senate:** No, Circuits should Terminate on the Service Provider's equipment. Current termination equipment for the Senate is a Cisco 3845. The 3845 then connects to the Senate LAN equipment.
**House:** No, Circuits should Terminate on the Service Provider's equipment. Current termination equipment for the Senate and the House is a Cisco 3845. The 3845 then connects to the Senate LAN or the House LAN equipment.
Is there a requirement for Respondent to provide routers for the Internet circuits at Tallahassee?
**Senate:** Yes.
**House:** For the House, they own their routers and would like to keep them. Please provide pricing options if these routers are not sufficient.

3.3.2.3 Competitive Market Refresh: [Mandatory – Respondent must confirm compliance] The Legislature requires that the cost, rates and terms offered to the Legislature during the contract term remains competitive with the cost, rates and terms offered in the market. Describe how Respondent will keep cost, rates and terms competitive.

95. Question: For consistency, shouldn't this sentence state: "Respondent must confirm compliance] The Legislature requires that the cost, rates and

terms offered to the Legislature during the renewal terms of the Contract remains competitive with the cost, rates and terms offered to Respondents similarly situated users." as it states in section 3.5.2.1
No, this wording remains as is in the ITN.

3.5.2.2 Competitive Market: [Mandatory – Respondent must confirm compliance] The Legislature requires that the cost, rates and terms offered to the Legislature during the renewal terms of the Contract remains competitive with the cost, rates and terms offered in the market. Describe how Respondent will keep cost, rates and terms competitive.

96. Question: For consistency, shouldn't this sentence state: "Respondent must confirm compliance] The Legislature requires that the cost, rates and terms offered to the Legislature during the renewal terms of the Contract remains competitive with the cost, rates and terms offered to Respondents similarly situated users." as it states in section 3.5.2.1
No, this wording remains as is in the ITN.

97. The following section, 4.4.1.3, references four (4) spreadsheets. I only see three (3) in the ITN listing. Is there a fourth?

The Respondent shall submit all four (4) Bandwidth Cost Responses in the Appendix B Cost Response format and in a separately sealed package.

Four (4) Spreadsheets have been prepared for Respondents to submit cost for the full scope of services as provided in Appendix B.

Respondents must use the tables in Excel to submit their four (4) Bandwidth Cost Responses. No other method of submitting cost information will be accepted, and failure to comply will result in rejection of Respondent's Response. See Mandatory Requirement 4.4.1.1.

**Senate and House:** All four spreadsheets are included in Appendix B.

98. Does the Legislature intend to use all new CPE (routers), or are they planning on reusing any existing equipment?
**Senate:** Respondent to provide pricing options.
**House:** For the House, the current 2811's would be preferred, but provide pricing options.

99. Is the legislature open to managing only the voice-related areas of the router configuration while the vendor manages everything else?
**Senate and House:** Yes.

100. In the process of analyzing the Florida Legislature ITN, and when viewing 'Appendix A – Service Address Listings', pages 3, 4, and 5, have many

typos and it is very difficult to read the addresses listed on these pages. Do you happen to have another document that is easier to read?
**Senate and House:** The Legislature anticipates an amendment to revise Appendix A.

101. Do you have the Address Listings available in a spreadsheet format?
**Senate and House:** The Legislature anticipates an amendment to revise Appendix A.

102. What are the Senate and House preferences regarding customer read/write access to the fully managed routers?
**Senate and House:** Read/write access is required

# The Florida Legislature - ITN #851
## Appendix B - Respondent's Recommendation and Cost

### Instructions

**The Respondents must complete Appendix B – Respondent's Recommendation and Cost spreadsheets with proposed solutions and all inclusive Cost for each of the four network bandwidth options. Each spreadsheet is composed of the following six (6) sections:**

**1. Tallahassee Core** – Should include all costs associated with the OLITS-Managed & House OIT-Managed network services, with the exception of IPS/IDS.

**2. Internet Access Failover** - Internet Circuits in the Pepper Building and Capitol should allow failover to a separate Internet Service Provider.

**3. Commission on Ethics** – Should include all costs associated with providing the Commission on Ethics access to the Legislative MPLS Network.

**4. Wide Area Network** – Should include all costs associated with providing all district and satellite office's connectivity to the Legislative MPLS network for each of the four bandwidth options. This section must include all costs for Respondent managed customer premise equipment to include 16 network ports per district office and 8 ports per satellite office.

**5. Other Implementation Cost** – Should include any and all remaining costs not identified in the sections above.

**6. Intrusion Prevention / Intrusion Detection System (IPS/IDS)** – Optional Cost

Respondents may include optional services on the cost spreadsheets labeled Optional Services. These options will not be evaluated as components of the Cost response.

The Cost spreadsheets should indicate the total cost for each proposed network option for years one through four and total cost for renewal of the fifth and sixth year; and total cost for renewal of the seventh and eighth years.

