<p>Proviso after Best Management Practices</p> <p>Of the funds in Specific Appropriations 1389, \$500,000 from the General Inspection Trust Fund is provided for the Florida Water Quality Compliance and Improvement Best Management Practices project to adapt real-time radio frequency soil-sensor-based systems from a limited research setting to deployment in agricultural fields to assess their effectiveness in irrigation decision-making, reduction in water use, and minimizing nutrient loss of nitrogen and phosphorus due to leaching and runoff. This</p> <p>4 project will include installing remote sensor systems in different field locations, calibrating the sensors to the fields, evaluating soil samples along a depth profile to determine moisture, nitrogen, and phosphorus content, and calculating daily water and nutrient uptake from different soil regions. The field data will be concentration model for target crops that can be extended to the watershed level. Use of this model will augment weather, hydrologic, and water quality information for the development of improved agricultural best management practices for nutrient management and optimum irrigation scheduling for reduction of nutrient runoff and leaching.</p>	House