### Spreadsheet Columns

| | |
|---|---|
| Service Address / Service | The location of the access circuit or a description of the service being proposed. |
| City, State, Zip | The city, state and zip of proposed access circuit or service proposed. |
| Exch | The telephone exchange for named service addresses. |
| Managed CPE Type | The proposed managed customer premise equipment (CPE). Each managed CPE type proposed must be identified in Appendix C – SLA Parameters. |
| Access Circuit Type | The proposed access circuit type. Each circuit access type proposed must be identified in Appendix C – SLA Parameters. |

| | |
|---|---|
| Bandwidth | The bandwidth proposed for the service address. Bandwidth for district offices must equal the minimum required for each option. |
| PVC CIR | If applicable, the Private Virtual Circuit Committed Information Rate must be included. If not applicable, indicate N/A. |
| Managed CPE One Time Cost | If applicable, all one time cost associated with the managed customer premise equipment (CPE). |
| Managed CPE MRC Cost | All monthly recurring charges (MRC) associated with the managed customer premise equipment (CPE). |
| Annual Managed CPE Cost (CPE MRC * 12) | Annual cost of the managed CPE equal to CPE MRC * 12. |
| Circuit One Time Cost | If applicable, all one time access circuit cost for the service address or service being provided. |
| Circuit MRC Cost | All monthly recurring charges (MRC) associated with the access circuit for the service address or service being provided. Include estimated Federal Fees MRC, WAN Port MRC, Local Loop MRC, and Management MRC as applicable. |
| Circuit Annual Cost (MRC * 12) | Annual circuit cost equal to Managed CPE Cost – MRC * 12 months. |
| 1st Year Total Cost (One Time + Annual Recurring) | A field for the first year total cost of service. Equals the sum of One Time Managed CPE Cost, Annual Managed CPE Cost, One Time Circuit Cost, and Annual Circuit Cost. |
| 2nd Year Total Cost (Not To Exceed) | A field for the second year total cost of service. |
| 3rd Year Total Cost (Not To Exceed) | A field for the third year total cost of service. |
| 4th Year Total Cost (Not To Exceed) | A field for the fourth year total cost of service. |
| 5th Year Total Cost | A field for the renewal of the fifth year total cost of service. |
| 6th Year Total Cost | A field for the renewal of the sixth year of total cost of service. |
| 7th Year Total Cost | A field for the renewal of the seventh year of total cost of service. |
| 8th Year Total Cost | A field for the renewal of the eighth year of total cost of service. |

# The Florida Legislature - ITN #851

## Optional Available Services

# The Florida Legislature - ITN #851
## Appendix B - Respondent's Recommendation and Cost

### Instructions

**The Respondents must complete Appendix B – Respondent's Recommendation and Cost spreadsheets with proposed solutions and all inclusive Cost for each of the four network bandwidth options. Each spreadsheet is composed of the following six (6) sections:**

**1. Tallahassee Core** – Should include all costs associated with the OLITS-Managed & House OIT-Managed network services, with the exception of IPS/IDS.

**2. Internet Access Failover** - Internet Circuits in the Pepper Building and Capitol should allow failover to a separate Internet Service Provider.

**3. Commission on Ethics** – Should include all costs associated with providing the Commission on Ethics access to the Legislative MPLS Network.

**4. Wide Area Network** – Should include all costs associated with providing all district and satellite office's connectivity to the Legislative MPLS network for each of the four bandwidth options. This section must include all costs for Respondent managed customer premise equipment to include 16 network ports per district office and 8 ports per satellite office.

**5. Other Implementation Cost** – Should include any and all remaining costs not identified in the sections above.

**6. Intrusion Prevention / Intrusion Detection System (IPS/IDS)** – Optional Cost

Respondents may include optional services on the cost spreadsheets labeled Optional Services. These options will not be evaluated as components of the Cost response.

The Cost spreadsheets should indicate the total cost for each proposed network option for years one through four and total cost for renewal of the fifth and sixth year; and total cost for renewal of the seventh and eighth years.

### Spreadsheet Columns

| | |
|---|---|
| Service Address / Service | The location of the access circuit or a description of the service being proposed. |
| City, State, Zip | The city, state and zip of proposed access circuit or service proposed. |
| Exch | The telephone exchange for named service addresses. |
| Managed CPE Type | The proposed managed customer premise equipment (CPE). Each managed CPE type proposed must be identified in Appendix C – SLA Parameters. |
| Access Circuit Type | The proposed access circuit type. Each circuit access type proposed must be identified in Appendix C – SLA Parameters. |

| | |
|---|---|
| Bandwidth | The bandwidth proposed for the service address. Bandwidth for district offices must equal the minimum required for each option. |
| PVC CIR | If applicable, the Private Virtual Circuit Committed Information Rate must be included. If not applicable, indicate N/A. |
| Managed CPE One Time Cost | If applicable, all one time cost associated with the managed customer premise equipment (CPE). |
| Managed CPE MRC Cost | All monthly recurring charges (MRC) associated with the managed customer premise equipment (CPE). |
| Annual Managed CPE Cost (CPE MRC * 12) | Annual cost of the managed CPE equal to CPE MRC * 12. |
| Circuit One Time Cost | If applicable, all one time access circuit cost for the service address or service being provided. |
| Circuit MRC Cost | All monthly recurring charges (MRC) associated with the access circuit for the service address or service being provided. Include estimated Federal Fees MRC, WAN Port MRC, Local Loop MRC, and Management MRC as applicable. |
| Circuit Annual Cost (MRC * 12) | Annual circuit cost equal to Managed CPE Cost – MRC * 12 months. |
| 1st Year Total Cost (One Time + Annual Recurring) | A field for the first year total cost of service. Equals the sum of One Time Managed CPE Cost, Annual Managed CPE Cost, One Time Circuit Cost, and Annual Circuit Cost. |
| 2nd Year Total Cost (Not To Exceed) | A field for the second year total cost of service. |
| 3rd Year Total Cost (Not To Exceed) | A field for the third year total cost of service. |
| 4th Year Total Cost (Not To Exceed) | A field for the fourth year total cost of service. |
| 5th Year Total Cost | A field for the renewal of the fifth year total cost of service. |
| 6th Year Total Cost | A field for the renewal of the sixth year of total cost of service. |
| 7th Year Total Cost | A field for the renewal of the seventh year of total cost of service. |
| 8th Year Total Cost | A field for the renewal of the eighth year of total cost of service. |

# The Florida Legislature - ITN #851

## Optional Available Services

# The Florida Legislature - ITN #851
## Appendix B - Respondent's Recommendation and Cost

### Instructions

**The Respondents must complete Appendix B – Respondent's Recommendation and Cost spreadsheets with proposed solutions and all inclusive Cost for each of the four network bandwidth options. Each spreadsheet is composed of the following six (6) sections:**

**1. Tallahassee Core** – Should include all costs associated with the OLITS-Managed & House OIT-Managed network services, with the exception of IPS/IDS.

**2. Internet Access Failover** - Internet Circuits in the Pepper Building and Capitol should allow failover to a separate Internet Service Provider.

**3. Commission on Ethics** – Should include all costs associated with providing the Commission on Ethics access to the Legislative MPLS Network.

**4. Wide Area Network** – Should include all costs associated with providing all district and satellite office's connectivity to the Legislative MPLS network for each of the four bandwidth options. This section must include all costs for Respondent managed customer premise equipment to include 16 network ports per district office and 8 ports per satellite office.

**5. Other Implementation Cost** – Should include any and all remaining costs not identified in the sections above.

**6. Intrusion Prevention / Intrusion Detection System (IPS/IDS)** – Optional Cost

Respondents may include optional services on the cost spreadsheets labeled Optional Services. These options will not be evaluated as components of the Cost response.

The Cost spreadsheets should indicate the total cost for each proposed network option for years one through four and total cost for renewal of the fifth and sixth year; and total cost for renewal of the seventh and eighth years.

### Spreadsheet Columns

| | |
|---|---|
| Service Address / Service | The location of the access circuit or a description of the service being proposed. |
| City, State, Zip | The city, state and zip of proposed access circuit or service proposed. |
| Exch | The telephone exchange for named service addresses. |
| Managed CPE Type | The proposed managed customer premise equipment (CPE). Each managed CPE type proposed must be identified in Appendix C – SLA Parameters. |
| Access Circuit Type | The proposed access circuit type. Each circuit access type proposed must be identified in Appendix C – SLA Parameters. |

| | |
|---|---|
| Bandwidth | The bandwidth proposed for the service address. Bandwidth for district offices must equal the minimum required for each option. |
| PVC CIR | If applicable, the Private Virtual Circuit Committed Information Rate must be included. If not applicable, indicate N/A. |
| Managed CPE One Time Cost | If applicable, all one time cost associated with the managed customer premise equipment (CPE). |
| Managed CPE MRC Cost | All monthly recurring charges (MRC) associated with the managed customer premise equipment (CPE). |
| Annual Managed CPE Cost (CPE MRC * 12) | Annual cost of the managed CPE equal to CPE MRC * 12. |
| Circuit One Time Cost | If applicable, all one time access circuit cost for the service address or service being provided. |
| Circuit MRC Cost | All monthly recurring charges (MRC) associated with the access circuit for the service address or service being provided. Include estimated Federal Fees MRC, WAN Port MRC, Local Loop MRC, and Management MRC as applicable. |
| Circuit Annual Cost (MRC * 12) | Annual circuit cost equal to Managed CPE Cost – MRC * 12 months. |
| 1st Year Total Cost (One Time + Annual Recurring) | A field for the first year total cost of service. Equals the sum of One Time Managed CPE Cost, Annual Managed CPE Cost, One Time Circuit Cost, and Annual Circuit Cost. |
| 2nd Year Total Cost (Not To Exceed) | A field for the second year total cost of service. |
| 3rd Year Total Cost (Not To Exceed) | A field for the third year total cost of service. |
| 4th Year Total Cost (Not To Exceed) | A field for the fourth year total cost of service. |
| 5th Year Total Cost | A field for the renewal of the fifth year total cost of service. |
| 6th Year Total Cost | A field for the renewal of the sixth year of total cost of service. |
| 7th Year Total Cost | A field for the renewal of the seventh year of total cost of service. |
| 8th Year Total Cost | A field for the renewal of the eighth year of total cost of service. |

# The Florida Legislature - ITN #851

## Optional Available Services

# Appendix C – SLA Parameters

List all Access Circuit Types, associated bandwidth; service level Availability; Latency; Jitter; and MTTR under each column as appropriate. Respondents failure to utilize the spreadsheet will result in rejection of response.

| Access Circuit Type | Bandwidth | Availability | Latency (one way) | Jitter (one way) | MTTR | Installation |
|---|---|---|---|---|---|---|
| | | | | | | |
| | | | | | | |
| | | | | | | |
| | | | | | | |
| | | | | | | |
| | | | | | | |
| | | | | | | |
| | | | | | | |
| | | | | | | |
| | | | | | | |
| | | | | | | |

List all Managed Customer Premise Equipment (CPE) Make, Model , Ports and associated SLA parameters under each column as appropriate.

| Managed CPE | Make | Model | Ports | MTTR | Installation | Configuration |
|---|---|---|---|---|---|---|
| | | | | | | |
| | | | | | | |
| | | | | | | |
| | | | | | | |
| | | | | | | |

# Appendix D – References

Please use the format below for submitting references as outlined in the ITN.

**Organization 1:** _____

Point of Contact: _____

Mailing Address: _____

Phone Number: _____

Email Address: _____

Number of Sites: _____

Type and Duration of Services: _____

Dates of Service: _____

Effectiveness of the Services Provided: _____

Description of Project: _____

_____

**Organization 2:** _____

Point of Contact: _____

Mailing Address: _____

Phone Number: _____

Email Address: _____

Number of Sites: _____

Type and Duration of Services: _____

Dates of Service: _____

Effectiveness of the Services Provided: _____

Description of Project: _____

_____

**Organization 3:** _____

Point of Contact: _____

Mailing Address: _____

Phone Number: _____

Email Address: _____

Number of Sites: _____

Type and Duration of Services: _____

Dates of Service: _____

Effectiveness of the Services Provided: _____

Description of Project: _____

_____

# Appendix E – Glossary

| | |
|---|---|
| Access Circuit | A circuit that connects Customer Premise Equipment to the Service Provider's MPLS VPN Core Network. |
| ACL | Access Control List |
| ADSL | Asynchronous Digital Subscriber Line |
| Alternate Access Circuits | Includes purpose of providing a hot backup capability intended to provide high Availability, approaching uninterrupted service. Alternate Access Circuits may differ in transport from the Backup circuits provided to a Service Address for the primary Access Circuits, and may enter the Customer Premises at a different location than the primary Access Circuit in order to reduce exposure to single points of failure, such as contractor backhoe accidents. |
| Alternate Data Center | A backup facility with limited capacity to temporarily replace systems and functions provided by the Data Center. This location is yet to be determined. |
| ATM | Asynchronous Transfer Mode |
| Availability | With respect to network services, the proportion of time that a Service is accessible and functioning within specified technical performance Service Standards. |
| Bandwidth | Maximum data transmission rate for a circuit, channel, or device. Can be expressed in bits per second (bps) or Bytes per second (Bps). |
| Best Value | The expected outcome of an acquisition that, in the Florida Legislature's estimation, provides for the greatest overall needs. This includes Availability, Bandwidth, and benefit in response to the requirement. |
| BGP | Border Gateway Protocol |
| Business Days | Shall mean any day other than Saturday, Sunday or a day that is a public and legal holiday. |
| Change Order | Change to a pending service order. |
| Chronic | Long-lasting and recurrent or characterized by long suffering. |
| CLLI Code | A CLLI (Common Language Location Identification) Code is an eleven character alphanumeric descriptor used to identify switches, points of interconnection, and other categories of telephony network elements and their locations. A CLLI code is more specific than a Service Address, and may pinpoint a particular corner of a building or wiring closet. |

| | |
|---|---|
| Continuous Improvement Process | An ongoing Industrial Engineering process organized to provide ongoing enhancements to Services delivered or to the processes for delivering those Services. Typical steps include measurement and data collection with respect to Services delivered by Service Provider or processes for delivering those Services, gathering of feedback from business process and activity owners, analysis of data and feedback, establishing benchmarks, team-based process improvement idea generation, incremental implementation of improvements, and setting of new goals. Does not include reengineering needs outside the scope of the Continuous Improvement Process. |
| Core Network | That portion of the Service Provider's network that extends from one Service Provider Edge Router to another. CPE (other than Label Edge Routers) and Access Circuits are outside the Core Network. |
| CoS | Class of Service |
| COTS | Commercial off-the-shelf |
| CPE | Customer Premise Equipment – typically an Edge Router, CSU/DSU, switch and/or uninterruptible power supply installed at a Service Address. |
| Customer Premises | A facility at a Service Address, typically an office or office building. |
| Cutover | Synchronized transfer of data, functions, or users to new facilities or equipment in order to ensure continuity and minimize disruption |
| Data Center | The Florida Legislature's data center is in the Claude Pepper Building Tallahassee. This is the primary terminus of data circuits, routers and firewalls which serve the Senate and joint committees. It is the location of OLITS Operations, which monitors all data circuits. The Data Center is also the primary location for the IBM mainframe, Wintel servers, as well as associated data storage and backup facilities, printing facilities. See also Alternate Data Center. The House of Representatives operates a separate facility in the Capitol Building Tallahassee which will be the terminus of all the House data circuits |
| demarc | The termination location of the data circuit entrance cable is called the "telephone" or "carrier", or "phone company, or LEC, or Service Provider demarc." The LEC/Service Provider has ownership and responsibility to this point by tariff regulations. |
| DLCI | Data Link Circuit Identifier. A label used in Frame Relay networks to identify frame relay circuits |
| DSCP | Differentiated Services Code Point |
| DSL | Digital Subscriber Line |
| Edge Router | A router located at the logical external edge of the Service Provider's Core Network, or located at the Service Address end of an Access Circuit that directly connects to the Core Network. |
| Extended Wiring | Extended wiring, is wiring installed for the specific interconnection of the Service Provider's data circuit from point of entry into a facility (typically a wiring closet) to an interior location inside the facility where the demac will be located. A number of methods can be used to extend a circuit within a customer's premise, however as a minimum an industry standard method using individual sheathed shielded twisted-pair (STP) wiring is acceptable. |

| | |
|---|---|
| | Support and Maintenance of Extended Wiring<br>The support and maintenance of any extended wiring is the Service Provider's responsibility. |
| FEC | Forwarding Equivalence Class. A class of IP packets that are forwarded in the same manner |
| Frame Merge | Label merging, when it is applied to operation over frame based media, so that the potential problem of cell interleave is not an issue. |
| IGP | Interior Gateway Protocol |
| ILM | Incoming Label Map |
| IP | Internet Protocol. A Layer 3 network protocol. |
| IPSec VPN | Internet Protocol Security Virtual Private Network |
| ISP | Internet Service Provider |
| ITN | Invitation to Negotiate |
| Label | A short fixed length physically contiguous identifier which is used to identify a FEC, usually of local significance. |
| Label Edge Router | An Edge Router managed by the Service Provider as CPE, used to label packets with CoS and other information prior to those packets entering the Service Provider's MPLS VPN Core Network. |
| Label Merging | The replacement of multiple incoming labels for a particular FEC with a single outgoing label |
| Label Swap | The basic forwarding operation consisting of looking up an incoming label to determine the outgoing label, encapsulation, port, and other data handling information. |
| Label Swapping | A forwarding paradigm allowing streamlined forwarding of data by using labels to identify classes of data packets which are treated indistinguishably when forwarding. |
| Label Switched Path | The path through one or more Lars at one level of the hierarchy followed by a packets in a particular FEC. |
| Label Switching Router | an MPLS VPN node which is capable of forwarding native L3 packets |
| Latency | Time delay experienced between transmission of a packet by the sender and receipt of the packet by the receiver. Can be separately measured across each portion of the path between sender and receiver. |
| Layer 2 | The protocol layer under layer 3 (which therefore offers the services used by layer 3). Forwarding, when done by the swapping of short fixed length labels, occurs at layer 2 regardless of whether the label being examined is an ATM VPI/VCI, a frame relay DLCI, or an MPLS VPN label. |
| Layer 3 | The protocol layer at which IP and its associated routing protocols operate link layer synonymous with layer 2. |
| LDP | Label Distribution Protocol |
| LSP | Label Switched Path |
| LSR | Label Switching Router |

| | |
|---|---|
| MACD | Move Add Change Delete. Refers to ordinary and emergency changes to provisioned services or equipment over the course of time as required by changing business requirements. |
| MDP | Maintenance Demarcation Point |
| MPLS VPN | Multi-Protocol Label Switching Virtual Private Networking |
| MPLS VPN Domain | A contiguous set of nodes which operate MPLS VPN routing and forwarding and which are also in one Routing or Administrative Domain |
| MPLS VPN Edge Node | An MPLS VPN node that connects an MPLS VPN domain with a node which is outside of the domain, either because it does not run MPLS VPN, and/or because it is in a different domain. Note that if an LSR has a neighboring host which is not running MPLS VPN, that that LSR is an MPLS VPN edge node. |
| MPLS VPN Egress Node | An MPLS VPN edge node in its role in handling traffic as it leaves an MPLS VPN domain |
| MPLS VPN Ingress Node | An MPLS VPN edge node in its role in handling traffic as it enters an MPLS VPN domain |
| MPLS VPN Label | A label which is carried in a packet header, and which represents the packet's FEC |
| MPLS VPN Node | A node which is running MPLS VPN. An MPLS VPN node will be aware of MPLS VPN control protocols, will operate one or more L3 routing protocols, and will be capable of forwarding packets based on labels. An MPLS VPN node may optionally be also capable of forwarding native L3 |
| MRC | Monthly Recurring Charge |
| MTTR | Mean Time to Repair |
| Named Subcontractor | Means any subcontractor that: (i) Vendor chooses to specifically identify by name within the body of the Vendor's Response and/or (ii) is named by Vendor pursuant to the requirement that Vendor specifically identify by name any subcontractor that will provide ten percent (10%) or more of the services requested within this ITN. |
| NAT | Network Address Translation |
| NOC | Network Operation Center |
| OLITS | Office of Legislative Information Technology Services |
| Outage | For MPLS VPN, Access Circuits, and other circuits, partial or complete loss of connectivity, or connectivity with degraded performance that falls below applicable Service Standards listed in the Service Level Agreement. Failure of a Service Provider managed router at a customer site could cause a network outage. For Services other than MPLS VPN, Access Circuits, or other circuits, an outage is a complete or partial loss of a feature or functionality, or degraded functionality that does not meet applicable Service Standards listed in the Service Level Agreement. |
| Outage Start | The commencement of an Outage, as reported by OLITS or the Service Provider. |
| Packet Delivery | Packet Delivery is the proportion of packets transmitted from a sender that are received by the intended receiver. |
| PE | Provider Edge |
| Physical Access | Access From Providers MPLS VPN POP to the service address premise. |

| | |
|---|---|
| PSTN | Public Switched Telephone Network |
| PVC | Private Virtual Circuit |
| QoS | Quality of Service |
| Respondent | Means the single organization or Response Team that has submitted a Response to this ITN |
| RFC | Request for Comment, referring to Internet Engineering Task Force (IETF) documents |
| RT | Round Trip |
| RT | Restoration Time |
| SAP (Service Access Point) | Service Access Point |
| SAP-CE | Service Access Point at Customer Edge Device |
| SAP-PE | Service Access Point at Provider Edge Device |
| Scheduled Maintenance | Maintenance that is announced, and for which OLITS receives notification, at least 72 hours in advance |
| Service | Network, telecommunications, and multimedia capabilities and supporting management processes delivered to OLITS by the Service Provider. |
| Service Address | Street address of an office where network service is provided. Location of CPE at a Service Address may be further specified with a CLLI Code. Usually a District Office or Satellite Office. |
| Service Credit | Compensation provided by the Service Provider to the Florida Legislature in accordance with terms of the SLA that provide a partial remedy for Service Level Performance that does not meet Service Standards. |
| Service Level | The actual Availability, responsiveness, technical performance, timeliness, or quality of a service delivered. |
| Service Level Compliance | Service Level Performance that meets or exceeds Service Standards. |
| Service Level Guarantee | Agreement to meet or exceed a Service Standard |
| Service Level Measurement | The process of collecting data that reflects or indicates the actual Availability, responsiveness, technical performance, timeliness, or quality of service delivery. |
| Service Level Performance | The extent to which Service Levels achieved meet or exceed Service Standards. |
| Service Provider | Vendor providing MPLS VPN services as described in this ITN. |
| Service Review | A periodic and regularly scheduled technical meeting between the Service Provider and the Florida Legislature staff and others established to review deployment and upgrade progress, resolve technical issues, update schedules, and to consider updated business requirements. |
| Service Standard | A statement or statements that describe a common understanding between the Service Provider and the Legislature as to the specific Availability, responsiveness, technical performance, timeliness, or quality of a service to be delivered by the Service Provider. |
| Services Manager | The primary vendor or OLITS person responsible for management of delivery of MPLS VPN and related services. |
| SIP | Session Initiation Protocol |
| SLA | Service Level Agreement |

| | |
|---|---|
| SLA Review | A periodic and regularly scheduled technical meeting between the Service Provider and the Florida Legislature staff to review service levels. |
| SOHO | Small Office / Home Office |
| SVC (Switched Virtual Circuit) | A virtual circuit connection established across a network on an as-needed basis and lasting only for the duration of the transfer. |
| SVP (Switched Virtual Path) | Grouping of SVCs to define a path |
| Switched path | Synonymous with label switched path. |
| Termination Notice | Shall mean a written notice to Contractor specifying a termination date for all or a portion of the Services. |
| Trouble Ticket | Problem report with information about an Outage Start or ongoing Outage problems, status, and resolution. |
| TTL | Time to Live |
| VC Merge | Label merging where the MPLS VPN label is carried in the ATM VCI field (or combined VPI/VCI field), so as to allow multiple VCs to merge into one single VC |
| VCI | Virtual Circuit Identifier |
| VDSL | Very High Speed Digital Subscriber Line |
| Video Conference | Use of IP Multicast for video conferencing, including both live and on-demand video services |
| Virtual Circuit | A circuit used by a connection-oriented layer 2 technology such as ATM or Frame Relay, requiring the maintenance of state information in layer 2 switches. |
| VoIP | Voice over Internet Protocol |
| VP | Virtual Path |
| VP Merge | Label merging where the MPLS VPN label is carried din the ATM VPI field, so as to allow multiple VPs to be merged into one single VP. In this case two cells would have the same VCI value only if they originated from the same node. This allows cells from different sources to be distinguished via the VCI. |
| VPA | Voluntary Procuring Agency |
| VPI | Virtual Path Identifier |
| VPI/VCI | A label used in ATM networks to identify circuits |
| VPN | Virtual Private Network |

# Appendix F – Respondent's Mandatory Response Checklist

| ITN Section | Requirement Level | Description | Check |
|---|---|---|---|
| 3.2.1.1 | Mandatory | MPLS Routing | |
| 3.2.2.1 | Mandatory | Statewide connectivity | |
| 3.2.4.1 | Mandatory | QoS Functionality: | |
| 3.2.5.1 | Mandatory | CoS Functionality: | |
| 3.2.5.2 | Mandatory | Forwarding Equivalence Classes (FEC) | |
| 3.2.8.1 | Mandatory | Fault-Tolerance | |
| 3.2.8.2 | Mandatory | Traffic Rerouting | |
| 3.2.9.1 | Mandatory | Signaling Protocols | |
| 3.2.10.1 | Mandatory | CODECs | |
| 3.2.10.2 | Mandatory | Voice over IP | |
| 3.2.10.3 | Mandatory | Least-cost Routing | |
| 3.2.10.4 | Mandatory | QoS and DiffServ Signaling | |
| 3.2.10.5 | Mandatory | VoIP Phone Failover to PSTN | |
| 3.2.11.1 | Mandatory | Access Circuit Services | |
| 3.2.11.2 | Mandatory | Access Circuits | |
| 3.2.11.3 | Mandatory | Availability | |
| 3.2.11.4 | Mandatory | Bandwidth | |
| 3.2.13.1 | Mandatory | Internet Access (Internal User Access) | |
| 3.2.13.2 | Mandatory | Alternate Internet Access | |
| 3.2.14.1 | Mandatory | Security Threats | |
| 3.2.14.2 | Mandatory | Security Threats CPE | |
| 3.3.2 | Mandatory | Ongoing Technology Refresh | |
| 3.3.2.1 | Mandatory | Technology Refresh | |
| 3.3.2.2 | Mandatory | Security Technology Refresh | |
| 3.3.2.3 | Mandatory | Competitive Market Refresh | |

| ITN Section | Requirement Level | Description | Check |
|---|---|---|---|
| 3.3.6 | Mandatory | Maintenance for Respondent-Managed CPE | |
| 3.3.7.1 | Mandatory | Configuration Management | |
| 3.3.7.2 | Mandatory | Configuration Records | |
| 3.3.7.3 | Mandatory | Archiving Configuration Information | |
| 3.3.7.4 | Mandatory | Security Configuration Management | |
| 3.3.7.5 | Mandatory | Rapid Modifications to Configurations | |
| 3.3.8.2 | Mandatory | Alarm and Alert Monitoring System or Application | |
| 3.3.8.5 | Mandatory | Access to Alarm and Alert System or Application | |
| 3.3.8.6 | Mandatory | Identification Options within Alarm and Alert System | |
| 3.3.8.7 | Mandatory | Alarm and Alert System or Application Training | |
| 3.3.10.1 | Mandatory | Trouble Ticketing System | |
| 3.3.10.2 | Mandatory | Advanced Outage Notification | |
| 3.3.10.5 | Mandatory | Trouble Ticketing System Training | |
| 3.3.10.9 | Mandatory | Intrusive Testing | |
| 3.3.10.10 | Mandatory | Trouble Ticketing System Reports | |
| 3.3.10.12 | Mandatory | Escalation | |
| 3.4.1.1 | Mandatory | SLA | |

## NON-COLLUSION STATEMENT

I certify that this response is made without prior understanding, agreement, or connection with any corporation, firm or person submitting a response for the same materials, supplies, or equipment, and is in all respects fair and without collusion or fraud. I agree to abide by all conditions of this Response and certify that I am authorized to sign this response for the Respondent and that the Respondent is in compliance with all requirements of the Invitation to Negotiate (ITN) including, but not limited to, certification requirements. In submitting a response to an agency of the State of Florida, the respondent offers and agrees that, upon the respondent's acceptance, the Respondent is deemed to have sold, assigned, and transferred to the State of Florida all rights, title, and interest in and to all causes of action it may now or hereafter acquire under the Antitrust laws of the United States and the State of Florida relating to the particular commodities or services purchased or acquired by the State of Florida or political subdivision thereof.

**COMPANY NAME** _____

# Appendix I

# WARRANTIES

The successful Respondent represents that it is professionally qualified and possesses the requisite skills, knowledge, qualifications and experience to provide the required services specified. The following are warranty certification requirements which must be certified in writing (Appendix I) in the Administrative Documents Required (Section 4). If the Respondent cannot so certify to any of the following, the Respondent must submit with its Response a written explanation of why it cannot do so within the Administrative Documents Required.

**1.11.1** The Respondent or any other organization associated with the ITN is not currently under suspension or debarment by the State or any other governmental authority.

**1.11.2** To the best knowledge of the person signing the Response, the Respondent, its affiliates, subsidiaries, directors, officers, employees of any other organization associated with this ITN are not currently under investigation by any governmental authority and have not in the last ten years been convicted or found liable for any act prohibited by law in any jurisdiction involving conspiracy or collusion with respect to bidding on any public contract.

**1.11.3** To the best knowledge of the person signing the Response, the Respondent, its affiliates, subsidiaries, directors, officers or any other organization associated with this ITN have no delinquent obligations to the State, including a claim by the State for liquidated damages under any other contract.

**1.11.4** To the best knowledge of the person signing the Response, the Respondent, its affiliates, subsidiaries, directors, officers or any other organization associated with this ITN have not within the preceding three years been convicted of or had a civil judgment rendered against them or is presently under indictment for or otherwise criminally or civilly charged for commission of fraud or a criminal offense in connection with obtaining, attempting to obtain or performing a federal, state, or local government transaction or public contract; violation of federal or state antitrust statutes; or commission of embezzlement, theft, forgery, bribery, falsification or destruction of records, making false statements, or receiving stolen property.

**1.11.5** To the best knowledge of the person signing the Response, the Respondent, its affiliates, subsidiaries, directors, officers or any other organization associated with this ITN have not within a three-year period preceding this certification had one or more federal, state, or local government public transactions terminated for cause or default.

# The Florida Legislature
# Appendix J
# Policies and Procedure

## 2.151 Invoice Processing Time Limits

(1) A voucher authorizing payment of an invoice submitted to a unit of the Legislature shall be filed with the Chief Financial Officer not later than 20 days after receipt of the invoice and receipt, inspection, and approval of the goods or services, except that, in the case of a bona fide dispute, the voucher shall contain a statement of the dispute and authorize payment only in the amount not disputed. Approval and inspection of goods or services shall take no longer than five working days unless the bid specifications, purchase order, or contract specifies otherwise. If a voucher filed within the 20-day period is returned by the Chief Financial Officer because of an error, it shall nevertheless be deemed timely filed. For the purposes of determining the receipt of invoice date, the Legislature is deemed to receive an invoice on the date on which a proper invoice is first received in the Finance & Accounting Office. The Legislature is deemed to receive an invoice on the date the invoice was postmarked if the Finance & Accounting Office failed to annotate the invoice with the date of receipt at the time it actually received the invoice.

(2)

(a) The Finance & Accounting Office shall keep a record of the date of receipt of the invoice; dates of receipt, inspection, and approval of the goods or services; date of filing of the voucher; and date of issuance of the warrant in payment thereof.

(b) If a warrant in payment of an invoice is not issued within 40 days after receipt of the invoice and receipt, inspection, and approval of the goods and services, the Legislature shall pay to the vendor, in addition to the amount of the invoice, interest at a rate established pursuant to Section 55.03(1), *Florida Statutes,* on the unpaid balance from the expiration of such 40-day period until such time as the warrant is issued to the vendor. Such interest shall be added to the invoice at the time of submission to the Chief Financial Officer for payment whenever possible. If addition of the interest penalty is not possible, the Legislature shall pay the interest penalty payment within 15 days after issuing the warrant. The provisions of this paragraph apply only to undisputed amounts for which payment has been authorized. In the case of an error on the part of the vendor, the 40-day period shall begin to run upon receipt by the Finance & Accounting Office of a corrected invoice or other remedy of the error.

(c) The Legislature may make partial payments to a contractor upon partial delivery of goods or services or upon partial completion of construction when a request for such partial payment is made by the contractor and approved by the legislative unit. Provisions of this section shall apply to partial payments in the same manner as they apply to full payments.

(d) The Finance & Accounting Office shall be responsible for initiating the penalty payments required by this subsection, and the Legislature shall use this policy as authority to make such payments.

(3) Travel and other reimbursements to state officers and employees shall be the same as payments to vendors pursuant to this section.

(4) Vendors, state officers, or employees may assert their right to an interest penalty through an application made to the Office of Legislative Services. In the event their application is disputed by the purchasing legislative unit, the dispute shall be resolved by the presiding officers.

**Amendment #1 to the Contract No SE15D**
**for**
**Network Services between**
**the Florida Senate**
**and EarthLink Business**

2016 JAN 19 P12:08

This Amendment #1, made and entered into this ____ day of January, 2016, by and between the Florida Senate (Senate), and EarthLink Business LLC (EarthLink), a foreign limited liability company registered to do business in Florida with a primary address of 7037 Old Madison Pike, Huntsville, Alabama, for Network Services.

**RECITALS:**

WHEREAS, on or about January 12, 2012, Senate pursuant to ITN #851, entered into a Contract for Network Services (Contract) for Internet access services for Legislature's Wide Area Networks and Internet services including upgrades and improvements for Wide Area Network, 40 Senate Locations, 10 Senate satellite offices, 1 Tallahassee remote office, and 2 Tallahassee circuits with Senate district office configurations; and

WHEREAS, the Parties have modified the locations by practice throughout the original Contract Term; and

WHEREAS, the Parties desire to provide continued managed communication services, Internet access, and public Internet presence for same;

NOW THEREFORE, for valuable and good consideration, the Parties agree to amend the Contract as follows:

**TERM OF CONTRACT**

The parties agree to a renewal of the Contract for one renewal term of two (2) years as allowed in the Contract.

All other terms and conditions of the Contract shall remain in full force and effect.

The Florida Senate:

Andy Gardiner, President
